The procedural change proposed should afford all States an adequate opportunity to demonstrate to the Department that the numbers submitted on compliance do not tell the entire picture, and to show any other relevant facts that a State wishes the Department to consider. The procedure should be adequate to permit the Department to gather information to determine whether a State is in compliance, what the sanction should be and whether any sanction should be deferred.

Commenters are free to suggest alternatives and address why a particular option should not be adopted. If a commenter wishes to suggest an alternative, a specific proposal should also be included and explained. Comments are also requested on whether a separate provision specifically authorizing the Administrators at their option to utilize administrative law judges to determine questions of fact is desirable.

Other Changes

The changes discussed below reflect the Department's current interpretation and application of the statute and regulation. Therefore, they are included in this document for notice purposes, and comments, while helpful, are not requested.

Section 659.19 Effect of Failure to Certify or To Meet Compliance Standards

Much of this section now implements the earlier statutory scheme which included a phased-in compliance process. The 1981 amendment to 23 U.S.C. 154 (§ 1106(a) of Pub. L. 97–35, 95 stat. 626) replaced the phased-in compliance requirement (which set different standards for each succeeding year) with a straightforward compliance standard of 50 percent. Thus, States now must demonstrate that the percentage of motor vehicles exceeding 55 MPH on roads posted at that speed is not greater than 50 percent. The proposed regulation would conform this section to reflect the statutory amendment. In addition, the withheld funds provision would be revised and a reserved funds provision would be added.

Withheld Funds: The crurrent regulation states: first, that funds withheld shall be apportioned if a State demonstrates that the percentage of motor vehicles exceeding 55 MPH has dropped to the "level specified for the fiscal year" in which funds were withheld; and second, that funds withheld shall be released if the State comes into compliance based on the following year's monitoring results.

The first provision is generally consistent with the current law. However, the "level specified for the fiscal year" language is based on the Federal-Aid Highway amendments of 1974 (Pub. L. 93–643) and section 205 of the Surface Transportation Assistance Act of 1978 (Pub. L. 95–599), and thus, refers to the former phased-in compliance process. The Department, therefore, will amend this language to state that the level specified constitutes the 50 percent threshold established in the 1981 amendment to 23 U.S.C. 154 for roads posted at 55 MPH.

The second provision provides that a State whose funds are withheld because it is found in noncompliance in one year, could reacquire the use of the funds if it comes into compliance based on one full year's monitoring results.

The applicable statutory provision, which the regulation intended to implement, provides that the Secretary must—

> promptly apportion to a State any funds which have been withheld pursuant to subsection (f) * * * if he [she] determines that the percentage of motor vehicles in such State exceeding fifty-five miles per hour has dropped to the level specified for the fiscal year for which the funds were withheld.

23 U.S.C. 154(h).

Consistent with an interpretation of this provision issued by the Department, a copy of which is available in the docket, the Department will make clearer that funds withheld for a fiscal year will be reinstated if the State comes into compliance within three fiscal years following the year in which the funds were withheld. This clarification ensures that withheld funds are subject to the same limitations that are applicable to other apportioned funds. Thus, funds withheld will continue to be available for expenditure "for a period of three years after the close of the fiscal year for which such sums are authorized and any amounts so apportioned remaining unexpended at the end of such period lapse." 23 U.S.C. 118(b). A full fiscal year of speed monitoring data will be required to determine if withheld funds should be reinstated.

Reservation of Funds: In the event that a final decision in a particular case has not been made before October 1, the beginning of a fiscal year, or before the date funds are apportioned, States subject to such proceedings are notified that the Department will apportion Federal-aid funds for that State, but reserve from obligation 10 percent of the primary, secondary and urban funds. This process, used in FY 86 for the three ongoing cases concerning FY 84, and in FY 87 for possible cases in FY 85, preserves the Department's ability to impose sanctions if they are deemed appropriate.

Speedometer Variability

Section 205 of the Surface Transportation Assistance Act of 1978 (STTA), Pub. L. 95–599, Stat. 2689, amended 23 U.S.C. 154 by establishing maximum allowable 55 MPH noncompliance levels, against which each State's 55 MPH enforcement effort would be judged. This amendment changed State collection of vehicular speed data and required each State to report annually a figure representing statewide driver noncompliance with the 55 MPH speed limit. The STAA also required that, in developing the criteria to measure States' speed limit enforcement effort, the Secretary include "* * * criteria which takes into account the variability of speedometer readings * * *".

When a final rule implementing the STAA was published (45 FR 64486) September 29, 1980, speedometer variability was acknowledged, but no specific procedures were put in regulatory form. Discussion of speedometer variability was confined to the rule's supplementary information section. That narrative indicated that methodologies available to implement the concept would be published and distributed at a later date. Until now, however, further information on this topic has not appeared in the **Federal Register**.

Instead, the speedometer variability adjustment process has been handled via memorandum from FHWA Headquarters to the FHWA field offices, with the appropriate information then passed on to the States. The first memorandum was sent in December, 1980 and similar information has been provided, through the same channel, each year since. This line of communication has proven to be quite adequate. The States have received each year's memorandum far enough in advance to incorporate the information in the preparation of the annual certification of speed limit enforcement required by 23 U.S.C. 141.

Incorporation of the speedometer variability adjustment procedures into 23 CFR Part 659 at this time is not needed in response to any controversy, and no changes are being made.

Use of the adjustment process always has been, and remains, voluntary on the part of a State. However, without at least partial application, few States would be able to demonstrate compliance with the 50 percent maximum allowable 55 mph noncompliance level spelled out in 23 U.S.C. 154. To illustrate the importance of the ajustment process the following table lists, by year since FY 1982, the number of States that would have certified more than 50 percent exceeding 55 mph if the adjustment procedures were not available.

Fiscal year:	*Number of States*
1982	30
1983	39
1984	39
1985	44
1986	44

The alternate adjustment procedures incorporated are the same two procedures that have been made available to the States for use in preparing the annual enforcement certification each year since 1982.

Miscellaneous

Because of the passage of the Federal-Aid Highway Act of 1987 (Pub. L. 100–17) and specifically section 174 which amended 23 U.S.C. 154 by giving the States authority to increase, without loss of Federal-Aid funds, the maximum speed limits to 65 MPH on Interstate highways located outside of an urbanized area of 50,000 or more, certain technical changes are necessary. These too, therefore, have been included in this notice. In addition, other technical amendments were adopted and published in the **Federal Register** on August 3, 1987 (52 FR 28691).

Regulatory Evaluation/Flexibility Act

The Department has determined that this rule is not a major rule under Executive Order 12291. However, because of the public's interest in the 55/65 MPH speed limit, it is considered a significant regulation under the Department's regulatory policies and procedures. A regulatory evaluation has not been prepared because the changes to the current regulation proposed in this document are procedural in nature or are merely technical to reflect statutory changes. In accordance with Section 553(b) of the Administrative Procedure Act, comments are not requested with respect to the latter changes.

Since this rule prescribes procedural requirements for implementation of the statute, and since any economic impact will result from the operation of the statute and not this rule, under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities.

In consideration of the foregoing, the FHWA proposes to amend Chapter I of Title 23, Code of Federal Regulations as set forth below:

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

List of Subjects in 23 CFR Part 659

Grant programs—transportation, Highways and roads, Motor vehicles, Reporting and recordkeeping requirements, Speed limit, Traffic regulations.

Issued on March 2, 1988.

Robert E. Farris,

Deputy Administrator, Federal Highway Administration.

Diane Steed,

Administrator, National Highway Traffic Safety Administration.

The FHWA and the NHTSA propose to amend 23 CFR Part 659 as follows:

PART 659—CERTIFICATION OF SPEED LIMIT ENFORCEMENT

1. The authority citation for 23 CFR Part 659 is revised as follows:

Authority: 23 U.S.C. §§ 118, 141, 154, and 315, 49 CFR 1.48(b) and 1.50.

§ 659.7 [Amended]

2. Section 659.7 is amended by revising paragraph (a) to read as follows:

§ 659.7 Adoption of a national maximum speed limit.

* * * * *

(a) The maximum speed limit on any highway in the State, except for a highway on the Interstate System located outside of an area of 50,000 population or more, shall be 55 MPH or less. The maximum speed limit on a highway on the Interstate System located outside of an urbanized area of 50,000 population or more shall be 65 MPH or less. Emergency and police motor vehicles may be authorized to operate at higher speeds when necessary to protect the public health or safety.

* * * * *

§ 659.9 [Amended]

3. In § 659.9, paragraphs (b)(5)(ii), (b)(7)(i), and (c)(2) are revised to read as follows:

§ 659.9 Formulation of a plan for monitoring speeds.

* * * * *

(b) * * *

(5) * * *

(ii) A 24-hour monitoring period shall be minimum duration of any individual sampling session.

* * * * *

(b) * * *

(7) * * *

(i) Schedule—a detailed schedule shall take into account day of the week and calendar quarter of the year.

* * * * *

(c) * * *

* * * * *

(2) Adjustments to the number of sampling locations in a state.

§ 659.13 [Amended]

* * * * *

4. Section 659.13 is revised to read as follows:

§ 659.13 Certification requirement.

Each State shall certify to the Secretary of Transportation before January 1 of each year that it is enforcing the National Maximum Speed Limit on all public highways in accordance with 23 U.S.C. 154. The certification shall be supported by information on activities and results achieved during the 12-month period ending on September 30 preceding the January 1 date by which certification is required.

§ 659.15 [Amended]

5. In § 659.15 the introductory text, paragraph (a), and paragraph (d) are revised to read as follows:

§ 659.15 Certification content.

The certification shall consist of the following elements:

(a)(1) A statement by the Governor of the State, or an official designated by the Governor, that the National Maximum Speed Limit on public highways in the State is being enforced. The certifying statement shall be worded as follows:

I, (name of certifying official), (position title), of the (State or Commonwealth) of ———, do hereby certify that the (State or Commonwealth) of ———, is enforcing the National Maximum Speed Limit.

(2) If this statement is made by an official other than the Governor, a copy of the document designating the official, signed by the Governor, shall also be included in the certification made under this part.

* * * * *

(d) The statewide percentage of vehicles exceed the 55 MPH speed limit as derived from the speed sampling plan discussed in § 659.9, and adjusted to take into account variability of speedometer readings. The allowable adjustment to account for variability of speedometer readings shall be calculated using either of the two following procedures.

(1) This procedure includes separate adjustments for each of three potential error sources. First, Speedometer Variability.

Let:

A = the percent exceeding 55 MPH derived from the speed sampling plan for § 659.9.

B = the present exceeding 60 MPH from the speed sampling plan.

C = (A-B)

D = .7(C) + B

Second Statistical Error.

Let:

E = the percent exceed 55 MPH adjusted for the first and second part of speedometer variability.

$({}^{t}.95^{n})$ and $s({}^{p}{}_{st})$ are as defined in the SMPPM.

$E = D - ({}^{t}{}_{.95,n})\, s(Pst)$

Third, Speed Monitoring Equipment Error.

Let:

F = a correction for speed measuring equipment error. Derivation and use of an equipment error correction is subject to approval by the FHWA.

G = the percent exceeding 55 MPH, fully adjusted to account for variability of speedometer readings.

G = E–F

(2) This procedure is intended to account for all three error sources discussed in (d)(1) with a single adjustment. A, B and G are as defined in (d)(1).

$$G = \frac{A+B}{2}$$

§ 659.17 [Amended]

6. In § 659.17, paragraph (c) is revised to read as follows:

§ 659.17 Certification and statistical submittal.

* * * * *

(c) As described in § 659.15(d), the statewide percentage of vehicles exceeding 55 MPH is the only direct result of the speed monitoring program that is required for inclusion in the annual certification. However, additional summary statistics from the speed monitoring program are necessary to provide a complete review. A report of the average speed, median speed, 85th percentile speed, and percent of vehicles exceeding 55, 60, and 65 miles per hour shall be submitted by each State to the FHWA Division Administrator on a quarterly basis for the 3-month periods ending December 31, March 31, June 30, and September 30 of each year. The submittal for the July-September quarter shall, in addition to the quarterly report, include a summary report of the entire year's speed monitoring data starting from the previous October 1.

§ 659.19 [Amended]

7. Section 659.19 is amended by revising paragraphs (a), (b), and (d), and adding paragraph (e), to read as follows:

§ 659.19 Effect of failure to certify, enforce or to meet the compliance standards.

(a) If a State fails to certify as required by § 659.13, or if the Secretary determines that a State is not adequately enforcing the National Maximum Speed Limit on all public highways notwithstanding the certification, no Federal-aid highway project shall be approved under 23 U.S.C. 106 in that State.

(b) Notwithstanding the proper submission of a certification, or information supporting the enforcement activities of any State, if a certification shows a percentage of motorists exceeding 55 MPH greater than 50 percent on roads posted at 55 MPH, funds apportioned under 23 U.S.C. 104(b)(1), 104(b)(2), and 104(b)(6) shall be reduced an aggregate amount of up to 10 percent, and reserved from obligation as provided in subsection (e), for the fiscal year subsequent to the fiscal year in which the certification is submitted.

* * * * *

(d) Funds withheld pursuant to this Part shall be apportioned to a State, subject to availability of such funds under 23 U.S.C. 118(b), upon a determination that the pecentage of motor vehicles exceeding 55 MPH in such State has dropped to 50 percent or lower on roads posted at 55 MPH. One fiscal year's speed monitoring results will be required to make such a determination.

(e) If a final decision for a State subject to §§ 659.19 and 659.21 has not been made before the beginning of the fiscal year in which funds would otherwise be withheld, the Secretary may apportion 100 percent of the funds for the fiscal year. However, up to ten percent of the apportioned funds under 23 U.S.C. 104(b)(1), 104(b)(2) and 104(b)(6) may be reserved from obligation, pending a final decision.

§ 659.21 [Amended]

8. Section 659.21 is revised to read as follows:

§ 659.21 Procedures for the reduction of funds.

(a) *Noncompliance Finding.* (1) In the event that information concerning the enforcement by any State shows that a percentage of motorists exceeding 55 MPH is greater than 50 percent, the Administrators of the FHWA and NHTSA shall make, in writing, a proposed determination of noncompliance, and shall notify the Governor of the State of the proposed determination by certified mail. The notice shall state the reasons for the proposed determination.

(2) If the reason for the proposed determination is the failure to meet the compliance standards set forth in § 659.19, the State may within 30 days from the date of receipt of the letter request an informal hearing before the Department to show cause why it should not be found in compliance. If the state does not request an informal hearing, it may submit any pertinent written documents, including any relating to matters specified in § 659.21(a)(3), for consideration by the Department. Such written documents also may be submitted prior to, or at, the informal hearing, if one is requested.

(3) The State may offer any information which it considers helpful to the resolution of the matter, and the scope of review will include but is not limited to, legislative actions, budgetary considerations, judicial actions, and proposals for specific program actions which will be implemented to bring the State into compliance.

(4) If a State wishes to claim a hardship deferral and/or address the potential amount of withholding of funds in the event of a determination of noncompliance, information concerning these matters shall be conveyed to the Department.

(5) If the Department concludes that the State is in noncompliance, a final decision shall be issued. If a State makes a claim under (a)(4), the final decision will address these issues. The decision will be served on the Governor and/or his or her designee.

(b) Compliance finding. If, on the basis of (a)(3), the Department concludes that the State is in

BEST COPY AVAILABLE

compliance, a final decision shall be issued. The decision will be served on the Governor and/or his or her designee.

[FR Doc. 88–5275 Filed 3–10–88; 8:45 am]

BILLING CODE 4810-22-M

DEPARTMENT OF THE TREASURY

31 CFR Part 103

Proposed Amendment to Bank Secrecy Act Regulations Providing for Notice to Customers of Anti-Structuring Provision by Financial Institutions

AGENCY: Departmental Officers, Treasury.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Treasury is considering issuing a Notice of proposed Rulemaking under the Bank Secrecy Act by which Treasury would require financial institutions subject to the Bank Secrecy Act to give notice to customers of the prohibition on structuring transactions for the purpose of evading the currency reporting requirements of 31 U.S.C. 5313. This prohibition is contained in 31 U.S.C. 5324. Treasury is issuing this Advance Notice to solicit the views of the affected financial institutions and other interested parties on how most effectively and efficiently to give such notice.

DATES: Comments must be received no later than April 11, 1988.

ADDRESS: Office of Financial Enforcement, Department of the Treasury, Room 4320, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Amy G. Rudnick, Director, Office of Financial Enforcement, at the address listed above, or at (202) 566–8022.

SUPPLEMENTARY INFORMATION: The Bank Secrecy Act, Pub. L. No. 91–508 (codified at 12 U.S.C. 1829(b), 12 U.S.C. 1951 *et seq.*, and 31 U.S.C. 5311–5324), authorizes the Secretary of the Treasury to require financial institutions to keep records and file reports that the Secretary determines have a high degree of usefulness in criminal, tax, and regulatory matters. Pursuant to 31 U.S.C. 5313 and the regulations thereunder, financial institutions subject to the Bank Secrecy Act are required to file Currency Transaction Reports (CTRs) with Treasury on transactions in currency in excess of $10,000 "by, through or to such financial institutions." 31 CFR 103.22.

As part of the Money Laundering Control Act of 1986, Subtitle H of the Anti-Drug Abuse Act of 1986, Pub. L. 99-570 (Oct. 27, 1986), Congress enacted 31 U.S.C. 5324, the so-called anti-structuring provision of the Bank Secrecy Act. Section 5324 prohibits any person from structuring transactions "for the purpose of evading" the Currency Transaction Report requirement. It also prohibits a person, for the same purpose, from causing a financial institution 1) not to file a Currency Transaction Report or 2) to file a report that contains a material omission or misstatement of fact. The "anti-structuring" requirement was aimed at drug and other money launderers who routinely conduct transactions under the $10,000 reporting threshold of section 103.22 in order to have their currency transactions go undetected by Federal law enforcement authorities. *See* H.R. Rep. No. 746, 99th Cong., 2d Sess. 18–20 (1986); Sen. Rep. No. 433, 99th Cong., 2d Sess. 21–22 (1986).

In order to prosecute a person (or to assess a civil penalty against a person) for structuring to evade the currency reporting requirement or causing a financial institution not to file a Currency Transaction Report, the Government must be able to establish that the person had knowledge of the reporting requirement and specific intent to commit the crime. In addition, some defendants recently have asserted, although Treasury does not agree, that in order to sustain a prosecution of section 5324, the government must be able to establish not only that the person knew that the financial institution at which he is structuring transactions had a reporting obligation, but that the person had knowledge that structuring transactions to avoid reporting by the financial institution was prohibited by law. This problem of establishing knowledge is presenting difficulties for investigators and prosecutors and is threatening to undermine Treasury's ability to assure compliance with section 5324.

Therefore, in order to assure compliance with Section 5324, Treasury is considering is considering requiring financial institutions subject to the Bank Secrecy Act to establish procedures to notify customers of the provisions to Section 5324, especially customers conducting currency transactions. Treasury would require such procedures pursuant to Treasury's authority in 31 U.S.C. 5318(a)(2) "to require a class of domestic financial institutions to maintain appropriate" procedures to ensure compliance with this subchapter and regulation prescribed under this subchapter." If prosecutions cannot be brought successfully under Section 5324, Treasury clearly will be unable to assure compliance with this provision.

Treasury is issuing this Advanced Notice of Proposed Rulemaking to solicit the views of the affected financial institutions, law enforcement agencies and other interested parties on how best to formulate procedures for communicating the provisions of Section 5324 to customers at the least expense and with the least operational burden to the financial institutions.

Treasury seeks views on the following proposals under consideration. We also welcome other suggestions on how best to give notice of Section 5324 to customers. The proposals are not meant to be considered as alternatives to each other, but may be proposed in conjunction with one another. Comments should be made on each individual proposal and also should address special concerns should any of the proposals be issued together:

1. Require that a short notice prescribed by Treasury of the provisions of Section 5324 be posted conspicuously at every location where customers may conduct cash transactions, *e.g.*, bank teller's windows, casino gaming tables and cages.

2. Require that a short Treasury form notice of the provisions of section 5324 be handed to any person conducting currency transactions over a specified amount, *e.g.*, $1000 or $3000. Currency transactions would include deposits to accounts and purchases of monetary instruments such as cashier's checks, official bank checks, money orders or traveller's checks.

3. Require that all deposit tickets be imprinted with a short notice prescribed by Treasury of the provisions of Section 5324 and that a person making a currency deposit over a certain amount, *i.e.*, $1000 or $3000, sign the back of the deposit slip in acknowledgment of reading such notice.

4. Require that a short Treasury form notice of the provisions of Section 5324 be sent to all customers by a certain date and to all new customers upon the opening of an account. This requirement would apply to customers with "transactional accounts" as defined in 31 CFR 103.11(n).

5. Require that a short Treasury form notice of the provisions of Section 5324 be included periodically, *e.g.*, quarterly, in all customers' monthly statements of accounts, and upon opening a new account. This requirement would apply to statements of "transactional accounts," as defined in 31 CFR 103.11(n).

In the event that financial institutions receive inquiries from customers as the

result of any of the above proposals, Treasury could make available a form to give to customers giving a more detailed explanation of the provisions of Section 5324 and a toll free Treasury number for the customer to call for further information.

Treasury is committed to the judicious exercise of its rulemaking authority under the Bank Secrecy Act. At the same time, we must maximize the effectiveness of this authority in the fight against money laundering and the pernicious activities it sustains, especially drug trafficking. We are depending on the wholehearted cooperation of the financial community in this effort. As always, in any rulemaking under the Bank Secrecy Act, Treasury is seeking to strike an appropriate balance between law enforcement utility and cost to financial institutions.

Date: March 4, 1988.

Francis A. Keating, II,

Assistant Secretary (Enforcement).

[FR Doc. 88–5348 Filed 3–10–88; 8:45 am]

BILLING CODE 4810-25-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 110 and 165

[CGD 86–079]

Anchorage Regulations; Regulated Navigation Areas and Limited Access Areas

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to amend the anchorage regulations by placing a general statement at the beginning of Part 110 advising mariners that state and/or local ordinances may apply in these anchorages; by removing other notes and textual references to state and/or local ordinances which may apply to the anchorages in this part; by removing non-regulatory, obsolete or duplicative language; and by relocating sections to Part 165 which regulate navigation outside of the anchorages established in this part. These changes are primarily editorial in nature and are intended to clarify and update the regulations in this part.

DATE: Comments must be received on or before May 10, 1988.

ADDRESS: Comments should be submitted to Commandant (G-CMC/21) (CGD 86–079), U.S. Coast Guard, 2100 Second St., SW., Washington, DC 20593–0001. Comments may be delivered to and will be available for inspection and copying at the Marine Safety Council, room 2110, between the hours of 8:00 a.m. and 4:00 p.m. Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Margie G. Hegy, Project Manager, Office of Navigation (G-NSS/2), Room 1606, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593–0001, telephone (202) 267–0415, between 8:00 a.m. and 3:30 p.m. Monday through Friday.

SUPPLEMENTARY INFORMATION:

Request for Comments

The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his or her name and address, identify this notice as CGD 86–079, and give the reasons for the comment. Persons desiring acknowledgement that their comment has been received should enclose a stamped self-addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held at a time and place to be set in a subsequent notice if written requests for a hearing are received, and it is determined that the opportunity to make oral presentations will be beneficial to this rulemaking.

Drafting Information

The principal persons involved in drafting this proposed rulemaking are: Margie G. Hegy, Project Manager, and Christena G. Green, Project Counsel, Office of Chief Counsel.

Discussion of Proposed Regulations

Responsibility for the administration and enforcement of anchorage regulations was transferred from the U.S. Army Corps of Engineers (COE) to the U.S. Coast Guard in 1967. Many of these regulations have remained basically unchanged since that time. In 1979, the authority to issue rules and regulations pertaining to anchorage grounds and special anchorage areas was delegated to Coast Guard district commanders who have made necessary changes to specific areas under their authority. State and/or local governments have also promulgated ordinances which apply in some federal anchorages. Inclusion of references to state and/or local ordinances in Part 110 is not desirable as it appears that the Coast Guard has incorporated these ordinances into the federal regulations. The Coast Guard has reviewed the federal anchorage regulations and proposes to eliminate specific references to state and/or local ordinances and to place a general statement, as a caveat, at the beginning of Part 110 advising of the possible existence of state/or local ordinances.

The federal anchorage statute, 33 U.S.C. 471, authorizes the establishment of federal anchorage grounds in the navigable waters of the United States when required by maritime or commercial interests for safe navigation. The statute also allows for the issuance of regulations concerning anchoring therein. However, it does not specifically provide for the designation of non-anchorage areas or the regulation of navigation outside the anchorage grounds.

The Coast Guard proposes to redesignate or remove those sections containing regulations establishing "non-anchorage" grounds or regulating navigation outside the boundaries of established anchorages. These regulations are more appropriately contained in Part 165 as "regulated navigation areas".

The Coast Guard also proposes to update the regulations in Part 110 by removing obsolete regulations, by making editorial changes, and by removing non-regulatory language and informational material from the regulatory text. in the Final Rule, the Coast Guard also proposes to renumber the sections in Part 110 to eliminate non-standard section designations and facilitate future amendments.

Regulatory Evaluation

These regulatory changes are considered to be non-major under Executive Order 12291 and nonsignificant under the DOT regulatory policies and procedures (44 FR 11034; Feb. 26, 1979). The economic impact of this amendment has been found to be so minimal that further evaluation is unnecessary. The Coast Guard certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

List of Subjects

33 CFR Part 110

Special anchorage areas, Anchorage grounds.

33 CFR Part 165

Regulated navigation areas.

In consideration of the foregoing, Parts 110 and 165 of Title 33 of the Code of Federal Regulations are amended as follows:

PART 110—ANCHORAGE REGULATIONS

1. The authority citation for Part 110 is revised to read as follows:

Authority: 33 U.S.C. 471 and 2071; 49 CFR 1.46, 33 CFR 1.05–1(g). The regulations in § 110.155 are also promulgated under the authority of 33 U.S.C. 1231.

2. Section 110.1 (a) are (b) and (e) revised to read as follows:

§ 110.1 General.

(a) The areas described in Subpart A of this part are designated as special anchorage areas for the purposes of 33 U.S.C. 2030 and 2035. Vessels less than 20 meters in length (65.6 feet), when at anchor in any special anchorage area, are not required to exhibit anchor lights and shapes or to sound signals as prescribed in those sections.

(b) The anchorage grounds described in Subpart B of this part are established, and the rules and regulations in relation thereto are adopted, under the authority of 33 U.S.C. 471.

* * * * *

(e) Vessel owners and operators are advised that state and/or local ordinances may apply to the anchorages established in Subparts A and B.

§ 110.1a [Removal]

3. The text of § 110.1a is redesignated as § 110.155(k) and is revised to read as follows:

§ 110.155 Port of New York.

* * * * *

(k) *Anchorages under Ports and Waterways Safety Act.* (1) The anchorages listed in this section are regulated under the Ports and Waterways Safety Act (33 U.S.C. 1221 et seq.).

(2) Any person who violates a regulation issued under the Ports and Waterways Safety Act:

(i) Is liable for a civil penalty, not to exceed $25,000 for each violation;

(ii) If the violation is willful and knowing, is liable to be fined not more than $50,000 for each violation or imprisoned for not more than five years, or both.

* * * * *

§ 110.5 [Amended]

4. Section 110.5 is amended by removing the notes immediately following paragraphs (a–1) and (e).

§ 110.6 [Amended]

5. Section 110.6 is amended by removing the note at the end of the section.

§ 110.6a [Redesignated as § 110.7]

6. Section 110.6a is redesignated as § 110.7 and is revised to read as follows:

§ 110.7 Fore River, Portland Harbor, Portland, ME.

The waters beginning at a point on the shoreline near the Coast Guard Base at latitude 43°38′43″N, longitude 070°14′49″W; thence 319° to latitude 43°38′55″N, longitude 070°15′03″W; thence 050° to latitude 43°39′06″N, longitude 070°14′43″W; thence 161° to mainland; and thence southwesterly along the shore to the point of beginning.

§ 110.8 [Amended]

7. Section 110.8 is amended by removing the note immediately following paragraph (c–2).

§ 110.25 [Amended]

8. Section 110.25 is amended by removing the last three sentences of paragraph (c).

§ 110.26 [Amended]

9. Section 110.26 is amended by removing the note at the end of the section.

§ 110.30 [Amended]

10. Section 110.30 is amended by removing the note at the end of the section.

§ 110.31 [Amended]

11. Section 110.31 is amended by removing the note at the end of the section.

§ 110.32 [Amended]

12. Section 110.32 is amended by removing the note at the end of the section.

§ 110.37 [Amended]

13. Section 110.37 is amended by removing the note at the end of the section.

§ 110.38 [Amended]

14. Section 110.38 is amended by removing the note at the end of the section.

§ 110.45 [Redesignated as § 110.44]

15. Section 110.45 is redesignated as § 110.44.

§ 110.45a [Redesignated as § 110.45 and amended]

16. Section 110.45a is redesignated as § 110.45 and amended by removing the note at the end of the section.

§ 110.50 [Amended]

17. Section 110.50 is amended by removing the note at the end of the section.

§ 110.50a [Amended]

18. Section 110.50a is amended by removing the note at the end of the section.

§ 110.50b [Amended]

19. Section 110.50b is amended by removing the note at the end of the section.

§ 110.50c [Amended]

20. Section 110.50c is amended by removing the note at the end of the section.

§ 110.50d [Amended]

21. Section 110.50d is amended by removing paragraphs (b), (b)(1), (b)(2), and (b)(3).

§ 110.51 [Amended]

22. Section 110.51 is amended by removing the note at the end of the section.

§ 110.52 [Amended]

23. Section 110.52 is amended by removing the note at the end of the section.

§ 110.53 [Amended]

24. Section 110.53 is amended by removing the note at the end of the section.

§ 110.55 [Amended]

25. Section 110.55 is amended by removing the notes immediately following paragraphs (b), (c), (e) (e−1), (e−2), and (g).

§ 110.55a [Amended]

26. Section 110.55a is amended by removing the note at the end of the section.

§ 110.56 [Amended]

27. Section 110.56 is amended by removing the note at the end of the section.

§ 110.58 [Amended]

28. Section 110.58 is amended by removing the note at the end of the section.

29. Section 110.60 is amended by removing the notes immediately following paragraphs (a−2), (b−1), (j−1), (m−2), (o−2), (s−1), and (u−3), and by removing paragraph (x)(4), Table 110.60(x)(4) and Figure 110.60(x)(4). Paragraph (r−1) is revised to read as follows:

§ 110.60 Port of New York and vicinity.

* * * * *

(r−1) *Great Kills Harbor.* Beginning at a point on the shoreline at latitude 40°32′05.6″N, longitude 74°08′24.2″W; thence to latitude 40°32′06.7″N, longitude 74°08′27.6″W; thence to latitude 40°32′19″N, longitude 74°08′23.1″W; thence to latitude 40°32′27.8″N, longitude 74°08′25.9″W; thence to latitude 40°32′40.2″N, longitude 74°08′10.5″W; thence to latitude 40°32′44.2″N; longitude 74°08′12.9″W; thence along the northern and eastern shoreline to the point of beginning.

Note: This special anchorage area is within the limits of General Anchorage No. 28 described in section 110.155(f)(3).

* * * * *

§ 110.73a [Amended]

30. Section 110.73a is amended by removing the note at the end of the section.

31. Section 110.73b is amended by revising paragraph (a) and removing paragraph (c). Section 110.73b, as amended, reads as follows:

§ 110.73b Indian River at Vero Beach, FL.

(a) Area A. Beginning at a point located on the eastern shore of Fritz Is. at latitude 27°39′32.5″ N, longitude 80°22′20.6″ W following the shoreline northward to the northwest point at latitude 27°39′46″ N, longitude 80°22′25.9″ W, thence due east to a point on Orchid Is. at approximate latitude 27°39′46″ N, longitude 80°22′16.2″ W, thence southerly along the shoreline of Orchid Is. to latitude 27°39′32.5″ N, longitude 80°22′13.4″ W, thence due west to the point of beginning.

§ 110.74 [Amended]

32. Section 110.74 is amended by removing the note at the end of the section.

§ 110.77 [Amended]

33. Section 110.77 is amended by removing the note at the end of the section.

§ 110.79a [Amended]

34. Section 110.79a is amended by removing the note at the end of the section.

§ 110.80 [Amended]

35. Section 110.80 is amended by removing the note at the end of the section.

§ 110.80b [Amended]

36. Section 110.80b is amended by removing the note at the end of the section.

§ 110.81 [Amended]

37. Section 110.81 is amended by removing the note at the end of the section.

§ 110.83 [Amended]

38. Section 110.83 is amended by removing the note at the end of the section.

§ 110.84a [Amended]

39. Section 110.84a is amended by removing the note at the end of the section.

§ 110.85 [Amended]

40. Section 110.85 is amended by removing the note at the end of the section.

§ 110.86 [Amended]

41. Section 110.86 is amended by removing the note at the end of the section.

§ 110.87 [Amended]

42. Section 110.87 is amended by removing the note at the end of the section.

§ 110.90 [Amended]

43. Section 110.90 is amended by removing the note at the end of the section.

§ 110.91 [Amended]

44. Section 110.91 is amended by removing the notes immediately following paragraphs (a), (b), (c), and (d).

§ 110.95 [Amended]

45. Section 110.95 is amended by removing the notes immediately following paragraphs (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), and (n).

§ 110.111 [Amended]

46. Section 110.111 is amended by removing the note at the end of the section.

§ 110.115 [Amended]

47. Section 110.115 is amended by removing the note at the end of the section.

§ 110.120 [Amended]

48. Section 110.120 is amended by removing the note at the end of the section.

§ 110.125 [Amended]

49. Section 110.125 is amended by removing the note at the end of the section.

§ 110.126a [Amended]

50. Section 110.126a is amended by removing the note at the end of the section.

§ 110.127 [Amended]

51. Section 110.127 is amended by removing the note at the end of the section.

§ 110.127a [Amended]

52. Section 110.127a is amended by removing the note immediately following paragraph (e).

§ 110.127b [Amended]

53. Section 110.127b is amended by removing the note at the end of the section.

§ 110.127c [Amended]

54. Section 110.127c is amended by removing the note at the end of the section.

§ 110.130 [Amended]

55. Section 110.130 is amended by removing paragraph (b)(3).

56. The introductory text of § 110.131(a) is revised to read as follows:

§ 110.131 Kennebec River in vicinity of Bath, ME

(a) *The anchorage grounds.* * * *

§ 110.140 [Amended]

57. Section 110.140 is amended by removing paragraphs (d)(2), (d)(4), (d)(5), (d)(6), and (d)(7), and by redesignating paragraph (d)(3) as (d)(2).

58. Section 110.142(b) is revised to read as follows:

§ 110.142 Nantucket Harbor, MA.

* * * * *

(b) *The regulations.* The anchorage is for the use of commercial and pleasure craft. Temporary floats or buoys for marking anchors or moorings in place will be allowed. Fixed mooring piles or stakes are prohibited.

§ 110.145 [Amended]

59. Section 110.145 is amended by removing paragraphs (a)(2)(ii)(*e*), (d)(5) and (d)(6) and by removing and reserving paragraphs (d)(1) and (d)(3).

§ 110.147 [Amended]

60. Section 110.147 is amended by removing paragraph (b)(3).

61. Section 110.148(b) is revised to read as follows:

§ 110.148 Johnsons River at Bridgeport, CT.

* * * * *

(b) *The regulations.* The anchorage is for use by commercial and pleasure craft. Temporary floats or buoys for marking anchors or moorings will be allowed. Fixed mooring piles or stakes will not be allowed.

§ 110.155 [Amended]

62. Section 110.155 is amended by removing the note at the end of the section.

§ 110.157 [Amended]

63. Section 110.157 is amended by removing and reserving paragraphs (b)(1) and (b)(7), and by removing paragraphs (b)(10) and (c)(7).

§ 110.158 [Amended]

64. Section 110.158 is amended by removing and reserving paragraph (b)(1), and by removing paragraph (b)(8).

§ 110.159 [Amended]

65. Section 110.159 is amended by removing the last sentence of paragraph (a)(1) and the last two sentences of paragraph (a)(4), by removing the note immediately following paragraph (a)(6), and by removing paragraphs (b)(1) through (b)(6).

§ 110.168 [Amended]

66. Section 110.168 is amended by removing paragraphs (a)(7)(x), (d)(4)(iv), by removing and reserving paragraphs (h)(1), (h)(6), (h)(8), (h)(9), and by removing paragraph (h)(11).

§ 110.170 [Amended]

67. Section 110.170 is amended by removing paragraph (b)(4).

§ 110.173 [Amended]

68. Section 110.173 is amended by removing and reserving paragraph (b)(1) and by removing paragraph (b)(13).

§ 110.179 [Amended]

69. Section 110.179 is amended by removing and reserving paragraphs (b)(1) and (b)(3).

§ 110.182 [Amended]

70. Section 110.182 is amended by removing and reserving paragraph (b)(2) and by removing paragraph (d).

§ 110.185 [Amended]

71. Section 110.185 is amended by removing paragraphs (b)(1) and (b)(2).

§ 110.188 [Amended]

72. Section 110.188 is amended by removing and reserving paragraphs (b)(1), (b)(2), and (b)(5), and by removing paragraph (b)(8).

§ 110.189a [Redesignated as § 110.189 and amended]

73. Section 110.189a is redesignated as § 110.189 and is amended by removing paragraph (b)(4).

§ 110.190 [Amended]

74. Section 110.190 is amended by removing paragraph (b).

§ 110.195 [Amended]

75. Section 110.195 is amended by removing the note following the paragraph (c)(6), and removing and reserving paragraphs (c)(1), (c)(2), (c)(5), and (c)(7).

§ 110.196 [Amended]

76. Section 110.196 is amended by removing paragraph (b)(7).

§ 110.197 [Amended]

77. Section 110.197 is amended by removing paragraph (b)(7).

§ 110.205 [Amended]

78. Section 110.205 is amended by removing and reserving paragraphs (b)(1), (b)(3), and (b)(6).

§ 110.210 [Amended]

79. Section 110.210 is amended by removing paragraph (b)(3) and by removing the note at the end of the section.

§ 110.212 [Amended]

80. Section 110.212 is amended by removing paragraphs (a)(3)(ii) and (a)(3)(iii), and by removing and reserving paragraphs (a)(2)(ii) and (b)(2).

§§ 110.214 and 165.1109 [Amended]

81. Section 110.214 is amended by removing paragraphs (a)(10)(ii), (a)(11)(ii), (a)(12)(ii), (a)(18), and (b)(15), by removing and reserving paragraph (b)(7), and by redesignating paragraphs (a)(14), (a)(15) and (a)(16) as § 165.1109(a)(2), (a)(3), and (a)(4) respectively.

§ 110.215 [Amended]

82. Section 110.215 is amended by removing and reserving paragraph (b)(3).

§ 110.216 [Amended]

83. Section 110.216 is amended by removing paragraph (b)(5).

84. Section 110.218(b)(1) is revised to read as follows:

§ 110.218 Pacific Ocean at San Clemente Island, CA; in vicinity of Wilson Cove.

* * * * *

(b) *The regulations.* (1) This area is reserved exclusively for anchorage of United States Government vessels or vessels temporarily operating under Government direction, and no vessel, except in an emergency, shall anchor in the area without obtaining permission from the Commander, Naval Base, San Diego, CA or his designated representative.

* * * * *

85. Section 110.220(b) is revised to read as follows:

§ 110.220 Pacific Ocean at San Nicolas Island, CA; restricted anchorage areas.

* * * * *

(b) *The regulations.* Except in an emergency, no vessel shall anchor in these restricted areas without authority of the Commander, Naval Base, San Diego, CA or his designated representative.

§ 110.224 [Amended]

86. Section 110.224 is amended by removing paragraphs (a)(1), (a)(9), (a)(14), (a)(16), and (a)(17), by redesignating paragraphs (a)(2), (a)(3), (a)(4), (a)(5), (a)(7), (a)(8), and (a)(15) as § 165.1113 (a) through (g) respectively, and by redesignating paragraph (a)(6) as (a)(1) and by redesignating paragraphs (a)(10) through (a)(13) as (a)(2) through (a)(5), respectively. Section 110.224(a), (b)(1) and (2) are revised to read as follows:

§ 110.224 San Francisco Bay, San Pablo Bay, Carquinez Strait, Suisun Bay, Sacramento River, San Joaquin River, and connecting waters, CA.

(a) *General Regulations.* (1) No vessel in an unseaworthy condition which may become a menace or obstruction to navigation or anchorage of other vessels may occupy an anchorage, except when circumstances create conditions of imminent peril to personnel or when authorized by the Captain of the Port.

(2) Each vessel that does not have sufficient personnel on board to weigh anchor at any time, must anchor with two anchors and mooring swivel, unless authorized by the Captain of the Port.

(3) Deep-draft vessels shall take precedence over vessels of less draft in the deeper portions of all anchorages. Light-draft barges and vessels shall anchor away from the deeper portions of the anchorage so as not to interfere with the anchoring of deep-draft vessels. Should circumstances warrant, the Captain of the Port may require lighter draft vessels to move to provide safe anchorage, particularly in Anchorages 7 and 9, for deep-draft vessels.

(4) Barges towed in tandem to any anchorage shall nest together when anchoring.

(5) Each vessel that is notified by the Captain of the Port or his authorized representative to shift location shall do so promptly as directed.

(b) Naval/Army Anchorages. In addition to the General Regulations in paragraph (a) of this section, the following regulations apply to each naval/army anchorage described in this section.

(1) Naval/Army anchorages are intended for public vessels of the United States. They may be used by other vessels when not required for use by public vessels.

(2) Non-public vessels using a naval/army anchorage shall promptly notify the Captain of the Port upon anchoring and upon departure and shall be prepared to move within one hour after notice that the anchorage is required for public vessels.

* * * * *

§ 110.229 [Removed and reserved]

87. Section 110.229 is removed and reserved.

§ 110.235 [Amended]

88. Section 110.235 is amended by removing paragraph (b)(8).

§ 110.236 [Amended]

89. Section 110.236 is amended by removing and reserving paragraph (b)(6) and by redesignating paragraphs (a)(2), (a)(4), (a)(6) and (b)(5) as § 165.1405(a)(1), (a)(2), (a)(3), and (b), respectively.

§ 110.238 [Amended]

90. Section 110.238 is amended by removing paragraph (b)(5)(ii).

§ 110.250 [Amended]

91. Section 110.250 is amended by removing the last two sentences of paragraph (b)(3), by removing and reserving paragraph (b)(4), and by removing paragraphs (b)(7), (b)(8), and (b)(9).

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

92. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6, and 160.5.

93. Newly designated § 165.1109(a)(2)–(a)(4) are revised to read as follows:

§ 165.1109 San Pedro Bay, CA.

(a) The following are Regulated Navigation Areas—(1) The waters of San Pedro Bay enclosed by a line beginning at Los Angeles Light, latitude 33°42'30.6"N, longitude 118°15'02.5"W; thence easterly along the Los Angeles-Long Beach Middle Breakwater to Long Beach Channel Entrance Light 2, latitude 33°43'23.5"N, longitude 118°10'46.9"W; thence southerly to latitude 33°42'09.9"N; longitude 118°10'23.0"W; thence westerly to latitude 33°42'09.0"N, longitude 118°11'33.3"W; thence southwesterly to latitude 33°41'40.5"N, longitude 118°13'02.2"W; thence westerly to latitude 33°41'36.1"N, longitude 118°13'43.0"W; thence southwesterly to latitude 33°41'13.8"N, longitude 118°14'52.5"W; thence northerly to the beginning point at Los Angeles Light.

(2) Non-anchorage U (Los Angeles Harbor). An area enclosed by a line beginning at latitude 33°44'00.0"N, longitude 118°15'12.2"W; thence southerly to latitude 33°43'48.7"N, longitude 118°15'06.4"W; thence easterly to latitude 33°43'49.7"N, longitude 118°15'03.9"W; thence northerly to latitude 33°44'01.1"N, longitude 118°15'09.2"W; thence along the south containment dike to the beginning point.

(i) No vessel may anchor or moor in this non-anchorage.

(ii) Dragging, seining, trawling or other fishing operations, and activities which might foul submerged installations within this non-anchorage are prohibited.

Note: This non-anchorage is established for protection of a submerged sewer outfall pipeline.

(3) Non-anchorage V (Long Beach Harbor). An area enclosed by a line beginning at Long Beach Breakwater East End Light 1, latitude 33°43'23.5"N, longitude 118°08'10.1"W; thence northerly to latitude 33°43'38.4"N, longitude 118°08'10.1"W; thence easterly to latitude 33°43'38.4"N, longitude 118°07'45.5"W; thence southeasterly to latitude 33°43'27.3"N, longitude 118°07'36.8"W; thence to the beginning point.

(i) No vessel may anchor or moor in this non-anchorage.

(ii) Dragging, seining, trawling, or other fishing operations, and activities which might foul submerged installations within this non-anchorage area are prohibited.

Note: This non-anchorage is established for protection of a submerged pipeline.

(4) Non-anchorage W (Mouth of Entrance Channel to Alamitos Bay) Non-anchorage Area W is a semicircle with a 460m (approximately 1,509 ft.) radius that is centered at midchannel on a line between Alamitos Bay West Jetty Light 1 and Alamitos Bay East Jetty Light 2 and which extends seaward from that line.

(i) No vessel may anchor or moor in this non-anchorage.

* * * * *

94. Newly designated § 165.1113 is revised to read as follows:

§ 165.1113 San Francisco Bay, San Pablo Bay, Carquinez Strait, Suisun Bay, Sacramento River, San Joaquin River, and connecting waters, CA.

(a) No vessel may permanently moor in areas adjacent to the San Joaquin River Deep Water Channel except with the written permission of the Captain of the Port.

(b) Each vessel anchoring for safety reasons in the San Joaquin River Deep Water Channel, the Sacramento River Deep Water Ship Channel, or the Stockton or West Sacramento Turning Basins shall be positioned as near to the edge of the channel or turning basin as possible. Such vessels shall not interfere with navigation, or obstruct the approach to any pier, wharf, slip, or boat harbor and shall move as soon as possible or when notified to move by the Captain of the Port.

(c) No vessel may anchor within a tunnel, cable, or pipeline area indicated on a U.S. Government chart.

(d) No vessel may moor, anchor, or tie up to any pier, wharf, or other vessel in such a manner as to extend into an adjacent channel or fairway.

(e) Each vessel carrying explosives shall only anchor in an explosives anchorage.

(f) No vessel other than a vessel under Federal supervision may go alongside or moor to any Government-owned vessel, mooring buoy, pontoon boom, including their anchor cables, or any of their appendages. No vessel may obstruct or interfere in any manner with the mooring, unmooring, or servicing of vessels owned by the United States.

(g) Where these regulations require that a vessel notify the Captain of the Port, the operator of the vessel shall call the San Francisco Vessel Traffic Service.

Note: Vessel Traffic Service guards VHF-FM Channel 13 (156.65 MHz) and Channel 16 (156.8 MHz); call sign "SAN FRANCISCO VESSEL TRAFFIC SERVICE".

Dated: February 2, 1988.

Martin H. Daniell,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

BILLING CODE 4910-14-M

DEPARTMENT OF EDUCATION

34 CFR Part 696

Special Treatment of Institutions of Higher Education Located in Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands

AGENCY: Department of Education.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On October 23, 1987, the Department of Education published in the **Federal Register** a notice of proposed rulemaking (NPRM) related to the implementation of waivers and priorities for institutions of higher education located in Guam, American Samoa, the Virgin Islands, the Trust

Terriroty of the Pacific Islands, and the Northern Mariana Islands (52 FR 39896–39897). The comment period for this proposed rule ended on November 23, 1987.

In response to requests by representatives of institutions most affected by this proposed rule, the Secretary extends the comment period for all provisions of the NPRM of October 23, 1987.

DATE: The comment period for all provisions of the October 23, 1987, NPRM (52 FR 39896–39897) is extended until April 11, 1988.

FOR FURTHER INFORMATION CONTACT: Leo Paszkiewicz, Office of Postsecondary Education, U.S. Department of Education (Room 4060, ROB–3) 400 Maryland Avenue SW., Washington DC 20202. Telephone (202) 732–3551.

Dated: March 8, 1988

William J. Bennett,

Secretary of Education.

Notices

Federal Register

Vol. 53, No. 48

Friday, March 11, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Flue-Cured Tobacco Advisory Committee; Meeting

In accordance with the Federal Advisory Committee Act (5 U.S.C. App. 1) announcement is made of the following committee meeting:

Name: Flue-Cured Tobacco Advisory Committee.

Date: March 29, 1988.

Time: 1 p.m.

Place: Tobacco Division, Agricultural marketing Service, U.S. Department of Agriculture, Flue-Cured Tobacco Cooperative Stabilization Corporation Building, 1306 Annapolis Drive, Raleigh, North Carolina 27605.

Purpose: To discuss recommendations from the industry for improving the marketing of flue-cured tobacco during the 1988 season.

The meeting is open to the public. Persons, other than members, who wish to address the Committee at the meeting should contact the Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, 300 12th Street SW., P.O. Box 96456, Washington, DC 20090–6456, (202) 447–2567, prior to the meeting. Written statements may be submitted to the Committee prior to or at the meeting.

Dated: March 8, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 374]

Resolution and Order Approving the Application of the City of Mobile, AL, for a Special-Purpose Subzone for ADDSCO Industries, Inc.

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the City of Mobile, Alabama, grantee of Foreign-Trade Zone 82, filed with the Foreign-Trade Zones Board (the Board) on June 20, 1986, requesting special-purpose subzone status for the shipyard of ADDSCO Industries, Inc., within the Mobile Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations would be satisfied, and that the proposal would be in the public interest, if approval is subject to certain conditions, approves the application subject to the following conditions: (1) Any steel plate, angles, shapes, channels, rolled sheet stock, bars, pipes and tubes, classified under Schedule 6, Part 2, Subp. B, TSUS, and not incorporated under merchandise otherwise classified, and which is used in manufacturing shall be subject to Customs duties in accordance with applicable law, if the same item is then being produced by a domestic steel mill; and (2) in addition to the annual report, ADDSCO Industries, Inc., shall advise the Board's Executive Secretary as to significant new contracts, with appropriate information concerning foreign purchases otherwise dutiable, so that the Board may consider whether any foreign dutiable items are being imported for manufacturing in the subzone primarily because of subzone status and whether the Board should consider requiring Customs duties to be paid on such items.

The Secretary of Commerce, as Chairman and Executive Office of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81c) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the City of Mobile, Alabama, grantee of Foreign-Trade Zone No. 82, has made application (filed June 20, 1986, FTZ Docket 22–86, 51 FR 25075) in due and proper form to the Board for authority to establish a special-purpose subzone at the shipyard of ADDSCO Industries, Inc., in Mobile, Alabama;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and

Whereas, the Board has found that the requirements of the Act and the Board's regulations would be satisfied if approval is subject to the conditions stated in the resolution accompanying this action;

Now, therefore, in accordance with the application filed June 20, 1986, the Board hereby authorizes the establishment of a subzone at the shipyard of ADDSCO Industries, designated on the records of the Board as Foreign-Trade Subzone No. 82A at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the regulations, and those stated in the resolution accompanying this action, including the requirement that foreign basic steel mill products shall be subject to Customs duties prior to admission into the subzone if the same item is then being produced by a domestic mill, and also to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, any necessary permits shall be obtained from Federal, State, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and District Army Engineer with the grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In witness whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer or his delegate at Washington, DC, this 4th day of March 1988, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Gilbert B. Kaplan,

Acting Assistant Secretary of Commerce for Import Administration; Chairman, Committee of Alternates.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

[Order No. 373]

Resolution and Order Approving the Application of the Greater Gulfport/Biloxi Foreign-Trade Zone, Inc. for a Special-Purpose Subzone for Moss Point Marine, Inc. in Escatawpa, MI

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Greater Gulfport/Biloxi Foreign-Trade Zone, Inc., grantee of Foreign-Trade Zone 92, filed with the Foreign-Trade Zones Board (the Board) on December 4, 1985, requesting special-purpose subzone status for the shipyard of Moss Point Marine, Inc., within the Pascagoula Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations would be satisfied, and that the proposal would be in the public interest, if approval is subject to certain conditions, approves the application subject to the following conditions: (1) any steel plate, angles, shapes, channels, rolled sheet stock, bars, pipes and tubes, classified under Schedule 6, Part 2, Subp. B, TSUS, and not incorporated under merchandise otherwise classified, and which is used in manufacturing shall be subject to Customs duties in accordance with applicable law, if the same item is then being produced by a domestic steel mill; and (2) in addition to the annual report, Moss Point Marine, Inc., shall advise the Board's Executive Secretary as to significant new contracts, with appropriate information concerning foreign purchases otherwise dutiable, so that the Board may consider whether any foreign dutiable items are being imported for manufacturing in the subzone primarily because of subzone status and whether the Board should consider requiring Customs duties to be paid on such items.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81c) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the Greater Gulfport/Biloxi Foreign-Trade Zone, Inc., grantee of Foreign-Trade Zone No. 92, has made application (filed December 4, 1985, FTZ Docket 42–85, 50 FR 51442) in due and proper form to the Board for authority to establish a special-purpose subzone at the shipyard of Moss Point Marine, Inc., in Escatawpa, Mississippi;

Whereas, notice of said application has been given and published, an full opportunity has been afforded all interested parties to be heard; and

Whereas, the Board has found that the requirements of the Act and the Board's regulations would be satisfied if approval is subject to the conditions stated in the resolution accompanying this action;

Now, therefore, in accordance with the application filed December 4, 1985, the Board hereby authorizes the establishment of a subzone at the shipyard of Moss Point Marine, designated on the records of the Board as Foreign-Trade Subzone, No. 92A at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the regulations, and those stated in the resolution accompanying this action, including the requirement that foreign basis steel mill products shall be subject to Customs duties prior to admission into the subzone if the same item is then being produced by a domestic mill, and to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, and necessary permits shall be obtained from Federal, State, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In Witness, whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer or his delegate at Washington, DC, this 4th day of March 1988, pursuant to Order of the Board.

Foreign-Trade Zones Board.

BILLING CODE 3510-DS-M

International Trade Administration

Subcommittee on Export Administration of the President's Export Council; Partially Closed Meeting

A partially closed meeting of the President's Export Council Subcommittee on Export Administration will be held April 6, 1988, 9:00 a.m. to 3:00 p.m., Herbert C. Hoover Building, Room 4830, 14th and Constitution Avenue NW., Washington, DC.

The Subcommittee provides advice on matters pertinent to those portions of the Export Administration Act as amended, that deal with United States policies of encouraging trade with all countries with which the United States has diplomatic or trading relations, and of controlling trade for national security and foreign policy reasons.

General Session: 9:00–11:45 a.m. Introduction of new members; objectives of Subcommittee; briefing on Export Administration developments; working group status reports.

Executive Session: 1:30–3:00 p.m. Discussion of matters properly classified under Executive Order 12356 pertaining to the control of exports for national security, foreign policy or short supply reasons under the Export Administration Amendments Act of 1979, as amended. A Notice of Determination to close meetings or portions of meetings of the Subcommittee to the public on the basis of 5 U.S.C. 522(c)(1) was approved October 17, 1985 in accordance with the Federal Advisory Committee Act. A copy of the Notice is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, (202) 377–4217.

For further information, contact Sharon Gongwer, (202) 377–4275.

Date: March 7, 1988.

Vincent F. DeCain,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

Princeton University, et al.; Consolidated Decision on Applications for Duty-free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket number: 87–211R. Applicant: Princeton University, Princeton, NJ 08544. Instrument: Surface Science Facility and Accessories. Manufacturer: University of Waterloo, Canada. Intended Use: See notice at 52 FR 27039, July 17, 1987. Reasons for this Decision: The foreign apparatus provides a pressure of 10^{-11} torr, a low temperature (30–80K) He source and allows for both cluster and crystal experiments and detection of power oscillation (under He cooled conditions) of $\approx 10^{-13}$ watt.

Docket Number: 88–038. Applicant: University of California, Lawrence Livermore National Laboratory, Livermore, CA 94550. Instrument: Streak Camera, Model Imacon 500. Manufacturer: Hadland Photonics, United Kingdom. Intended Use: See notice at 52 FR 48557, December 23, 1987. Reasons for this Decision; The foreign article provides a guaranteed temporal resolution of <10 picosecond.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The capability of each of the foreign instruments described above is pertinent to each applicant's intended purposes. We know of no instrument or apparatus being manufactured in the United States which is of equivalent scientific value to either of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 88–5416 Filed 3–10–88; 8:45 am]

BILLING CODE 3510-DS-M

University of Wisconsin; Decision on Application for Duty-free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 88–028. Applicant: University of Wisconsin, Madison, WI 53706. Instrument: Mass Spectrometer, Model VG 354/S. Manufacturer: VG Instruments, United Kingdom. Intended Use: See notice at 52 FR 46813, December 10, 1987.

Comments: None received.

Decision: Approved. No domestic manufacturer was both "able and willing" to manufacture an instrument or apparatus of equivalent scientific value to the foreign instrument for such purposes as the instrument was intended to be used, and have it available to the applicant without unreasonable delay in accordance with § 301.5(d)(2) of the regulations, at the time the foreign instrument was ordered, June 30, 1987.

Reasons: The foreign instrument provides precise automated variable multicollector thermal ionization of isotopic ratios on small samples (10^{-9} to 10^{-6} grams). The capabilities of the foreign instrument described above are pertinent to the applicant's intended purposes. We know of no domestic manufacturer both able and willing to provide an instrument with the required features at the time the foreign instrument was ordered.

As to the domestic availability of instruments, § 301.5(d)(2) of the regulations provides that, in determining whether a U.S. manufacturer is able and willing to produce an instrument, and have it available without unreasonable delay, "the normal commercial practices applicable to the production and delivery of instruments of the same general category shall be taken into account, as well as other factors which in the Director's judgment are reasonable to take into account under the circumstances of a particular case." This subsection also provides that, if "a domestic manufacturer was formally requested to bid an instrument, without reference to cost limitations and within a leadtime considered reasonable for the category of instrument involved, and the domestic manufacturer failed formally to respond to the rquest, for the purposes of this section the domestic manufacturer would not be considered willing to have supplied the instrument."

The regulations require that domestic manufacturers be both "able and willing" to produce an instrument for the purpose of comparison with the foreign instrument. Where an applicant, as in this case, received no bid response to a formal request for quotation sent to the only known domestic manufacturer, it is apparent that the domestic manufacturer was either not able or not willing to produce an instrument of equivalent scientific value to the foreign instrument for such purposes as the foreign instrument was intended to be used at the time it was ordered.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Bureau of Standards

[Docket No. 80109-8009]

Federal Information Processing Standard (FIPS) for Programmer's Hierarchical Interactive Graphics System (PHIGS)

AGENCY: National Bureau of Standards, Commerce.

ACTION: Notice of proposed Federal Information Processing Standard (FIPS).

SUMMARY: A Federal Information Processing Standard (FIPS) adopting the Programmer's Hierarchical Interactive Graphics System (PHIGS) is proposed for Federal agency use. This proposed FIPS adopts the forthcoming American National Standard X3.144–198X. This standard specifies the control and data interchange between an application program and its graphic support system. This standard will improve the portability of graphics application programs among different manufacturers' computer systems.

Prior to submission of this proposed standard to the Secretary of Commerce for review and approval as a FIPS, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

This proposed FIPS contains two sections: (1) An announcement section, which provides information concerning the applicability, imlementation, and maintenance of the standard; and (2) a specifications section, ANIS X3.144–198X, which deals with the technical requirements of the standard. Only the announcement section of the standard is provided in this notice. Interested parties may obtain a copy of the technical specifications from the Global Engineering Documents, 1990 M Street NW., Suite 400, Washington, DC 20036, (800) 854–7179.

DATE: Comments on this proposed FIPS must be received on or before June 9, 1988.

ADDRESS: Written comments concerning the adoption of PHIGS as a FIPS should be sent to: Director, Institute for Computer Sciences and Technology, ATTN: Proposed FIPS for PHIGS, Technology Building, Room B–154, National Bureau of Standards, Gaithersburg, MD 20899.

Written comments received in response to this notice will be made part of the public record and will be made available for inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel Benigni, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899, telephone (301) 975–3266.

Ernest Ambler,

Director.

Date: March 7, 1988.

Federal Information Processing Standards Publication (date)________

Announcing the Standard for Programmer's Hierarchical Interactive Graphics System (PHIGS)

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Bureau of Standards pursuant to Section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Pub. L. 89–306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15 Code of Federal Regulations (CFR).

1. Name of Standard

Programmer's Herarchical Interactive Graphics System (PHIGS) (FIPS PUB ________).

2. Category of Standard

Software Standard, Graphics.

3. Explanation

This publication announces the adoption of the American National Standard Programmer's Hierarchical Interactive Graphics System, ANSI X3.144–198X, as a Federal Information Processing Standard (FIPS). This standard specifies the control and data interchange between an application program and its graphic support system. It provides a set of functions and programming language bindings (or toolbox package) for the definition, display and modification of two-dimensional (2D) or three-dimensional (3D) graphical data. In addition, this standard supports highly interactive processing and geometric articulation, multi-level or hierarchical graphics data, and rapid modification of both the graphics data and the relationships between the graphical data. The purpose of the standard is to promote portability of graphics application programs between different installations. The standard is for use by implementors as the reference authority in developing graphics software systems; and by other computer professionals who need to know the precise syntactic and semantic rules of the standard.

4. Approving Authority

Secretary of Commerce.

5. Maintenance Agency

Department of Commerce, National Bureau of Standards (Institute of Computer Sciences and Technology).

6. Cross Index

American National Standard (ANSI, X3.144–198X) Programmer's Hierarchical Interactive Graphics System (PHIGS).

7. Related Documents

a. Federal Information Processing Standards Publication (FIPS PUB) 120, Graphical Kernel System (GKS).

b. Federal Information Processing Standards Publication (FIPS PUB) 128, Computer Graphics Metafile (CGM).

c. Federal Information Resources Management Regulation 201–8.1, Federal ADP and Telecommunications Standards.

d. American National Standard Graphical Kernel System, GKS, ANSI/ASC X3.124–1985.

e. American National Computer Graphics Metafile, CGM, ANSI/ASC X3.122–1986.

g. ISO 2022–1982, Information Processing—ISO 7-Bit and 8-Bit Coded Character Sets—Code Extension Techniques.

h. ISO 2382/13, Data Processing—Vocabulary—Part 13: Computer Graphics.

i. ISO 6093, Information Processing—Representation of numeric values in character strings for information interchange (in course of preparation).

j. ISO 7942–1985, Information Processing Systems—Computer Graphics—Functional Specification of the Graphical Kernel System (GKS).

k. ISO 8632–1986, Information Processing Systems—Computer Graphics Metafile for the Storage and Transfer of Picture Description Information (Part 1: Functional Specifications; Part 2: Character Encoding; Part 3: Binary Encoding; Part 4: Clear Text Encoding).

1. ISO 8805, Information Processing—Computer Graphics—Graphical Kernel System (GKS) 3D Extensions Functional Description (in course of preparation).

8. Objectives

The primary objectives of this standard are:

—to allow very highly interactive graphics application programs using 2D or 3D hierarchically structured graphics data to be easily transported between installations. This will reduce costs associated with the transfer of programs among different computers and graphics devices, including replacement devices.

—to aid the understanding and use of dynamic hierarchical graphics methods by application programmers.

—to aid manufacturers of graphics equipment by serving as a guideline for identifying useful combinations of graphics capabilities in a device.

—to encourage more effective utilization and management of graphics application programmers by ensuring that skills acquired on one job are transportable to other jobs, thereby reducing the cost of graphics programmer retraining.

—to aid graphics application programmers in understanding and using graphics methods by specifying well-defined functions and names. This will avoid the confusion of incompatibility common with operating systems and programming languages.

9. Applicability

a. This standard is intended for use in computer graphics applications that are either developed or acquired for government use. It is specifically designed to meet the performance requirements of such demanding applications as Computer Aided Design/Computer Aided Engineering/Computer Aided Manufacturing, command and control, molecular modelling, simulation and process control. It emphasizes the support of applications needing a highly dynamic, highly interactive operator interface and expecting rapid screen update of complex images to be performed by the display system.

b. The use of this standard is strongly recommended when one or more of the following situations exist:

—The graphics application is very highly interactive, or contains hierarchically structured graphics data, or requires rapid modification of 2D or 3D graphics data and the relationships among the data.

—It is anticipated that the life of the graphics program will be longer than the life of the presently utilized graphics equipment.

—The graphics application or program is under constant review for updating of the specifications, and changes may result frequently.

—The graphics application is being designed and programmed centrally for a decentralized system that employs computers of different makes and models and different graphics devices.

—The graphics program will or might be run on equipment other than that for which the program is initially written.

—The graphics program is to be understood and maintained by programmers other than the original ones.

—The graphics program is or is likely to be used by organizations outside the Federal government (i.e., State and local governments, and others).

c. Nonstandard features of implementations of PHIGS should be used only when the needed operation or function cannot reasonably be implemented with the standard features alone. Although nonstandard features can be very useful, it should be recognized that the use of these or any other nonstandard elements may make the interchange of graphics programs and future conversion more difficult and costly.

10. Specifications

American National Standard Programmer's Hierarchical Interactive Graphics System, ANSI X3.144–198X, defines the scope of the specifications, the syntax and semantics of the PHIGS elements and requirements for conforming implementations. All of these specifications apply to Federal Government implementations of this standard.

ANSI X3.144–198X defines a language independent nucleus of a graphics system for integration into a programming language. Thus, it is embedded in a language layer obeying the particular conventions of the language. This means that the standard is separated into two parts. Part 1 represents the functional aspects of PHIGS. Part 2 contains bindings of PHIGS functions to actual programming languages. These bindings are developed in cooperation with the voluntary industry standards committees of the various languages. A binding of the PHIGS functionality to the Programming Language FORTRAN (ANSI X3.9–1978), known as FORTRAN '77, appears in the first version of this standard. Subsequent language bindings for C, Ada, PASCAL, etc., will be added periodically as they become available.

As these bindings are approved by ANSI, each language binding will become part of this standard.

11. Implementation

The implementation of this standard involves two areas of consideration: acquisition of implementations and interpretations of this standard.

11.1 Acquisition of Implementations

This standard becomes effective six months after the date of publication of final document in the **Federal Register**. Implementations which meet the requirements of the applicability section and acquired after this date should comply with this standard. Conformance to this standard should be considered whether toolbox packages are developed internally, acquired as part of an ADP system procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services.

A transition period provides time for industry to produce toolbox packages conforming to the standard. The transition period begins on the effective date and continues for twelve (12) months thereafter. The provisions of this publication apply to orders placed after the date of this publication; however, a toolbox package not conforming to this standard may be acquired for interim use during the transition period.

11.2 Interpretation of this FIPS

Resolution of questions regarding this standard will be provided by NBS. Questions concerning the content and specifications should be addressed to: Director, Institute for Computer Sciences and Technology, ATTN: PHIGS Interpretation, National Bureau of Standards, Gaithersburg, MD 20899.

12. Waivers

Under certain exceptional circumstances the head of the agency is authorized to waive the application of the provisions of this FIPS PUB. Exceptional circumstances which would warrant a waiver are:

a. Significant, continuing cost or efficiency disadvantages will be encountered by the use of this standard and,

b. The interchange of information between the system for which the waiver is sought and other systems is not anticipated.

Agency heads may act only upon written waiver requests containing the information detailed above. Agency heads may approve requests for waivers only by a written decision which explains the basis upon which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899.

When the determination on a waiver request applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the Commerce Business Daily as a part of the notice of solicitation for offers of an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver request, any supporting documents, the document approving the waiver request and any supporting and accompanying document(s), with such deletions as the agency is authorized and decides to make under 5 U.S.C. 552(b), shall be part of the procurement documentation and retained by the agency.

BILLING CODE 3510-CH-M

National Oceanic and Atmospheric Administration

Marine Mammals; Human/Dolphin Swim Programs; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public meetings.

SUMMARY: Notice is hereby given that the National Marine Fisheries Service (NMFS) is reviewing its authorization of human/dolphin swim programs issued pursuant to the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407). NMFS is convening two (2) meetings to ensure that all interested parties have an opportunity to comment on the issuance of authorizations for the conduct of human/dolphin swim programs. Those persons wishing to comment on the swim programs will be required to sign in at the meeting location and will be allowed ten (10) minutes to address the issue. If more than ten (10) minutes is needed, prior notification to NMFS is required.

DATES: The meetings will be held on April 1, 1988, in Washington, DC, 9:00 a.m.–noon; and April 5, 1988, in Islamorada, Florida; 7:00 p.m.–10:00 p.m.

ADDRESSES: Universal Building South, Room 928, 1825 Connecticut Avenue NW., Washington, DC; and Islamorada Fire House, US 1 at Mile Marker 80, Islamorada, Florida.

FOR FURTHER INFORMATION CONTACT: Wanda L. Cain, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, Washington, DC 20235 (202/673–5348).

SUPPLEMENTARY INFORMATION: MNFS began issuing authorization to conduct human/dolphin swim programs in 1985 under public display permits issued pursuant to the Marine Mammal Protection Act of 1972. Three (3) authorizations have been issued and three (3) additional requests for authorizations have been submitted to NMFS. NMFS has considered the programs experimental in nature until sufficient information could be obtained to assess the effects of the programs on the health and well-being of the animals involved. In the interim questions have also arisen focused on whether or not such programs constitute public display as envisioned by the Act. Concern for human safety and liability are also matters for discussion. These meetings are being held to ensure full opportunity for interested members of the public and government agencies to provide NMPS with comments on the continued issuance of authorizations to conduct human/dolphin swim programs.

Dated: March 8, 1988.

Dr. Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510-22-M

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The South Atlantic Fishery Management Council will convene separate public meetings of its Summer Flounder Advisory Panel, and its Summer Flounder Committee, at the Ramada Inn, Essington, PA. On March 14, 1988, from 2 p.m. to 4 p.m., the Summer Flounder Advisory Panel will review public hearing comments regarding the Mid-Atlantic Fishery Management Council's proposed summer flounder fishery management plan. Also on March 14 from 4 p.m. to 6 p.m., the Summer Flounder Committee will conduct the same review as stated for the Summer Flounder Advisory Panel, as well as reassess its position regarding the summer flounder plan. A detailed agenda will be available to the public on or about March 4, 1988.

For further information contact Robert K. Mahood, Executive Director, South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407; telephone: (803) 571–4366.

Date: March 8, 1988.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COUNCIL ON ENVIRONMENTAL QUALITY

Availability of Annual Report on Endangered Species Act Exemption

March 3, 1988.

AGENCY: Council on Environmental Quality, Executive Office of the President.

ACTION: Information only: Notice of Availability of Annual Report on Endangered Species Act Exemption.

SUMMARY: This notice announces the availability of the Annual Report submitted by Basin Electric Power Cooperative, as Project Manager for the Missouri Basin Power Project in the matter of an exemption granted from the requirements of the Endangered Species Act to Grayrocks Dam. The lead Federal agency in the project is the Rural Electrification Administration.

DATES: The Report was submitted to the Council on January 19, 1988.

SUPPLEMENTARY INFORMATION: Subsection (L)(2) of the Endangerd Species Act Amendments of 1978 (16 U.S.C. 1536) requires that any agency granted an exemption under subsection (h) of the Endangered Species Act must submit to the Council on Environmental Quality an annual report describing its compliance methods with the mitigation and enhancement measures prescribed by the law. Subsection (L)(2) further requires that the Council publish availability of the report in the **Federal Register.**

On February 7, 1979 the Endangered Species Committee granted an exemption from the requirements of the Endangered Species Act to Grayrocks Dam. In granting the Exemption Order, the Committee, as required by the Act, established requirements for reasonable mitigation and enhancement measures. These requirements are set out in an "Agreement of Settlement and Compromise" and is part of the Annual Report announced herein.

ADDRESS: The Annual Report is available from Basin Electric Power Cooperative, 1717 East Interstate Avenue, Bismarck, ND 58501–0564; Telephone: (701) 223–0441.

FOR FURTHER INFORMATION CONTACT: Ms. Lisa S. Defensor, Staff Attorney, Council on Environmental Quality, 722 Jackson Place NW., Washington, DC 20503. (202) 395–5754.

A. Alan Hill,

Chairman.

BILLING CODE 3125-01-M

COMMISSION ON MERCHANT MARINE AND DEFENSE

Closed Meeting

SUMMARY: The Commission on Merchant Marine and Defense was established by Pub. L. 98–525 (as amended), and the Commission was constituted in December 1986. The Commission's mandate is to study and report on problems relating to transportation of cargo and personnel for national defense purposes in time of war or national emergency, the capability of the Merchant Marine to meet the need for such transportation, and the adequacy of the shipbuilding mobilization base to support naval and merchant ship construction. In accordance with the Federal Advisory Committee Act, P.L. 92–463, as amended, the Commission announces the following meeting:

DATES AND TIMES: Monday, March 21, 1988, beginning 9:00 a.m.; Tuesday, March 22, 1988, Beginning 9:00 a.m.

Place: Suite 520, 4401 Ford Avenue, Alexandria, Virginia, 22302–0268.

Type of Meeting: Closed.

CONTACT PERSON: Allan W. Cameron, Executive Director, Commission on Merchant Marine and Defense, Suite 520, 4401 Ford Avenue, Alexandria, Virginia 22302–0268, Telephone (202) 756–0411.

Purpose of Meeting: To receive additional information pertaining to the needs of the national defense for the Merchant Marine and the shipbuilding industry, and to discuss and to deliberate facts and opinions obtained from briefings and public hearings.

SUPPLEMENTARY INFORMATION: The executive meetings of the Commission will be closed to the public pursuant to 5 U.S.C. 552b(c)(1) and 552b(c)(4) in the interests of national security and to protect proprietary information provided to the Commission in confidence.

Allan W. Cameron,

Executive Director, Commission on Merchant Marine and Defense.

BILLING CODE 3820-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

March 7, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 16, 1988. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535–9481. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry of certain cotton, wool and man-made fiber textiles and textile products, produced or manufactured in Mexico and exported during 1988, in excess of the designated levels.

Background

During negotiations held December 14–31, 1987 between the Governments of the United States and the United Mexican States, agreement was reached to establish a new bilateral agreement concerning cotton, wool and man-made fiber textiles and textile products, produced or manufactured in Mexico and exported during the period which began on January 1, 1988 and extends through December 31, 1991.

The agreement establishes, among other things, a specific limit for cotton and man-made fiber broadwoven fabric in Categories 218–220, 225–227, 313–326, 611–617 and 625–629, as a group, and sublimits within the group for Categories 218, 219, 313, 314, 315, 317, 326 and 611; Categories 201pt./669pt. (cotton and man-made fiber cordage), 300/301/607pt. (with a sublimit for cotton carded yarn in Category 300), 334, 336/636, 341/641 (with a sublimit for cotton and man-made non-knit blouses made with two or more colors in the warp and/or the filling), 435, 604–A (staple synthetic yarn), 604–O/607–O, 635 and 669–P (man-made fiber bags); designated consultation levels for cotton, wool and man-made fiber textile products in Categories 222, 223, 229, 337/637, 359–O, 363, 369–D (cotton dishtowels), 369–O (excluding cotton webs, wadding and batting), 410, 433, 443, 447, 621, 632, 659–H (man-made fiber headwar), 659–O, 669–O and 670, and minimum consultation levels for cotton, wool and man-made fiber products in Categories 345, 350, 442, 459, 646 and 650, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1988 and extends through December 31, 1988.

The agreement establishes a special regime for certain categories of apparel products made of American formed and cut fabric parts. Listed below are the designated percentages of the specific limit for these categories which are not subject to the special regime:

Category	Percentage
335	25
338/339/638/639	50
340/640	25
342/642	20
347/348	13.5
349/649	20
351/651	15
352/652	45
359–C (coveralls & overalls).	10
369–B (bags)	15
369–U (shoe uppers)	15
633	10
634	15
647/648	10
659–C (coveralls & overalls).	10
659–S (swimwear)	10
666	50

Information on procedures required to paticipate in the Special Regime will be published in a separate directive.

Charges will be made to the limits established for the foregoing categories as data become available.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice dated December 11, 1987 (52 FR 47745).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral

VOL 53 ISS 48 MR 11 1988 UMI

agreement, but are designed to assist only in the implementation of certain of its provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 7, 1988.

COMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 13, 1988 between the Governments of the United States and the United Mexican States; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 16, 1988, entry into the United States for consumption, and withdrawal from warehouse for consumption, of cotton, wool and man-made fiber textiles and textile products in the following categories, produced or manufactured in Mexico and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988, in excess of the following restraint limits:

Category	12 mo. limit [1]
218–220, 225–227, 313–326, 611–617 and 625–629, as a group.	44,000,000 square yards equivalent.
Sublevels within the group	
218	1,600,000 square yards.
219	11,000,000 square yards.
313	22,000,000 square yards.
314	11,000,000 square yards.
315	11,000,000 square yards.
317	11,000,000 square yards.
326	1,600,000 square yards.
611	2,600,000 square yards.
Individual limits not in the group	
201pt./669pt. [2]	2,500,00 pounds.
222	900,000 pounds.
223	1,480,000 pounds.
229	2,200,000 pounds.
300/301/607pt. [3]	13,500,000 pounds of which not more than 7,500,000 pounds shall be in Category 300.
334	70,000 dozen.
335	120,000 dozen.
336/636	180,000 dozen.
337/637	60,000 dozen.
338/339/638/639	1,100,000 dozen.
340/640	360,000 dozen.
341/641	775,000 dozen of which not more than 280,000 dozen shall be in blouses with two or more colors in the warp and/or filling in Categories 341–Y/641–Y. [4]
342/642	290,000 dozen.
345	19,022 dozen.
347/348	2,150,000 dozen.
349/649	2,500,000 dozen.
350	13,725 dozen.
351/651	290,000 dozen.
352/652	2,500,000 dozen.
359–C [5]	1,600,000 pounds.
359–0 [6]	300,000 pounds.
363	5,500,000 numbers.
369–B [7]	2,500,000 pounds.
369–D [8]	400,000 pounds.
369–U [9]	3,350,000 pounds.
369–0 [10]	400,000 pounds.
410	475,000 square yards.
433	11,000 dozen.
435	10,000 dozen.
442	5,556 dozen.
443	84,000 numbers.
447	12,000 dozen.
459	50,000 pounds.
604–A [11]	1,300,000 pounds.
604–0/607–O [12]	4,000,000 pounds.
621	200,000 pounds.
632	750,000 dozen pairs.
633	65,000 dozen.
634	65,000 dozen.
635	115,000 dozen.
646	19,022 dozen.
647/648	1,600,000 dozen.
650	13,725 dozen.
659–C [13]	1,700,000 pounds.
659–H [14]	350,000 pounds.
659–S [15]	500,000 pounds.
659–0 [16]	1,500,000 pounds.
666	7,200,000 pounds.
669–P [17]	1,300,000 pounds.
669–0 [18]	650,000 pounds.
670	10,000,000 pounds.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

[2] In Category 201pt., only TSUSA numbers 315.0500, 315.1000, 315.1500, 316.5500 and 316.5800; in Category 669pt., TSUSA numbers 348.0065, 348.0075, 348.0565 and 348.0575.

[3] Categories 300/301, and in 607pt. only TSUSA number 310.0034.

[4] In Categories 341–Y/641–Y, only TSUSA number 384.4608, 384.4610, 384.4612, 384.0505, 384.0511, 384.0512, 384.2302, 384.2304, 384.2307, 384.9110, 384.9120 and 384.4708.

[5] In Category 359–C, only TSUSA numbers 381.0822, 381.6510, 384.0828 and 384.5222.

[6] In Category 359–0, all TSUSA numbers except 381.0822, 381.6510, 384.0828 and 384.5222.

[7] In Category 369–B, only TSUSA numbers 706.3210, 706.3260, 706.3640, 706.3650, 706.4106 and 706.4111.

[8] In Category 369–D, only TSUSA numbers 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440 and 366.2660.

[9] In Category 369–U, only TSUSA numbers 366.0410 and 366.5210.

[10] In Category 369–0, all TSUSA numbers except 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440, 366.2660 in Category 369–D; 366.0410, 366.5210 in Category 369–U; 706.3210, 706.3260, 706.3640, 706.3650, 706.4106 and 706.4111 in Category 369–B; and 365.0260 (cotton waste and wadding).

[11] In Category 604–A, only TSUSA numbers 310.5049 and 310.6045.

[12] In Category 604–O/607–O, all TSUSA numbers except 310.5049 and 310.6045 in Category 604–O and all TSUSA numbers except 310.6034 in Category 607–O.

[13] In Category 659–C, only TSUSA numbers 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607 and 384.9310.

[14] In Category 659–H, only TSUSA numbers 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650.

[15] In Category 659–S, only TSUSA numbers 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353.

[16] In Category 659–0, all TSUSA numbers except 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607, 384.9310 in Category 659–C; 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650 in Category 659–H; and 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353 in Category 659–S.

[17] In Category 669–P, only TSUSA numbers 385.5300.

[18] In Category 669–O, all TSUSA numbers except 348.0065, 384.0075, 348.0565, 348.0575 in Category 669pt.; and 385.5300 in Category 669–P.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during the period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the limits set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreement.

BILLING CODE 3510–DR–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1988; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1988 a commodity to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: April 11, 1988.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On July 24, 1987 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (52 FR 27842) of proposed addition to Procurement List 1988, December 10, 1987 (52 FR 46926).

Two letters were received from the current contractor for this belt commenting on the proposed addition. That firm indicated that the belt is a DOD industrial preparedness program item, a safety critical life support item, and must be manufactured under stringent specification reauirements. The commentor indicated further that his firm has been a consistent supplier to the Government for the item and its addition to the Procurement List would have a serious negative economic impact on his firm and that the Department of Navy had indicated that there had not been a facility survey of the workshop to determine its capability to produce the belt.

The workshop proposing to produce this belt was inspected by the procuring activity and was determined to be capable of producing the belt in compliance with Government's requirements. In addition, the workshop has produced a similar belt satisfactorily for the Government. The fact that the belt is a DOD industrial preparedness program item does not preclude its being added to the Procurement List. There are a number of items on the Procurement List for which the producing workshops have been identified as DOD industrial preparedness producers.

The value of the contract of the current contractor for this belt represents approximately 3.4 percent of the firm's total sales. This is not considered to be severe impact.

This belt meets the definition of suitability contained in 41 CFR 51–2.6.

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77 and 41 CFR 51–2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the commodity listed.

c. The action will result in authorizing small entities to produce the commodity procured by the Government.

Accordingly, the following commodity is hereby added to Procurement List 1988:

Commodity

Belt, Aircraft Safety; 1680–00–407–5335.

C.W. Fletcher,

Executive Director.

BILLING CODE 6820–33–M

Procurement List 1988; Proposed Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions and Deletions to Procurement List.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1988 military resale commodities to be produced by and services to be provided by workshops for the blind or other severely handicapped.

DATE: Comments Must be Received on or Before April 11, 1988.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1775 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the military resales commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following military resale commodities and services to Procurement List 1988, December 10, 1987 (52 FR 46926):

Military Resale Item Nos. and Names

No. 620	Vest, Safety, Joggers, Small
No. 621	Vest, Safety, Joggers, Medium
No. 622	Vest, Safety, Joggers, Large
No. 820	Opener, Can & Bottle
No. 824	Slicer, Cheese
No. 826	Peeler, Vegetable
No. 828	Cutter, Pizza
No. 832	Spatula, Plate & Bowl
No. 850	Bib, Baby, Cotton
No. 860	Hooks, Laundry, Plastic
No. 862	Brush, Lint, Plastic

Services

Cleaning of Magnetic Tapes,
Robins Air Force Base, Georgia

Janitorial Service, Fort Gillem, Georgia

Litter Pick-Up, Tinker Air Force Base, Oklahoma

Preservation and Packaging, New Cumberland Army Depot, Pennsylvania

Repair of Strap, Air Cargo (1670–00–725–1437), Robins Air Force Base, Georgia

Deletions

It is proposed to delete the following military resale commodities, commodity, and service from Procurement List 1988, December 10, 1987 (52 FR 46926):

Military Resale Item Nos. and Name

No. 940	Towel, Heritage design
No. 942	Dish Cloth, Heritage design

Refill, List Finder, Automatic, 7510–00–285–2800

Administrative Services, Environmental Protection Agency, at the following locations:
  Beltsville Research Laboratory, Beltsville, Maryland
  6100 Executive Boulevard, Rockville, Maryland
  9100 Brookville Road, Silver Spring, Maryland

C. W. Fletcher,

Executive Director.

BILLING CODE 6820–33–M

DEPARTMENT OF DEFENSE

Department of the Air Force

Intent To Prepare Environmental Impact Statement; Malmstrom AFB, MT

The United States Air Force, Department of Defense, will prepare an Environmental Impact Statement (EIS) for use in decision making regarding the proposed basing of a second KC–135R squadron at Malmstrom AFB, Montana.

The aircraft would begin arriving during the fourth quarter of Fiscal Year 1991. The 13 additional aircraft would result in an increase of about 250 personnel. The aircraft would fly about 900 missions per year.

The proposed KC–135R basing action will be incorporated in the EIS for the Peacekeeper Rail Garrison System, previously announced. The US Air Force is planning to conduct a public scoping meeting to determine the nature, extent, and scope of the environmental issues and concerns to be addressed in the EIS. The KC–135R proposal will be included in the scoping meeting for the

VOL 53 ISS 48 MR 11 1988 UMI

Peacekeeper Rail Garrison Sysem to be held on 23 March 1988 at 7:00 p.m. in the Great Falls High School, Great Falls, Montana.

For further information concerning the proposed basing of a second KC–135R squadron at Malmstrom AFB, MT, contact Mr. William Taylor, HQ SAC/DEVE, Offutt AFB, NE 68113–5001.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

DEPARTMENT OF ENERGY

Advisory Committee on Nuclear Facility Safety; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Advisory Committee on Nuclear Facility Safety.

Date and Time: Tuesday, March 29, 1988, 9:00 a.m. to 6:00 p.m. Wednesday, March 30, 1988, 9:00 a.m. to 1:00 p.m.

Place: U.S. Department of Energy, Forrestal Building, Room 8E–089, 1000 Independence Avenue SW., Washington, DC 20585.

Contact: Wallace R. Kornack Executive Director, ACNFS, S–3, 1000 Independence Avenue SW., Washington, DC 20585, Telephone: 202/586–1770.

Purpose of the Committee: The Committee was established to provide the Secretary of Energy with advice and recommendations concerning the safety of the Department's production and utilization facilities, as defined in section 11 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2014).

Tentative Agenda: March 29, 1988—Technical Session

- Presentation of DOE's Safety Philosophy, Approach and Program
- Noon to 1:00 p.m.—Lunch
- National Academy of Sciences (NAS) Presentation of NAS/NAE Report on Production Reactors
- Status of NAS/NAE Study on other Class A Reactors
- DOE Response to NAS/NAE Report
- New Production Reactor: Status Report
- Public Comment

March 30, 1988—Planning Session

- Committee Administrative Matters
- Committee Discussion of Scope and Priorities
- Discussion of Possible Subcommittees
- Agenda for Next Meeting
- Public Comment

Public Participation. The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Wallace Kornack at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: The transcript of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room IE–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington DC, on March 7, 1988.

Howard H. Raiken,

Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Uranium Mill Tailings; Naturita, CO

AGENCY: Department of Energy.

ACTION: Program Information Notice: Advance notice of decision on proposed inclusion of a private property near Naturita, Colorado as a vicinity property for remedial action under section 101 of Pub. L. 95–604, the "Uranium Mill Tailings Radiation Control Act of 1978", enacted on November 8, 1978.

SUMMARY: The "Uranium Mill Tailings Radiation Control Act of 1978" authorized the Department of Energy (DOE) to conduct in cooperation with interested states, Indian Tribes, and persons who own or control certain inactive mill tailings sites, a program of assessment and remedial action to stabilize and control the tailings in a safe and environmentally sound manner and to minimize or eliminate radiation health hazards at these sites and at nearby vicinity properties.

The DOE has been requested by the Hecla Mining Company to include its "Durita" property as a vicinity property for the purposes of remedial action under the Act.

This advance notice is to alert interested parties that DOE will be soliciting the views of interested parties on its proposed decision regarding the inclusion of the "Durita" property. In a subsequent notice, which we expect to issue within 30 days, DOE will provide more details on the request and seek comments on its decision.

FOR FURTHER INFORMATION CONTACT: Mr. W. John Arthur III, Acting Project Manager, Uranium Mill Tailings Project Office, U.S. Department of Energy, 5301 Central Avenue NE., Suite 1720, Albuquerque, New Mexico, 87108, telephone: (505) 844–3941, or Mr. James A. Turi, Director, Division of Uranium Mill Tailings Projects, Office of Nuclear Energy, U.S. Department of Energy, Mail Stop NE–22, Washington, DC 20545, telephone: (301) 353–2585.

Issued in Washington, DC, March 3, 1988.

John E. Baublitz,

Acting Director, Office of Remedial Action and Waste Technology, Office of Nuclear Energy.

BILLING CODE 6450-01-M

Atomic Energy Agreements; Proposed Subsequent Arrangement; EURATOM and Switzerland

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation between the Government of the United States of America and the Government of Switzerland concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following retransfer:

RTD/SD(EU)–50, for the retransfer of 8 irradiated fuel rods containing 3,420 grams of uranium enriched to 1.46 percent in the isotope uranium-235 and 30 grams of plutonium from Belgium to Switzerland for post-irradiation examination.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: March 8, 1988.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

BILLING CODE 6450-01-M

Assistant Secretary for International Affairs and Energy Emergencies

Atomic Energy Agreements; Proposed Subsequent Arrangement; Norway and Sweden

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the Government of the United States of America and the Government of Sweden concerning Peaceful Uses of Nuclear Energy, and the Agreement for Cooperation between the Government of the United States of America and the Government of Norway concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following retransfer:

RTD/NO(SW)–18, for the transfer of 10 kilograms of uranium samples enriched to approximately 4.5 percent in the isotope uranium-235 from Sweden to the Institutt for Energiteknikk, Kjeller, Norway, for use in safeguards control analysis. After examination, the samples will be disposed of as waste.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Date: March 8, 1988.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

BILLING CODE 6450-01-M

Atomic Energy Ageement; Proposed Subsequent Arrangement; Sweden and Euratom

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the Government of the United States of America and the Government of Sweden concerning Peaceful Uses of Nuclear Energy, and the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following retransfer:

RTD/EU (SW)–78, for the transfer from Sweden to the Federal Republic of Germany of 28,302 kilograms of uranium oxide, enriched to approximately 4 percent in the isotope uranium-235, for fabrication of fuel for use in light water power reactors in the Federal Republic of Germany.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Date: March 8, 1988.

BILLING CODE 6450-01-M

Atomic Energy Agreements; Proposed Subsequent Arrangement; Switzerland

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between Government of the United States of America and the Government of Switzerland concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreement involves the post-irradiation examination of 8 irradiated rods at the Swiss Institute for Reactor Research (EIR), Wuerlingen, Switzerland. This subsequent arrangement records the joint determination of the Government of the United States of America and the Government of Switzerland that safeguards may be effectively applied to the post-irradiation examination at the EIR facility in Switzerland for the said irradiated rods.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: March 8, 1988.

Economic Regulatory Administration

[ERA Docket No. 88–05–LNG]

Distrigas Corp.; Order Granting Amended Authorization To Import Algerian Liquefied Natural Gas

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting amended authorization to import Algerian liquefied natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy gives notice that it has issued an order amending Distrigas Corporation's (Distrigas) current authorization, issued in ERA Docket No. 77–011–LNG On December 31, 1977, under which Distrigas imports liquefied natural gas (LNG) from Algeria. The order, issued in ERA Docket No. 88–05–LNG, authorized Distrigas to import up to five cargoes of LNG prior to May 15, 1988, at prices lower than are currently authorized.

A copy of this order is available in the Natural Gas Division Docket Room, GA–076, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20505, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, on March 4, 1988.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA C&E 88–07; Certification Notice—12]

Coal Capability of New Electric Powerplants; Filing of Certification of Compliance by Thermo Michigan, Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Filing.

In the matter of a notice of filing of certification of compliance; coal capability of new electric powerplants pursuant to provisions of the Powerplant and Industrial Fuel Use Act, as amended (42 U.S.C. 8311 section 201(d)).

SUMMARY: Title II of the Powerplant and Industrial Fuel Use Act of 1978, as amended ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) provides that no new electric powerplant may be constructed or operated as a base load powerplant without the capability to use coal or another alternate fuel as a primary energy source (section 201(a)). In order to meet the requirement of coal capability, the owner or operator of any new electric powerplant to be operated as a base load powerplant proposing to use natural gas or petroleum as its primary energy source may certify, pursuant to section 201(d) to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) as of the date it is filed with the Secretary. The Secretary is required to publish in the **Federal Register** a notice reciting that the certification has been filed. One owner and operator of a proposed new electric base load powerplant has filed a self certification in accordance with section 201(d). Further information is provided in the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION: The following company filed a self certification:

Name	Date received	Type facility	Megawatt capacity	Location
Thermo Michigan, Inc, Detroit, Michigan.	2-23-88	Cogeneration Combined Cycle.	90	Big Rapids, MI.

Amendments to FUA on May 22, 1987 (Pub. L. 100–42) altered the general prohibitions to include only new electric baseload powerplants and to provide for the self certification procedure.

Issued in Washington, DC on March 7, 1988.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of requests submitted for clearance to the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for approval under provisions of the Paperwork Reduction Act (44 U.S.C. Ch. 35).

The listing does not contain information collection requirements contained in new or revised regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) Annual respondent burden, i.e., an estimate of the total number of hours needed to respond to the collection; and (12) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed on or before April 11, 1988.

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards, at the address below.)

FOR FURTHER INFORMATION CONTACT: Carole Patton, Office of Statistical Standards (EI–70), Energy Information Administration, M.S. 1H–023, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–2222.

SUPPLEMENTARY INFORMATION: If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this Notice, you should advise the OMB DOE Desk Officer of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395–3084.

The first energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–544
3. N.A.
4. Gas Pipeline Rates: Rate Change (Formal)
5. New Collection
6. On Occasion
7. Mandatory
8. Businesses or other for profit
9. 125 respondents
10. 86.25 responses
11. 413,443 hours
12. Pursuant to sections 4, 5, and 16 of the Natural Gas Act, the Commission requires these data to determine if an interstate pipeline's rate filing complies with requirements and that the rate/charge for the transportation/sale of jurisdictional natural gas is just and reasonable. (Formal)

The second energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–545
3. N.A.
4. Gas Pipeline Rates: Rate Change (Non-Formal)
5. New Collection
6. On Occasion
7. Mandatory
8. Businesses or other for profit
9. 125 respondents
10. 183.75 responses
11. 14,700 hours
12. Pursuant to sections 4, 5, and 16 of the Natural Gas Act, the Commission requires these data to determine if an interstate pipeline's rate filing complies with requirements and that the rate/charge for the transportation/sale of jurisdicational natural gas is just and reasonable. (Non-Formal)

The third energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–546
3. N.A.
4. Gas Pipeline Rate: Certificated Rate Filings
5. New Collection
6. On occasion
7. Mandatory
8. Businesses or other for profit
9. 125 respondents
10. 583.75 responses
11. 23,350 hours
12. Pursuant to sections 4, 5 and 16 of the Natural Gas Act, the Commission requires these data to determine if an interstate pipeline's rate filing complies with requirements and that the rate/charge for the transportation/sale of jurisdictional natural gas is just and reasonable.

The fourth energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–547
3. 1902–0084
4. Gas Pipeline Rates: Refund Obligations
5. Extension
6. On occasion
7. Mandatory
8. Businesses or other for profit
9. 125 respondents
10. 325 responses
11. 26,000 hours
12. The filing of refund reports is necessary to ensure compliance with the Natural Gas Act and the Natural Gas Policy Act, and the correct refunding of amounts which were overcharged.

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Pub. L. 93–275, Federal Energy Administration Act of 1974, (15 U.S.C. 764(a), 764(b), 772(b), and 790(a)).

Issued in Washington, DC, March 7, 1988.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

Office of Fossil Energy

Liquids Transportation Task Group, Coordinating Subcommittee on Petroleum Storage and Transportation of the National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

Name: Liquids Transportation Task Group, Coordinating Subcommittee on Petroleum Storage & Transportation of the National Petroleum Council.

Date and Time: Thursday, March 24, 1988, 1:00 p.m.

Place: National Petroleum Council, 1625 K Street NW., Conference Room, Washington, DC.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC. 20585, Telephone: 202/586–4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Discuss pipeline survey and progress on individual assignments.

Tentative Agenda:

—Opening remarks by Chairman and Government Cochairman.
—Discuss the pipeline survey.
—Review progress on individual assignments.
—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC., between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday, except Federal holidays.

Availability of EPA comments prepared February 22, 1988 through February 26, 1988 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in the Federal Register FR dated April 24, 1987 (52 FR 13749).

Draft EISs

ERP No. D-BLM-K61068-CA, Rating EC2, California Section 202 Wilderness Study Areas Recommendation, Wilderness Designation or Nondesignation, Implementation, Bakersfield, Susanville and Ukiah Districts, San Luis Obispo, Tulare, Kern, Modoc, Tehama, Mendocino and Trinity Counties, CA and Carson City District, Alpine County, NV.

Summary: EPA supports the proposed wilderness recommendation for best protesting air and water quality. However, EPA is concerned that the individual and cumulative effect of activities allowed under non-wilderness designation have the potential to degrade water quality and riparian habitats.

ERP No. DS-COE-H32009-00, Rating E02, Mississippi River Locks and Dam 26 Replacement Construction, Second Lock, Updated Information, Implementation, Upper Mississippi and Illinois Rivers, Alton, Madison County, IL and St. Louis, MO.

Summary: EPA continues to have concerns about the lack of information necessary to adequately assess impacts and identify mitigation. EPA is also concerned that alternatives are not thoroughly discussed. EPA requests that the deficiencies be addressed in the final EIS and that the ROD include: (1) A draft plan of study for determining impacts; (2) a detailed schedule for implementation; (3) a determination of need for mitigation; and (4) a commitment to implement mitigation. Further, EPA plans on entering into a MOU with the Corps to insure EPA involvement in the development and implementation of the study.

ERP No. D-FRC-L05196-ID, Rating E02, Twin Falls (FERC No. 18), Milner (FERC No. 2899), Auger Falls (FERC No. 4797) and Star Falls (FERC No. 5797) Hydroelectric Projects on the Mainstream of the Snake River, Construction, Operation, and Maintenance Licenses, Upper Snake River Basin, Twin Falls and Jerome Counties, ID.

Summary: EPA has environmental objections to the FERC staff-preferred alternative due to anticipated water quality and wetland impacts from the Auger Falls project. Additional information is needed to fully assess environmental impacts. Mitigation also needs to be proposed for wetland impacts.

Final EISs

ERP No. F-BLM-J61055-WY, Adobe Town and Ferris Mountain Wilderness Study Areas, Wilderness Recommendations, Designation or Nondesignation, Rawlins District, Carbon and Sweetwater Counties, WY.

Summary: EPA supports the proposed action (all wilderness) for the Ferris Mountain Wilderness Study Area. Further, EPA is pleased that BLM has chosen to recommend the partial wilderness/conflict resolution alternative for Adobe Town WSA.

ERP No. F-BOP-D81015-PA, Schuylkill Federal Correctional Institution Complex, Construction and Operation, Schuylkill County, PA.

Summary: EPA feels this document adequately addresses all previous concerns regarding the project.

ERP No. FB-COE-K35012-CA, Sacramento River Bank Protection Project, Butte Basin Reach (River Miles 176 to 194) Stabilization, Updated Information, Butte and Glenn Counties, CA.

Summary: EPA expressed concerns that mitigation measures committed to by the Army Corps in an earlier EIS for this project was not included in this document.

ERP No. F-FHW-G40115-AR, US 65 Bypass Construction, US 65/US 270 Interchange and Bryant Street Intersection to US 65/US 65B Interchange, Funding and 404 Permit, Pine Bluff, Jefferson County, AR.

Summary: EPA feels this document adequately satisfies the requirements of NEPA and those areas within EPA's jurisdiction and expertise.

ERP No. F-MMS-L02016-AK, 1988 Chukchi Sea Outer Continental Shelf (OCS) Oil and Gas Sale No. 109, Leasing, AK.

Summary: EPA continues to have environmental concerns about the proposed full-lease alternative. EPA's major concern is the effects of oil and gas activities on endangered bowhead whales. The biological opinion indicated long-term development and production activities in the bowhead whale spring migration corridor would likely jeopardize the population. Since leasing decisions will determine where future development and production facilities are located, then leasing should not be allowed in the sensitive spring migration corridor. EPA supports the Coastal Deferral alternative.

Dated: March 8, 1988.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Extension of 3067-0024
Title: General Admission Application and Class Attendance Roster
Abstract: Information collected in connection with stipend reimbursement programs and enrollment at the National Emergency Training Center.
Type of Respondents: Individuals or households, State or Local Governments, Federal agencies or employees, Non-profit institutions
Number of Respondents: 15,000
Burden Houses: 3,000
Frequency of Recordkeeping or Reporting: Weekly and Other

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646-2624, 500 C. Street, Washington, DC 20472.

Comments should be directed to Francine Picoult, (202) 395-7231, Office of Management and Budget, 3235 NEOB, Washington, DC 20503 within two weeks of this notice.

Dated: February 19, 1988.

Wesley C. Moore,

Director Office of Administrative Support.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203-011117-002

Title: North American/Australasia Interconference and Carrier Discussion Agreement

Parties: Pacific Coast/Australia-New Zealand tariff; Bureau; U.S. Atlantic & Gulf/Australia-New Zealand Conference; Blue Star Line, Ltd.; Pacific Australia Direct Line; Columbus Line; Associated Container Transportation (Australia) Ltd.; Ocean Star Container Line A.G.; Australia-New Zealand Direct Line

Synopsis: The proposed amendment would add Scancarriers as a party to the agreement. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission

Joseph C. Polking,

Secretary.

Dated: March 8, 1988.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

March 7, 1988.

Background

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulation on Controlling Paperwork Burdens on the Public).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202-452-3822).

OMB Desk Officer—Robert Fishman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503, (202-395-7340).

Proposal To Approve Under OMB Delegated Authority the Extension, With Revision, of the Following Reports

1. *Report Title:* Criminal Referral Form
Agency Form Number: FR 2230
OMB Docket Number: 7100-0212
Frequency: On occasion
Reporters: State member banks, bank holding companies, Edge Act and Agreement corporations, and U.S. branches and agencies of foreign banks
Annual Reporting Hours: 1955
Small businesses are affected.

General Description of Report

This information collection is voluntary (12 U.S.C. 248(a)(1), 625, and 1844(c)) and is given confidential treatment (5 U.S.C. 552(b)(7) and 552a(k)(2)).

This form has been jointly designed and used by the federal financial institutions supervisory agencies, the Department of Justice, and the F.B.I. It is also used by the U.S. Secret Service and U.S. Department of Treasury. The purpose of the form is to detect and track suspected criminal misconduct involving financial institutions and persons associated with them. The revisions address issues raised by recently enacted legislation as well as suggestions made by representatives of supervisory agencies, the federal law enforcement community, and financial institutions in light of experience gained with use of the form since its inception in 1985.

2. *Report Title:* Report of Changes in Foreign Investments
Agency Form Number: FR 2064
OMB Docket Number: 7100-0109
Frequency: On occasion
Reporters: Member banks, bank holdings companies and Edge and Agreement corporations making or changing a foreign investment
Annual reporting hours: 180
Small businesses are not affected.

General Description of Report

This report is required by law (12 U.S.C. 602 and 1844). Certain portions are given confidential treatment (5 U.S.C. 552(b)(4)).

This report provides information needed to enable the Federal Reserve to monitor foreign investments by U.S. banking organizations. The report is used to notify the Federal Reserve of foreign investment changes as required under Regulation K, and to provide a basis for updating the System's information on foreign investments.

Board of Governors of the Federal Reserve System, March 7, 1988.

William W. Wiles,

Secretary of the Board.

[FR Doc. 88-5334 Filed 3-10-88; 8:45 am]

BILLING CODE 6210-01-M

Bank of Boston Corp.; Proposal To Underwrite and Deal in Certain Securities to a Limited Extent

Bank of Boston Corporation, Boston, Massachusetts ("Applicant"), has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.23(a)(3), of the Board's Regulation Y (12 CFR 225.23(a)(3)), for permission to engage in the activities of underwriting and dealing in, to a limited degree, commercial paper, municipal revenue bonds (including "public ownership" industrial development bonds), 1-4 family mortgage-related securities and consumer-receivable-related securities ("ineligible securities"). These securities are eligible for purchase by banks for their own account but not eligible for banks to underwrite and deal in.

Applicant has also applied to underwrite and deal in securities that state member banks are permitted to underwrite and deal in under the Glass-Steagall Act ("eligible securities") (U.S. government securities, general obligations of states and municipalities and certain money market instruments), as permitted by § 225.25(b)(16) of Regulation Y (12 CFR 225.25(b)(16)). Company would conduct the proposed activities on a nationwide basis.

The application presents issues under section 20 of the Glass-Steagall Act (12 U.S.C. 377). Section 20 of the Glass-Steagall Act prohibits the affiliation of a member bank, such as The First National Bank of Boston, with a firm that is "engaged principally" in such activities on the basis of the restrictions on the amount of the proposed activity relative to the total business conducted by the underwriting subsidiary.

Applicant has applied to underwrite and deal in ineligible securities in accordance with most of the limitations set forth in the Board's Orders approving those activities for a number of bank holding companies. *See e.g., Citicorp, J.P. Morgan & Co. Incorporated and Bankers Trust New York Corporation,* 73 Federal Reserve Bulletin 473 (1987) (underwriting and dealing in commercial paper, municipal revenue bonds and mortgage-related securities) (*"Citicorp/Morgan/Bankers Trust"*); and *Chemical New York Corporation, The Chase Manhattan Corporation, Bankers Trust New York Corporation, Citicorp, Manufacturers Hanover Corporation and Security Pacific Corporation,* 73 Federal Reserve Bulletin 731 (1987) (underwriting and dealing in consumer-receivable-related securities) (*"Chemical"*). Applicant's proposal differs from the Board's *Citicorp/Morgan/Bankers Trust* and *Chemical* Orders in the following respects:

1. Company would underwrite and deal in ineligible securities up to 10 percent of Company's gross revenue and 5 percent of the market;

2. Company would underwrite and deal in ineligible securities which, in accordance with *Citicorp/Morgan/Bankers Trust,* are rated in the top four categories by a national rating agency, but Company would also underwrite and deal in ineligible securities that it determines, based on its own credit analysis and evaluation, meet the standards used by such rating organizations to identify bonds of the four highest investment grades;

3. Company would have a limited number of management interlocks with The First National Bank of Boston (specifically, four officers of the bank would also be officers of Company and four directors of Company would also be directors or officers of the bank, but two of Company's directors would have no positions with either the bank or with Applicant);

4. Applicant would *not* commit to exclude its investment in Company and Company's assets in determining the holding company's consolidated primary capital under the Board's capital adequacy guidelines;

5. Company would place its affiliates' commercial paper and debt obligations as agent as an incidental activity;

6. Company would underwrite and deal in "public ownership" industrial development bonds which are *not* tax-exempt; and

7. Applicant would establish Company on the premises of The First National Bank of Boston (Applicant has committed that Company would be clearly identified as separate from the bank by physical separation of staff and appropriate signs).

In publishing Applicant's proposal for comment, the Board does not take any position on the differences between Applicant's proposal and the Board's prior ineligible securities underwriting orders. Notice of the proposal is published solely in order to seek the views of interested persons and does not represent a determination by the Board that the proposal is consistent with the Board's prior orders.

Any request for a hearing on this application must comply with 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)).

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Boston.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than March 30, 1988.

Board of Governors of the Federal Reserve System, March 4, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-5335 Filed 3-10-88; 8:45 am]

BILLING CODE 6210-01-M

The Boston Bancorp et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 4, 1988.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *The Boston Bancorp,* South Boston, Massachusetts; to become a bank holding company by acquiring 100 percent of the voting shares of South Boston Savings Bank, South Boston, Massachusetts.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Banks of Iowa, Inc.,* Des Moines, Iowa; to acquire 100 percent of the voting shares of United Bank & Trust, Ames, Iowa.

2. *First of America Bank Corporation,* Kalamazoo, Michigan, and *First of America Bancorporation-Illinois, Inc.,* Libertyville, Illinois; to acquire 100 percent of the voting shares of Sheridan Bank of Peoria, Peoria, Illinois.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *HRH Bancorp, Inc.,* Grant City, Missouri; to become a bank holding company by acquiring 99.4 percent of the voting shares of Farmers Bank of Grant City/Sheridan, Grant City, Missouri.

D. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Ford Bank Group, Inc.,* Lubbock, Texas; to acquire 100 percent of the voting shares of Lubbock Bancorporation, Inc., Lubbock, Texas, thereby indirectly acquire Bank of the West, Lubbock, Texas.

E. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. Napa Valley Bancorp, Napa, California; to acquire 100 percent of the voting shares of Bank of Lake County, National Association, Lakeport, California, a *de novo* bank.

Board of Governors of the Federal Reserve System, March 7, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Acquisitions of Shares of Banks or Bank Holding Companies; Equimark Managing Partners et al.

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 4, 1988.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Equimark Managing Partners*, Pittsburgh, Pennsylvania; through Alan S. Fellheimer and Judith E. Fellheimer, general partners of the partnership, Sewickley Heights, Pennsylvania; and Claire W. Gargalli, Henry Posner, James H. McLaughlin, George F. Eichleay, David J. East, S. Raymond Rackoff, Howard W. Hanna, III, Patricia A. Muldoon, Dennis Pitocco, all of Pittsburgh, Pennsylvania; David A. Gardner, New York, New York; Charles G. Cheleden, Horsham, Pennsylvania; Judith E. Yankovic, Robinson Township, Pennsylvania; James M. Murphy, Bethel Park, Pennsylvania; J. Bruce Johnston, McMurray, Pennsylvania; William F. Jones, Jr. and Nicholas J. Zennario, both of Wexford, Pennsylvania; Dennis F. Kennedy and Emerson Wickwire, both of Sewickley, Pennsylvania; and Robert C. Payment, Butler, Pennsylvania; to acquire 21.41 percent of the voting shares of Equimark Corporation, Pittsburgh, Pennsylvania.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Lawrence O. Hauge*, Henderson, Minnesota; to acquire an additional 92.2 percent of the voting shares of Henderson Bancorporation, Inc., Henderson, Minnesota; thereby indirectly acquire Sibley County Bank, Henderson, Minnesota.

C. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Edward L. Birckhead*, Dubois, Wyoming; to acquire an additional 1.2 percent of the voting shares of Riverton State Bank Holding Company, Riverton, Wyoming; thereby indirectly acquire Dubois National Bank, Dubois, Wyoming, and Riverton State Bank, Riverton, Wyoming.

2. *Donald A. Sloan*, Richardson, Texas; to acquire an additional 28.12 percent of the voting shares of Rawlins Bancshares, Inc., Atwood, Kansas; thereby indirectly acquire Farmers Bank and Trust, Atwood, Kansas.

D. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Donald E. Reily*, Lufkin, Texas; to acquire 29.2 percent of the voting shares of Citizens State Financial Corporation, Corrigan, Texas.

2. *Ray H. Reily*, Livingston, Texas; to acquire 27.56 percent of the voting shares of Citizens State Financial Corporation, Corrigan, Texas.

Board of Governors of the Federal Reserve System, March 7, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Florida National Banks of Florida, Inc. et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than April 1, 1988.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Florida National Banks of Florida, Inc.*, Jacksonville, Florida; to acquire Florida National Insurance Services, Inc., Jacksonville, Florida, and thereby engage in underwriting, as a reinsurer, of credit-related life and credit-related accident, health and disability insurance in connection with extensions of credit, pursuant to § 225.25(b)(8) of the Board's Regulation Y.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on February 26, 1988.

Social Security Administration

(Call Reports Clearance Officer on 301-965-4149 for copies of package)

1. Request for Correction of Earnings Record—0960-0029—When an individual questions the accuracy of his or her earnings record, SSA uses the information obtained by this form to check against their record and, if necessary, to develop for evidence of earnings. Respondents: Individuals or households. Number of Respondents: 100,000; Frequency of Response: Occasionally; Estimated Annual Burden: 16,666 hours.

2. Supplement to Claim of Person Outside the United States—0960-0051—The information collected by this form is used by SSA to determine the continuing entitlement to benefits and the proper benefit amounts of aliens living outside the U.S. It is also used to determine if those benefits are subject to withholding tax. Respondents: Individuals or households. Number of Respondents: 35,000; Frequency of Response: Occasionally; Estimated Annual Burden: 2,917 hours.

3. Request to be Selected as Payee—0960-0014—This form is used by SSA to help determine the proper representative for a person who cannot receive his or her own social security benefits. Respondents: Individuals or households. Number of Respondents: 605,000; Frequency of Response: Occasionally; Estimated Annual Burden: 100,833 hours.

4. You Can Make Your Payment By Credit Card—NEW—The information collected by use of the forms SSA-4588 and SSA-4589 is needed for the Social Security Administration and certain banks in order that title II debtors may repay overpayments via credit cards. The affected public is comprised of title II beneficiaries who have been overpaid. Respondents: Individuals or households. Number of Respondents: 160,000; Frequency of Response: Occasionally; Estimated Annual Burden: 13,333 hours.

OMB Desk Officer: Elaina Norden

Health Care Financing Administration

(Call Reports Clearance Officer on 301-594-1238 for copies of package)

1. Information Collection Requirements Contained in 42 CFR 447.253—NEW—These regulatory provisions will require the Medicaid agency to submit along with their States plan, assurances and related information whenever the State makes any changes to its methods and standards for determining payment rates. Respondents: State or local governments. Number of Respondents: 54; Frequency of Response: One-time; Estimated Annual Burden: 54 hours.

OMB Desk Officer: Allison Herron

Office of Human Development Services

(Call Reports Clearance Officer on 202-472-4415 for copies of package)

1. National Study of Child Care Supply, Demand and Economic Information—NEW—A national sample survey of supply and demand of licensed child care providers in both centerbased care and family based care settings. Respondents: Individuals or households, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 3,500; Frequency of Response: One-time; Estimated Annual Burden: 1,750 hours.

OMB Desk Officer: Shannah Koss-McCallum

Public Health Services

(Call Reports Clearance Officer on 202-245-2100 for copies of package)

National Institutes of Health

1. Preterm and Small for Gestational Age Delivery Across Generations—NEW—Previous studies have shown a correlation between maternal and infant birth weight. It is not known if this is caused by differences in duration of pregnancy or rate of growth. The proposed study will help resolve this issue. The results of this project will be used for research studies aimed at the prevention of low birth weight deliveries. Respondents: Individuals or households, State or local governments, Businesses or other for-profit. Number of Respondents: 1,577; Frequency of Response: One-time; Estimated Annual Burden: 611 hours.

2. Drug Accountability Record—0925-0240—These forms will be used by investigational new drugs under NCI clinical protocols. These forms will serve as a link between the NCI drug distribution data and the protocol patient data to ensure that investigational drugs are being used properly, in accordance with the "Notice(s) of Claimed Investigational Exemption for a New Drug" filed by the National Cancer Institute with the Food and Drug Administration. Respondents: State or local governments, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations. Number of Respondents: 4,000; Frequency of Response: Occasionally; Estimated Annual Burden: 2,020 hours.

Food and Drug Administration

1. Premarket Notification Submission (510(k))—Subpart E-21 CFR 807—0910-0120—Manufacturers wishing to distribute new or changed medical devices must submit a premarket notification to FDA, 90 days before marketing. FDA reviews the notification and determines whether the product is substantially equivalent to a preamendments device. Those which are equivalent may be marketed immediately, and those which are not may not be marketed without further evaluation. Respondents: Businesses or other for-profit, Small businesses or organizations. Number of Respondents: 5,000; Frequency of Response: Occasionally; Estimated

Annual Burden: 78,000 hours.

2. Tamper-resistant Packaging Requirements for Contact Lens Solution and Tablets—0910-0150—The regulation requires that containers for contact lens solutions and/or tablets be tamper-resistant, and appropriately labeled as such. Firms may request an exemption from the regulation's requirements. Respondents: Individuals or households, Small businesses or organizations. Number of Respondents: 35; Frequency of Response: Occasionally; Estimated Annual Burden: 350 hours.

Indian Health Service

1. Pub. L. 93-638—Initial and Renewal Contract: Application, Tribal Clearance and Contract Law Waiver—0915-0040—Pursuant to P.L. 93-638 an American Indian Tribal organization may apply to IHS for a contract to carry out certain functions of IHS and may request a contract law to be waived. Specific information is to be collected for initial contracts, Tribal clearances and contract law waivers. Respondents:

State or local governments. Number of Respondents: 280; Frequency of Response: Occasionally; Estimated Annual Burden: 1,100 hours.

OMB Desk Officer: Shannah Koss-McCallum

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, on one of the following numbers:

PHS: 202–245–2100
HDS: 202–472–4415
SSA: 301–965–4149
HCFA: 301–594–1238

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, Attn: (Name of OMB Desk Officer)

Date: March 7, 1988.

James F. Trickett,

Deputy Assistant Secretary, Administrative and Management Services.

[FR Doc. 88–5376 Filed 3–10–88; 8:45 am]

BILLING CODE 4150-04-M

Food and Drug Administration

Workshop on the Application of Biosafety Principles in Blood Establishments; Public Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice

SUMMARY: The Food and Drug Administration (FDA) is announcing a public workshop to discuss the application of biosafety principles in the prevention of infectious disease transmission in blood establishments such as blood banks and source plasma centers.

DATE: The workshop will be held on Friday, April 8, 1988, 8 a.m.–5:00 p.m.

ADDRESS: The workshop will be held at the National Institutes of Health, Warren Grant Magnuson Clinical Center, Bldg. 10, Jack Masur Auditorium, 9000 Rockville Pike, Bethesda, MD.

FOR FURTHER INFORMATION CONTACT: Linda A. Smallwood, Center for Biologics Evaluation and Research, Food and Drug Administration (HFB–830), 8800 Rockville Pike, Bethesda, MD 20892, 301–496–0393.

SUPPLEMENTARY INFORMATION: The FDA, the Centers for Disease Control, the Occupational Safety and Health Administration, the Environmental Protection Agency, and the Health Care Financing Administration have planned a public workshop to discuss the application of biosafety principles in the prevention of infectious disease transmission in blood establishments such as blood banks and source plasma centers. Among the major topics to be discussed are: (1) Scientific background, (2) employee protection programs, (3) operational issues, and (4) transportation issues.

Dated: March 4, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[FDA 225–87–2001]

Memorandum of Understanding With the Department of Agriculture and Food of Ireland

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is providing notice of a memorandum of understanding (MOU) between the Department of Agriculture and Food of Ireland and FDA, U.S. Department of Health and Human Services. This MOU describes the mutual goals of the Department of Agriculture and Food of Ireland and FDA to establish certification requirements for the caseins, caseinates, and mixtures thereof exported from Ireland to the United States and to minimize the need for extensive FDA audit sampling of these certified products from Ireland.

DATE: This agreement became effective January 22, 1988.

FOR FURTHER INFORMATION CONTACT: Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC–50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1583.

SUPPLEMENTARY INFORMATION: In accordance with § 20.108(c) (21 CFR 20.108(c)), which states that all agreements and memoranda of understanding between FDA and others shall be published in the **Federal Register**, the agency is publishing this memorandum of understanding.

Dated: March 7, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

Memorandum of Understanding Between the Food and Drug Administration Department of Health and Human Services of the United States of America and the Department of Agriculture and Food of Ireland Covering Caseins, Caseinates, and Mixtures Thereof Exported to the United States

I. Purpose

The mutual goals of the Food and Drug Administration (FDA) and of the Department of Agriculture and Food (DOAF) of Ireland in entering into this Memorandum of Understanding are to:

1. Establish certification requirements for the caseins, caseinates, and mixtures thereof exported from Ireland to the United States to assure that contaminated caseins, caseinates, and mixtures thereof will not be imported into the United States.

2. Minimize the need for extensive FDA audit sampling of these certified products from Ireland.

II. Definitions

For the purposes of this agreement, both parties agree to the following definitions:

Lot: A lot is a quantity of casein, caseinates, or mixtures thereof packaged by one manufacturer during a definite period of time not exceeding one (1) day. The manufacturing process, including milling and packaging, is performed by using a perfectly identified processing line. Caseins, caseinates, or mixtures thereof intended for export to the United States are packaged, after milling, in identical containers identified by a unique code or mark traceable to the manufacturer.

Salmonella-negative: The absence of *Salmonella* in thirty (30) subsamples, each of twenty-five (25) grams, that have been taken from the same lot of product and tested using the procedures contained in the current edition of the "Bacteriological Analytical Manual (See Section V. ANALYTICAL METHODOLOGY.)

Phosphatase-Negative: The absence of phosphatase activity in thirty (30) subsamples, each of twenty-five (25) grams, that have been taken from the same lot of product and tested using the method contained in the current edition of the "Official Methods of Analysis" (See Section V. ANALYTICAL METHODOLOGY).

III. Substance of Agreement

A. The Department of Agriculture and Food of Ireland

The Department of Agriculture and Food (DOAF) of Ireland is the agency of the Irish government responsible for inspecting those caseins, caseinates, and mixtures thereof that are intended for export. Such inspection is necessary for consumer protection. To fulfill its responsibilities under this Memorandum of Understanding, DOAF will direct its activities to ensure that caseins, caseinates, and mixtures thereof that are intended for export to the United States are fit for human consumption in that they comply with the requirements of the Food, Drug, and Cosmetic Act of the United States, of the Public Health Service Act of the United States, and of this Memorandum of Understanding. DOAF will inspect and analyze samples of these caseins, caseinates, and mixtures thereof to ensure that they comply with these requirements.

To discharge its responsibilities regarding caseins, caseinates, and mixtures thereof and to fulfill its commitment under this agreement, DOAF will:

1. Inspect and analyze each lot of caseins, caseinates, and mixtures thereof produced in Ireland for export to the United States to assure that it is *Salmonella*-negative and phosphatase-negative, based on the testing of thirty (30) subsamples of twenty-five (25) gram units taken from bags in a lot of caseins, caseinates, and mixtures thereof immediately before closing, as determined by the methods cited in Section V. ANALYTICAL METHODOLOGY.

2. Issue an export certificate only for those lots that are *Salmonella*-negative and phosphatase-negative.

3. Require that all containers of a lot of caseins, caseinates, and mixtures thereof that are to be exported to the United States be certified as complying with the provisions of this Memorandum of Understanding, and identified by a lot number, and all other information required by the Federal Food, Drug, and Cosmetic Act of the United States.

4. Require that all of the information that is required by the Food, Drug, and Cosmetic Act and the Fair Packaging and Labeling Act of the United States be included on the label and labeling of individual products.

5. Include the following information on the export certificate for each lot of caseins, caseinates, and mixtures thereof exported to the United States:

a. Lot identification, including name and address of manufacturer;

b. Number and size of containers in the lot;

c. Analytical results for *Salmonella* and phosphatase activity;

d. Date of the certificate; and,

e. Name and stamp or seal of authorizing official.

6. Provide the exporter of caseins, caseinates, and mixtures thereof with the validated export certificate. This certificate and the packing list, which indicates those lots that are physically present in each containerized cargo unit, are to be attached to the shipping manifest.

7. Furnish FDA with a copy of the current Irish regulations and the procedures used to ensure that the caseins, caseinates, and mixtures thereof are in compliance with those regulations and with the Food, Drug, and Cosmetic Act and the Public Health Service Act of the United States.

8. Furnish FDA, upon request, with a full description of the manufacturing processes and quality controls used to ensure that the caseins, caseinates, and mixtures thereof that are produced are fit for human consumption, as discussed in III. A. SUBSTANCE OF AGREEMENT of this Memorandum of Understanding.

9. Furnish FDA with a list of the names of those officials who will sign the certificates issued in accordance with this Memorandum of Understanding.

B. The Food and Drug Administration of the United States of America

FDA is charged with the enforcement of the Food, Drug, and Cosmetic Act, the Fair Packaging and Labeling Act, certain provisions of the Public Health Service Act, and other related statutes of the United States. FDA directs its activities toward the protection of the public health in the United States by ensuring that foods are safe and wholesome and are honestly and informatively labeled. FDA accomplishes this goal in part through inspections of food processors and distributors. In addition, it collects and examines samples to ensure compliance with these statutes. FDA makes a concerted effort to ensure that food entering the United States meet the same standards as domestic products. To discharge these responsibilities regarding caseins, caseinates, and mixtures thereof and to fulfill this Memorandum of Understanding, FDA will:

1. Audit samples of caseins, caseinates, and mixtures thereof certified by DOAF under this Memorandum of Understanding to ensure that the products exported from Ireland and offered for import into the United States comply with the requirements of the Food, Drug, and Cosmetic Act, the Fair Packaging and Labeling Act, the Public Health Service Act, and other related statutes of the United States.

2. Share any information obtained through its audit sampling with DOAF and the First Secretary of the Embassy of Ireland.

3. Promptly notify DOAF and the First Secretary of the Embassy of Ireland of the detention of any caseins, caseinates, and mixtures thereof covered by this Memorandum of Understanding.

4. Share expertise and provide consultative assistance to DOAF when necessary to assure the safety of the caseins, caseinates, and mixtures thereof exported to the United States.

IV. Sample Collection

The same samples will be used to determine both the presence, if any, of *Salmonella* and the level of phosphatase activity.

Each sample will consist of thirty (30) subsamples of caseins, caseinates, or mixtures thereof. Each subsample will consist of approximately twenty-five (25) grams that will be collected in accordance with the applicable portions of the current edition of the "Bacteriological Analytical Manual" (See Section V. ANALYTICAL METHODOLOGY).

V. Analytical Methodology

Compliance with the established criteria for *Salmonella* and phosphatase will be determined according to the methods contained in the current editions of "Bacteriological Analytical Manual" for *Salmonella* and "Official Methods of Analysis" for phosphatase.

These publications are available from: Association of Official Analytical Chemists, 1111 North 19th Street, Department 55, Arlington, VA 22209.

VI. Participating Parties

A. The Department of Agriculture and Food, Agriculture House, Kildare Street, Dublin 2, Ireland

B. Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, USA

VII. Liaison Officers

A. For DOAF—Principal Officer, Dairying Trade Division (Currently Mr. John Malone), Agriculture House, Kildare Street, Dublin 2, Ireland, Telephone: (353–1) 789011, extension 3055; Telex: 93607 AGRI EI

B. For FDA—Director, Division of Regulatory Guidance (Currently Mr. Howard Pippin), Center for Food Safety and Applied Nutrition, Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, Telephone: (202) 485–0187; Telex: 197623 PHS PKLN 898488 PHS PKLN ROVE

VOL 53 ISS 48 MR 11 1988 UMI

VIII. Administrative Procedures

The parties shall mutually agree on the ways and means of giving instructions and guidance for the practical implementation and application of this Memorandum of Understanding.

IX. Period of Agreement

This Memorandum of Understanding will become effective upon acceptance by both parties and will continue for a period of five (5) years. It may be extended or revised by mutual consent or terminated by either party upon a thirty (3) day advance written notice to the other.

BILLING CODE 4160-01-M

Health Care Financing Administration

[HSQ-155-N]

Medicare Program; Peer Review Organization Contracts; Solicitation of Statements of Interest From In-State Organizations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice, in accordance with section 4092 of the Omnibus Budget Reconciliation Act (OBRA) of 1987, gives six months advance notice of the dates when contracts with out-of-State Utilization and Quality Control Peer Review Organizations (PROs) end. It also gives the period of time in which in-State organizations may submit statements of interest so that they may receive Requests for Proposals (RFPs) and compete for those contracts. The States currently affected are Delaware, Kentucky, South Carolina, and Wyoming.

DATE: Statements of interest must be received at the appropriate address as provided below no later than 5:00 p.m. EST on March 31, 1988.

ADDRESS: Statements of interest must be submitted to: William J. Tate, Health Care Financing Administration, OMB, Room 389 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207.

FOR FURTHER INFORMATION CONTACT: Paul Mendelsohn, (301) 966-7209.

SUPPLEMENTARY INFORMATION:

I. Background

The Peer Review Improvement Act of 1982 (Title I, Subtitle C of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), Pub. L. 97-248) amended Part B of Title XI of the Social Security Act (Act) by establishing the Utilization and Quality Control Peer Review Organization (PRO) program.

PROs review health care services funded under Title XVIII of the Act (Medicare) to determine whether those services are reasonable, medically necessary, furnished in the appropriate setting, and are of a quality which meets professionally recognized standards. Congress created the PRO program in order to redirect, simplify and enhance the cost-effectiveness and efficiency of the peer review of services reimbursed by Medicare.

In June of 1984, HCFA began awarding contracts to PROs. We currently maintain 54 PRO contracts with organizations that provide medical review activities for each of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and American Samoa and Guam. In accordance with section 1153 of the Act, the organizations that are eligible to contract as PROs have satisfactoritly demonstrated either: that they are: (1) Physician-sponsored organizations that are composed of a substantial number of the licensed doctors of medicine or osteopathy practicing medicine or surgery in the respective review area and who are representative of the physicians practicing in the area; or, (2) physician access organizations that have available, by arrangement or otherwise, the services of a sufficient number of licensed doctors of medicine or osteopathy practicing medicine or surgery in the review area to assure adequate peer review of the services provided by the various medical specialties and subspecialties. In addition, the organization must not be a health care facility, health care facility association, or a health care facility affiliate, and must have a consumer (a Medicare beneficiary) on its governing board.

Under our current contracts, the PROs for 11 of the review areas are organizations from outside the review areas. Those areas are: Alaska, American Samoa and Guam, the District of Columbia, Delaware, Idaho, Kentucky, Maine, Nebraska, South Carolina, Vermont, and Wyoming.

The Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100-203) includes provisions that impose new requirements on the Secretary with respect to contracts with PROs. Section 4092 of OBRA amends section 1153 of the Act by adding a new subsection (i) that prohibits the Secretary from renewing the contract of any PRO that is not an in-State organization without first publishing in the **Federal Register** a notice announcing when the contract will expire. This notice must be published no later than six months before the date of expiration, and must specify the period of time during which an in-State organization may submit a proposal for the contract. If one or more qualified in-State organizations submit a proposal within the specified period of time, HCFA may not automatically renew the contract on a noncompetitive basis, but must instead provide for competition for the contract in the same manner used for a new contract. We note that the conference agreement accompanying the legislaton specifically removed the Senate amendment requirement that the Secretary give *additional* consideration to any qualified in-State organization in the contract competition process.

These requirements are effective with contracts eligible for renewal on or after August 1, 1988, and, for the purposes of these contract requirements, the statute defines an in-State organization as one which has its primary place of business in the State in which review will be conducted; or one that is owned by a parent corporation which has its headquarters in such State.

We intend to implement these changes in the most equitable manner, and will therefore apply this new procedure in any State where doubt exists with respect to the "in-State" status of the incumbent PRO. In addition, rather than requiring an in-State organization to submit a fully developed contract proposal at the time of this notice, we will ask only that the organization demonstrate that it meets the definition of an in-State organization and that it is otherwise an eligible organization in accordance with section 1153 of the Act. If we receive one or more qualified statements of interest, we will conduct a full and open competition in the acquisition of medical review services for that PRO area. All eligible in-State organizations and other potential sources will be furnished with a Request for Proposal (RFP) as part of

the competitive contracting process. We are following this two-step procedure to assure the integrity of the competitive bidding process.

Additionally, section 4091 of OBRA Permits the Secretary to provide for extensions of existing PRO contracts to provide for a staggered period of contract expiration dates and to permit adequate time to complete contract renewal negotiations. We will extend PRO contracts under the authority of this section to provide an opportunity for an orderly transition. Specifically, we intend to extend the PRO contracts in Delaware, Kentucky, South Carolina, and Wyoming, which were originally scheduled to expire on June 30, 1988, through September 30, 1988.

II. Provisions of the Notice

This notice announces that current contracts (including intended extensions) between HCFA and out-of-State PROs responsible for review in the States of Delaware, Kentucky, South Carolina, and Wyoming will expire on October 1, 1988. Interested organizations in these States may submit statements of interest in those contracts. The statements must be received by HCFA no later than March 31, 1988, and, in its statement of interest, the organization must furnish materials that demonstrate that it meets the definition of an in-State organization. Specifically, the organization must have its primary place of business in the State in which review will be conducted or it must be owned by a parent corporation the headquarters of which is located in that State. In its statement, each interested organization must further demonstrate that it meets the following requirements:

A. Be either a physician sponsored or a physician access organization

1. Physician sponsored organization.

(i) The organization must be composed of a substantial number of licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area and who are representative of the physicians practicing in the area.

(ii) The organization must not be a health care facility, health care facility association, or health care facility affiliate.

(iii) In order to meet the requirements of A.1.i. and A.1.ii., an organization must be composed of at least 10 percent of the licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area. In order to demonstrate that it meets this criterion, an organization must state and have documentation in its files demonstrating that it is composed of at least 20 percent of the licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area; or, if the organization does not demonstrate that it is composed of at least 20 percent of the licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area, then the organization must demonstrate in its statement of interest, through letters of support from physicians or physician organizations, or through other means, that it is representative of the area physicians.

2. Physician access organization.

(i) The organization must have available to it, by arrangement or otherwise, the services of a sufficient number of licensed doctors of medicine or osteopathy practicing medicine or surgery in the review area to assure adequate peer review of the services provided by the various medical specialties and subspecialties.

(ii) The organization must not be a health care facility, health care facility association, or health care facility affiliate.

(iii) An organization meets the requirements of A.2.i. and A.2.ii. if it demonstrates that it has available to it at least one physician in every generally recognized specialty; and has an arrangement or arrangements with physicians under which the physicians would conduct review for the organization.

B. Have a consumer (that is, a Medicare beneficiary) on its governing board

If one or more organizations meet the above requirements, and submit statements of interest in accordance with this notice, HCFA will consider those organizations to be potential sources for the contracts (identified above) that are expiring on October 1, 1988. These organizations will be furnished with an RFP and will be considered in full and open competition for the PRO contract to provide medical review services for that State.

III. Regulatory Impact Statement

This notice merely announces the dates when contracts with various out-of-State Peer Review Organizations expire, and the period of time in which in-State organizations may file statements of interest. This notice is not a proposed rule of a final rule issued after a proposal, and does not alter any regulations. Therefore, we have determined and the Secretary certifies that no analyses are required under Executive Order 12291, the Regulatory Flexibility Act (5 U.S.C. 601 through 612), or section 1102(b) of the Act.

IV. Information Collection Requirements

This notice contains information collection requirements that will be forwarded to the Executive Office of Management and Budget for review and approval under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

(Sec. 1153 of the Social Security Act (42 U.S.C. 1320c-2)) (Catalog of Federal Domestic Assistance Program No. 13.773, Medicare—Hospital Insurance; and No. 13.774, Medicare—Supplementary Medical Insurance.)

Dated: February 26, 1988.

BILLING CODE 4120-01-M

Health Resources and Services Administration

Program Announcement and Proposed Study Areas Under Fellowship Eligibility Criteria for Nursing Post-baccalaureate Faculty Fellowship Grants

The Health Resources and Services Administration announces that applications for Fiscal Year 1988 Post-baccalaureate Faculty Fellowship grants will be accepted under the authority of section 830(b) of the Public Health Service Act, as amended by Pub. L. 99-92. Comments are invited on the additional areas of practice proposed for study under the fellowship eligibility criteria.

Approximately $901,000 is being made available by the Department of Health and Human Services Appropriations Act, 1988. Of this amount, it is expected that 137 awards averaging $6,552 will be made.

Purpose

Section 830(b) of the Public Health Service Act, as amended by the Nurse Education Amendments of 1985, Pub. L. 99-92, authorizes grants to public or private nonprofit schools of nursing to cover the costs of post-baccalaureate faculty fellowships to enable faculty to carry out studies in areas specified by the legislation or by the Secretary, Department of Health and Human Services.

Applicants

Public or private nonprofit schools of nursing are eligible to apply for grants to cover the cost of tuition and fees and, in some instances, stipends for currently employed faculty who would qualify for a post-baccalaureate faculty fellowship. Only one application will be accepted from any one school of nursing. A school with separate departments or more than one type of program must submit a combined request. A school may request fellowship support for more than one faculty member.

Faculty Eligibility

To qualify for a fellowship faculty must:

(1) Hold a baccalaureate degree.

(2) Be employed by the applicant institution as a faculty member during the period of the awarded fellowship.

(3) Be enrolled in a master's program in nursing or in a doctoral program which requires a substantial study, master's thesis or a doctoral dissertation, and anticipate meeting master's or doctoral degree requirements by August 31, 1989 or sooner.

(4) Undertake a reported study, thesis or dissertation focusing on:

a. An investigation of cost-effective alternatives to traditional health care modalities, with special attention to the needs of at-risk populations, such as the elderly, premature infants, physically and mentally disabled individuals, and ethnic and minority groups; or

b. Examination of nursing interventions that result in positive outcomes in health status, with attention to interventions which address family violence, drug and alcohol abuse, the health of women, adolescent care, and disease prevention; or

c. Factors within the practice setting associated with retention of nursing personnel; or

d. Acute and long-term nursing care of patients with infectious diseases, particularly illness caused by the human immunodeficiency virus (HIV).

The subject areas (a) and (b) are specified by the legislation. The subject areas (c) and (d) have been proposed for this grant cycle because they represent national health problems considered by the Secretary to require investigation.

(5) Be licensed to practice as a registered nurse in a State.

Funding Preference

A funding preference will be given to those schools that have been successful in recruiting or retaining minority faculty. The Department believes that continued efforts must be made to increase the number of minority faculty and students in schools of nursing.

Proposed Study Areas Under Fellowship Eligibility Criteria

The Secretary has proposed designation of two additional study areas, thus expanding the fellowship eligibility criteria. These study areas include:

- An examination of factors within the practice setting associated with retention of nursing personnel; and
- Investigations dealing with acute and long term care of patients with infectious diseases, particularly illness caused by human immunodeficiency virus (HIV).

Interested persons are invited to comment on these additional study areas for fellowship eligibility. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the Fiscal Year 1988 award cycle, this comment period has been reduced to 30 days. All comments received on or before April 11, 1988, will be considered before the final designated study areas of nursing practice are established. No funds will be allocated or final selections made until a final notice is published stating whether the designated study areas of nursing practice will be applied.

Written comments should be addressed to: Director, Division of Nursing, Bureau of Health Professions, Health Resources and Service Administration, Parklawn Building, Room 5C–26, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Nursing, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m.

Application Deadline

One review cycle will be held annually for Post-baccalaureate Faculty Fellowship grant applications. To receive consideration applications must meet the deadline of April 29, 1988. Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline, or

(2) Postmarked on or before the deadline date, and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

The standard application form and general instructions, Form PHS 6025–1, HRSA Competing Training Grant Application and supplement for this program have been approved by the Office of Management and Budget.

The OMB clearance number is 0915–0060.

Requests for application materials should be directed to: Grants Management Officer (A–23), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C–22, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443–6915.

For technical assistance and other information regarding this program, contact: The Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 5C–26, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443–6333.

This program is listed at 13.147 in the *Catalog of Federal Domestic Assistance* and is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: February 9, 1988.

John H. Kelso,

Acting Administrator.

[FR Doc. 88–5372 Filed 3–10–88; 8:45 am]

BILLING CODE 4160-15-M

Pediatric Acquired Immune Deficiency Syndrome (AIDS) Health Care Demonstration Projects

AGENCY: Health Resources and Services Administration, PHS, DHHS.

ACTION: Notice of availability of funds.

SUMMARY: The Bureau of Maternal and Child Health and Resources Development (BMCHRD), Health Resources and Services Administration (HRSA) announces that Fiscal Year 1988 funds are available for grants to fund projects demonstrating strategies and innovative models for intervention in pediatric AIDS and coordination of services for children and women of child-bearing age with HIV infection, AIDS or other related conditions, or those at risk for developing HIV infection ad its consequences. Funds were appropriated for this purpose by Pub. L. 100–202.

DATE: The deadline for receipt of grant applications is May 5, 1988. Applications shall be considered as meeting the deadline if they are either: (1) Received by the Grants Management Office at the address below on or before the deadline date, or (2) postmarked on or before the deadline date, and received in time for submission to the review group. Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private

metered postmarks shall not be acceptable as proof of timely mailing.

FOR FURTHER INFORMATION CONTACT: Additional information relating to technical and program issues may be obtained from John J. Hutchings, M.D., Division of Services for Children with Special Health Needs, BMCHRD, Parklawn Building, Room 6–40, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–2170.

Grant applications and additional information regarding business, administrative or fiscal issues related to the awarding of grants under this notice may be requested from Glenna Wilcom, Grants Management Specialist, BMCHRD, Parklawn Building, Room 9–21, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6745.

The original and two (2) copies of the applications must be submited to Ms. Wilcom.

SUPPLEMENTARY INFORMATION:

Program Background and Objectives

Through December 28, 1987, 49,600 cases of AIDS have been reported to the Centers for Disease Control (CDC). Of these, 737 have been infants and children 0–12 years of age and 203 are adolescents 13–19 years of age.

Approximately one half of the total of 940 cases in this pediatric population have died. The PHS predicts a nearly 350% increase in pediatric AIDS by 1991 to 3,000 cases.

The cost of providing a full range of services for the pediatric population with AIDS is expected to be high. These expected high costs largely reflect higher daily inpatient hospital rates for children and the long periods of hospitalization these children often experience. Comprehensive ambulatory care and community-based services, which these demonstration programs will encourage, are expected to reduce these high costs.

The pediatric AIDS projects are designed to further coordinate services for children and women of child-bearing age with HIV infection, AIDS or related conditions, or those at risk for developing infection and its consequences. Other PHS AIDS activities, the funding of which totals $931 million in FY 1988, are expected to be enhanced through the funding of these projects.

Purpose

It is generally recognized that there is a need for development of strategies and innovative models for the care of pediatric AIDS patients through a case management approach, which emphasizes service delivery in outpatient and community settings. The Pediatric AIDS Health Care Demonstration program is expected to initiate solutions to a broad range of critical problems arising from the AIDS crisis. The projects are intended to (1) demonstrate effective ways to prevent infection, especially through the reduction of perinatal transmission; (2) develop community-based, family centered, coordinated services for infected infants and children; and (3) develop programs to reduce the spread of the HIV infection to vulnerable populations of young people.

The demonstration projects to be carried out with these grants are intended to serve as models for other communities, and to identify the range of resources needed to provide appropriate, humane, and effective care to pediatric AIDS patients. These grants will be awarded to support demonstration projects which are designed to build on existing resources or networks to reach and provide health care and supportive services to women and children most at-risk. These projects will be developed in communities with varying degrees of impact from pediatric AIDS, and will focus on local capacity-building, making maximum use of all available public and private resources.

Availability of Funds

A total of $4.435 million is available to be expended by grantees during project periods lasting from one to three years to support Pediatric AIDS Health Care Demonstration projects. It is anticipated that 10 to 20 demonstration grants will be made, depending on demonstrated need.

Collaboration/Coordination with Other AIDS Programs

Grantees supported by HRSA will be expected to coordinate their projects with other Federal, State, and local programs concerned with AIDS, including, but not limited to: (1) CDC AIDS activities; (2) Community Health Centers and Migrant Health Centers; (3) Medicaid; (4) Title V Programs: Maternal and Child Health Services Block Grants, Maternal and Child Health Hemophilia Services Projects, and other relevant SPRANS grants under Title V; (5) HRSA AIDS Service Demonstration Grants: Grants have been made in 13 metropolitan areas and are designed to support the organization of systems of care for people with HIV-related conditions which will identify unmet service needs and take measures to meet those needs; provide optimal integration of community resources through effective coordination; ensure a continuity of services through effective case management, and reduce the overall cost of providing medical services for people with AIDS by providing alternatives to hospital care; (6) the education and outreach programs of the National Institute on Drug Abuse, especially those concerned with IV drug users, their sexual partners, and prostitutes; (7) HRSA Education and Training Centers Grants; (8) grants concerned with mothers and children funded by the National Institute of Child Health and Human Development; (9) the clinical drug trials or other relevant research conducted by other institutes of the National Institutes of Health; and, (10) discretionary grants by the Office of Human Development Services to demonstrate innovative approaches to providing child welfare services for infants with AIDS.

To the maximum extent possible, the Pediatric AIDS Health Care Demonstration program grantees also will be expected to work closely with community-based AIDS service organizations and with the activities supported by the Robert Wood Johnson Foundation Service Demonstration Grants, the National Hemophilia Foundation, or other foundations and organizations.

Eligible Applicants

Public and private entities, nonprofit and for-profit, are eligible to apply for these grant awards. Eligible entities include public or private hospitals, university medical centers, State or local health departments, or consortia of health care and community organizations which can develop Pediatric AIDS Health Care Demonstration projects.

Review and Evaluation Criteria

Grant applications will be reviewed and rated by an objective review committee according to each applicant's ability to demonstrate the most effective ways of organizing services and support to children and women of childbearing age with HIV infection, AIDS or AIDS-related conditions or those at-risk for developing infection and its consequences. More detailed information on the review and evaluation criteria may be found in the grant application kit.

Allowable Costs

The basis for determining the allowability and allocability of costs charged to PHS grants is set forth in 45 CFR Part 74, subpart Q. The five separate sets of cost principles prescribed for grant recipients are: OMB Circular A–87 for State and local governments; OMB Circular A–21 for institutions of higher education; 45 CFR Part 74, Appendix E for hospitals; OMB Circular A–122 for nonprofit organizations; and 48 CFR chapter 1, subpart 31.2 for for-profit (commercial) organizations.

Reporting Requirements

A successful applicant under this notice will submit reports in accordance with the provisions of the general regulations which apply under 45 CFR Part 74, subpart J—Monitoring and Reporting of Program Performance.

Executive Order 12372

The Pediatric AIDS Health Care Demonstration program has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs, as implemented by 45 CFR Part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available under this notice (Form PHS 5161–1 with revised facesheet HHS Form 424 approved under OMB 0348–0006) will contain a listing of States which have chosen to set up such a review system and will provide a point of contact in the States for the review. Applicants should promptly contact their State single point of contact (SPOC) and follow their instructions prior to the submission of an application. The SPOC has 60 days after the application deadline to submit its review comments.

The OMB Catalog of Federal Domestic Assistance number for the Pediatric AIDS Health Care Demonstration program is 13.153.

Date: February 9, 1988.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160–15–M

National Institutes of Health

National Cancer Institute; Board of Scientific Counselors, Division of Cancer Biology and Diagnosis; Open Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Biology and Diagnosis, National Cancer Institute, May 31, 1988, Building 31C, Conference Room 9, National Institutes of Health, Bethesda, Maryland 20892.

The entire meeting will be open to the public on May 31 from 8:30 a.m. to adjournment for concept review of proposed NCI research projects. Attendance by the public will be limited to space available.

Mrs. Winifred Lumsden, Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summary minutes of the meeting and roster of committee members.

Dr. Ihor J. Masnyk, Deputy Director, Division of Cancer Biology and Diagnosis, National Cancer Institute, Building 31, Room 3A03, National Institutes of Health, Bethesda, Maryland 20892 (301/496–3251) will provide substantive program information.

Dated: March 2, 1988.

Betty J. Beveridge,

Committee Management Officer, National Institutes of Health.

BILLING CODE 4140–01–M

Public Health Service

National Toxicology Program (NTP) Board of Scientific Counselors Meetings to Review Draft NTP Technical Reports

I. Meeting of April 18 and 19, 1988

Pursuant to Pub. L. 92–463, notice is given of the next meeting of the NTP Board of Scientific Counselors Technical Reports Review Subcommittee and associated *ad hoc* Panel of Experts *(Peer Review Panel)* on April 18 and 19, 1988, in the Conference Center, Building 101, South Campus, National Institute of Environmental Health Sciences, 111 Alexander Drive, Research Triangle Park, North Carolina. The meeting will begin at 9:00 a.m. on both days and is open to the public. The primary agenda topic is the peer review of draft Technical Reports of long-term toxicology and carcinogenesis studies from the National Toxicology Program.

Tentatively scheduled to be peer reviewed on April 18 and 19 are draft technical reports of studies on the following chemicals, listed alphabetically, along with Chemical Abstracts Service registry numbers, responsible staff scientists with telephone numbers, NTP report numbers, uses, routes of administration, exposure levels used in the chronic studies, and tentative levels of evidence of carcinogenic activity (see table below). All studies were done using Fischer 344 rats and B6C3F$_1$ mice unless noted. For the first time, levels of evidence of carcinogenic activity proposed by NTP staff are included to provide more information in advance of the meeting. The order of presentation will be made available at a later date.

Chemical name/CAS No.	Staff scientist	TR No.	Use/Route	Exposure levels	Levels of evidence*
p-Chloroaniline, Hydrochloride, 106–47–8.	R. Chhabra, 919–541–3386	351	DYE/GAV	R:0,2,6,18; M:0,3,10,30 MG/KG	MR:CE (spleen), FR:EE (spleen, adrenal gland), MM:SE (liver, spleen), FM:NE.
2,4-Dichlorophenol, 120–83–2	R. Melnick, 919–541–4142	353	INTR/FEED	FR:0,2500,5000; MR and M:0,5000,10,000 PPM.	MR:NE, FR:NE, MM:NE, FM:NE.
Furosemide, 54–31–9	J. Bucher, 919–541–4532	356	PHAR/FEED	R:0,350,700; M:0,700,1400 PPM	MR:EE (kidney, brain), FR:EE (thyroid gland), MM:NE, FM:SE (mammary gland).
Hydrochlorothiazide, 58–93–5	J. Bucher, 919–541–4532	357	PHAR/FEED	R:0,250,500, 2000; M:0, 2500, 5000 PPM.	MR:EE (zymbal gland), FR:NE, MM:SE (liver), FM:NE.
d-Limonene, 5989–27–5	W. Jameson, 919–541–4096	347	FOOD/GAV	FR:0,300,600;MR: 0, 75, 150; FM: 0, 500, 1000; MM: 0,250,500 MG/KG.	MR:CE (kidney), FR:NE, MM:NE, FM:NE.
8-Methoxypsoralen, 298–81–7	J. Dunnick, 919–541–4811	359	PHAR/GAV	R:0,37.5, 75 MG/KG	MR:CE (kidney, zymbal gland), FR:NE.
Ochratoxin A, 303–47–9	G. Boorman, 919–541–3440	358	NATL/GAV	R:0,21,70, 210 MG/KG	MR:CE (kidney), FR:CE (kidney, mammary gland).
Pentachlorophenol, Technical, 87–86–5.	E. McConnell, 919–541–3267	349	PEST/FEED	M:0,100,200 PPM	MM:CE (adrenal gland, liver), FM:SE (liver).
Pentachlorophenol, Dowicide, EC–7, 87–86–5.	E. McConnell, 919–541–3267	349	PEST/FEED	M:0,100,200,600 PPM	MM:CE (adrenal gland, liver), FM:CE (adrenal gland, liver).
Tribromomethane (Bromoform), 75–25–2.	R. Melnick, 919–541–4142	350	INTR/GAV	R and FM: 0,100,200; MM:0,50, 100 MG/KG.	MR:SE (large intestine), FR:CE (large intestine), MM:NE, FM:NE.

*NOTE: The proposed results indicated are to be considered tentative until reviewed, discussed, and approved at the Peer Review Panel meeting, April 18–19, 1988.

Abbreviations Used:

Categories of Evidence of Carcinogenic Activity: CE=clear evidence; SE=some evidence; EE=equivocal evidences; NE=no evidence.

Species: MR=male rats, FR=female rats, MM=male mice, FM=female mice.

Use: Primary Use Category: DYE Used as or in the Manufacture of Dyes, Inks and Pigments; FOOD Food and Food Additives; INTR Chemical Intermediate or Catalyst; NATL Naturally Occurring Substances; PEST Pesticides; PHAR Pharmaceuticals.

Route: Route of Administration: FEED Available in Diet; GAV Gavage.

Further, we plan to present to the Peer Review Panel additional data from the toxicology and carcinogenesis studies on two chemicals, dichlorvos and nitrofurantoin, for which draft Technical Reports were reviewed and approved by the Panel on July 14, 1987. Additional data on dichlorvos (CAS No. 62–73–7, TR No. 342) will include: (1) Erythrocyte and plasma cholinesterase activities following short-term gavage administration over a range of doses to F344 rats and B6C3F$_1$ mice of both sexes; (2) incidences of pancreatic acinar cell adenomas after additional sectioning of pancreata from F344 rats on the two-year studies; and (3) effects of dichlorvos administration on growth of transplantable rat mononuclear cell leukemias in male F344 rats. Additional data on nitrofurantoin (CAS No. 67–20–9, TR No. 341) pertain to incidences of renal tubular cell neoplasms after additional sectioning of kidneys from control and treated male F344 rats on the two-year studies.

Also, there will be a brief presentation on the NTP's proposed plans for the toxicological evaluation of ozone.

Persons wanting to make a formal presentation regarding a particular Technical Report should notify the Executive Secretary and provide a written copy in advance of the meeting so copies can be made and distributed to all Panel members, staff, and attendees.

II. Meeting of August 1 and 2, 1988

The meeting of the Peer Review Panel scheduled for August 1 and 2, 1988, has been cancelled.

III. Announcement of NTP Draft Technical Reports Projected for Public Peer Review From October 1988 Through October 1989

To earlier inform the public and allow interested parties to comment or obtain information on toxicology and carcinogenesis studies prior to public peer review, the NTP again publishes in the **Federal Register** a current listing of draft Technical Reports projected for evaluation by the Peer Review Panel during their four meetings after April 18–19, 1988, from October 1988 through October 1989. The listing will be updated with announcements in the **Federal Register** approximately twice a year.

The attachment gives draft Technical Reports of studies on chemicals listed alphabetically within known or estimated month of reviews and includes Chemical Abstracts Service registry numbers, responsible staff scientists with telephone numbers, NTP report numbers (if assigned), uses, species, routes of administration, and exposure levels used in the chronic studies.

Those interested in having more information about any of the studies listed in this announcement, or wanting to provide input, should contact the particular NTP staff scientist as early as possible by telephone or by mail to: NIEHS, P.O. Box 12233, Research Triangle Park (RTP), North Carolina 27709. The staff scientists would welcome receiving toxicology and carcinogenesis data from completed, ongoing or planned studies by others as well as current production data, human exposure information, and use and use patterns.

The Executive Secretary, Dr. Larry G. Hart, NTP, P.O. Box 12233, RTP, North Carolina 27709, telephone (919–541–3971), FTS (629–3971), will furnish final agendas, a roster of subcommittee and panel members, and other program information prior to a meeting, and summary minutes subsequent to a meeting.

Dated: March 4, 1988.

David P. Rall,

Director, National Toxicology Program.

NTP TOXICOLOGY AND CARCINOGENESIS STUDIES ON CHEMICALS PROJECTED FOR PEER REVIEW

Chemical name/CAS No.	Staff scientist	NTP TR No.	Use	Spec	Route	Exposure levels

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-88-1785]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbrs of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Date: March 7, 1988.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Cost Certification Forms
Office: Housing
Description of the Need for the Information and Its Proposed Use: The associated forms are necessary to allow HUD to make an analysis of the cost certifications required by HUD regulations. These requirements were instituted in the Housing Act of 1954 and require that the mortgagor certify to "actual cost."
Form Number: FHA-2205, FHA-2328, and HUD-92330A
Respondents: Businesses or Other For-Profit and Non-Profit Institutions
Frequency of Respondents: On Occasion
Estimated Burden Hours: 13,280
Status: Reinstatement
Contact:

Felix Coward, HUD, (202) 755-5743
John Allison, OMB, (202) 395-6880

Date: March 7, 1988.

Proposal: Application for Coinsurance Benefits (Multifamily)—State Agencies
Office: Administration
Description of the Need for the Information and Its Proposed Use: The information is needed for the state agencies to claim insurance benefits on defaulted loans. HUD uses the information to compute the claim settlement due the state agency.
Form Number: HUD-426, 426A, 426.1, and 427
Respondents: State of Local Governments
Frequency of Respondents: On Occasion
Estimated Burden Hours: 30
Status: Extension

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT-060-08-4333-11]

Environmental Assessment; San Rafael Swell, UT

AGENCY: Bureau of Land Management, Moab, Utah, Interior.

ACTION: Notice of 30-day comment period on two draft programmatic environmental assessments analyzing proposed and anticipated commercial recreation guide service within wilderness study areas.

SUMMARY: The first draft environmental assessment has been prepared in response to applications for commercial special recreation permits to conduct guided horseback trips in the San Rafael Swell within Emery County. Trips would extend into the Devil's Canyon (UT-060-025), Sid's Mountain Complex (UT-060-023 & 023A), Muddy Creek (UT-060-007), Crack Canyon (UT-060-028A), and Mexican Mountain (UT-060-054) wilderness study areas. This environmental assessment also considers proposed commercial tours by vehicle in the San Rafael Swell outside of wilderness study areas.

The second draft environmental assessment has been prepared in anticipation of receiving additional applications for commercial special recreation permits to conduct commercial hunting guide service in the portion of the Book Cliffs administered by Price River Resource Area within Carbon and Emery counties. Trips would extend into the Turtle Canyon (UT-060-067), Desolation Canyon (UT-060-068A), and Jack Canyon (UT-060-068C) wilderness study areas. All hunter base camp facilities would be located on private land. This document is being released a second time to provide an additional opportunity for public comment.

Interested parties may comment upon these environmental assessments for a period of 30 days from the date of publication of this notice.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 900 N. 700 E., Price, Utah 84501 (Phone 801-637-4584).

Date: March 3, 1988.

Gene Nodine,

District Manager.

Medford District Advisory Council; Meeting

Notice is hereby given in accordance with Pub. L. 99-463 that a meeting of the Bureau of Land Management, Medford District Advisory Council will be held April 5, 1988.

On April 5, the meeting will begin at 9:00 a.m., in the Oregon Room of the Bureau of Land Management Office at 3040 Biddle Road, Medford, Oregon. The agenda for the meeting will include: discussion of the 1987 fire season and the outlook for 1988. Other items include an assessment of the Medford District's public involvement activities, blocking up land ownerships, discussion of the District's protest and appeal procedure, use of herbicides, status reports on District reorganization, planning for the 1990s and areas of critical environmental concern and court actions brought against the District.

Persons interested in making oral statements during the Council meeting, may do so following conclusion of the Council's other agenda items, or written statements may be submitted for the Council's consideration.

Anyone wishing to make an oral statement at the Council meeting must notify the District Manager, Bureau of Land Management, 3040 Biddle Road, Medford, Oregon 97504, by close of business April 4, 1988. Depending on the number of persons wishing to make oral statements, a per-person time limit may be established by the District Manager.

Summary minutes of the Council Meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Date Signed: March 4, 1988.

David A Jones,

District Manager.

Date Signed: March 4, 1988.

BILLING CODE 4310-33-M

[UT-080-08-4212-13]

Realty Action; Private Exchange of Public Lands in Uintah County, UT

The following described lands have been determined to be suitable for a surface only private exchange under section 206 of the Federal Land Policy and Management Act to 1976, 43 U.S.C. 1716. The federal lands that have been identified as suitable for disposal by exchange are:

Salt Lake Meridian, Utah

T. 1 S., R. 23 E.,
 Section 19: Lot 5.
 Comprising 43.16 acres.

In exchange for these federal lands, the United States will acquire the surface estate of the following non-federal lands belonging to George Searle and Miles Searle:

Salt Lake Meridian, Utah

T. 3 S., R. 23 E.,
 Section 1: SW¼NW¼.
 Comprising 40 acres.

Upon publication of this notice, the federal lands are hereby segregated from appropriation under the public land laws, including the mining laws.

Lands to be transferred from the United States will be subject to the following reservations:

1. A reservation of a right-of-way for ditches and canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. All minerals with the right to prospect for, mine and remove the same under applicable laws and such regulations as the Secretary may prescribe.

For a period of 45 days from the date of the notice, interested parties may submit comments to the District manager, Vernal District Office, 170 South 500 East, Vernal, Utah 84078.

Dean L. Evans,

Assistant District Manager for Lands and Renewable Resources.

BILLING CODE 4310-DQ-M

[ES-030-08-5101-YBKA; ES-00157-012; ES-37985]

Right-of-Way Grant; Hoosier National Forest and Camp Atterbury Military Reservation, IN

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Application for Right-of-Way Grant.

SUMMARY: As the lead agency for National Environmental Policy Act (NEPA) compliance, the Federal Energy Regulatory Commission, Department of Energy, in cooperation with Bureau of Land Management (BLM), Department of the Interior, Forest Service (FS), Department of Agriculture, and U.S. Army Corps of Engineers (ACOE), Department of the Army; is preparing an environmental assessment (EA) of a proposed natural gas 16- and 20-inch diameter pipeline and related facilities in northern Kentucky and southern Indiana. The EA, when completed, will be the basis for BLM's right-of-way grant issuance decision relative to Federal land.

FOR FURTHER INFORMATION CONTACT: Duane Marti, Archeologist/Realty Specialist, Milwaukee District (BLM), P.O. Box 631, Milwaukee, Wisconsin, 53201-0631, or telephone (414) 291-4429.

SUPPLEMENTARY INFORMATION: Texas Gas Transmission Corporation (Texas Gas) has applied for a right-of-way grant across 10.3 miles of Hoosier National Forest and 11.3 miles of Camp Atterbury Military Reservation. The former area is located in Perry, Crawford, Orange, Jackson, and Brown Counties; while the latter area is located in Bartholomew and Johnson Counties. Texas Gas filed its application with BLM on February 29, 1988.

On February 13, 1987, Texas Gas applied to the Federal Energy Regulatory Commission (FERC) for a certificate of public convenience and necessity for the entire proposed pipeline. Shortly thereafter, Texas Gas initiated an environmental analysis of the proposed route. As a result of public involvement, Texas Gas later amended its application on September 4, 1987, to adopt a significant route modification affecting a portion of the final 45 miles of its original route.

Whereas the original route only crossed Federal lands administered by the Hoosier National Forest, (FS), the amended route also crossed Federal land administered by the Camp Atterbury Military Reservation, which is leased from the Department of Defense by the State of Indiana. When a proposed oil or natural gas pipeline crosses Federal lands administered by two or more Federal agencies, it becomes the responsibility of BLM to issue a right-of-way grant across the Federal lands pursuant to 43 CFR 2882.2-2. In this case, the proposed right-of-way will cross portions of the Hoosier National Forest and Camp Atterbury Military Reservation.

FERC has agreed to continue to be the lead agency for NEPA compliance on the proposed natural gas pipeline, including the proposed right-of-way. As the lead agency, FERC is preparing an EA of the proposed pipeline. BLM, FS, and ACOE (for Camp Atterbury) are participating in the preparation of the EA as cooperating agencies.

The EA, when completed, will be the basis for BLM's decisions. Those decisions include: (1) Whether a Finding of No Significant Impacts is appropriate for the right-of-way grant, (2) If so, whether the right-of-way grant should be issued, and (3) If so, under what terms and conditions will the grant be issued.

Comments: Until April 15, 1988, interested parties may submit written comments on the proposed right-of-way grant to: District Manager, Milwaukee District, BLM, P.O. Box 631, Milwaukee, Wisconsin 53201-0631.

Bert Rodgers,

District Manager.

BILLING CODE 4310-GJ-M

Fish and Wildlife Service

Intent to Prepare a Supplemental Environmental Impact Statement for the Wilderness Review of the Kenai National Wildlife Refuge

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of intent.

SUMMARY: This notice advises the public that the Fish and Wildlife Service intends to prepare a Supplemental Environmental Impact Statement for the Wilderness Review of the Kenai National Wildlife Refuge Final Comprehensive Conservation Plan, Environmental Impact Statement, and Wilderness Review. The Kenai National Wildlife Refuge is located in southcentral Alaska. This notice is being furnished as required by the National Environmental Policy Act regulations to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the environmental impact statement. A public hearing on the supplemental impact statement will be held following release of the draft impact statement.

DATE: Written comments should be received by April 8, 1988.

A public hearing will be held during the public review and comment period on the Draft Supplemental Environmental Impact Statement on the Wilderness Review. The date and location of this hearing will be announced later.

ADDRESS: Comments should be addressed to: Regional Director; Attention: Bill Knauer; U.S. Fish and Wildlife Service; 1011 E. Tudor Road; Anchorage, Alaska 99503.

FOR FURTHER INFORMATION CONTACT: Bill Knauer, Resource Support; U.S. Fish and Wildlife Service; 1011 E. Tudor Road; Anchorage, Alaska 99503; telephone (907) 786-3399.

SUPPLEMENTARY INFORMATION: This Supplemental Environmental Impact Statement on the Wilderness Review for the Kenai National Wildlife Refuge is being prepared to fulfill requirements of the Wilderness Act of 1964 and the Alaska National Interest Lands Conservation Act. The environmental review of the wilderness proposal will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended [42 U.S.C. 4371 et seq.], Council of Environmental Quality Regulations [40 CFR Parts 1500 through 1508], other appropriate federal regulations, and Fish and Wildlife Service procedures for compliance with those regulations. The five wilderness alternatives to be analyzed are the same as those in the Final Comprehensive Conservation Plan, Environmental Impact Statement, and Wilderness Review for the Kenai National Wildlife Refuge.

We estimate that the draft supplemental environmental impact statement will be made available to the public in May 1988.

Dated: March 1, 1988.

John P. Rogers,

Acting Regional Director.

the initial determination. The initial determination in this matter was served upon the parties on March 3, 1988.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on, 202-252-1810.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 500 E Street SW., Washington, DC 20436, no later than 10 days after publication of this notice in the Federal Register. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reason why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202-252-1805.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: March 3, 1988.

BILLING CODE 7035-01-M

Acceptance of Credit Cards for Payment Due the Federal Government

AGENCY: Interstate Commerce Commission.

ACTION: Notice to the public regarding acceptance of Visa or Master Card as an alternate method of payment due the Federal Government.

SUMMARY: The Department of the Treasury, Financial Management Services, has authorized the Interstate Commerce Commission to accept credit cards (Visa and Master Card only) from the public for receipts due the Federal Government.

The Commission will begin accepting credit cards for all services rendered by the Commission (headquarters and Regional Offices). These services include, but are not limited to: application filing fees; tariff filing fees; fines; and established ICC monthly billing accounts.

Individuals or companies who wish to use their credit card for payment should include on a separate sheet of paper their credit card number, expiration date, type of credit card (Visa or Master Card only) and their signature authorizing the credit card use. All credit card information will be maintained in a confidential manner as required by law.

EFFECTIVE DATE: March 21, 1988.

FOR FURTHER INFORMATION CONTACT: Noreta R. McGee, (202) 275-7428. [TDD for hearing impaired: 202-275-1721]

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-No. 218X)]

CSX Transportation, Inc.; Abandonment Exemption in Lake and Osceola Counties, MI

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts from the prior approval requirement of 49 U.S.C. 10903, *et seq.*, the abandonment by CSX Transportation, Inc., of 30.64 miles of rail line extending between Baldwin and Evart, in Lake and Osceola Counties, MI, subject to standard labor protective conditions and environmental protective conditions.

DATES: This exemption will be effective on April 10, 1988. Petitions to stay must be filed by March 28, 1988. Petitions for reconsideration must be filed by April 5, 1988. Any formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2) must be filed by March 21, 1988.[1]

ADDRESSES: Send pleadings referring to Docket No. AB-55 (Sub.-No. 218X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423
(2) Petitioner's representative: Lawrence H. Richmond, 100 North Charles Street, Baltimore, MD 21201

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202) 275-7245 [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc. Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 289-4357/4359 (DC Metropolitan area), (assistance for the hearing impaired is available through TDD services (202) 275-1721 or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters).

Decided: February 23, 1988.

By the Commission, Chairman Gardison, Vice Chairman Andre, Commissioners

DEPARTMENT OF JUSTICE

Information Collection(s) Under Review

March 9, 1988.

The Office of Management and Budget (OMB) has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories. Each entry contains the following information: (1) The name and telephone number of the Department's Clearance Officer from whom a copy of the form and/or supporting documentation is available; (2) the office, board or division of the Department of Justice issuing the form or administering the collection; (3) the title of the form/collection; (4) the agency form number, if any; (5) how often the report must be filled out or the information is to be collected; (6) who will be asked or required to respond, as well as a brief abstract; (7) an estimate of the total number of respondents; (8) an estimate of the total public burden hours associated with the collection; (9) an indication of whether section 3504(h) of Pub. L. 96-511 applies; and, (10) the name and telephone number of the person or office responsible for the OMB review. Comments and/or questions regarding the item(s) contained in this notice should be directed to the OMB reviewer listed at the end of each entry *AND* to the Department's Clearance Officer. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should so advise the OMB reviewer *AND* the Department's Clearance Officer of your intent as early as possible.

The Department of Justice Clearance Officer is: Larry E. Miesse and can be reached on (202) 633-4312.

Revision of a Previously Approved Collection

(1) Larry E. Miesse, (202) 633-4312.
(2) Immigration and Naturalization Service, Department of Justice.
(3) Employment Eligibility Verification.
(4) I-9.
(5) On occasion.
(6) Individuals and households, State and local governments, farms, businesses or other for-profit, Federal agencies or employees, non-profit institutions, small businesses or organizations. Developed to facilitate compliance with section 101 of the Immigration Reform and Control Act of 1986. Revision allows for microfilm/fiche storage by employers.
(7) 135,000,000 annual responses, .166 hours burden per response. 30,000,000 recordkeepers at .083 hours per.
(8) 24,960,000 estimated public burden hours.
(9) Not applicable under 3504(h).
(10) Robert Fishman, (202) 395-7340.

Larry E. Miesse,

Department Clearance Officer.

BILLING CODE 4410-19-M

Drug Enforcement Administration

Modern Drug Co.; Revocation of Registration

On November 20, 1987, the Administrator of the Drug Enforcement Administration (DEA) issued an Order To Show Cause to Modern Drug Company (Respondent), of 350 Main Street, Windsor Locks, Connecticut 06096, proposing to revoke DEA Certificate of Registration AM1519668, and deny any pending applications for renewal of that registration as a retail pharmacy under 21 U.S.C. 823(f). Additionally, citing his preliminary finding of imminent danger to the public health and safety, the Administrator ordered the immediate suspension of DEA Certificate of Registration AM1519668 during the pendency of these proceedings. 21 U.S.C. 824(d).

Since the president of Modern Drug Company was not available to accept service of the Order to Show Cause/Immediate Suspension, service was accepted by the firm's attorney on November 23, 1987. More than thirty days have passed since the Order to Show Cause was served and the Drug Enforcement Administration has received no response thereto. Pursuant to 21 CFR 1301.54(a) and 1301.54(d), Modern Drug Company is deemed to have waived its opportunity for a hearing. Accordingly, the Administrator now enters his final order in this matter without a hearing and based on the investigative file. 21 CFR 1301.57.

The Administrator finds that on ten occasions during the course of an undercover investigation conducted by Special Agents of the Drug Enforcement Administration and the State of Connecticut Drug Control Division, Sidney Portnoy, the pharmacist and president of Modern Drug Company, unlawfully delivered controlled substances to undercover agents outside the course of his professional practice as a pharmacist. The undercover agents never presented prescriptions for the controlled substances.

As a result of the investigation, on Octobe 27, 1987, Mr. Portnoy was indicted and charged with ten counts of unlawful distribution or dispensing of controlled substances in violation of 21 U.S.C. 841(a)(1).

On October 30, 1987, the Connecticut Board of Pharmacy suspended Modern Drug Company's license to operate a pharmacy. The Board also suspended Mr. Portnoy's license to practice pharmacy. As justification for both suspensions, the Board cited the imminent danger to the public health and safety posed by the continued operation of the pharmacy and the continued practice by Mr. Portnoy.

Additionally, the Administrator finds that on October 30, 1987, the Connecticut State Drug Control Agents who were conducting an invetory of the pharmacy's controlled substances pursuant to the emergency suspension of its pharmacy's license, found a bottle which was labeled as containing 25 grams of cocaine hydrochloride. Subsequent field testing and laboratory anaylsis revealed that the bottle contained a substance other than cocaine. The totality of the circumstances in this case support a reasonable conclusion that the cocaine hydrochloride had been diverted.

The Administrator further finds that Modern Drug Company had reported a highly unusual and suspicious series of thefts of controlled substances. On October 3, 1987, Modern Drug Company reported the theft of 26,606 dosage units of controlled substances to the Windsor Locks Police Department. Investigators have stated that they consider the purported circumstances of the theft to be of a highly suspicious nature and are continuing their investigation. Additionally, in 1986, Modern Drug Company reported a theft of controlled substances to its insurance carrier but not to the Drug Enforcement Administration. The insurance carrier denied Modern Drug Company's claim based upon the suspicious nature of the incident.

Based upon the foregoing, the Administrator concludes that the registration of Modern Drug Company would be inconsistent with the public interest. Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registraion AM1519668, previously issued to Modern Drug Company be, and it hereby is, revoked. It is further ordered that any pending applications for renewal be, and they hereby are, denied. This order is effective immediately.

When the Order to Show Cause/Immediate Suspension was served on Modern Drug Company all controlled substances possessed by the pharmacy under the authority of its then-suspended registration were placed under seal and removed for safekeeping. 21 U.S.C. 824(f) provides that no disposition may be made of such controlled substances under seal until all appeals have been concluded or until the time for taking an appeal has elapsed. Accordingly, these controlled substances shall remain under seal until April 11, 1988 or until any appeal of this order has been concluded. At this time, all such controlled substances shall be forfeited to the United States and shall be disposed of pursuant to 21 U.S.C. 881(e).

Dated: March 7, 1988.

John C. Lawn,

Administrator.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New

Bureau of Labor Statistics
Consumer Expenditure Surveys
CE-201 Vehicle Leasing Supplement
One time
Individuals or households
1920 responses; 128 hours; one form

The Vehicle Leasing Supplement will be used to test a more comprehensive set of leasing questions than currently appears on the Quarterly Interview Survey. The data will be analyzed to determine the suitability of a conceptual change in the treatment of new vehicles in the Consumer Price Index.

Signed at Washington, DC, this 8th day of March, 1988.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-24-M

Employment and Training Administration

Job Training Partnership Act; Policy Considerations in Administering JTPA Regulations on Fixed Unit Price Performance Based Contracts

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice publishes for 30-day comment a paper describing issues the Department of Labor is presently considering in administering JTPA regulations at 20 CFR 629.38(e)(2), which set forth conditions whereby fixed unit price, performance based contracts may be charged 100 percent to the training cost category. The paper lists a number of optional positions the Department might take in addressing policy issues in an upcoming official policy interpretation. The paper also identifies several issues which in the longer run could be treated in proposed regulatory change or in statutory amendments. The Department intends for a thorough discussion to take place involving all the partners in the JTPA system, to respond to the issues and options presented in the paper and provide the opportunity for commenters to suggest additional options or pose questions that the Department has not considered.

Following the completion of the comments period and of public discussions, the Department will analyze the information received and prepare an official policy interpretation, to be published proposed in the **Federal Register**, which will in the short run clarify selected questions under the current JTPA regulations at 20 CFR 629.38(e)(2).

DATE: Comments must be submitted on or before April 11, 1988.

ADDRESS: Submit comments to: Administrator, Office of Job Training Programs, Employment and Training Administration, Room N-4469, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Hugh S. Davies, Telephone (202) 535-0580.

Policy Considerations in Administering JTPA Regulations on Fixed Unit Price Performance-Based Contracts

Overview

In the paper which follows, the Department of Labor reviews the three principal areas of concern regarding the use of fixed unit price, performance-based agreements written under 20 CFR

629.38(e)(2), a section of the Federal regulations for the Job Training Partnership Act (JTPA) program.

These areas are:

—The nature of training activities properly chargeable under 20 CFR 629.38(e)(2);

—Issues surrounding current practices in the JTPA system for making payments to contractors; and

—The question of "profits" for public and private non-profit agencies, realized through agreements written under 20 CFR 629.38(e)(2).

This paper is in followup to Training and Employment Guidance Letter (TEGL) 3–87, dated November 18, 1987, in which the Department described a series of problems with fixed unit price, performance-based contracts that had come to light, and requested the cooperation of States and Service Delivery Areas (SDAs) to examine local practices and policies involved in entering into this type of contract and, in particular, to study procurement requirements.

In presenting an analysis of issues and options which respond to perceived problems, the Department of Labor intends to engage in a dialog with States, SDAs, and interested service providers on those questions open to interpretation rather than make immediate policy determinations. Following consultations, the Department will assess what the best course of action is for the short run, and will publish a proposed formal policy interpretation in the **Federal Register** to deal with selected issues. It is anticipated that these steps will be completed during Spring 1988.

The ideas and options presented in this paper are included for the purposes of discussion, and do not represent final DOL interpretation of the statute and regulations.

Policy Considerations in Administering JTPA Regulations on Fixed Unit Price, Performance-Based Contracts

Background

In Training and Employment Guidance Letter (TEGL) 3–87, the Department of Labor described numerous concerns with respect to fixed unit price, performance-based contracts written for training under the Job Training Partnership Act (JTPA). At the heart of the Department's concerns have been questions of compliance with the requirements of 20 CFR 629.38(e)(2), which establishes conditions whereby all contract costs can be charged to the training cost category, and flawed contracting practices that have been used to enter into agreements for training services, sometimes in violation of State and local procurement codes.

The TEGL requested that States and SDAs institute a review of relevant aspects of procurement systems, assessing both the adequacy of provisions and the thoroughness of implementation by JTPA programs. Since the TEGL was issued on November 18, the Department has heard from a number of States and SDAs and discussions have been held at several national and regional meetings.

It is evident that an examination of procurement practices is taking place in many locations. The purpose of this paper is to focus on questions of interpretation of the Federal requirements at § 629.38(e)(2), and to focus on short and longer-term options that could be considered for clarifying or further defining the conditions whereby all contract costs can be charged to training rather than allocated among the administration, participant support and training cost categories.

Training Activities Chargeable Under 20 CFR 629.38(e)(2)

The first group of interpretation issues involves the definition of the term "training" for the purposes of § 629.38(e)(2) of the JTPA Regulations. Questions have been raised whether it is consistent or fair for the Department to hold "training" here strictly to the definition "occupational training", when at § 629.38(e)(1) "training" is defined for the purposes of the training cost category to include a range of training, remedial education, counseling and job search assistance services. The primary intention of DOL in transferring the language of § 629.38(e)(2) from the regulations of the former CETA program was to allow for simplification of contractor cost billing and accounting in exchange for guaranteed placement of participants. Also, during the JTPA implementation period, it was recognized that this regulation would provide strong incentives for higher quality training agreements which would lead to higher wage, and better quality placements for participants. The contractor would have greater flexibility in charging costs, but would only be paid for performance. Occupational specificity for placement outcomes would help tie training activities to the Private Industry Council's (PIC's) guidelines, developed per section 107(d) of the Act.

Other than DOL responses to specific inquiries received during the 1983 JTPA implementation, there was no clear Federal statements as to what constituted acceptable training for the purposes of charging contracts under § 629.38(e)(2). One set of options, both longer-range, would be for the Department to propose a PY 1988 regulatory amendment, or seek clarifying statutory language which would define "training," during any congressional revision to JTPA. Another option is to conclude that it is not ultimately useful to tie the meaning down at the Federal level.

There are, however, two sub-issues related to what constitutes "training" for the purposes of § 639.38(e)(2) that can be addressed in the short run through either general policy guidance or official interpretation:

—The contents of acceptable training "packages", chargeable under 20 CFR 629.38(e)(2); and

—Arrangements for charging of "umbrella contracts" 100 percent to the training cost category, under Section 629.38(e)(2).

A level of concern surrounds the allowability of training packages under § 629.38(e)(2), since the package approach is most common in fixed unit price agreements designed for the hard to serve, including at-risk youth and adults needing basic skills remediation: literacy training, adult basic education, English-as-a-second language (ESL), or GED preparation. Packages may include up front intake and assessment, and job search assistance (JSA) for placement at the end of the program. A core curriculum of occupational skills training is a variable element in such packages, as are provisions for participant support costs.

One approach is for the Department to provide general policy guidance indicating that training packages are permissible written in fixed unit price, performance-based agreements under § 629.38(e)(2). This would be consistent with DOL's emphasis on literacy skills and enriched, longer-term training interventions which will better prepare youth and adult participants facing serious barriers to productive employment.

Another option is for DOL to more formally issue an official interpretation that training packages are permissible under § 629.38(e)(2), and enumerate acceptable elements. In providing a definition of acceptable contents, DOL need not prescribe a universally acceptable package. It is understood all packages may contain a placement phase.

"Umbrella contracts" or "blanket contracts" written under § 629.38(e)(2) have generated unease as well as specific audit challenges, both because of the scale of the contracts and the range of possible participant sequences.

In some of these large, omnibus contracts, the service provider may be able to enroll and directly place some participants, without ever enrolling these individuals in *any* training activity, whether occupationally specific or not. Because in some locations the entire contract amount can be charged to the training cost category without allocating the cost of those participants directly placed, these contracts could be considered a ruse of statutory administrative cost limitations. There are a limited number of SDAs where virtually the entire JTPA allocation has been obligated into a few "umbrella contracts," usually with public agencies or large community-based organization (CBO's).

DOL's options in responding to problems with umbrella contracts appear to be three:

(1) Issue no general policy guidance or official interpretation, and continue to deal with problems on a case-by-case basis. For example, DOL can utilize 20 CFR 629.38(e)(3): "Training costs shall not include direct or indirect costs associated with the supervision and management of the program."

(2) In an official policy interpretation, indicate that these contracts may be written under § 629.38(e)(2) only if there is a method developed to ensure that the costs of participants who do not participate in any training activity are allocated among the cost categories.

(3) In an official policy interpretation, clarify that umbrella contracts are inconsistent with DOL's regulation at 20 CFR 629.38(e)(2).

Specific technical questions arise in training packages for youth. Section 629.38(e)(2), paragraph (iii)(B), allows for youth training packages purchased competitively if the training results in employment, or attainment of an outcome specified in section 106(b)(2) of the Act. The list of outcomes includes:

—Attainment of employment competencies recognized by the PIC;

—Completion of elementary, secondary or postsecondary school or equivalent;

—Enrollment in other training or enlistment in the Armed Forces.

Effective in Program Year 1989, the Department will be using a new stronger definition for attainment of youth employment competencies, which will require completion of two out of three skill areas for performance standards and related DOL reporting requirements. Does the DOL focus on the deliverables in performance-based contracts written under § 629.38(e)(2) limit the latitude of local JTPA programs to write training agreements where the outcome is to be a PIC-established youth employment competency? Can performance-based contracts be structured to:

—Enable providers to meet their performance standards for youth programs?

—Mesh with reporting requirements for SDAs?

—Assign credit for outcomes among multiple service providers?

—Encourage service to at-risk youth?

If DOL elects the option to issue guidance on acceptable training packages, the policy guidance could clarify that, in the case of training packages for youth, contracts may be written under § 629.38(e)(2) for the attainment of one or more PIC-recognized youth competency (pre-employment/work maturity, basic education, or job specific skills), according to the preference of the SDA. This guidance would show that achievement of performance standards and reporting of outcomes to DOL do not limit local flexibility in choosing program designs or ligitimate sequences of training and competency attainment for at-risk youth.

Payments to Contractors

The second major area for policy consideration concerns requirements for payments made to contractors under § 629.38(e)(2). The March 1983 JTPA Regulations do not prevent incremental payments to a contractor. DOL has previously indicated that incremental payments are acceptable, provided that contracts treat these payments as a form of advance against full performance, which is defined in § 629.38(e)(2)(iii) to include:

Completion of training by a participant;

Placement of the participant in the occupation trained for;

At not less than the wage specified in the agreement; or,

For youth programs, attainment of outcomes specified in section 106(b)(2) of the Act.

Contract goals for full performance may be defined under a State/SDA system on the basis of each participant served, or on the basis of a percentage of participants served. In circumstances where full performance is not achieved by the contractor, any incremental payments made must be either reimbursed to the local JTPA program or prorated among the three cost categories.

If costs are to be charged to training in accordance with § 629.39(e)(2), in DOL's judgment, there are no legal grounds for making incremental payments that are not contingent on the full performance phase. Therefore, the current practice of non-contingent payment for interim performance benchmarks—often enrollment, training midpoint, and training completion—is inconsistent with JTPA regulations. Payments should be recalculated against the final placement, full performance record of contractors, and necessary reimbursements or prorations arranged.

Because payments to contractors under the present § 629.38(e)(2) regulation "ride" on full performance, a related question is how much of an advance should properly be made to contractors prior to the full performance, placement phase. Current practices in the JTPA system vary widely, with some programs advancing up to and over 90 percent of the contract total to service providers through interim payments. JTPA programs whose contractors do not perform per performance goals may experience delays or difficulties in obtaining reimbursement or cost proration reports. Also, interim payment practices may cause contractors to have excess cash on hand in violation of Federal cash management requirements.

DOL's options in responding to the advance payments issued under § 629.38(e)(2) stem from the level of detail determined appropriate for a general policy guidance issuance or an official interpretation notice. One approach is to provide policy guidance that all interim payments to contractors under § 629.38(e)(2) should be advances which bear a reasonable relationship to the costs incurred by the contractor prior to the placement phase. Another option would be to issue this guidance, but further state a guideline that a range of 25 to 30 percent of the "full unit price" amount be withheld prior to full performance. This guideline would be described as a range, to allow adjustments in cases of very long or very short training periods.

A related "payment to contractors" question is whether DOL should address the meaning of "at not less than the wage specified in the agreement" in § 629.38(e)(2), in light of current practices in the JTPA system. Some SDAs specify a range of acceptable placement wages, or an average wage for placements under the agreement. Also, SDAs have been identified that set no requirement other than the Federal minimum wage. The first option would be for DOL to clarify in general policy guidance or an official interpretation notice that States and SDAs may specify the placement wage as an average wage for the placements obtained by a training contractor, or as a range of acceptable placement wage rates The second option would be for DOL to make an additional statement concerning what constituted an acceptable floor level or lowest-value for placement wage rates in fixed unit price, performance-based contracts. For example, a system-wide general guideline on a floor level could be based on each SDA's Performance Standard model departure number for the placement wage. A third option, opposite to the second option just described, would find the question of the lowest acceptable placement wage rate to be adequately addressed by the overall JTPA Performance Standards mechanism, and not an issue to be specially treated under § 629.38(e)(2) of the regulations.

The Question of "Profits" for Public and Private Non-Profit Agencies

The final area for policy consideration regarding fixed unit price, performance-based contracts written in accordance with 20 CFR 629.38(e)(2) involves contracting between JTPA programs and public and private non-profit agencies on a fixed price basis. When revenues to the contractor exceed the contractor's actual costs in operating a training activity, how are these revenues to be considered? The most prevalent practice in the JTPA system has been to consider these revenues to be profits fairly earned by the public or private non-profit agency by accepting the risk associated with a performance-based contract, and by meeting or exceeding specified JTPA performance goals. Some States and SDAs place restrictions on the use of revenue generated, however. Organizations classified as tax-exempt under section 501(c)(3) of the Federal Internal Revenue Service code are required under the laws of some States to restrict the use of excess JTPA revenue to activities consistent with the general charitable or educational purpose of the organization, which may or may not be job training activities. State and local laws may place other restrictions on the use of any excess revenue or earnings by public agencies, for example, requiring that such funds be formally appropriated prior to any use. Few locations are known to define such excess revenue as JTPA "program income", to be retained by the program generating the revenue and used to further program objectives consistent with JTPA's overall program income regulation found at 20 CFR 629.32.

This final issue presents a real challenge to DOL in its role to provide national policy leadership and oversight of the JTPA system. On the one hand, Federal regulatory history militates against unrestricted use of excess revenues accrued through operation of a job training program. Office of Management and Budget (OMB) Circulars A–87 (cost principles applicable to grants with State and local governments) and A–122 (cost principles applicable to grants with non-profit organizations) state that "No provision for profit or other increment above cost is intended" (A–87), and "Provision for profit or other increment above cost is outside the scope of this circular" (A–122). These Federal management circulars were not referenced in JTPA regulations as requirements as they had been for previous training and employment programs. States have been given a choice as to the cost principles they wish to adopt for JTPA programs, although a number of States did choose the option of formally adopting A–87. Implementation of the Federal cost principles in those States has been unclear with respect to the allowability of "profit"-generating contractual arrangements with public and private non-profit agencies.

Federal grant administrative requirements historically have been determined under OMB Circulars A–102 (State and local governments) and A–110 (non-profit organizations). In July 1979, DOL codified these circulars for its grant programs at 41 CFR 29.70. These DOL regulations do make provision for program income from various sources, such as service fees, with the requirement that program income can be used to expand the DOL-grant assisted program, reduce the total Federal cost, or be applied towards any matching cost. Therefore, 20 CFR 629.32 treats JTPA program income in a way consistent with other DOL grant regulations.

In seeking to understand the background of the OMB circulars, the Department has been advised by OMB officials involved in the initial drafting of the Federal cost principles that the circulars simply did not anticipate or address the question of profits by State, local governments, and private non-profit agencies. Similarly, while DOL officials recognized after JTPA implementation that contracts with governmental or private-non-profit agencies might generate excess revenues in the normal course of operation, it was assumed that these revenues would be modest in scale as the result of sound procurement and price negotiation, and would be expended for program purposes, rather than be identified as no-strings "profits."

At State, SDA, and service provider levels, however, there is a strongly held view that JTPA represented an important departure from past Federal training and employment programs. The Act mandated that the program would be run through a partnership with the private sector, and that the program would be performance-driven, focusing on placement results, with operations influenced by incentives for successful programs and sanctions against poor programs. In this environment, the argument is frequently made to DOL that public and private non-profit agencies which succeed should not be treated differently from private for-profit training providers. If these agencies succeed in meeting or exceeding their goals specified in fixed unit price, performance-based contracts written per § 626.38(e)(2), then these agencies should have free use of revenues in excess of costs as profits.

TEGL 3–87, in discussing the "profits" issue, enumerated a series of excessive profit situations that have been flagged as program abuse problems by DOL during specific investigations. Most "excessive profit" situations can be traced to flaws in actual procurement practices, and in fewer cases, to the procurement system legally in place for a State or SDA program. There have been instances where an administrative decision was made not to hold a competitive selection, although a number of public, private non-profit, and private for-profit potential service providers existed in the local area who would have submitted bids under a request for proposal. Some jurisdictions, in seeking to stream-line contracts, reduced agreement provisions to the point where contracts do not specify clearly the services to be provided or detail deliverables, i.e., the terms of placement or youth competencies to be attained.

Relatedly, agreements in which a variety of services and training activities are authorized without contractual commitments for the minimum number of participants to be provided each service or training course have resulted in agreements that are difficult or impossible to price. One "fixed unit price" may be offered by the bidder, based on participant sequence assumptions that are not guaranteed by the contract. Simply by reducing the number of participants assigned to longer-term or more intensive sequences, a contractor could eliminate risk and assure any desired level of profit from placements.

To control against excessive profits, JTPA contracting officials should penetrate "behind" each proposal and understand the prospective costs associated with what is offered, particularly when a "fixed unit price" is

proposed for a complicated aggregate. Most but not all procurement systems in use do require cost and price analysis. Shortcomings in the application of procurement system requirements and any shortcomings in those systems themselves should be uncovered as States and SDAs complete review of procurement practices and policies.

Improved compliance with applicable procurement requirements, greater attention paid to questions of contract negotiation, and prudent public administration can be expected to minimize cases of excessively high contractor profits in the future. The basic issue remains of the appropriateness of any public/private non-profit agency gaining "profit", and the uses made of such "profit", versus restricted-use program income. Questions remain whether the "profit" concept is consistent with the proper use of public funds, and whether a public perception of the potential for abuse through self-serving contractual arrangements poses a threat to the integrity of the JTPA program nationwide.

The options to address the controversial "profits" issue appear to be three:

(1) In the short run, issue policy guidance or an official interpretation notice, to clarify that revenues in excess of costs incurred by public and private non-profit agencies through JTPA contracts written under 20 CFR 629.38(e)(2) are subject to all constraints on use under State and local law, and limitation under IRS requirements for organizations designated as tax exempt under 501(c)(3). At a later date, propose this clarification for inclusion as an amendment to JTPA regulations, to be effective for PY 1989.

(2) Add to option (1) above, by indicating that it is DOL's official interpretation that profits earned by public and private non-profit agencies through contracts written under 20 CFR 629.38(e)(2) are in fact "program income", and programs are accountable for use of this income per the JTPA regulations at 20 CFR 629.32. As with option (1), at a later date DOL would propose this official interpretation for inclusion as an amendment to JTPA regulations.

(3) Take no Federal-level action in the short run to clarify use of profits earned by agencies through contracts written under 20 CFR 629.38(e)(2). DOL would continue to deal with situations where excessive profits appear to have been earned by public and private non-profits on a case-by-case basis. In the longer run, DOL would consider suggesting legislative amendment to address the allowability of such profits, and any "program income" restrictions on use.

Conclusion

In the long run, the problems with the requirements of 20 CFR 629.38(e)(2) and current practices in the JTPA system are amenable to solution through either regulatory revision to address technical issues, or statutory amendment. The performance-based contracting mode preferred by an increasing body of JTPA administrators and private sector representatives on the PICs can be maintained, as well as fixed unit price agreements, while at the same time the JTPA system responds with adjustments. Potential long-range options include those which address particular issues in each area—the nature of training, payments to contractors, and profits—as well as those that call for replacing or simplifying the present regulatory framework so as to deal with all three main areas of concern. It is important to outline and to study these longer-range answers, at the same time more immediate options are identified.

The Department anticipates that a great deal of discussion will ensue in the JTPA system regarding each of the three areas outlined in this paper. The Department trusts that contributors to this process will consider the overall welfare and future health of the JTPA system as each advances their views and suggestions. DOL will finalize no plan until there has been opportunity for thorough discussion, and as previously agreed, will provide ample notice to the JTPA system prior to the effective date of any new policy interpretations on the use of fixed unit price, performance-based contracts.

Signed at Washington, DC, March 4, 1988.

Roberts T. Jones,

Acting Assistant Secretary of Labor.

[FR Doc. 88–5401 Filed 3–10–88; 8:45 am]

BILLING CODE 4510-30-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therin.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 783-3238

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 3rd day of March 1988.

Alan L. Moss

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-409]

Environmental Assessment and Finding of No Significant Impact; Dairyland Power Cooperative

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 550.54(o) and Part 50, Appendix J to Dairyland Power Cooperative (the licensee) for the La Crosse Boiling Water Reactor (LACBWR).

Environmental Assessment

Identification of Proposed Action

The exemption will delete the requirements for Type A testing of the containment building.

LACBWR was permanently shutdown on April 30, 1987 and reactor defueling completed on June 11, 1987. The LACBWR operating License No. DPR-45 was modified to possess-but-not-operate status on August 4, 1987.

Need for Proposed Action

The exemption is needed to eliminate requirements that were appropriate for an operating plant but are not needed at the permanently shutdown LACBWR facility.

Environmental Impact of the Proposed Action

The proposed action will have no environmental impact because all fuel has been removed from the reactor vessel and the worst case accident would not require containment integrity.

Alternative Use of Resources

This action does not involve the use of resources.

Agencies and Persons Consulted

The licensee initiated this exemption action. The NRC staff is reviewing their request. No other agencies or persons were consulted.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the licensee's application dated August 21, 1987 as revised August 28, 1987, which are available in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Dated at Rockville, Maryland, this 7th day of March 1988.

For the Nuclear Regulatory Commission.

Lester S. Rubenstein,

Director, Standardization and Non-Power Reactor Project Directorate, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-5359 Filed 3-10-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-388]

Pennsylvania Power & Light Co. and Allegheny Electric Cooperative, Inc.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-22 issued to Pennsylvania Power & Light Company and (the licensee) for operation of the Susquehanna Steam Electric Station, Unit 2, located in Luzerne County, Pennsylvania.

The proposed amendment would revise the Technical Specifications (TS) Table 3.6.3-1 by replacing existing containment isolation valves with new isolation valves which will be installed as a result of modifications proposed for Residual Heat Removal (RHR) system. The proposed RHR modifications are intended to reduce the potential of waterhammer and consequent damage to the RHR system during the operation of the RHR system in Suppression Pool Cooling (SPC) mode of operation. The proposed modification is needed because the SPC mode of RHR system operation is being utilized more frequently than anticipated at the time of plant licensing. The increased use of the SPC mode of RHR system operation increases the likelihood of an event which could cause a switchover of the RHR system from SPC mode to Low Pressure Coolant Injection (LPCI) mode of operation. In the present plant configuration, the switchover can cause a waterhammer and damage to the piping and valves of safety systems. The proposed modification is intended to reduce the waterhammer potential and will consist of installation of a new section of piping from RHR system pump discharge header to the SPC system return line in each RHR loop to be used for normal SPC mode of operation. The modified configuration is intended to assure that the LPCI mode piping remains filled and minimizes the potential of waterhammer. As a result of the proposed modifications existing valves which are classified as containment isolation valves are being replaced by a new set of containment isolation valves. The licensee proposed to change the Technical Specifications showing the revised containment isolation valves.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By April 11, 1988, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Butler: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a subsequent notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated December 23, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Ousterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Dated at Rockville, Maryland, this 7th day of March 1988.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 34–25419; File No. SR–OCC–88–01]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Options Clearing Corp.

On February 26, 1988, the Options Clearing Corporation ("OCC") filed a proposed rule change with the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") to provide for the continued effectiveness of OCC Rule 609A, which by its terms expires of February 28, 1988.[1] The Commission is publishing this notice to solicit comments on the proposal.

The proposal continues the effectiveness, through May 1988, of OCC Rule 609A which enables OCC to waive clearing member margin requirements in certain circumstances. Specifically, Rule 609A authorizes the Chairman or President of OCC to waive, in whole or in part, conditionally or unconditionally, any deposit or margin that would otherwise be required to be made by any clearing member in any account at any time during any business day. Such a waiver must be based upon a determination that it (1) is advisable in the interest of maintaining fair and orderly markets or is otherwise advisable in the public interest or for the protection of investors, and (2) is consistent with maintaining the financial integrity of OCC.

Additionally, Rule 609A subjects OCC to certain obligations. The rule requires OCC to consult with the Commission before exercising its authority to waive margin requirements. The rule also requires that record of any such waiver be prepared and maintained with the corporate records of OCC.

OCC states that the proposal is consistent with the purposes and requirements of section 17A of the Act. OCC believes that continued effectivèness of Rule 609A serves the public interest and the protection of investors by giving OCC needed flexibility in dealing with unusual market conditions.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington DC 20549.

Copies of the filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to file number SR–OCC–88–01 and should be submitted by April 1, 1988.

For The Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 4, 1988.

Jonathan G. Katz,

Secretary.

[FR Doc. 88–5350 Filed 3–10–88; 8:45 am]

BILLING CODE 8010-01-M

---

[1] To enable OCC to respond to extraordinary market conditions in October 1987, the Commission approved Rule 609A on a temporary, accelerated basis. *See* Securities Exchange Act Release No. 25059 (October 23, 1987), 52 FR 41645. On December 31, 1987 OCC filed, and the Commission currently is reviewing, a rule change that would make Rule 609A permanent *See* SR–OCC–87–24.

[Release No. 34–25420; File No. SR–OCC–87–24]

Self-Regulatory Organizations; Options Clearing Corp.; Filing of Proposed Rule Change

Pursuant to section 19 of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 31, 1987, the Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described below. The proposal would make permanent a temporary rule that enables OCC to waive clearing member margin requirements in certain circumstances.[1] The Commission is publishing this notice to solicit comment.

I. Description of the Proposal

The proposal would make permanent OCC Rule 609A dealing with clearing member margin requirements, which, by its terms, expires on February 28, 1988.[2] Rule 609A authorizes the Chairman or the President of OCC to waive, in whole or in part, conditionally or unconditionally, any deposit of margin that would otherwise be required to be made by any clearing member in any account at any time during any business day.[3] Such a waiver must be based upon a determination that it (1) is advisable in the interest of maintaining fair and orderly markets or is otherwise advisable in the public interest or for the protection of investors, and (2) is consistent with maintaining the financial integrity of OCC.

Currently, Rule 609A subjects OCC to certain obligations. Specifically, the rule requires OCC staff to consult with SEC staff before granting a waiver and, after granting a waiver, to make and keep a record of action taken under the rule. The proposal replaces the prior consultation requirement with the requirement that OCC's Chairman or President use his best efforts to consult with the Commission prior to taking action under the rule. In the event the Chairman or President is unable to accomplish prior consultation, he would advise the Commission, as soon as practicable, after any waiver was granted. Additionally, the proposal retains the requirements in Rule 609A that OCC maintain with its corporate records a record of any action taken under the rule.

II. OCC's Rationale for the Proposal

OCC believes that the proposed rule change is consistent with the purposes and requirements of Section 17A of the Act. OCC states in its filing that the proposed rule change serves the public interest and the protection of investors by providing OCC needed flexibility in dealing with extraordinary market conditions.

OCC also believes there is good cause for modifying the prior consultation requirement. OCC states that this requirement could undermine the effectiveness of the rule, which is intended to enable OCC to apply its margin requirements flexibly in extraordinary market conditions. OCC believes that ability may be impaired if the Chairman or President has to consult with the Commission before OCC can take any ameliorative action under the rule.

III. Request for Comments

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (1) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (2) as to which OCC consents, the Commission will by order approve such proposed change or institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons can submit written comments about the proposal by filing six copies of their comments with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing also will be available for inspection and copying at OCC's principal office. All comments should refer to file number SR–OCC–87–24 and should be submitted by April 1, 1988.

For the Commission, by the Division of Market Regulations, pursuant to delegated authority. 17 CFR 200–30–3.

Dated: March 4, 1988.

Jonathan G. Katz,

Secretary.

[1] To enable OCC to respond to extraordinary market conditions in October 1987 the Commission approved, on a temporary accelerated basis, a rule change substantially in the form of the proposed rule change. *See* Securities Exchange Act Release No. 25059 (October 23, 1987), 52 FR 41645.

[2] On February 26, 1988, OCC filed a rule change pursuant to § 19(b)(3)(A) of the Act that continues temporary approval of the rule through May 1988. *See* Securities Exchange Act Release No. 34–25419 (3–4–88).

[3] The term "waive" includes, but is not limited to, adjustments or modifications to OCC's formula for calculating margin requirements.

[Release No. IC–16301; (812–6627)]

MetLife-State Street Equity Trust et al.; Notice of Application

March 7, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: MetLife-State Street Equity Trust; MetLife-State Street Fixed Income Trust; MetLife-State Street Income Trust; MetLife-State Street Money Market Trust; MetLife-State Street Tax-Exempt Trust (collectively, "Trusts"); and MetLife-State Street Investment Services, Inc (the "Adviser").

Relevant 1940 Act Sections: Exemption requested pursuant to Section 6(c) from sections 13(a)(2), 17(d), 18(f)(1) and 22 (f) and (g) and approval pursuant to Section 17(d) and Rule 17d–1 thereunder.

Summary of Application: Applicants seek an order (i) to permit the Trusts and all subsequent or similar registered investment companies organized or sponsored by the Adviser or its affiliates to enter into deferred fee arrangements with their Board of Trustees or Directors ("Trustees") and (ii) to permit the Trust and participating Trustees to effect transactions incident to such arrangements.

Filing Date: The application was filed on February 12, 1987 and letters from counsel were submitted on April 22, and December 30, 1987. An amendment incorporating the representations contained in the letters was filed on March 1, 1988. A second amendment will be filed during the notice period the substance of which is contained herein.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on March 30, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personnaly or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney, by certificate. Request notifications of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, N.W., Washington, D.C. 20549. Applicants, One Financial Center, Boston, MA 02111.

FOR FURTHER INFORMATION CONTACT: Sherry Hutchins Perkins, Staff Attorney (202) 272–3026 or Brion R. Thompson, Special Counsel (202) 272–3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (8000 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations:

1. The Trusts are diversified open-end management investment companies organized as business trusts under the laws of the Commonwealth of Massachusetts and currently consist, in the aggregate, of ten separate funds, eight of which currently either offer their shares to the public. The Adviser, a wholly-owned subsidiary of State Street Research & Management Company ("State Street"), serves as the investment adviser and distributor for the Trusts. State Street is, in turn, an indirect wholly-owned subsidiary of Metropolitan Life Insurance Company (New York).

2. The Trustees of MetLife-State Street Fixed Income Trust consists of seven persons, five of whom are not "interested persons" of that Trust within the meaning of section 2(a)(19) of the 1940 Act. The Trustees of each of the other Trusts consists of nine persons, seven of whom are not "interested persons" of such Trusts within the meaning of section 2(a)(19) of the 1940 Act. Each of the Trustees who is not an interested person of the Adviser or State Street are compensated on the basis of $500 for each regular or special meeting of the Trustees or Audit Committee of a

Trust attended and reimbursement for reasonable expenses incurred in connection therewith, plus an annual retainer of $2,500 from each Trust. No Trustee who is an "interested person" of the Adviser or State Street will receive any remuneration from the Trusts.

3. The proposed deferred fee arrangements would be implemented by means of a Deferred Fee Agreement (the "Agreement") entered into between a Trustee and each participating Trust. The effect of such Agreement would be to permit individual Trustees to elect to defer receipt of their Trustees' fees, to enable them to defer payment of income taxes on such fees, or for other reasons. The Agreement will allow each individual Trustee to defer receipt of all Trustee's fees which otherwise would become payable by a Trust to him for services performed after the date of such Agreement. A Trustee will be able to enter into agreements with any number of the Trusts. Each Trust believes that the availability of deferred fee arrangements will enhance its ability to attract and retain Trustees of the same high caliber as those who now serve on its Board of Trustees.

4. Under the Agreement, deferred Trustee fees will be credited to a book reserve account established by the participating Trust (the "Deferred Fee Account"), as of the date such fees would have been paid to such Trustee. The value of the Deferred Fee Account shall be equal to the value such account would have had as if the amounts credited had been invested and reinvested in certain designated securities ("Underlying Securities"). The Underlying Securities for a Deferred Fee Account will consist of shares of the MetLife-State Street Money Market Fund of the MetLife-State Street Money Market Trust provided, however, that in the discretion of the Board of Trustees of the Trust entering into such Agreement (subject to the restriction described below) such account shall be deemed to have been invested in such other Underlying Securities as the Board of Trustees and the participating Trustee shall have agreed upon in writing from time to time. In such event the account shall be credited or charged with all interest, dividends and other earnings and all gains and losses which would have been realized had such account been invested in the Underlying Securities.

5. Under the Agreement, such other Underlying Securities will be restricted to securities which could then be purchased by the Trust entering into the Agreement without violating section 13(a)(3) of the 1940 Act. As a matter of prudent risk management, each Trust intends in all cases to purchase Underlying Securities in an amounts equal to the deemed investment of the Deferred Fee Accounts of its Trustees. No Trust will enter into an Agreement specifying shares of a registered investment company as Underlying Securities for any Deferred Fee Account if there is a material risk that the purchase of such shares would result in a violation of section 12(d)(1) of the 1940 Act.

6. The Agreement provides that the participating Trust's obligation to make payments of the Deferred Fee Account will be a general obligation of such Trust, and payments made pursuant to the Agreement will be made from the Trust's general assets and property. With respect to the obligations created under the Agreement, the relationship of the Trustee to the Trust will only be that of a general unsecured creditor. The Agreement also provides that the Trust will be under no obligation to purchase, hold or dispose of any investments under the Agreement, but, if the Trust choses to purchase investments to cover obligations, any and all such investments will continue to be a part of the general assets and property of the Trust.

Applicants' Legal Analysis

1. Applicants believe that the deferral of Trustee fees in accordance with the Agreement will have a negligible effect on each Trust's assets, liabilities, net assets and net income per shares. The effect of the Agreement would merely be to defer the payment of fees that the Trusts would otherwise be obligated to pay on a current basis. Liabilities created by the credits to the Deferred Fee Account under the Agreement would be held by the equal amount of assets, which assets would not be held by the Trust if fees were paid on a current basis. In addition, when all payments under the Agreement have been made to a Trustee, such Trustee would be in a position no better than if any deferred fees had been paid on a current basis. Further, the Agreement will not obligate any Trust to retain a Trustee in such capacity, nor will it obligate any Trust to pay any (or any particular level of) Trustee fees to any Trustee.

2. Applicants contend that the Agreement possesses none of the characteristics of "senior securities" that led to the adoption of restrictions pertaining to such securities, that the restriction on transferability or negotiability of the deferred fees will have no adverse affects on the Trusts' shareholders, and that the deferral of fees under the Agreement should be viewed as being issued not for services, but in return for the Trusts not being required to pay such fees on a current basis. Thus, Applicants request exemptions from the provisions of sections 13(a)(2), 18(f)(1), 22(f) and 22(g) of the 1940 Act, to the extent necessary, to permit implementation of the Agreement.

3. Applicants assert that the Agreement does not involve joint transactions between the Trusts and their Trustees within the meaning of section 17(d) of the 1940 Act and Rule 17d–1 thereunder. In this respect, Applicants submit that the Agreement does not possess the profit-sharing characteristics required for a joint transaction as contemplated by the 1940 Act. To the extent that the Agreement may be deemed to involve joint transactions between the Trusts and their Trustees, Applicants submit that the participation in the Agreement by the Trusts will not be on a basis that is less advantageous than that of any other participant.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

Office of Protocol

[Public Notice 1055]

Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1987

The Department of State submits the following comprehensive listing of the statements which, as required by law, Federal employees filed with their employing agencies during calendar year 1987 concerning gifts received from foreign government sources. The compilation includes reports of both tangible gifts and gifts of travel or travel expenses of more than minimal value, as defined by statute.

Publication of this listing in the **Federal Register** is required by section 7342(f) of Title 5, United States Code, as added by section 515(a)(1) of the Foreign Relations Authorization Act, Fiscal Year 1978 (Public Law 95–105, August 17, 1977, 91 Stat. 865).

Dated: March 4, 1988.

Ronald I. Spiers,
Under Secretary for Management.

Name and title of person accepting gift on behalf of the U.S. Government	Gift, date of acceptance on behalf of the U.S. Government, estimated value, and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance

BILLING CODE 4910-62-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended March 4, 1988.

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No. 45481

Date Filed: February 29, 1988
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 28, 1988
Description: Application of The Air-Shuttle, L.P., pursuant to section 401 of the Act and Subpart Q of the Regulations requests a certificate of public convenience and necessity authorizing it to engage in scheduled interstate and overseas air transportation of persons, property and mail.

Docket No. 45482

Date Filed: February 29, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 28, 1988
Description: Application of Hawaiian Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations requests amendment to its certificate of public convenience and necessity issued authorizing scheduled non-stop service for passengers, property and mail between Honolulu, Hawaii and three cities in Japan including Fukuoka, Tokyo, and Nagoya.

Docket No. 45483

Date Filed: March 1, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 29, 1988
Description: Application of Aero-Chago, S.A. pursuant to section 402 of the Act and Subpart Q of the Regulations requests amendment to its foreign air carrier permit to authorize scheduled services over its presently authorized routes to add Mayaguez, P.R.

Docket No. 45485

Date Filed: March 1, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 29, 1988
Description: Application of Federal Express Corporation pursuant to section 401 of the Act and Subpart Q of the Regulations requests issuance of a new or amended certificate of public convenience and necessity authorizing it to provide foreign air transportation of property and mail between a point or points in the United States, on the one hand, and Rio de Janeiro, Sao Paulo and Manaus, Brazil, on the other hand.

Docket No 45488

Date Filed: March 2, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 30, 1988
Description: Application of Northwest Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations applies for a certificate of public convenience and necessity authorizing it to provide service between the United States and Mexico over U.S. Routes B.14, B.17, C.12, D.4, D.16, and D.21, as authorized by the U.S. Mexico Memorandum of Consultations signed on January 29, 1988.

Docket No. 45489

Date Filed: March 3, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 31, 1988
Description: Application of United Air Lines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations applies for an amendment of its certificate of public convenience and necessity for Route 57 in order to authorize United to provide round-trip foreign air transportation of passengers, property, and mail between San Francisco, Los Angeles, and San Diego, California, on the one hand, and Acapulco, Guadalajara, Hautulco, Manzanillo, Mexico City/Toluca, and Zihuatanejo, Mexico, on the other hand.

Docket No. 45495

Date Filed: March 3, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 17, 1988
Description: Conforming Application of American Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations, applies for a certificate of public convenience and necessity authorizing service between Los Angeles, California, and Mexico City, Mexico.

Docket No. 45433

Date Filed: March 3, 1988
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: March 31, 1988
Description: Amendment No. 1 to the Application of Federal Express Corporation pursuant to section 401 of the Act and Subpart Q of the Regulations, amends Paragraph 4 and Appendix A, page 3 of its U.S.-Mexico all-cargo certificate application so as to delete its request for authority to serve McAllen, Texas.

BILLING CODE 4910-62-M

Office of the Secretary

Privacy Act of 1974; System of Records

The Department of Transportation (DOT) herewith publishes a proposal to alter a system of records.

Any person or agency may submit written comments on the proposed altered system to the U.S. Coast Guard (G–KOM), ATTN: LT R.S. Condron, 400 7th St., SW., Washington, DC 20590-0001. Comments must be received within 30 days to be considered.

If no comments are received, the proposed changes will become effective 30 days from the date of issuance. If comments are received, the comments will be considered and where adopted, the document will be republished with the changes.

Issued in Washington, DC, March 4, 1988.

Jon H. Seymour,
Assistant Secretary for Administration.

Narrative Statement Department of Transportation Office of the Secretary On Behalf of the United States Coast Guard For Alteration of the USCG Military Personnel Health Record System

The Office of the Secretary, on behalf of the Coast Guard, proposes to amend the USCB Military Personnel Health Record System, DOT/CG 572, to cover all medical records maintained on Coast Guard personnel and all records maintained on other uniformed services active duty, reserve and retired personnel and dependents provided care at a Coast Guard health care facility.

The purposes of this notice is to revise the system to incude all medical files at Coast Guard treatment facilities, and at Coast Guard administrative offices, and to more accurately reflect current

agency practices. These files contain treatment records and computerized medical record data used for the purposes described under the appropriate headings in the attached copy of the system notice prepared for publication in the **Federal Register**.

The changes include amendments to: System location, Categories of records in the system, Routine uses of records maintained in the system, Storage, Retrievability, Retention and disposal, Record access procedures, Contesting record procedures and Record source categories.

Since this proposal is an amendment of an existing record system, the probable effects of this proposal on the privacy interests of the general public is minimal.

A description of the steps taken to safeguard these records is given under the appropriate heading of the attached **Federal Register** system of records notice.

The purpose of this report is to comply with Office of Management and Budget Circular, A-130, Appendix I, dated December 12, 1985.

Amendment—DOT/CG 572

System location: Amended to reflect inclusion of records retained at the service member's unit or the Coast Guard health care facility at which the members or dependents receive treatment.

Categories of records in the system: Amended to reflect inclusion of x-rays; physical examinations; ADP records containing due dates for physical/dental and eye examinations, innoculations, screening tests and results of actions required by Coast Guard or other federal, state or local government or agency, including body weight/measurements, HIV, PPD, etc.; records concerning line of duty determination and eligibility for disability benefits.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Amended to reflect that:

a. Records are provided to Department of Defense to determine suitability of members for overseas assignments and to develop automated information relating to medical readiness in wartime and contingency operations.

b. Records are provided to federal, state or local governments and agencies to compile statistical data for research and auditing; to provide quality assurance; to report medical conditions and other data required by law; to aid in preventive health and communicable disease control programs.

c. Records are provided to the Joint Commission on Accreditation of Healthcare Organizations to evaluate health care provided, personnel and facilities for professional certification and hospital accreditation; to provide quality assurance.

d. Records of communicable disease are provided to the Department of Defense to analyze the results, to ensure uniformity of record keeping, and to centralize production of reports for all uniformed services.

e. Records are provided to Department of Defense or other federal, state or local governments and agencies for casualty identification purposes.

f. Records are provided to the Social Security Administration and Veterans Administration for use in determining entitlement to benefits administered by those agencies.

g. Records are provided to the Public Health Service, Department of Defense, or Veterans Administration medical personnel or to personnel or facilities providing care to eligible beneficiaries under contract in connection with medical treatment of individuals.

Storage: Amended to indicate that portions of records are automated at some units.

Retrievability: Amended to reflect that a member's or dependent's social security number may be used as a method of retrieving records.

Retention and disposal: Amended to reflect inclusion of retention and disposal actions of medical files for retired personnel, dependents, and reservists. Records for retired personnel and dependents are retained at the health care facility for a period of 4 years from the date of the last activity. They are forwarded to the National Personnel Records Center 4 years after last activity. Records for reserve personnel are retained in custody of the reserve group or unit or district commander(s) so long as the reservist is assigned to the particular area. Records are transferred to new reserve unit or district commander(s) upon reassignment of reservist. They are incorporated into the Official Coast Guard Reserve Service Record System upon separation or retirement.

Record access procedures: Amended to indicate that active duty personnel may write or visit the health care facility where the record is located in addition to writing Commandant (G–CMA) to gain access to records; that retired personnel and dependents should write or visit the health care facility where the record is/was located, and to write National Personnel Records Center if otherwise unable to locate the records; that reserve personnel should write or visit the reserve group or unit or district commander(s) of the district where command is located or write Commandant (G–CMA).

Contesting record procedures: Amended to indicate that Commandant (G–CMA) should be contacted in all cases.

Record source categories: Amended to reflect inclusion of records obtained from investigations resulting from illness or injury, and from the individual to whom the record pertains.

SYSTEM NAME:

USCG Military Personnel Health Record System.

SYSTEM LOCATION:

At the member's unit or the Coast Guard health care facilities at which the member or dependents receive treatment.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

a. Active duty, reserve, and retired members of the uniformed services and their dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

a. Records of medical and dental treatment, including x-rays.

b. Physical Examinations.

c. ADP Records containing due dates for physical/dental and eye examinations, innoculations, screening tests and results of actions required by Coast Guard or other federal, state or local government or agency.

d. Records concerning line of duty determination and eligibility for disability benefits.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. Provided to the Department of Defense to determine suitability of members for overseas assignments and to develop automated information relating to medical readiness in wartime and contingency operations.

b. Provided to federal, state, or local governments and agencies to compile statistical data for research and auditing; to provide quality assurance; to report medical conditions and other data required by law; to aid in preventive health and communicable disease control programs.

c. Provided to the Joint Commission on Accreditation of Healthcare Organizations to evaluate health care provided, personnel and facilities for professional certification and hospital accreditation; to provide quality assurance.

d. Records of communicable disease are provided to the Department of Defense to analyze the results, to ensure uniformity of record keeping, and to centralize production of reports for all uniformed services.

e. Provided to Department of Defense or other federal, state or local governments and agencies for casualty identification purposes.

f. Provided to the Social Security Administration and Veterans Administration for use in determining an individual's entitlement to benefits administered by those agencies.

g. Provided to the Public Health Service, Department of Defense, or Veterans Administration medical personnel or to personnel or facilities providing care to eligible beneficiaries under contract in connection with medical treatment of individuals.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage of individual files are in folders. Portions of records are automated at some units

RETRIEVABILITY:

Name or social security number of member or dependent.

SAFEGUARDS:

Rooms or cabinets in which records are located are locked when unattended. Access limited to these records at all times by personnel screening.

RETENTION AND DISPOSAL:

a. Active Duty Personnel: Individual medical files are retained at the members' unit or medical administration office for so long as the member is assigned to the particular area. When the member is reassigned, the individual medical file is transferred to the new duty station upon reassignment of member. Upon separation or retirement, the individual medical file is incorporated into the Official Officer Service Records System (DOT/CG 626) or Enlisted Personnel Record System (DOT/CG 629), as appropriate.

b. Retired Personnel: Individual medical files are retained at the medical facility for a period of 4 years from date of last activity. Transferred to National Personnel Records Center (Military Personnel Records) 9700 Page Blvd., St. Louis, MO 63132, 4 years after last activity.

c. Dependents: Individual medical files are retained at the medical treatment facility for period of 4 years from date of last activity. Transferred to new duty station of sponsor upon written request of dependent. Records not transferred are forwarded to National Personnel Records Center (CPR) 111 Winnebago St., St. Louis, MO 63118, 4 years after last activity.

d. Reserve Personnel: Individual medical files are retained in custody of the reserve group or unit, or district commander(r) for so long as the reservist is assigned to the particular area. When the member is reassigned, the individual medical file is transferred to the new reserve group or unit or district commander(r), as appropriate. Upon separation or retirement, the individual medical file is incorporated into Official Coast Guard Reserve Service Record System (DOT/CG 676).

SYSTEM MANAGER(S) AND ADDRESS:

System Manager: Chief, Office of Health Services, Department of Transportation, United States Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard, Commandant (G–CMA), 2100 2nd Street, SW., Washington, DC 20593–0001. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

a. Active Duty Personnel: Write or visit the health care facility where the record is located, or write Commandant (G–CMA) at the address in "Notification Procedure."

b. Retired Personnel and all Departments: Write or visit the health care facility where the record is/was located. If unable to locate records, write:

(Retired) National Personnel Records Center, (Military Personnel Records), 9700 Page Blvd, St. Louis, MO 63132
(Dependents) National Personnel Records Center (CPR), 111 Winnebago Street, St. Louis, MO 63118

c. Reserve Personnel: Write or visit reserve group or unit or district commander(r) of the district where command is located, or write: U.S. Coast Guard (G–CMA), 2100 2nd Street, SW., Washington, DC 20593–0001.

The decision to release medical records directly to the individual shall be made by a medical practitioner per 49 CFR 10.35(c).

CONTESTING RECORD PROCEDURES:

Contact Commandant (G–CMA) at the address in "Notification Procedure."

RECORD SOURCE CATEGORIES:

a. Medical facilities where beneficiaries treated or examined.

b. Investigations resulting from illness or injury.

c. From the individual.

BILLING CODE 4910-62-M

Research and Special Programs Administration

Office of Hazardous Materials Transportation; Applications for Renewal or Modification of Exemptions or Applications To Become a Party to an Exemption

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applications for renewal or modification of exemptions or application to become a party to an exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of the Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Except as otherwise noted, renewal application are for extension of the exemption terms only. Where changes are requested (e.g., to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) they are described in footnotes to the application number. Application numbers with the suffix "X" denote renewal; application numbers with the suffix "P" denote party to. These applications have been separated from the new applications for exemptions to facilitate processing.

DATE: Comment period closes March 29, 1988.

Comment:

Address comments to: Docket Branch, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Docket Branch, Room 8426, Nassif Building, 400 7th Street, SW. Washington, DC.

(1) To amend exemption to change proper shipping name, to eliminate the requirement for weighing the tank, to revise the retest period from 2-5 years and to delete the OWTT requirement for liquid helium.

(2) To authorize shipment of two additional materials classed as Corrosive material.

(3) To amend exemption to increase the maximum allowable service pressure to 1500 psig from 900 psig and to change the wording in certain sections to make more correct.

(4) To amend exemption to include a provision for Competent Authority Approval for air shipments.

(5) To authorize the reporting of shipments, incidents and accidents in the renewal application instead of every six months.

(6) To authorize renewal and an alternative notification procedure to provide the FAA with advance notice of an operation.

(7) To amend exemption to include any manufacturer's non-DOT specification packaging, to increase the weight limit to 3000 lbs., and to allow shipments in full container loads in stack trains.

(8) To authorize renewal and to amend the exemption to provide for alternative air carriers and to reword certain provisions for accuracy.

(9) To authorize shipment of four additional materials classed as flammable liquid in the approved packaging.

BILLING CODE 4910-60-M

Urban Mass Transportation Administration

Intent To Prepare an Environmental Impact Statement on Alternative Transit Improvements in the Pittsburgh, Pennsylvania Region

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice of Intent to prepare an environmental impact statement.

SUMMARY: This notice announces that the Urban Mass Transportation Administration (UMTA) and Port Authority of Allegheny County are undertaking the preparation of an Environmental Impact Statement (EIS) for alternative transit improvements in the Northside, Downtown, Oakland, and Squirrel Hill corridor of the Pittsburgh, Pennsylvania area. This area is locally referred to as the Spine Line Corridor. The EIS is being prepared in conformance with 40 CFR Parts 1500–1508, Council on Environmental Quality (CEQ), Relations for Implementing the Procedural Requirements of the National Environmental Policy Act of 1969 as amended; and 23 CFR Part 771, Federal Highway Administration and Urban Mass Transportation Administration, Environmental Impact and Related Procedures.

FOR FURTHER INFORMATION CONTACT: Elaine Burick, Transportation Representative, UMTA Region III, 841 Chestnut Street, Suite 714, Philadelphia, Pennsylvania 19107 (215) 597–8098.

SUPPLEMENTARY INFORMATION:

Scoping Meeting

Two public scoping meetings will be held on April 6, 1988 at 11:30 a.m., and again at 6:30 p.m., in the Young Women's Christian Association Building, First Floor (Fourth Avenue and Wood Street, Pittsburgh, Pennsylvania 15222). The meetings will be held to help establish the purpose, scope, framework, and approach for the analysis. At the scoping meeting, a presentation will be made which will provide a description of the proposed scope of the study using maps and visual aids, as well as a plan for an active citizen involvement program, a projected work schedule, and an estimated budget. Members of the public and interested Federal, State, and local agencies are invited to comment on alternatives to be assessed, the environmental, social and economic impacts to be analyzed, and the evaluation approach to be used to arrive at a decision. Comments may be made either orally at the meetings or in writing, to Allen D. Biehler, Director of Planning and Business Development, Port Authority of Allegheny County, Beaver and Island Avenues, Pittsburgh PA 15233. Written comments must be postmarked no later than April 11, 1988.

Corridor Description

The Spine Line Corridor, linking the Northside, Downtown Pittsburgh, Oakland, and Squirel Hill, is one of the most heavily traveled corridors in the Pittsburgh Metropolitan area. The natural attraction of the compact Central Business District (CBD) of Pittsburgh, located in close proximity to the unique community of Oakland with its technical, cultural and educational facilities, and the highly developed Northside create dense travel patterns which strain the roadway network serving them. The corridor area generally encompasses an area of the lower Northside across the Allegheny River to the Central Business District of Pittsburgh, and through the Hill District, Midtown, Soho, and Oakland areas to Squirrel Hill. The lower Northside is bordered by Pennsylvania Avenue on the north, Allegheny Avenue on the west, and a line just east of the Sixteenth Street Bridge on the east. The eastern portion of the corridor is bordered generally by Bigelow Boulevard, Craig Street, Centre Avenue and Wilkins Avenue. The easternmost border is a north-south line just east of Shadow Avenue to the northern edge of the Parkway East Corridor. The Monongahela River is the southern corridor border.

Alternatives

Transportation alternatives proposed for consideration in the corridor are the following:

1. Null Alternatives—Existing transit service with level of service expanded as appropriate to meet projected year 2005 travel demand.

2. Transportation Systems Management (TSM) Alternative—Low cost transit improvements that include actions such as one-way streets, exclusive bus lines and intersection channelization.

3. Light Rail Transit (LRT) Northside to Oakland via Centre Avenue Alternative—The construction and operation of a LRT line which begins at a below grade station at Allegheny Community College and goes east underground to Allegheny Center Mall at South Commons Avenue. The alignment then turns south at Federal Street and surfaces at General Robinson Street. The alignment is at-grade on Federal Street and onto the Sixth Street Bridge. Turning west in the median of the Fort Duquesne Boulevard for two blocks, the alignment then traverses south under Stanwix Street to connect with the existing subway at the Gateway Station. Outbound movement from the subway toward Oakland is effected through a grade separated loop at the Manor Building under the existing LRT tracks. Heading east the alignment is a tunnel under Centre Avenue to approximately Kirkpatrick Street then proceeds diagonally southeast to the intersection of Fifth and Craft Avenues. Continuing as tunnel, the alignment follows Fifth Avenue east to Bigelow Boulevard, traverses south one block to Forbes Avenue and extends east on Forbes to Morewood Avenue in Oakland.

4. LRT Northside to Oakland via Colwell Street Alternative—The construction and operation of a LRT line which follows the same alignment through the Northside then connects to the existing subway in the CBD as Alternative 3. Outbound movement from the subway toward Oakland is effected through a grade separated loop at the Manor Building under the existing LRT tracks, then north to Crosstown Boulevard where tunneling begins. The tunnel continues northeast under Diamond Street to Fifth Avenue and continues east on Fifth to just east of Washington Place. Here the alignment becomes at-grade in a northeast direction to the intersection of Colwell and Magee Streets. The alignment continues east on Colwell as elevated structure (parallel to Fifth Avenue) to just past Kirkpatrick Street, then tunnels southeast to Fifth Avenue at approximately Halket Street. Continuing as tunnel, the alignment follows Fifth Avenue east to Bigelow Boulevard, traverses south one block to Forbes Avenue and extends east on Forbes to Morewood Avenue in Oakland.

5. LRT Northside to Oakland Via Fifth Avenue Alternative—The construction and operation of a LRT line which follows the same alignment through the Northside and connects to the existing subway in the CBD as Alternative 3. Outbound movement from the subway toward Oakland is similar to Alternative 4. The alignment proceeds east under Fifth Avenue to Bigelow Boulevard where it turns south one block to Forbes Avenue and extends east on Forbes to Morewood Avenue in Oakland. With the exception of the at-grade connection to the Manor Building, this alignment east of the CBD is tunnel construction.

6. LRT Northside to Squirrel Hill via Centre Avenue Alternative—Following the same alignment through the Northside and Oakland as Alternative 3, the alignment then proceeds east along Forbes Avenue to Shady Avenue in Squirrel Hill. The connection between Oakland and Squirrel Hill is tunnel construction.

7. LRT Northside to Squirrel Hill via Colwell Street Alternative—Following the same alignment through the Northside and Oakland Alternative 4, the alignment proceeds east along Forbes Avenue to Shady Avenue in Squirrel Hill. The connection between Oakland and Squirrel Hill is tunnel construction.

8. LRT Northside to Squirrel Hill via Fifth Avenue Alternative—Following the same alignment through the Northside and Oakland as Alternative 5, the alignment proceeds east along Forbes Avenue to Shady Avenue in Squirrel Hill. The connection between Oakland and Squirrel Hill is tunnel construction.

9. LRT Downtown to Pittsburgh Technology Center Alternative—Following the B&O Railroad east at-grade from the CBD to just past the Birmingham Bridge, the alignment then tunnels northeast to Fifth Avenue at approximately Craft Avenue and follows the same alignment to Oakland as Alternative 5.

Comments on the alternatives should focus on the appropriateness of these and other options for consideration in the study, not on individual preferences for a particular alternative as most desirable for implementation.

Probable Effects

Impacts proposed for analysis are potential changes in the natural environment (air quality, noise, water quality, aesthetics . . .), changes in the social environment (land use, development patterns, neighborhoods . . .), impacts on parkland and historic sites, changes in transit service and ridership, associated changes in highway congestion, impacts on capital, operating and maintenance costs, and impacts on Port Authority's financial condition. Impacts will be identified both for the construction period and for the long term operation of the alternatives.

The proposed evaluation criteria include transportation, environmental, social, economic and financial measures as required by current Federal laws and current CEQ and UMTA regulations. Mitigating measures will be explored for any adverse impacts that are identified.

Comments on the environmental, social and economic impacts should focus on the completeness of the proposed sets of impacts and the evaluation approach. Other impacts or criteria judged relevant to local decision-making should be identified.

Herman C Shipman,

Acting Deputy Regional Manager.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 48
Friday, March 11, 1988.

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

COMMISSION ON CIVIL RIGHTS

March 8, 1988.

PLACE: 1121 Vermont Avenue, NW., Room 512, Washington, DC 20425.

DATE AND TIME: Friday, March 18, 1988. 9:00 a.m.—5:00 p.m.

STATUS OF MEETING: Open to the public.

MATTERS TO BE CONSIDERED:

I. Approval of Agenda
II. Approval of Minutes of Last Meeting
III. Briefing Panel #1: Reauthorization of the U.S. Commission on Civil Rights
IV. Report of Commissioner Subcommittee Regarding Proposed Projects
V. SAC Report: "Collecting Data on Bias-Related Incidents in Connecticut"
VI. SAC Recharters
VII. Presentations by SAC Chairs
VIII. Briefing Panel #2: Reauthorization of the U.S. Commission on Civil Rights

PERSON TO CONTACT FOR FURTHER INFORMATION: John Eastman, Press and Communications Division, (202) 376–8105.

Part II

Office of Management and Budget

Grants and Cooperative Agreements With State and Local Governments; Revision of Circular A-102; Notice

BEST COPY AVAILABLE

OFFICE OF MANAGEMENT AND BUDGET

Grants and Cooperative Agreements with State and Local Governments

AGENCY: Office of Management and Budget.

ACTION: Revision of Circular A–102.

SUMMARY: This notice sets forth the final revision of Office of Management and Budget Circular A–102, "Grants and Cooperative Agreements with State and Local Governments".

FOR FURTHER INFORMATION CONTACT: Jonathan Breul, Financial Management Division, Office of Management and Budget, Washington, DC 20503. (202) 395–3050.

SUPPLEMENTARY INFORMATION: An interagency task force under the President's Council on Management Improvement (PCMI) was established to review existing guidance for managing Federal aid programs. On June 18, 1984, OMB published a Notice in the **Federal Register** (49 FR 24958) announcing the review and seeking public comment on over 50 issues and possible options for each. Federal agencies, States, local governments, interest groups, business organizations, and nonprofit organizations, as well as members of Congress submitted several hundred comments.

Five agency-chaired teams studied the comments, Circular A–102, and the existing Federal agency regulations implementing it to develop and draft two products: a revised OMB Circular—addressed solely to Federal agencies, and a "common" government-wide regulation—addressed to State and local grantees. The proposed government-wide "common rule" stated the fiscal and administrative conditions governing grants to State and local governments and subgrantees which are State and local governments.

On March 12, 1987, the President directed OMB to revise Circular A–102 and all affected Federal agencies to simultaneously propose a common rule to adopt verbatim government-wide grants management terms and conditions. The revised Circular and common rule were to be proposed within 90 days, and issued final within one year.

OMB published a proposed revision to Circular A–102 as a Notice in the June 9, 1987 issue of the **Federal Register** (52 FR 21816–21818). Simultaneously in the same issue (52 FR 21820–21852), Federal grant-making agencies proposed a common rule

Comments and Changes to the Proposed Revision

While OMB and the agencies received nearly 100 comments on the proposed common rule, only a handful addressed the revision to Circular A–102 itself.

Advance Public Notice and Priority Setting (paragraph 6b.) A number of Federal agencies questioned the need for, and type of official responsible for, advance public notice and priority setting in discretionary grant and cooperative agreement programs. Consistent with recent recommendations by the U.S. General Accounting Office (GAO) ("Discretionary Grants: Opportunities to Improve Federal Discretionary Award Practices"), this section aims to improve managerial accountability for the discretionary award process by emphasizing the need for upfront priority setting and policy-level sign-off on grant and cooperative agreement awards. "Policy-level official" was deliberately not defined in order for agency heads to determine the appropriate placement of such responsibilities. Such officials include program heads or political appointees located sufficiently high in an organization to ensure that funding priorities and actual awards are consistent with the agency's overall priorities. OMB is willing to work with agencies to identify appropriate officials where there is question.

Standard Forms for Applying for Federal Assistance (paragraph 6c). Several Federal agencies, particularly those with programs which fund both governmental (State and local) and nonprofit grantees, requested *not* to use the standard application facesheet (SF–424) as well as the project approval checklist, budget sheet, and standard assurances in Attachment "M" to Circular A–102. They pointed out that unlike 1971, when Circular A–102 and the forms were originally developed, there is less duplication and overlap in Federal funding for grantees and consequently less need by grantees for uniform application forms. Further, OMB now reviews and approves all forms and application packages under the Paperwork Reduction Act of 1980. In recognition of these changes in the makeup of Federal assistance programs, the types of recipients receiving funding and the paperwork control authorities in OMB's Office of Information and Regulatory Affairs (OIRA), OMB asked for public comment on revised standard application forms in a May 29, 1987 Notice in the **Federal Register** (52 20178–20179).

The great majority of the over 80 public comments to the May 1987 Notice were concerned about the proposed financial reporting formats for the open ended entitlement programs, rather than either the need for, or design of, the standard application forms. We attribute much of this lack of interest to the fact that, with the approval of OMB's Office of Information and Regulatory Affairs, few programs use the forms display in Circular A–102 "as is". In fact, aside from the SF–424 Facesheet, nearly every program extensively tailors the forms or develops its own instructions and supplemental program-specific requirements.

In recognition of current practice and approved forms, the proposed circular has been revised to require use of either (1) three types of pre-approved standard forms: facesheet, standard budget information (construction or non-construction) and standard assurances (construction or non-construction) or (2) forms approved by OMB under the Paperwork Reduction Act of 1980. Two forms previously displayed in Circular A–102, the Part II, "Project Approval Checklist," and Part IV, "Narrative," are eliminated. The contents of the latter are reflected as guidance to agencies in paragraph 6c. of the circular. Agencies are free to use the standard forms without further OMB clearance. Use of any other forms and application packages requires OMB approval and clearance under the Paperwork Reduction Act of 1980.

Exception to the common rule (paragraph 6g). A number of grantees expressed concern that paragraph 6g, "Special Conditions or Restrictions," coupled with the corresponding "Exceptions" (§—.6) and "High-Risk" (§—.12) provisions of the common rule are loopholes which permit Federal agencies to circumvent the rule and impose additional or unwarranted requirements. In recognition of this concern and to permit oversight, the circular is revised to make it clear that agencies will document the use of these provisions.

Financial Status Reports (paragraph 7c). A new section was added to require use of the SF–269, Financial Status Report-Long Form, or SF–269a, Financial Status Report-Short Form. These forms are a revision of the SF–269 previously required under Circular A–102, with changes based on a May 29, 1987 **Federal Register** Notice (discussed above under "Standard Forms for Applying for Federal Assistance"). Both the short and long forms are simplified to require a single column rather than 6-column breakout of the status of funds. The long form responds to recommendations from the GAO for a form which permits reporting matching as well as the various uses of program income. The new paragraph 7c expresses a longstanding, but unstated, prohibition against agencies using the form to collect object class expenditure data (e.g., expenditures broken down by personnel, travel, equipment, etc.). Further, it limits collection of expenditure detail by programs, functions or activities within the program or project, unless required by statute or regulation.

Contracting with small and minority firms, women's business enterprise and labor surplus area firms (paragraph 7d). A number of commenters expressed concern that the proposed circular did not contain policy language from the old Circular A–102 which encouraged use of small, minority, women's and labor surplus area firms. This was true because all of the substantive requirements from Attachment "O" in the old A–102 for grantees to use such firms when possible were proposed to be codified in the June 9, 1988, 24-agency, common rule. Unfortunately, in the interest of streamlining the rule, the prefatory sentence explaining that this is national policy was dropped. To remove any doubt that grantees are encouraged to contract with such firms, the opening sentence concerning small and minority business, as well as those concerning women's enterprises and labor surplus area firms have been restored to the circular.

Program Income (paragraph 7e). A number of State and local grantees were concerned that agencies will only sparingly permit the use of the addition or matching share alternatives for use of program income. On the other hand, others such as the GAO supported the circular, stating that there should be a preference for deducting program income from program costs since this alternative will result in financial savings to the Federal Government and grantees. No change is made to the proposed circular. In the event this provision serves as a disincentive to earning such income, §—.25(g) of the common rule permits agencies to specify another alternative (or combination of alternatives) in program regulations or a specific grant agreement.

Site visits and technical assistance (paragraph 7f). Federal agencies expressed concern that the proposal would unduly restrict their ability to travel to grantee project sites or offer technical assistance. OMB proposed site visits "only as warranted by program or project needs" and restricted technical assistance visits "only (1) in response to requests from recipients, or (2) when recipients are designated 'high risk.' " The proposed approach represented a departure from the original Circular A–102 which "encouraged" agencies to travel and offer technical assistance. Frequent travel and gratuitous technical assistance are no longer realistic given the Federal budget deficit and they are inconsistent with Federal deference to States' authority and competence under Federalism. However, to enable Federal agencies to address genuine program needs, an additional justification for technical assistance visits has been added based on "demonstrated program need."

Property Management (paragraph 8a). A number of commenters misinterpreted the provisions of the closeout provisions of the circular (as well as the property sections of the common rule) dealing with "federally owned property". They mistakenly concluded these provisions covered all grant-acquired property and equipment, not just that which is Federally owned and provided. This is not so because title to grant-acquired property vests with the grantee, not the Federal Government. The circular and common rule have been changed to make this distinction clear.

Another commenter suggested that closeout review cover all non-expendable personal property purchased with grant funds where title rests with the recipient. We do not believe such a mandatory Federal review of grant-acquired property is warranted. The common rule contains explicit instructions as to the grantee's property records and calls for the grantee to perform a physical inventory at least once every two years.

Closeout (paragraph 8a.) One agency expressed the opinion that Section 8a requiring written notification to grantees of required closeout documents may be too staff intensive. The agency recommended that published program regulations detailing this requirement should be sufficient. We agree. Since closeout reports do not generally vary significantly, a published program regulation or standard notice can satisfy the requirement.

[Circular No. A–102 (Revised)]

March 3, 1988.

To the Heads of Executive Departments and Establishments

Subject: Grants and Cooperative Agreements with State and Local Governments

1. *Purpose.* This Circular establishes consistency and uniformity among Federal agencies in the management of grants and cooperative agreements with State, local, and federally recognized Indian tribal governments. This revision supersedes Office of Management and Budget (OMB) Circular No. A–102, dated January 1981.

2. *Authority.* This Circular is issued under the authority of the Budget and Accounting Act of 1921, as amended; the Budget and Accounting Procedures Act of 1950, as amended; Reorganization Plan No. 2 of 1970; and Executive Order 11541. Also included in the Circular are standards to ensure consistent implementation of sections 202, 203, and 204 of the Intergovernmental Cooperation Act of 1968, the Office of Federal Procurement Policy Act Amendments of 1983, and sections 6301–08, title 31, United States Code.

3. *Background.* On March 12, 1987, the President directed all affected agencies to issue a grants management common rule to adopt government-wide terms and conditions for grants to State and local governments. This revised Circular provides guidance to Federal agencies on business-like management of grant programs and other matters not covered in the common rule. The revision replaces and rescinds Circular A–102, dated January 1981, including Attachments A–P.

4. *Coverage.* Consistent with their legal obligations, all Federal agencies administering programs that involve grants and cooperative agreements with State, local and Indian tribal governments (grantees) shall follow the policies in this Circular and issue a common grants management rule (common rule). If the enabling legislation for a specific grant program prescribes policies or requirements that differ from those in this Circular, the provisions of the enabling legislation shall govern.

5. *Deviations.* The Office of Management and Budget may grant deviations from the requirements of this Circular when permissible under existing law. However, in the interest of uniformity and consistency, deviations will be permitted only in exceptional circumstances.

6. *Pre-Award Policies.*

a. *Use of grants and cooperative agreements.* Sections 6301–08, title 31, United States Code govern the use of grants, contracts and cooperative agreements. A grant or cooperative agreement shall be used only when the principal purpose of a transaction is to accomplish a public purpose of support or stimulation authorized by Federal statute. Contracts shall be used when the principal purpose is acquisition of property or services for the direct benefit or use of the Federal Government. The statutory criterion for choosing between grants and cooperative agreements is that for the latter, "substantial involvement is expected between the executive agency and the State, local government, or other recipient when carrying out the activity contemplated in the agreement."

b. *Advance Public Notice and Priority Setting.*

(1) Federal agencies shall provide the public with an advance notice in the **Federal Register**, or by other appropriate means, of intended funding priorities for discretionary assistance programs, unless funding priorities are established by Federal statute. These priorities shall be approved by a policy level official.

(2) Whenever time permits, agencies shall provide the public an opportunity to comment on intended funding priorities.

(3) All discretionary grant awards in excess of $25,000 shall be reviewed for consistency with agency priorities by a policy level official.

c. *Standard Forms for Applying for Grants and Cooperative Agreements.*

(1) Agencies shall use the following standard application forms unless they obtain OMB approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 35) and the 5 CFR Part 1320, "Controlling Paperwork Burdens on the Public":

- SF–424 Facesheet
- SF–424a Budget Information (Non-Construction)
- SF–424b Budget Information (Construction)
- SF–424c Standard Assurances (Non-Construction)
- SF–424d Standard Assurances (Construction)

When different or additional information is needed to comply with legislative requirements or to meet specific program needs, agencies shall also obtain prior OMB approval.

(2) A preapplication shall be used for all construction, land acquisition and land development projects or programs when the need for Federal funding exceeds $100,000, unless the Federal agency determines that a preapplication is not needed. A preapplication is used to:

(a) Establish communication between the agency and the applicant,

(b) Determine the applicant's eligibility,

(c) Determine how well the project can compete with similar projects from others, and

(d) Discourage any proposals that have little or no chance for Federal funding before applicants incur significant costs in preparing detailed applications.

(3) Agencies shall use the Budget Information (Construction) and Standard Assurances (Construction) when the major purpose of the project or program is construction, land acquisition or land development.

(4) Agencies may specify how and whether budgets shall be shown by functions or activities within the program or project.

(5) Agencies should generally include a request for a program narrative statement which is based on the following instructions:

(a) Objectives and need for assistance. Pinpoint any relevant physical, economic, social, financial, institutional, or other problems requiring a solution. Demonstrate the need for the assistance and state the principal and subordinate objectives of the project. Supporting documentation or other testimonies from concerned interests other than the applicant may be used. Any relevant data based on planning studies should be included or footnoted.

(b) Results or Benefits Expected. Identify results and benefits to be derived. For example, show how the facility will be used. For land acquisition or development projects, explain how the project will benefit the public.

(c) Approach. Outline a plan of action pertaining to the scope and detail how the proposed work will be accomplished for each assistance program. Cite factors which might accelerate or decelerate the work and your reasons for taking this approach as opposed to others. Describe any unusual features of the project, such as design or technological innovations, reductions in cost or time, or extraordinary social and community involvements. Provide for each assistance program quantitative projections of the accomplishments to be achieved, if possible. When accomplishments cannot be quantified, list the activities in chronological order to show the schedule of accomplishments and their target dates. Identify the kinds of data to be collected and maintained, and discuss the criteria to be used to evaluate the results and success of the project. Explain the methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified are being achieved. List each organization, cooperator, consultant, or other key individuals who will work on the project along with a short description of the nature of their effort or contribution.

(d) Geographic Location. Give a precise location of the project and area to be served by the proposed project. Maps or other graphic aids may be attached.

(e) If applicable, provide the following information: for research and demonstration assistance requests, present a biographical sketch of the program director with the following information: name, address, telephone number, background, and other qualifying experience for the project. Also, list the name, training and background for other key personnel engaged in the project. Describe the relationship between this project and other work planned, anticipated, or underway under Federal assistance. Explain the reason for all requests for supplemental assistance and justify the need for additional funding. Discuss accomplishments to date and list in chronological order a schedule of accomplishments, progress or milestones anticipated with the new funding request. If there have been significant changes in the project objectives, location, approach or time delays, explain and justify. For other requests for changes, or amendments, explain the reason for the change(s). If the scope or objectives have changed or an extension of time is necessary, explain the circumstances and justify. If the total budget has been exceeded or if the individual budget items have changes more than the prescribed limits, explain and justify the change and its effect on the project.

(6) Additional assurances shall not be added to those contained on the standard forms, unless specifically required by statute.

d. *Debarment and Suspension.* Federal agencies shall not award assistance to applicants that are debarred or suspended, or otherwise excluded from or ineligible for participation in Federal assistance programs under Executive Order 12549. Agencies shall establish procedures for the effective use of the Consolidated List of Debarred, Suspended, Voluntarily Excluded and Ineligible Assistance Participants to assure that they do not award assistance to listed parties in violation of the Executive Order. Agencies shall also establish procedures to provide for effective use and/or dissemination of the list to assure that their grantees and subgrantees (including contractors) at any tier do not make awards in violation of implementing regulations.

e. *Awards and Adjustments.*

(1) Ordinarily awards shall be made at least ten days prior to the beginning of the grant period.

(2) Agencies shall notify grantees immediately of any anticipated

---

adjustments in the amount of an award. This notice shall be provided as early as possible in the funding period. Reductions in funding shall apply only to periods after notice is provided. Whenever an agency adjusts the amount of an award, it shall also make an appropriate adjustment to the amount of any required matching or cost sharing.

f. *Carryover Balances.* Agencies shall be prepared to identify to OMB the amounts of carryover balances (e.g., the amounts of estimated, grantee unobligated balances available for carryover into subsequent grant periods). This presentation shall detail the fiscal and programmatic (level of effort) impact in the following period.

g. *Special Conditions or Restrictions.* Agencies may impose special conditions or restrictions on awards to "high risk"applicants/grantees in accordance with § ___.12 of the common rule. Agencies shall document use of the "Exception" provisions of § ___.6 and "High-risk" provisions of §___ .12 of the common rule.

h. *Waiver of Single State Agency Requirements.*

(1) Requests to agencies from the Governors, or other duly constituted State authorities, for waiver of "single" State agency requirements in accordance with section 6504, title 31, United States Code, shall be given expeditious handling and, whenever possible, an affirmative response.

(2) When it is necessary to refuse a request for waiver of "single" State agency requirements under section 204, the Federal grantor agency shall advise the Office of Management and Budget prior to informing the State that the request cannot be granted. The agency shall indicate to OMB the reasons for the denial of the request.

(3) Legislative proposals embracing grant-in-aid programs shall avoid inclusion of proposals for "single" State agencies in the absence of compelling reasons to do otherwise. In addition, existing requirements in present grant-in-aid programs shall be reviewed and legislative proposals developed for the removal of these restrictive provisions.

i. *Patent Rights.* Agencies shall use the standard patent rights clause specified in "Rights to Inventions made by Nonprofit Organizations and Small Business Firms" (37 CFR Part 401), when providing support for research and development.

7. *Post-award Policies.*

a. *Cash Management.* Agency methods and procedures for transferring funds shall minimize the time elapsing between the transfer to recipients of grants and cooperative agreements and the recipient's need for the funds.

(1) Such transfers shall be made consistent with program purpose, applicable law and Treasury regulations at 31 CFR Part 205.

(2) Where letters-of-credit are used to provide funds, they shall be in the same amount as the award.

b. *Grantee Financial Management Systems.* In assessing the adequacy of an applicant's financial management system, the awarding agency shall rely on readily available sources of information such as audit reports to the maximum extent possible. If additional information is necessary to assure prudent management of agency funds, it shall be obtained from the applicant or from an on-site review.

c. *Financial Status Reports.*

(1) Federal agencies shall require grantees to use the SF–269, Financial Status Report-Long Form, or SF–269a, Financial Status Report-Short Form, to report the status of funds for all nonconstruction projects or programs. Federal agencies need not require the Financial Status Report when the SF–270, Request for Advance or Reimbursement, or SF–272, Report of Federal Cash Transactions, is determined to provide adequate information.

(2) Federal agencies shall not require grantees to report on the status of funds by object class category or expenditure (e.g., personnel, travel, equipment).

(3) If reporting on the status of funds by programs, functions or activities within the project or program is required by statute or regulation, Federal agencies shall instruct grantees to use block 12, Remarks, on the SF–269 or a supplementary form approved by the OMB under the Paperwork Reduction Act of 1980.

(4) Federal agencies shall prescribe whether the reporting shall be on a cash or an accrual basis. If the Federal agency requires accrual information and the grantee's accounting records are not normally kept on an accrual basis, the grantee shall not be required to convert its accounting system but shall develop such accrual information through an analysis of the documentation on hand.

d. *Contracting With Small and Minority Firms, Women's Business Enterprise and Labor Surplus Area Firms.* It is national policy to award a fair share of contracts to small and minority business firms. Grantees shall take similar appropriate affirmative action to support of women's enterprises and are encouraged to procure goods and services from labor surplus areas.

e. *Program Income.*

(1) Agencies shall encourage grantees to generate program income to help defray program costs. However, Federal agencies shall not permit grantees to use grant-acquired equipment to compete unfairly with the private sector.

(2) Federal agencies shall instruct grantees to deduct program income from total program costs as specified in the common rule at § _____.25(g)(1), unless agency regulations or the terms of the grant award state otherwise. Authorization for recipients to follow the other alternatives in § _____.25(g)(2) and (3) shall be granted sparingly.

f. *Site Visits and Technical Assistance.* Agencies shall conduct site visits only as warranted by program or project needs. Technical assistance site visits shall be provided only (1) in response to requests from grantees, (2) based on demonstrated program need, or (3) when recipients are designated "high risk" under § _____.12 of the common rule.

8. After-the-grant Policies.

a. *Closeout.* Federal agencies shall notify grantees in writing before the end of the grant period of final reports that shall be due, the dates by which they must be received, and where they must be submitted. Copies of any required forms and instructions for their completion shall be included with this notification. The Federal actions that must precede closeout are:

(1) Receipt of all required reports,

(2) Disposition or recovery of federally-owned assets (as distinct from property acquired under the grant), and

(3) Adjustment of the award amount and the amount of Federal cash paid the recipient.

(b) *Annual Reconciliation of Continuing Assistance Awards.* Federal agencies shall reconcile continuing awards at least annually and evaluate program performance and financial reports.

Items to be reviewed include:

(1) A comparison of the recipient's work plan to its progress reports and project outputs,

(2) the Financial Status Report (SF–269),

(3) Request(s) for payment,

(4) Compliance with any matching, level of effect or maintenance of effort requirement, and

(5) A review of federally-owned property (as distinct from property acquired under the grant).

9. *Entitlements (Reserved)*

10. *Policy Review (Sunset).* The Circular will have a policy review three years from the date of issuance.

11. *Effective Date.* The Circular is effective on publication.

12. *Inquiries.* Further information concerning this Circular may be obtained from: Financial Management Division, New Executive Office Building, Room 10215, Office of Management and Budget, Washington, DC 20503, (202) 395-3050.

James C. Miller III,
Director.

ACTION: Final rule.

SUMMARY: This action finalizes a common rule establishing consistency and uniformity among the Federal agencies shown above in the administration of grants and cooperative agreements to State, local and federally recognized Indian tribal governments.

EFFECTIVE DATE: This rule is effective October 1, 1988, except for the Department of Transportation. See the Department of Transportation agency specific preamble below.

FOR FURTHER INFORMATION CONTACT: See individual agencies below.

SUPPLEMENTARY INFORMATION:

Background

In November 1983, a 20-agency task force under the President's Council on Management Improvement (PCMI), chaired by the Office of Management and Budget (OMB), was established to explore streamlining grants management and review OMB Circular A–102, "Uniform Administrative Requirements for Grants to State and Local Governments."

On June 18, 1984, OMB published a Notice in the **Federal Register** (49 FR 24958–24959) seeking comments on over 50 issues and possible options for each. Federal agencies, States, local governments, interest groups, business organizations, and nonprofit organizations, as well as members of Congress, submitted several hundred comments.

Five agency-chaired teams studied the comments, existing Federal agency grants administration regulations, and noncodified manuals and handbooks implementing OMB Circular A–102 to draft a government-wide "common" rule. The proposed common rule contained fiscal and administrative requirements for grants to State and local governments (grantees) and subrecipients which are State and local governments (subgrantees). At the same time, OMB and the agencies prepared a revised Circular A–102—directed solely to Federal agencies—containing guidance to Federal agencies on how they should manage the award and administration of Federal grants.

On March 12, 1987, the President directed all affected agencies to simultaneously propose and subsequently adopt a common rule verbatim, except where inconsistent with statutory requirements. The President explained that at the time it was issued "Circular A–102 was a significant step toward simplification of grants management." He went on to say, however, that "after 16 years, some of the provisions are out of date, there are gaps where the standards do not cover important areas, and agencies have interpreted the circular in numerous different ways in their regulations. It is now time for the circular to be revised to reflect developments consistent with our Federalism policies and State and local regulatory relief objectives and the President's Management Improvement Program." The President directed the affected agencies to propose a common rule within 90 days and adopt a final common rule within one year. To meet

this schedule, 23 agencies proposed a governmentwide "common rule" in the June 9, 1987 **Federal Register** (52 FR 21820–21862). In the same issue, OMB proposed a revised Circular A–102 (52 FR 21816–21818).

The final common rule will be codified in each agency's portion of the Code of Federal Regulations, as indicated in the information provided for individual agencies below. Several agencies' rules reflect differences required in statute (e.g., the five-year record retention requirement for the Department of Education programs under the General Education Provisions Act (GEPA)). Such differences are indicated in the text.

All grants administration provisions in program regulations which are inconsistent with the common rule are rescinded, except to the extent they are required by legislation or approved as a deviation by OMB. Each agency will specify in the agency-specific preamble and amendments additional to the common rule those agency regulations that are rescinded. Likewise, all grants administration provisions of noncodified program manuals, handbooks, and other materials which are inconsistent with the rule are superseded, except to the extent they are required by legislation or approved by OMB.

This rule is effective for grants and cooperative agreements awarded on or after October 1, 1988, the start of the next Federal fiscal year. As noted in the agency-specific preambles, some Federal agencies may authorize earlier effective dates. For example, some Federal agencies may allow grantees to use the new definition of equipment and the increase in the threshold for small purchase procedures as of the issuance of the final rule.

Comments on the Proposed Common Rule

OMB and the Federal agencies received over 85 comments on the proposed common rule from States, local governments, counties, Indian tribes, councils of governments, interest groups, business organizations, universities and nonprofit organizations. All comments received by any agency were reproduced and exchanged among all of the agencies and used to prepare this final rule.

Commenters supported the codification of common governmentwide policies in federal agency regulations. As the General Accounting Office (GAO) explained, this approach "should go a long ways towards providing a more standardized and efficient approach to administering federal assistance" and "create a more certain environment for State and local governments."

The proposed rule invited comments on three issues in particular: Federalism, "Flow-down," and Open-Ended Entitlements.

Federalism

As explained in E.O. 12612, Federalism, States possess unique constitutional authority, resources and competence. Under Federalism, States should be given the maximum administrative discretion possible with respect to national programs they administer. Intrusive, Federal oversight is neither necessary nor desirable. Federal agencies should refrain from establishing uniform, national standards, and, where possible, defer to the States to establish them.

Consistent with the President's Federalism Executive Order, the proposed common rule provided that in three important areas (financial management systems, § ____.20, equipment, § ____.32, and procurement, § ____.36), States will expend and account for grant funds according to their own laws and procedures. This flexibility for States in these three areas applies only to funds expended by the State itself.

Most commenters reacted favorably to granting States increased flexibility. A number of States as well as the National Association of State Budget Officers, who were commenting on behalf of the Governors and the National Governors' Association, enthusiastically endorsed these changes. The GAO as well was supportive, pointing out that "This policy would provide greater flexibility to States to standardize the management of related State and Federal programs. The policy also recognizes the improvements made by many States in recent years to upgrade their management systems and personnel."

"Flow-down"

In the past, OMB Circular A–102 required that its provisions be applied to State and local governments when they were subgrantees under Federal grants as well as when they were primary grantees. The purpose of this "flow-down" of requirements was to ensure that subgrantees had the same rights and protections as grantees. To maintain this uniformity for subgrantees, the requirements in the proposed rule applied not only to direct Federal grantees, but also when funds "flow-down" to governmental subgrantees. Grantees, in their dealings with subgrantees, were subject to the same rules as Federal awarding agencies in dealing with them. The proposal did not address the administrative requirements applicable to nongovernmental grantees and subgrantees, because they are covered by Circular A–110, "Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations." A June 24, 1987 Notice in the **Federal Register** (52 FR 23729) announced that OMB and the Department of Health and Human Services (HHS) are co-chairing a follow-on effort to similarly review and issue a common rule and revised Circular for nongovernmental grantees covered by Circular A–110. Grants to non-governmental grantees and subgrantees will be addressed at that time. The proposed rule, however, did address which cost principles apply or "flow-down" to grantees, subgrantees, or contractors. Section ____.22, Allowable Costs, stipulated that depending on the organization, Circular A–21 (educational institutions), A–87 (governments), or A–122 (nonprofits), or 48 CFR Part 31 (for-profits) will apply.

From the outset of the review of Circular A–102, OMB and the agencies recognized the importance of the policy requiring the "flow-down" of administrative requirements to subgrantees. The June 18, 1984 **Federal Register** Notice which announced the review specifically asked for public comment on a number of issues and provided options for each. The "flow-down" issue asked: "To what extent should States or other applicants be required to apply Federal administrative requirements to subrecipients (subgrantees)?" It offered three options which included: (1) Letting States manage and condition subgrants (except for requirements which fulfill a Federal need), (2) letting all grantees (besides States) do so, and (3) maintaining the status quo. The policy issue made reference to a full discussion and illustration of the first or "Federalism" option (giving States flexibility to condition and manage subgrants) in the Department of Health and Human Services (HHS) proposed rule published in the **Federal Register**, February 24, 1984 on pages 6933–5.

There was considerable public comment on the June 1984 Notice. The several interest groups representing local governments indicated they "do not want major policy modifications to the Circular." Many local governments and nonprofits alleged that States' administration and conditioning of subgrants is uneven at best and typically heavy-handed, i.e., has more "strings." States and the National

Association of State Budget Officers (NASBO), writing in conjunction with the National Governors' Association (NGA), strongly supported the review of the Circular. NASBO further indicated a preference for continued application of the uniform administrative requirements to subgrantees. Thus, continued "flow-down" of the rules to subgrantees appeared to satisfy both the States as well as the local governments.

On March 12, 1987, the President directed all affected grant-making agencies to adopt a government-wide common rule reflecting Federalism and regulatory relief. The resulting June 9, 1987 proposed common rule maintained the "flow-down" policy. The status quo approach for subgrantees was taken in spite of Federalism and regulatory relief because of the comments made earlier by State and local governments.

A number of commenters on the June 1987 proposal were concerned about the clarity of the flow-down policy. Several recommended that rather than incorporating the policy throughout the text (e.g., by repeating the applicability to grantees and subgrantees), that the rule contain a separate section entitled "Subgranting" or "Subgrants" to explain "flow-down" and distinguish such funding from contracting in § ____.36, Procurement.

A greater number of commenters addressed the substance of the "flow-down" policy. States in particular pointed out that the proposal constituted undue regulation of State administration of Federal funds and is inconsistent with Federalism. NASBO and several Governors said that the flexibility in the June 1987 proposal was not enough—that States should be able to condition and manage subgrants according to State law and procedures without any required "flow-down" of the Federal administrative standards.

On the other hand, a number of subgrantees wrote urging maintenance of "flow-down" to ensure that the rules they follow under State subgrants would be the same as those for direct Federal grants. One regional grantee argued that they have "a vital interest in simplicity and consistency in regulations governing the administration of grants which are received both directly from the Federal Government and, indirectly, as passed through various State agencies" and thus "applaud and strongly support the retention and clarification of the flow-down policy requiring grantees to follow A–102 with subrecipients."

In reconsidering this important matter, it is our view that most restrictions and requirements on States in administering subgrants are no longer necessary. As explained in E.O. 12612, Federalism, States have unique Constitutional authority, resources, and competence. "Flow-down" provisions cannot be reconciled with the goal of this common rule to place maximum reliance on a State's own management systems, including a State's system for administering grants from its non-Federal funds. In response to clear and strong recommendations from NASBO, the NGA and Governors themselves, the rule is modified to permit States to more freely manage subgrants. A new § ____.37, Subgrants, has been added to clarify the policy, distinguish subgrants from the award and administration of procurement contracts, and, with regard to States, to rely on a State's own laws and procedures.

This will mean that local governments and Indian tribal governments will administer *direct* Federal grants according to the standards in the common rule and Federal "pass-through" funds *subgranted* from the State according to State laws and procedures. This change represents a shift in the basis upon which uniformity is established. When Circular A–102 was first issued in 1971, uniformity for local governments was based on Federal standards. This made sense because at that time there were many more Federal programs directly funding local governments and State aid to local governments was proportionally lower. Now, according to the Bureau of the Census, this is no longer the case. Local governments receive 5 times as much aid from States as they do from the Federal Government. Further, due to the ten block grants authorized in 1981 and 1982, States occupy a much more pivotal position in the administration of the remaining Federal grant programs. The common rule shifts the basis for uniformity to one which recognizes States' increased role in financing and administering intergovernmental programs.

Open-Ended Entitlements

The regulatory requirements in the June 9, 1987 proposal did not apply to open-ended entitlement grants. These are the grants for public assistance programs, such as Medicaid and Aid to Families with Dependent Children, the child nutrition programs and the administrative costs of the Food Stamps program, for which the Federal Government pays a statutorily-required share of costs without dollar limit. Because of this open-ended feature and because of special statutory requirements, these grants are administered differently from other grants in important aspects. Subpart E of the proposed rule was reserved to subsequently and separately address these programs.

Commenters agreed with the proposal to address entitlement programs separately from the closed-ended grants The GAO, for example, explained that "Since the Federal role varies among the types of assistance programs, we agree that the accountability rules should also vary to reflect the differential Federal roles."

The Departments of Agriculture (USDA) and Health and Human Services (HHS) which administer these programs will collaborate in the drafting of the common Subpart E for these programs.

Other Public Comments

Subpart A—General

Section ____.3 Definitions.

"Subgrant"—There were four comments regarding the definitions of subgrants and contracts between governmental entities. The primary comments came from local governments that were concerned that States would bypass the flow-down requirements of § ____.4(a) by using a procurement contract to pass Federal assistance funds to substate units of government. The definition of subgrant is worded to include contracts used to provide financial assistance to an eligible subgrantee; however, a section on subgrants, § ____.37, has been added to help clarify when requirements flow through to subgrantees.

"Share"—There was one comment concerning the definition of the term "share." The commenter was concerned that this definition excluded donated equipment and supplies for subrecipients. This definition is used for determining the proportionate share when disposing of property, equipment or supplies acquired with Federal grant funds and has no effect on the eligibility of in-kind contributions.

Section ____.4 Applicability.

Two commenters recommended that the coverage of the common rule be extended to block grant programs to obtain uniformity. The commenters said that, although block grant programs had been exempt from the requirements of Office of the Management and Budget (OMB) Circular A–102, many States used the procedures of OMB Circular A–102. The common rule does not prohibit States from using these requirements when dealing with subgrantees; however, to subject these programs to the requirements of the common rule would be contrary to the broad discretion granted to States to run block grant programs.

Several comments were received regarding the applicability of other Federal regulations. Section ____.4 implies that Federal regulations that are inconsistent with this common rule, whether or not they had been approved by OMB or required by statute, would apply to grants and subgrants. In § ____.5, regulations that are inconsistent with the common rule are superseded except those required by statute or approved by OMB as an exception. Section ____.4(a) has been rewritten to match the wording of § ____.5.

Section ____.6 Exceptions.

Three comments were received objecting to the provisions of § ____.6(c) that allows Federal agencies to authorize exceptions on a case-by-case basis or for subgrantees. The commenters believed that OMB should be the only organization allowed to grant exceptions. This provision was included to provide Federal agencies the flexibility to respond to individual situations for grantees and to provide Federal agencies the same oversight over subgrantee requirements that OMB has over requirements on grantees. There should be limited use of this provision by Federal agencies just as OMB has authorized few exceptions to the common rule. No substantive change was made to the common rule.

Subpart B—Pre-Award Requirements

Section ____.10 Forms for applying for grants.

The existing application forms are a five-part package including: the SF–424 Facesheet; Part II, Project Approval Information checklist; Part III, Budget Information; Part IV, Narrative; and Part V, Assurances. Unlike 1971 when Circular A–102 was first issued, there is less duplication and overlap in Federal funding for grantees and consequently less need by grantees for uniform application forms. Further, OMB now reviews and approves all forms and application packages under the Paperwork Reduction Act of 1980. In recognition of these changes in the makeup of Federal grant and cooperative agreement programs, the types of recipients receiving funding, and the paperwork control authorities in OMB's Office of Information and Regulatory Affairs (OIRA), OMB asked for public comment on revised standard application forms in a May 29, 1987 Notice in the **Federal Register** (52 FR 20178–20179). The great majority of the over 80 public comments concerned the proposed financial reporting formats for the open-ended entitlement programs, rather than either the need for, or design of, the standard application forms. We attribute much of this lack of interest to the fact that, with the approval of OMB's Office of Information and Regulatory Affairs (OIRA), few programs use the forms displayed in Circular A–102 "as is." In fact, aside from the SF–424 Facesheet, every program extensively tailors the forms or develops its own instructions and supplemental program-specific requirements. In recognition of this, § ____.10 has been revised to require use of either (1) three types of pre-approved standard forms: Facesheet, standard budget information (construction or non-construction) and standard assurances (construction and non-construction) or (2) forms approved by OMB under the Paperwork Reduction Act of 1980.

Section ____.11 State Plans.

To further implement E.O. 12372, this section offered States three additional means to simplify, consolidate or substitute State plans for Federally required plans. All three commenters supported the language and intent, particularly in response to some Federal agencies which had indicated in their agency-specific preambles that this section was not applicable to their programs. Since the public comment was supportive, there was no need to make any change.

Section ____.12 Special grant or subgrant conditions for "high-risk" grantees.

This section clearly identified the controls or conditions which awarding agencies may use when making grants to high risk grantees. These conditions were not mandatory, nor were they exclusive to this section. For example, some conditions such as payment on a reimbursement basis are available in other circumstances, in §§ ____.21 and ____.43. Further, under § ____.6, agencies are permitted to depart from the common rule on a case-by-case basis or with the approval of OMB. Three commenters addressed this section: one supported the section as is; another requested more detailed due process procedures; the third wanted more clearly described controls over Federal agency use of the conditions. No change is made to this section, but the revised OMB Circular A–102 issued elsewhere in this issue has been changed to require Federal agencies to document the use of high risk conditions to permit oversight.

Subpart C—Post-Award Requirements

Section ____.20 Standards for financial management systems.

A number of Inspectors General were concerned that in State-administered programs the effect of § ____.20 is that subgrantees and cost-type contractors are not subject to any requirements to account for funds. This is not the case. Section ____.20 requires a State to follow its own laws and procedures regarding financial management systems. Section ____.20 does not require States to meet specific Federal financial management standards because such requirements are an unwarranted intrusion into State affairs and could effect a State's ability to administer subgrants effectively. However, the rule has been revised to clarify that States, *as well as* their subgrantees and cost-type contractors, must have sufficient control and accounting procedures to show that Federal funds have not been used for unauthorized purposes.

One comment was received regarding the provision of § ____.20(b)(7) that requires grantees to establish procedures with subgrantees to ensure timely receipt of cash management reports. The commenter wanted the rule to include a concept of "reasonableness" for grantee imposed requirements on subgrantees. One purpose of this rule is to provide uniform and "reasonable" requirements on grantees, and we do not expect grantees to impose unreasonable requirements on subgrantees based on the requirements of this common rule. However, the rule has been revised to include the reasonable concept for grantee procedures imposed on subgrantees to prepare cash management reports.

Section ____.21 Payment.

In anticipation of legislation amending the Intergovernmental Cooperation Act of 1968, the proposed rule merely cross-referenced the Department of the Treasury rules governing payment. Many commenters therefore noted the absence of any provisions addressing the disposition of interest earned on advances or use of receivables from audit disallowances, credits and other adjustments. In order to address these concerns, the section has been expanded to address interest earned on advances, payments to subgrantees and contractors, and use of refunds, credits and other receivables. In addition, provisions for payments to grantees through the method of electronic transfer of funds have been added.

Section ____.22 Allowable costs.

A comment was received that the complete reference to cost principles for for-profit organizations was too broad and should be 41 CFR Subpart 31.2; however, other portions of Part 31, such as definitions and applicability, also apply to commercial organizations. Another commenter objected to the provision that allows Federal agencies to prescribe cost principles, such as railroads that use the Uniform System of Accounts established by the Interstate Commerce Commission. To require these organizations to adopt a second set of Federal cost principles would be counter productive. No changes were made to the common rule.

Section ____.23 Period of availability of funds.

Several comments were received regarding the requirement in § ____.23(b) for grantees to liquidate all obligations within 90 days after the end of the funding period (or as specified in program regulations). Two commenters only wanted exceptions to the 90-day period if specified in law, and one commenter recommended an extension to 9 months. The 90-day period was established as standard for programs that have a funding period, but a provision is contained in the common rule that allows Federal agencies to establish a different time limit in program regulations to provide for different program requirements. Because the common rule contains a provision that permits the flexibility needed to meet differing program needs, the common rule was not changed.

Section ____.24 Matching or cost sharing.

A comment was received that indicated an inconsistency in the use of Federal cash for satisfying matching requirements in § ____.24, and the definition of "cash contributions" in § ____.3. The definition allows Federal funds received from other assistance agreements to be considered as a recipient's cash contribution if authorized by Federal statute. The exception in § ____.24(b)(1) allows costs borne by another Federal grant if authorized by Federal statute. The term "cost borne by another Federal grant" includes grant funds used to pay the recipient's cash contribution. Therefore, no change was made to the common rule.

Two comments were received regarding the provision of § ____.24(e)(2) on the valuation of building and land donated to the grantee. The common rule provides that unless approval is received from the awarding agency, no amount can be allowed for donated land, and only depreciation or use allowances may be counted for donated equipment and buildings. The commenters recommended that the fair rental rate be used for such property. The common rule values such property in the same manner as grantee-owned property is valued in OMB Circular A-87, Cost Principles for State and Local Governments, which is the government-wide directive on such matters. Consequently, no change was made to the common rule.

Section ____.25 Program income.

One commenter did not believe that the definition of program income in § ____.25(b) covered the proceeds derived by grantees from the products of the land, such as oil, gas, and other minerals. The definition of program income includes income "earned only as a result of the grant agreement during the grant period." This definition includes items, such as oil and gas revenues, that a grantee would earn from land acquired with Federal grant funds. Earnings on items such as oil or gas revenues are not considered or contemplated when making awards. No change was made to the common rule.

Several commenters objected to what they interpreted were the provisions of § ____.25(g). They believed that this paragraph required the use of the deductive method in handling program income. The common rule encourages the use of the deductive method for using program income; however, the common rule does not require Federal agencies to use only this method. The common rule does require specific Federal action before other uses can be made of program income. No change was made to the rule.

Two commenters objected to the provision in § ____.25(g) that allows Federal agencies to distinguish between the treatment of grantee and subgrantee program income. This provision is included because different functions are often performed by grantees and subgrantees. In some situations the purpose of the program may be better served if a subgrantee uses the additive method, while the grantee uses the deductive method because there is no need for the grantee to enlarge its efforts. This provision allows for such a situation. Therefore, no change was made to the common rule.

Section ____.26 Non-Federal Audit.

Since all of the agencies participating in the common rule have regulations implementing the Single Audit Act of 1986, this section merely cross-referenced the Act. Nonetheless, a number of commenters asked for a fuller explanation of grantee audit responsibilities. We agree there should be a fuller explanation. The section has been expanded to address grantee audit responsibilities. However, for a complete discussion of the Single Audit Act, audit standards, requirements, and reporting, grantees should look to the agency regulations implementing the Act and OMB Circular A-128.

Section ____.30 Changes.

Three significant revisions have been made to the "Changes" provisions based on the recommendations of Federal agencies. First, the prior approval requirement for budget transfers exceeding 10 percent has been made waivable by Federal agencies. (§ ____.30(c)(1)(ii)). Second, the prior approval requirement for changes in key persons has been elaborated to require approval for any change in the project director or principal investigator of a research project, unless this requirement is waived by the Federal grantor agency. In most research programs, the qualifications of this person are a major factor in the approval of the project. Consequently, this requirement is needed for almost all research grants. (§ ____.30(d)(3)). Third, the prohibition on approval requirements for grant administration project revisions other than those listed in paragraph (d) has been deleted because it was found to be unnecessary. A number of other changes have been made for editorial or clarifying purposes. Several public commenters suggested allowing even more latitude, in various ways, for changes that do not require approval. Because the proposed regulation represents a significant loosening of prior approval requirements, we have decided not to go further before experience is gained on the effect of these changes.

Section ____.32 Equipment.

Several comments were received related to the increase in the accountability thresholds to $5,000. Most commenters applauded the Federal Government's move to relieve the administrative burden placed on State and local governments by current requirements. One commenter expressed concern that raising the thresholds would virtually eliminate inventory records maintained by grantees of general office furniture and equipment. The commenter went on to say, however, that without doubt all grantees would follow their own definition of equipment and continue to maintain records regardless of Federal agency guidelines. The very purpose of raising the thresholds was to alleviate the recordkeeping burden placed on State and local government's assistance recipients. Consequently, no change was made to the proposed common rule.

Two commenters expressed concern over § ____.32(c)(3), which prohibits grantees or subgrantees from using equipment acquired with grant funds to provide services for a fee to compete unfairly with private companies that provide equivalent services, unless specifically permitted or contemplated by Federal statute. The commenters believed that the provision is vague and could lead to inconsistent implementation by the various Federal agencies. One commenter also expressed concern that this provision will prohibit use of equipment acquired with a Federal grant for legitimate charitable purposes. However, several business organizations strongly endorsed the provision. They applauded the restriction, saying it would be extremely helpful in controlling abuses in use of grant-acquired equipment. No change was made to the rule.

One commenter stated that the provision of § ____.32(e)(3) that allows an awarding agency to make a unilateral excess property and disposition decision, is unduly vague and may invite arbitrary implementation. This provision has been revised to state that in cases where a grantee or subgrantee fails to take appropriate disposition action, the awarding agency may direct the grantee to take appropriate excess and disposition actions.

Finally, paragraph 6(g) of Attachment N, Property Management Standards, in Circular A-102 reserves to the Federal Government the right to direct the transfer of equipment acquired with grant funds to the Federal Government or a third party. This provision was rarely, if ever, used in the case of grants to State and local governments and consequently not included in the June 9 proposal. One Federal agency expressed concern about the deletion of this provision, citing instances where a principal investigator under a research grant leaves one entity and continues the research at a successor entity. That agency believed it was in the best interest of the Government to maintain the right to direct the transfer of title to equipment in these instances. The common rule has been revised to add such a provision based on the language in the current Circular A-102.

Section ____.33 Supplies.

Two commenters recommended that the provision of § ____.33(b) on disposition of supplies should be deleted because grantees should not be required to calculate the cumulative Federal share of their supplies to compensate the grantor. During the development stages of the proposed regulation, this provision was considered necessary to protect the Federal interest and requesting grantees to keep records of their supplies (which the majority do anyway) did not seem reasonable. This provision merely continues existing policy (Attachment N to OMB Circular A-102) except for raising the threshold from $1,000 to $5,000 to be consistent with the revised threshold established throughout the proposed common regulation.

Section ____.35 Subawards to debarred and suspended parties.

One commenter opposed the Federal Government's system of nonprocurement suspension and debarment with government-wide effect. This system, which is in the final stages of development, was directed by the President in E.O. 12549. Because Federal agencies' regulations implementing the Executive Order will be issued later this year, the rule was revised to delete detailed procedural requirements.

Section ____.36 Procurement.

Section ____.36(b)(12). One commenter suggested that grantee protest procedures should be modified to set up a Federal agency review process to provide a forum for appeal to the grantor agency of any adverse grantee protest determination. Under § ____.36(b)(12) (i) and (ii), the Federal agencies are involved in the review of protests where there have been violations of Federal law or regulations and standards of § ____.36, or violations of the grantee's protest procedures. This provides Federal agencies the avenue to review and rectify adverse grantee actions. The same provisions are contained in the current procurement standards of Attachment O to A-102. Several Federal agencies have instituted review procedures of complaints against the award of contracts under grants. However, other agencies have determined a formal review process or board of appeals is unnecessary due to the low incidence of appeals. On January 23, 1985, the General Accounting Office decided to discontinue reviewing protests against grantee contracting activities largely because of the diminishing number of complaints filed by disappointed contractors over the nine years that protests were reviewed. We know of no major problems that grantees or Federal agencies are experiencing under the current procedures. Further, Federal agencies are permitted to set up a formal agency review when they deem it necessary. Therefore, we do not believe the provisions should be changed to require Federal agencies to set up formal agency review process.

Section ____.36(c)(1)(vi). Two commenters suggested a modification to the provision specifying a "brand name" product as being restrictive of competition. They believed that there are special instances, such as nonavailability of a product, quality needs or unique requirements, where only a "brand name" product should be purchased. Section ____.36(c) *Competition* requires all procurement transactions to be conducted in a manner providing full and open competition. Section ____.36(c)(1)(iv) identifies as being restrictive to competition the situation of specifying only a "brand name" product instead of allowing "an equal" product in the specifications. It does not prohibit the award to the "brand name" manufacturer when an award is justified on a basis such as nonavailability of a product. Therefore, to promote competition to its fullest as required by § ____.36(c), the suggestion was not adopted.

Section ____.36(c)(2). Several comments were made regarding the prohibition against using statutorily or administratively imposed in-State or local geographical preferences in the evaluation of bids or proposals. The provision was strongly supported by several commenters, although one commenter believed it should not be imposed without a study detailing the results of the prohibition. One commenter was concerned that the section would preempt State licensing laws. Also, one commenter had concern because in contracting for architectural and engineering (A/E) services geographic location is used as a selection criterion provided its application leaves an appropriate number of qualified firms to compete for a given project. The application of unreasonably restrictive qualifications and any percentage factors that give bidding advantages to in-State or local firms are barriers to open and free competition which are not in the public interest. Section ____.36(c)(2) was included in the proposed regulation to foster competition, fairness, and economy in the award of contracts. The provision is viewed as being federally appropriate for a regulation covering a wide range of procurement actions, and consequently the prohibition was retained. However, two provisos have been added to handle the special situations that the commenters noted which make it clear that State licensing laws are not preempted and that geographic location may be used when appropriate as a selection factor when contracting for A/E services.

Section ____36(d)(1). Procurement by small purchase procedures. Several commenters were complimentary of the increase in the dollar threshold for use of small purchase procedures from $10,000 to $25,000. However, there was an equal number of commenters that suggested raising the threshold even higher because of the cost of work in today's dollars. We believe that $25,000 is the proper level of threshold at this time, and it is consistent with the policy that is followed for Government direct procurements.

Section ____36(d)(2) Procurement by sealed bids (formal advertising). Two comments were received suggesting that a statement be included emphasizing that the use of competitive sealed bidding is the preferred procurement method of construction. Federal procurement policy for direct procurement is to acquire construction using sealed bid procedures if certain conditions exist. Those conditions are essentially the same as described under § ____36(d)(2)(i) (A), (B), and (C) of the proposed rules concerning procurement by sealed bids. We believe this to be sound procurement policy when acquiring construction for direct Federal and for assistance programs. In view of this, we have adopted the suggestion by adding a provision to the subsection which expresses a preference for the sealed bid method when purchasing construction.

Section ____36(d)(3). Several comments were submitted concerning procurement by competitive proposals. A few commenters believed the proposed regulation should more clearly identify the qualifications-based selection process for the procurement of A/E services. One commenter believed that the qualifications-based selection process for A/E services should be required. The proposed regulation more clearly identifies and describes the requirements for procuring A/E services than was done under the procurement standards of Attachment O to A–102. In the proposed regulation, a separate paragraph to the provisions on competitive procurements clearly identifies at § ____36(d)(3)(v) a distinctive qualifications-based selection process that may be used for A/E services. However, this process is not mandated because to do so would override many State and local procurement rules which provide for the consideration of price in the selection of firms for certain A/E services. Consequently, no change was made to the proposed common regulation.

Section ____36(e). Contracting with small and minority firms, women's business enterprises, and labor surplus area firms. One commenter recommended that this section should be amended to include the preamble that is in Section 9 of Attachment O to A–102. The current statement is: "It is national policy to award a fair share of contracts to small and minority business firms." The commenter believed that the elimination of this statement would stop all Federal agencies from complying with Executive Order 12432, Minority Business Enterprise Development. Two commenters supported the proposed rule which requires grantees to take all necessary affirmative steps (six steps are detailed) to assure that minority firms, women's business enterprises, and labor surplus area firms are used when possible. They believe the requirements are appropriate to ensure that grantees and contractors extend best faith efforts to use these firms while still allowing the open competitive bidding system to operate. While the proposed regulation is more concise, the total requirements that were in Section 9 of Attachment O remain intact. Also, the mere elimination of the preamble in the standards on grantee procurements does not in any way reduce or change the requirements listed in the Executive Order on Minority Business Enterprise Development. Consequently, the proposed common rule was not modified.

Section ____36(f). Contract cost and price. One commenter requested that legal services be singled out as being subject only to price analysis, but not to cost analysis because legal firms do not maintain their financial systems in a manner to permit cost analysis. The cost and price provision as circulated is intended to provide general guidance, and to set forth the requirement for cost or price analysis. Under a certain type of procurement, such as legal services, where there are an adequate number of sources available and the price or unit price can be determined as being reasonable through price analysis, a cost analysis would not be required. The standard appears to adequately provide for situations where price analysis would be used and, therefore, the commenter's request was not adopted.

Section ____36(g)(3)(ii). One comment was received supporting the provision which allows grantees to self-certify their procurement systems as complying with the regulation's requirements. However, another commenter objected to the provision because it does not allow sufficient time to take corrective action when a bidder protests. In cases of a protest, whether or not a grantee's procurement system has been self-certified should not affect the time required for any needed corrective action. A protest is lodged against a single procurement action and only one action needs to be addressed. System deficiencies do not need to be corrected to respond to a protest. Consequently, no change was made in the common rule.

Section ____36(h) Bonding requirements. One commenter requested that this section be modified to apply only to construction projects as is currently the case under the provisions of Attachment B to OMB Circular A–102. The bonding provisions are applicable to construction and the section has been modified to make this clear.

Section ____36(i). Contract provisions. One commenter recommended that Federal agencies be permitted to require standard contract clauses in grantee contracts. Two other commenters believed that standard or "model" clauses would be beneficial and should be allowed. Such clauses make it easier for grantees to manage their projects, and for contractors to understand the contractual requirements that will consistently be applied on federally assisted contracts. The proposed regulation and the current procurement standards in Attachment O require a grantee's contracts to contain certain provisions. In addition, Attachment O permits grantor agencies to require clauses approved by the Office of Federal Procurement Policy. Pursuant to the authority provided in Attachment O, Federal agencies have promulgated model clauses to be used by grantees. Clauses for changes, differing site conditions, suspension of work, termination, and remedies have been issued using the same type of language that has been recommended by the American Bar Association's Model Procurement Code and is required in direct Federal acquisition by virtue of FAR 43.205, FAR 36.502, FAR 12.505, and FAR 49.504. Under many of the Federal assistance programs the use of model clauses appears to be appropriate. Consequently, the authority that is included under current Attachment O was added to the common rule.

Section ____40 Monitoring and reporting program performance.

One commenter questioned whether the language in § ____40(a) requires the grantee to monitor its own activities as it administers the subgranting of funds or instead to monitor the activities of its subgrantees. The commenter believed there was an overlap between

§ ____40(a) and OMB Circular A–128. OMB Circular A–128, which implements the Single Audit Act of 1984, concerns auditing of State and local governments. There is no overlap between the requirements of that Circular and this § ____40, which concerns monitoring, not auditing. In response to the commenter's specific concern, the grantee is responsible for monitoring both its own activities and the activities of its subgrantees.

Another commenter recommended the regulation clarify the explicit responsibility of a grantee to monitor contract performance. The proposed common regulation only imposes minimal requirements regarding contracts entered into by grantees under § ____36. The grantee is ultimately responsible for administering the grant and for monitoring the contractor's activities to ensure compliance with applicable Federal requirements and achievement of performance goals. Because the factors involved in the monitoring will vary depending upon the nature of the work being performed under the contract, we do not believe specific detailed monitoring requirements should be imposed at the Federal level.

Section ____41 Financial reporting.

One commenter noted a conflict between the proposed common regulation at § ____41(b)(2) and the Circular at 7(b)(2), setting forth procedures for financial reporting on either a cash or accrual basis. The Circular requires Federal agencies to prescribe whether reporting shall be on a cash or accrual basis and the proposed common regulation requires grantees to report on the same accounting basis it uses in its own accounting system. In addition, several commenters objected to the option of allowing financial reporting on either a cash or accrual basis and thought a standard format should be established. The conflict noted between the proposed common regulation and the Circular has been corrected. The proposed common regulation has been changed to authorize each Federal agency to determine whether financial reporting shall be required on a cash or accrual basis. It is essential for Federal agencies to be given discretion to determine the appropriate type of information necessary to administer the programs for which they are responsible. The option of allowing financial reporting on a cash or accrual basis was determined to be the most feasible and the least burdensome to accommodate the accounting systems in place at Federal and grantee levels. The proposed common regulation has been modified at § ____41(b)(2) to authorize Federal agencies to determine whether financial reporting shall be required on a cash or accrual basis.

One commenter requested that the language permitting OMB to authorize supplementary financial reporting forms "from time-to-time" be deleted. In the alternative, if this could not be done, the commenter requested that respondents be given an opportunity to review the forms prior to OMB approval. If after original clearance, forms could not be supplemented to meet the needs of particular Federal agencies, the basic form would have to contain all financial reporting requirements for every agency of the Federal Government. Such a requirement is not feasible given the complexities of the various programs administered by the Federal Government. Therefore, the language permitting agencies to request supplementation of forms has not been deleted. The requirements for OMB clearance of forms is contained in the Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520. OMB implements the Act in regulations appearing at 5 CFR Part 1320. These regulations require an agency that wishes to collect information to submit a request for approval to OMB. The agency must also publish a notice in the **Federal Register** informing the public of the request. If anyone wishes to comment on agency-specific financial reporting forms prior to OMB approval, the forms clearance regulations contained in 5 CFR Part 1320 offer the appropriate vehicle.

Several commenters were very supportive of requiring, at the maximum, quarterly Financial Status Reports (SF–269). However, one commenter was concerned that quarterly financial reporting is not adequate to monitor large awards. This commenter suggested awarding agencies be given the option to require more frequent reporting for large awards. A significant emphasis of the proposed common regulation and Circular is to reduce unnecessary paperwork and reporting burdens at both the Federal Government and grantee levels. We believe that financial reporting on a quarterly basis, regardless of the size of the award, is adequate to monitor grantees. If reporting is insufficient, Federal agencies may impose additional financial reporting requirements through the "high-risk" provisions of § ____12.

A commenter believed the authority to allow awarding agencies to require financial reports more frequently or in more detail if a grantee's accounting system does not meet the standards for financial management systems may invite arbitrary implementation and should require due process procedures. The authority to review the adequacy of the financial management system of grantee is established in the proposed common regulation at § ____20(b)(7). The standards for financial management systems established in the proposed common regulation in § ____20(a)–(c) are such basic fiscal management principles that failure to meet these standards would have to involve egregious errors. Therefore, we do not believe this requirement to be arbitrary. In addition, a grantee has no due process rights to report information a certain number of times or a specific level of detail. This requirement, when imposed, would only require more detailed or frequent financial reporting. We believe that these requirements are essential to ensure the proper stewardship of Federal funds.

One commenter suggested that unliquidated obligations reported on an interim or final Financial Status Report (SF–269) be required to be liquidated within a reasonable time after the required 90-day reporting period. The proposed common regulation, at § ____23(b), requires that obligations incurred under an award be liquidated within 90 days after the end of the funding period, unless an extension has been granted by the awarding agency. We believe that the authorization to extend the liquidation date offers sufficient flexibility to handle any unique liquidation problems.

Another commenter suggested that the requirement to file Federal Cash Transactions Reports (SF–272) 15 days following the end of a quarter or month be increased to 30 days. The 15-day requirement is necessary for Federal Cash Transactions Reports (SF–272) in order for awarding agencies to complete cash requirement forecasts for the Treasury Department on a timely basis. Since grantees are required to establish methods and procedures for minimizing the time between transfer of funds and disbursement in accordance with Treasury regulations at 31 CFR 205, this timely reporting should not be burdensome.

A commenter believed the authority to allow awarding agencies to require reporting on the amount of cash advances in excess of three days' needs in the hands of their subgrantees or contractors, when considered necessary and feasible, may invite arbitrary implementation. Another commenter was concerned because many subgrantees get funds from the State on a monthly basis and therefore, the three days needs test would be impossible to meet, except at the very end of the month. In addition, other commenters believed a dollar threshold for requiring such reporting by subgrantees or contractors should be established. As required by Treasury regulation at 31 CFR Part 205, grantees must establish methods and procedures for payment that minimize the time elapsing between the transfer of funds from the U.S. Treasury and disbursements by grantees and subgrantees. Grantees must monitor cash drawdowns by their subgrantees to assure that they conform substantially to the same standards of timing and amount as apply to advances to the grantees. Therefore, grantees should readily have information available related to subgrantee cash advances and be prepared to report on such advances if requested. Also, payment systems that meet the requirement to minimize time elapsed between transfer of funds and subgrantee disbursements will provide funds at a rate sufficient to meet the three-days needs test. To ensure prudent management of Federal funds, awarding agencies need to know whether grantees have excess cash regardless of the amount of the award. Therefore, establishing a dollar threshold is inappropriate.

Section ____.43 Enforcement.

One commenter requested clarification on whether grantees can use the enforcement process described in § ____.43 to require subgrantees to resolve any audit findings, recommendations or exceptions cited in a previous year's audit. Yes, a grantee, as an awarding agency, is authorized under this section to resolve audits through the audit process.

Section ____.44 Termination for convenience.

One commenter was concerned that termination for convenience may only be carried out with the consent of the grantee and that the awarding agency may wish to terminate an award unilaterally without involving remedies for noncompliance. The commenter misunderstands the nature of a termination action. A termination involves a Federal grantor agency terminating a grantee's authority to obligate funds before the authority would otherwise expire. Incidental to that function, a grantee may be required, as the result of an audit, to return funds that were improperly expended. A grantee has a constitutionally protected property right to obligate funds until the end of its normal grant period. Therefore, a grantor agency, before it may cut short that period of obligation through a termination action, must either offer the grantee due process of law or obtain the grantee's consent to the termination. As a result, it is impossible to terminate a grant unilaterally even though a Federal agency may be willing to forego recovery of improperly expended funds.

Subpart D—After-the-Grant Requirements

Four comments were received on After-the-Grant requirements. Two State agencies commented that the 90-day timeframe in § ____.50(b) for grantees to submit all reports associated with the grant was not sufficient. One of the commenters suggested that 120 days or longer would be more appropriate, since they experienced difficulty with some grants in meeting the 90-day deadline. We agree that in some rare cases, 90 days may not be sufficient time for grantees to submit all required reports, particularly when there are unliquidated obligations or delays in receiving reports from subgrantees. In recognition of this, the section has been amended to provide the opportunity for the Federal agency to grant an extension upon the request of the grantee.

One Federal agency commented that the 60-day deadline for cost adjustments in § ____.50(c) was unrealistic, given large formula grants and the administrative burden of closing them out. Recognizing the problems such a short deadline will cause, the rule has been changed to a 90-day deadline. We believe all agencies should be able to make a cost adjustment based on the reports on hand within that timeframe. Section ____.51, Later disallowances and Adjustments provides the opportunity to make further adjustments if Single Audit reports or other findings question costs.

Another commenter stated that use of § ____.52(a)(2) authorizing withholding advance payments to a grantee to satisfy a debt owed to the Government could impede program implementation and not necessarily result in the actual collection of the amounts due. While we agree that use of this provision to satisfy delinquent debts to the Government may at times raise difficult issues, it is nevertheless necessary to insure that the Government has the tools to collect funds that are due. We are certain Federal agencies will continue, as in the past, to use good judgment in the exercise of this authority.

Subpart E—Entitlements [Reserved]

Impact Analyses

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for "major" rules which are defined in the Order as any rule that has an annual effect on the economy of $100 million or more, or certain other specified effects. We intend the rule to result in savings to State and local governments in the costs of administering grants. However, we do not believe that the rule will have an annual economic effect of $100 million or more or the other effects listed in the order. For this reason, we have determined that this rule is not a major rule within the meaning of the Order.

Regulatory Flexibility Act of 1980

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that, for each rule with "significant economic impact on a substantial number of small entities," an analysis be prepared describing the rule's impact on small entities and identifying any significant alternatives to the rule that would minimize the economic impact on small entities. We certify that this rule will not have a significant economic impact on a substantial number of small entities because they do not affect the amount of funds provided in the covered programs, but rather modify and update administrative and procedural requirements.

Paperwork Reduction Act

Sections ____.10(c); ____.20(b)(2); ____.24(b)(6); ____.30 (f)(1) and (f)(3); ____.32 (d)(1) and (f)(2); ____.36 (b)(9), (c)(3), and (i); ____.40 (b)(2), (c) and (d); ____.41 (b), (c), (d) and (e); ____.42(b); and, ____.50(b) of this rule contain collection-of-information requirements. As required by the Paperwork Reduction Act of 1980, each agency will submit a copy of this rule to the Office of Management and Budget (OIRA) for its review of these reporting and recordkeeping requirements. No recipient may be subject to a penalty for failure to comply with these information collection requirements until they have been approved and assigned an OMB control number.

7 CFR Parts 3015 and 3016

FOR FURTHER INFORMATION CONTACT: Gerald Miske (Branch Chief), (202)382-1553.

ADDITIONAL SUPPLEMENTARY INFORMATION: USDA has Uniform Federal Assistance Regulations found at 7 CFR Part 3015 which establish Departmentwide policies and standards for the administration of grants and cooperative agreements. The rules primarily implement OMB Circular A-102, "Uniform Requirements for Grants to State and Local Governments," Circular A-110, "Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations," Circular A-128, "Audits for State and Local Governments," and Executive Order 12372, "Intergovernmental Review of Federal Programs." Part 3015 also sets forth the Department's policy on competition in awarding discretionary grants and cooperative agreements and identifies the cost principles specified in Circular A-21 for universities, A-87 for State and local governments, A-122 for nonprofit organizations, and 41 CFR 1-15.2 for for-profit organizations.

Presidential Memorandum, "Uniform Requirements for Grants to State and Local Governments," dated March 12, 1987, directed that Executive departments and agencies simultaneously propose common regulations that adopt the Governmentwide terms and conditions of the proposed revisions to Circular A-102 verbatim.

The Circular A-102 common rule, Subparts A-D, does not apply to open-ended entitlement programs. Coverage for those programs will be provided in a future Subpart E. Pending the issuance of Subpart E, open-ended entitlements remain subject to the requirements of Part 3015.

USDA is adopting the A-102 common regulation by adding a new Part 3016, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments." Part 3016 applies only to assistance relationships documented by grants and cooperative agreements, and subawards to State and local governments. Thus, this part does not apply to transactions entered into under sections 1472(b), 1473A, and 1473C of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by the Food Security Act (7 U.S.C. 3318, 3319a and 3319c). Part 3016 also does not apply to the following open-ended entitlement grant programs administered by the Food and Nutrition Service:

(a) State Administrative Matching Grants for Food Stamp Program.
(b) National School Lunch Program.
(c) School Breakfast Program.
(d) Summer Food Service Program.
(e) Child Care Food Program.
(f) Special Milk Program for Children.

Part 3015 no longer governs assistance relationships with State and local governments, except as provided below. However, the above listed open-ended entitlement grant programs, as well as grants and cooperative agreements documenting assistance transactions with institutions of higher education, hospitals, other nonprofit organizations, and for-profit organizations continue to be subject to Part 3015.

The following subparts of Part 3015 remain in effect for State and local governments that receive assistance from USDA.

(a) Subpart I on audits of State, local, and Indian Tribal governments.
(b) Subpart Q, § 3015.158 on competition.
(c) Subpart T on cost principles.
(d) Subpart V on the intergovernmental review of Federal programs.
(e) Subpart W on nonprocurement debarment and suspension (to be issued at a later date).

Comments

In the June 9, 1987 **Federal Register** (FR) (52 FR 21822-21824), USDA requested comments on the proposal to amend 7 CFR 3015.1 and 3015.2 in order to redefine the recipients to which this rule applies. Since no comments were received on this and the policy in Part 3015 is not being revised for those recipients which it still covers, §§ 3015.1 and 3015.2 are amended as proposed.

The Department received no agency specific comments from the public on 7 CFR Part 3016. However, an internal comment was made concerning a statutory deviation.

The comment was that section 17(f)(4) of the Child Nutrition Act (CNA) of 1966, as amended, specifically requires State submission of monthly financial reports and participation data for the Food and Nutrition Service's (FNS) Women, Infants and Children (WIC) Program. Additionally, paragraph 17(i) of the authorizing legislation requires FNS to reallocate funds periodically if it is determined that a State agency is unable to spend its allocation. In order to fulfill this obligation, FNS must consistently make funding determinations that involve the continuous forecasting and reevaluation of State agencies' funding needs which necessitates compliance with the legislatively mandated monthly financial reporting requirement. Sections 3016.40 and 3016.41 of the common rule limit grantor agencies to quarterly requirements for submission of financial and program performance reports by grantees. Since monthly reporting is a statutory requirement for the WIC program, FNS must ask WIC grantees for financial and program performance reports on a monthly basis.

List of Subjects

7 CFR Part 3015

Grant programs (Agriculture), Intergovernmental relations.

7 CFR Part 3016

Grant programs (Agriculture).

Issued at Washington, DC.

Accordingly, Title 7 of the Code of Federal Regulations is amended as set forth below.

John J. Franke, Jr.,
Assistant Secretary for Administration.

Approved: February 19, 1988.

Richard E. Lyng,
Secretary of Agriculture.

PART 3015—[AMENDED]

1. USDA is amending Subpart A of 7 CFR Part 3015 as follows:

a. The authority citation for Part 3015 continues to read as follows:

Authority: 5 U.S.C. 301.

Subpart A—General

b. Section 3015.1(a) is revised to read as follows:

§ 3015.1 Purpose and scope of this part.

(a) (1) This part establishes USDA-wide uniform requirements for the administration of grants and cooperative agreements and sets forth the principles for determining costs applicable to activities assisted by such USDA awards. This part contains rules that apply to USDA grants and cooperative agreements to institutions of higher education, hospitals, and other nonprofit organizations, as well as those that apply to open-ended entitlement grants, and specifies the set of principles for determining allowable costs under USDA grants and cooperative agreements to State and local governments, universities, non-profit and for-profit organizations as set forth in OMB Circulars A-87, A-21, A-122, and 41 CFR 1-15.2, respectively.

(2) Additionally, this part establishes uniform audit requirements for State, local, and Indian Tribal governments pursuant to the Single Audit Act of 1984 and OMB Circular A-128, intergovernmental review provisions required by Executive Order 12372 for any programs listed in the **Federal Register** as covered, and policy on competition in awarding discretionary grants and cooperative agreements.

(3) Rules for nonentitlement grants and cooperative agreements to State and local governments are found in Part 3016.

* * * * *

c. Section 3015.2(d) introductory text is republished and paragraph (d)(5) is added to read as follows:

§ 3015.2 Applicability.

* * * * *

(d) Recipients to which this part does not automatically apply. This part does not automatically apply to the kinds of recipients listed below unless other conditions set forth in the grant, cooperative agreement, subgrant, or specific subpart in this part make all or specified portions apply:

* * * * *

(5) State and local governments, except open-ended entitlements to State and local governments.

* * * * *

2. Title 7 of the Code of Federal Regulations is being amended by adding Part 3016 as set forth at the end of this document.

PART 3016—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
3016.1 Purpose and scope of this part.
3016.2 Scope of subpart.
3016.3 Definitions.
3016.4 Applicability.
3016.5 Effect on other issuances.
3016.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

3016.10 Forms for applying for grants.
3016.11 State plans.
3016.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

3016.20 Standards for financial management systems.
3016.21 Payment.
3016.22 Allowable costs.
3016.23 Period of availability of funds.
3016.24 Matching and cost sharing.
3016.25 Program income.
3016.26 Non-Federal audit.

Changes, Property, and Subawards

3016.30 Changes.
3016.31 Real property.
3016.32 Equipment.
3016.33 Supplies.
3016.34 Copyrights.
3016.35 Subawards to debarred and suspended parties.
3016.36 Procurement.
3016.37 Subgrants.

Reports, Records Retention, and Enforcement

3016.40 Monitoring and reporting program performance.
3016.41 Financial reporting.
3016.42 Retention and access requirements for records.
3016.43 Enforcement.
3016.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

3016.50 Closeout.
3016.51 Later disallowances and adjustments.
3016.52 Collections of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 5 U.S.C. 301.

ADDITIONAL SUPPLEMENTARY INFORMATION:

I. Introduction

The proposed common rule was published in the **Federal Register** (52 FR 21820–21862) on June 9, 1987. In the DOE preamble to the proposed rule, we stated that amendments conforming Subparts A, B, and C of 10 CFR Part 600 to Subpart E would be issued with the final rule.

Since that time, DOE has promulgated a comprehensive revision of Subpart C, Cooperative Agreements (52 FR 5260, February 22, 1988). Among other things, this revision made, with a few exceptions, the administrative requirements for grants applicable to cooperative agreements in § 600.205. The common rule (Subpart E) similarly makes the administrative requirements for grants applicable to cooperative agreements except that it covers only State, local, and Indian tribal governments.

Subpart E is more limited in scope than the existing Subparts A, B, and C because it covers primarily external (applicant/recipient) requirements rather than both internal (Federal agency) and external requirements.

In order to integrate Subpart E into Part 600 and, consistent with the recent changes DOE has made to Subpart C, we believe it is necessary to restructure Part 600, to the extent possible, into Subparts which (1) group requirements according to recipient type (governmental vs non-governmental), (2) segregate internal from external requirements and (3) consolidate the common administrative requirements applicable to both grants and cooperative agreements. This restructuring does not change any of the existing requirements, it merely conforms the provisions of Part 600 as necessary to accommodate Subpart E and reorganizes the rule into a more comprehensible format.

Consequently, Part 600 is amended into the following Subparts: Subpart A—General, Subpart B—Uniform Administrative Requirements for Grants and Cooperative Agreements to Other than State and Local Governments, Subpart C—Cooperative Agreements, Subpart D—Audits of State and Local Governments, and Subpart E—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (Common Regulation).

While Subparts A and C focus primarily on DOE policy and *internal* procedural requirements which we believe applicants/recipients also need to know, Subparts B and E establish the *external* requirements or general terms ahd conditions applicable to recipients. Subpart B applies to non-governmental entities; Subpart E applies to State and local governments. Subpart D contains the Audit requirements for State and local governments. To effect this realignment in Part 600, certain sections which are discussed below, are being relocated.

In addition to these structural and conforming changes within Subparts A, B, and C, Subpart E is being changed in a few sections also described below to establish DOE policy in areas not covered by the common rule (e.g. cost principles for hospitals) and for purposes of clarification.

Please note in the Table of Contents of Subpart E, we have inserted in parenthesis the section numbers as they appear in the common rule following the Subpart E section numbers to show the relationship between the two.

II. Amendments to Subparts A, B, and C

Sections 600.3, 600.4, 600.10, 600.14, 600.19, 600.20, 600.25, 600.26 of Subpart A are amended to remove the obsolete cross-references to OMB Circular A–102, to provide the appropriate cross-references to Subpart E and to change references resulting from restructuring Part 600.

The scope and applicability of Subpart B as stated in § 600.100 is being amended. The amended Subpart B provides the common administrative requirements for grants *and* cooperative agreements for recipients who are *not* State, local, and Indian tribal governments. The term "grant" as used in Subpart B is redefined in § 600.101 to also include "cooperative agreement". The amended scope and applicability of Subpart B parallels that of Subpart E which establishes the common administrative requirements for grants and cooperative agreements to State and local governments.

Sections 600.102, 600.103, 600.109, and 600.112 are amended to change references due to restructuring.

Sections 600.104, 600.106, 600.108, 600.121 (a) and (c), and 600.122 of Subpart B are transferred to Subpart A because they primarily cover DOE policy and internal procedural requirements applicable to both grants and cooperative agreements rather than external requirements for recipients. Section 600.118 which establishes DOE patents, data, and copyrights policy and procedures is also moved to Subpart A. Paragraphs (a) and (c) of § 600.121 are reiterated in a new § 600.28 to continue the applicability of these procedures when DOE takes enforcement actions against recipients regardless of the type of recipient involved.

Sections 600.105, 600.107, 600.110, 600.111, 600.116, 600.117, and 600.119 of Subpart B are amended to remove the references to OMB Circular A–102 and to State, local, and Indian Tribal Governments.

Section 600.200 of Subpart C is amended to revise the scope and applicability of this subpart to cover DOE policies and procedures specific to cooperative agreements, but not the general administrative requirements for recipients which, as a result of this rulemaking, are covered in Subparts B and E.

Sections 600.203, 600.204, 600.205, 600.206 are amended to provide the appropriate cross-references to Subpart E.

III. Requirements for State and Local Governments—Subpart E

Section 600.403 of Subpart E of the common rule is amended to define "prior approval" as documentation signed by a *Contracting Officer*. We believe this information is necessary to let the recipient know the DOE official authorized to approve such requests.

Section 600.405 of the common rule is amended to include a cross-reference to the DOE process for obtaining a deviation to Part 600. Because this process is applicable to applicants and recipients as well as DOE staff, the common rule will provide this cross-reference to Subpart A.

Section 600.422 of the common rule is amended to include the cost principles to be used for hospitals (45 CFR Part 74, Appendix E) and to specify the cost principles applicable to commercial organizations receiving DOE financial assistance (48 CFR 31.2 as modified by 48 CFR 931.2).

List of Subjects in 10 CFR Part 600

Administrative practice and procedure, Applications, Audit, Cooperative agreements/energy, Copyrights, Educational institutions, Eligibility, Energy financial assistance, For-profit organizations, Grants, Hospitals, Indian tribes, Individuals, Inventions and patents, Local governments, Management standards, Nonprofit organizations, Patents, Reporting and recordkeeping requirements, Solicitations, Small businesses, States, Technical data, Uniform administrative requirements.

For the reasons set out in the preamble, Part 600 of Title 10 of the Code of Federal Regulations is amended as set forth below.

Berton J. Roth,

Director, Procurement and Assistance Management Directorate.

PART 600—FINANCIAL ASSISTANCE RULES

1. The Authority citation for Part 600 continues to read as follows:

Authority: Secs. 644 and 646, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254 and 7256; Pub. L. 97–258, 96 Stat 1003–1005 (31 U.S.C. 6301–6308).

2. Part 600 is amended by adding Subpart E to read as set forth at the end of this document:

Subpart E—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments

General

600.400 (__.1) Purpose and scope of this subpart.
600.401 (__.2) Scope of §§ 600.400 through 600.405.
600.402 (__.3) Definitions.
600.403 (__.4) Applicability.
600.404 (__.5) Effect on other issuances.
600.405 (__.6) Additions and Exceptions.

Pre-Award Requirements

600.410 (__.10) Forms for applying for grants.
600.411 (__.11) State plans.
600.412 (__.12) Special grant or subgrant conditions for "high risk" recipients.

Post-Award Requirements

Financial Administration

600.420 (__.20) Standards for financial management systems.
600.421 (__.21) Payment.
600.422 (__.22) Allowable costs.
600.423 (__.23) Period of availability of funds.
600.424 (__.24) Matching or Cost sharing.
600.425 (__.25) Program income.
600.426 (__.26) Non-Federal audit.

Changes, Property, and Subawards

600.430 (__.30) Changes.
600.431 (__.31) Real property.
600.432 (__.32) Equipment.
600.433 (__.33) Supplies.
600.434 (__.34) Copyrights.
600.435 (__.35) Subawards to debarred and suspended parties.
600.436 (__.36) Procurement.
600.437 (__.37) Subgrants.

Reports, Records Retention, and Enforcement

600.440 (__.40) Monitoring and reporting program performance.
600.441 (__.41) Financial reporting.
600.442 (__.42) Retention and access requirements for records.
600.443 (__.43) Enforcement.
600.444 (__.44) Termination for convenience.

After-the-Grant Requirements

600.450 (__.50) Closeout.
600.451 (__.51) Later disallowances and adjustments.
600.452 (__.52) Collection of amounts due.

Entitlements [Reserved]

3. Part 600 is further amended as set forth below:

§ 600.3 [Amended]

a. Section 600.3 is amended by changing the reference in the definition for "non-profit organization" and "Small business" from "600.118(b)(1)" to "600.33(b)(1)".

§ 600.4 [Amended]

b. Section 600.4 is amended as follows:

(1) In paragraph (a), after "§ 600.105" add "and § 600.412" and revise "§ 600.118" to read "§ 600.33".

(2) In paragraph (c)(2)(i) and (c)(3) revise "§ 600.118" to read "§ 600.33".

c. Section 600.10 is amended by revising paragraph (a) to read as follows:

§ 600.10 Form and content of applications.

(a) Forms. Application or preapplications shall be on the form or in the format and in the number of copies specified by DOE either in this part, in a program rule, or in the applicable solicitation and must include all required information. For State governments, local governments, or Indian tribal governments, applications shall be made on the forms prescribed in § 600.410. Such applicant shall not be required to submit more than the original and the two copies of the application or preapplication.

(Approved by OMB under OMB control number 1910-0400.)

* * * * *

d. Section 600.14 is amended by revising paragraph (c)(1) to read as follows:

§ 600.14 Unsolicited applications.

* * * * *

(c) * * *

(1) Unsolicited applications shall be in the format set forth in "The Guide for Submission of Unsolicited Proposals," except that a State government, local government, or Indian tribal government shall use one of the applications forms prescribed in § 600.410, as appropriate.

* * * * *

§ 600.19 [Amended]

e. Section 600.19(d) is amended by revising the reference "§ 600.106" to read § 600.31".

§ 600.20 [Amended]

f. Section 600.20(c) is amended by revising "§ 600.103(g) or § 600.108 of this part" to read "§ 600.103(g), § 600.108 or § 600.422(b)".

g. Section 600.25 is amended by revising paragraph (d) to read as follows:

§ 600.25 Access to records.

* * * * *

(d) *Duration of access right.* The right of access may be exercised for as long as the applicable records are retained by the recipient, subrecipient, contractor, or subcontractor. (See § 600.124 and § 600.442 for record retention requirements for grants and cooperative agreements based on recipient type.)

h. Section 600.26 is amended by revising paragraphs (d)(1) introductory text, (d)(1) (i), (ii), (iii), (iv), and (v) to read as follows:

§ 600.26 Disputes and appeals.

* * * * *

(d) *Review on appeal.* (1) The Board shall have no jurisdiction to review:

(i) Any preaward dispute (except as provided in paragraph (d)(2)(ii) of this section), including use of any special restrictive condition pursuant to § 600.105 or § 600.412;

(ii) DOE denial of a request for a deviation under § 600.4 or § 600.406 of this part;

(iii) DOE denial of a request for a budget revision or other change in the approved project under §§ 600.103, 600.114, 600.422, or 600.430 of this part or under another term or condition of the award;

(iv) Any DOE action authorized under §§ 600 121(b) (1), (2), (3) or (5); or § 600.443 (a)(1), (a)(3) for suspensions only; or § 600.443(a)(4) for actions disapproving renewal applications or other requests for extension of time or additional funding for the same project when related to recipient noncompliance, or such actions authorized by program rule;

(v) Any DOE decision about an action requiring prior DOE approval under §§ 600.112(g), 600.119, or 600.436 of this part or under another term or condition of the award;

* * * * *

i. Section 600.28 is added to Subpart A to read as follows:

§ 600.28 Noncompliance.

(a) Except for noncompliance determinations under 10 CFR Part 1040, whenever DOE determines that a recipient has not complied with the applicable requirements of this part, with the requirements of any applicable program statute or rule, or with any other term or condition of the award, a DOE Contracting Officer shall provide to the recipient (by certified mail, return receipt requested) a written notice setting forth

(1) The factual and legal bases for the determination of noncompliance;

(2) The corrective actions and the date (not less than 30 days after the date of the notice) by which they must be taken.

(3) Which of the actions authorized under § 600.121(b) or § 600.443(a) of this part DOE may take if the recipient does not achieve compliance within the time specified in the notice, or does not provide satisfactory assurances that actions have been initiated which will achieve compliance in a timely manner.

(b) DOE may take any of the actions set forth in § 600.121(b) or § 600.443(a) of this part concurrent with the written notice required under paragraph (a) of this section or with less than 30 days written notice to the recipient whenever:

(1) There is evidence the award was obtained by fraud;

(2) The recipient ceases to exist or becomes legally incapable of performing its responsibilities under the financial assistance award;

(3) There is a serious mismanagement or misuse of financial assistance award funds necessitating immediate action; or

(4) An immediate debarment in accordance with § 600.27(g) is warranted.

j. In § 600.100, paragraph (a) is revised and paragraph (b) is amended by revising "§ 600.122" to read "§ 600.29".

§ 600.100 Scope and applicability.

* * * * *

(a) This subpart establishes administrative rules for grants and cooperative agreements and subawards to other than State, local, and Indian tribal governments. This subpart implements OMB Circular A-110 and the Federal cost principles. Administrative rules for grants and cooperative agreements and subawards to State, local and Indian tribal governments are prescribed in Subpart E.

* * * * *

k. Section 600.101 is amended by adding the term "grant" to read as follows:

§ 600.101 Definitions.

* * * * *

"Grant" means an award of financial assistance, including cooperative agreements, in the form of money or property in lieu of money, by the Federal Government to an eligible recipient.

* * * * *

§ 600.102 [Amended]

l. Section 600.102 is amended by changing the reference in paragraph (c) from "§ 600.106" to "§ 600.31".

§ 600.103 [Amended]

m. Section 600.103 is amended by changing the reference in paragraph (g) from "§ 600.108" to "§ 600.32".

§ 600.104 [Redesignated as § 600.30]

n. Section 600.104 of Subpart B is redesignated as § 600.30 in Subpart A. In the newly redesignated § 600.30, "grant", "grantee", and "subgrant" are revised to read "award", "awardee", and "subaward" respectively wherever they appear.

§ 600.105 [Amended]

o. Section 600.105(b)(3) is amended by removing "A-102 or".

§ 600.106 [Redesignated as § 600.31]

p. Section 600.106 is redesignated as § 600.31 in Subpart A. In newly redesignated § 600.31 "grant" and "grantee" are revised to read "award" and "awardee" respectively wherever they appear. Also, the reference to "§ 600.108(c)" in paragraph (b)(3) is revised to read "§ 600.32(c)".

q. Section 600.107 is amended by revising paragraph (e) to read as follows:

§ 600.107 Cost sharing.

* * * * *

(e) Valuation of in-kind contributions. Any grantee or subgrantee shall determine the value of services or property donated by non-Federal third parties in accordance with OMB Circular A-110, Attachment E, Paragraph 5.

§ 600.108 [Redesignated as § 600.32]

r. Section 600.108 is redesignated as § 600.32 in Subpart A. In newly redesignated § 600.32, "grant", "grants", "grantee", and "subgrantee" are revised to read "award", "awards", "awardee", and "subawardee", respectively wherever they appear. Also, the reference to "§ 600.108(c)(2)" in paragraph (d) is revised to read "paragraph (c)(2) of this section".

§ 600.109 [Amended]

s. Section 600.109 is amended by changing the reference in paragraph (d) from "§ 600.104" to "§ 600.30".

§ 600.110 [Amended]

t. Section 600.110 is amended by revising "Attachments A of OMB Circulars A-102 and A-110," to read "Attachment A of OMB Circular A-110".

§ 600.111 [Amended]

u. Section 600.111(a)(1) is amended by revising "Attachments B of OMB Circulars A-102 and A-110" to read "Attachment B of OMB Circular A-110".

§ 600.112 [Amended]

v. Section 600.112(f)(1) is amended by revising "§ 600.122" to read "§ 600.29".

§ 600.116 [Amended]

w. Section 600.116(g) is amended by removing "in OMB Circular A-102, Attachment H and".

x. In § 600.117, paragraph (d)(1) introductory text is amended by removing "OMB Circular A-102, Attachment N, Paragraph 6.d. or" and paragraph (d)(3) is revised to read as follows:

§ 600.117 Property management.

* * * * *

(d) * * *

(3) Grantees and subgrantees shall comply with OMB Circular A-110, Attachment N, Paragraphs 6. b, c, and d for use, disposition, and management of such equipment.

* * * * *

§ 600.118 [Redesignated as § 600.33]

y. Section 600.118 of Subpart B is redesignated as § 600.33 in Subpart A.

z. In § 600.119, paragraph (b) is revised, paragraph (c)(1)(ii) is removed and reserved, paragraph (c)(2)(ii) is amended by revising "OMB Circulars A-102 or A-110" to read "OMB Circular A-110", paragraph (d) is amended by revising "OMB Circulars A-102 and A-110" to read "OMB Circular A-110", to read as follows:

§ 600.119 Procurement under grants and subgrants.

* * * * *

(b) *Grantee and subgrantee responsibilities.* Grantees and subgrantees shall comply with the grantee and subgrantee responsibility requirements of OMB Circular A-110, Attachment O, Paragraphs 2, 3, and 4.

* * * * *

§ 600.122 [Redesignated as § 600.29]

aa. Section 600.122 of Subpart B is redesignated as § 600.29 in Subpart A. In newly redesignated § 600.29, "grant" and "grantee" are revised to read "award" and "awardee" respectively wherever they appear. Also, citations need to be added in the following places:

(a) In paragraph (a)(1) add "or § 600.28" after "§ 600.121".

(b) In paragraph (b) add "or § 600.28(b)" after § 600.121(c)" and add "or § 600.28(a)" after "§ 600.121(a)".

(c) In paragraph (d) add "or § 600.28" after "§ 600.121".

(d) In paragraph (f) add "or § 600.28" after "§ 600.121".

bb. Section 600.200 is amended by revising paragraph (a) and by revising the reference "§ 600.122" in paragraph (b) to read "§ 600.29."

§ 600.200 Scope and applicability.

(a) This subpart establishes policies and procedures for the award and administration of cooperative agreements.

* * * * *

§ 600.203 [Amended]

cc. Section 600.203 is amended by revising "and 600.205" to read ", 600.102 and 600.410" wherever it appears.

§ 600.204 [Amended]

dd. Section 600.204(b)(4) is amended by revising "§ 600.122(d)" to read "§ 600.29."

ee. Section 600.205 is revised to read as follows:

§ 600.205 Application, funding, and administrative requirements.

Unless otherwise specified in this subpart or Subpart A of this part, the application, funding, and administrative requirements for cooperative agreements are specified in Subpart B of this part for recipients who are other than State, local, or Indian tribal governments and Subpart E of this part for State, local and Indian tribal governments. Furthermore, the audit requirements set forth in Subpart D of this part shall apply to cooperative agreements with State and local governments.

§ 600.206 [Amended]

ff. The introductory paragraph and paragraph (c) in § 600.206 are amended by adding "or § 600.424" after "§ 600.107" wherever it appears.

Subpart E—[Amended]

gg.-1 In newly added Subpart E, remove the terms "Part", "part", "Subpart" and "subpart" and insert "Subpart, "subpart", "Section", "section" respectively, wherever they appear.

§ 600.401 Scope of §§ 600.400 through 600.405.

gg-2 The heading for § 600.401 is revised to read as set forth above.

hh. In § 600.402, the definition of "prior approval" amended by adding paragraph (1) to read as follows:

500.402 Definitions.

* * * * *

"Prior approval" * * *

* * * * *

(1) For the Department of Energy this must be signed by a Contracting Officer.

ii. § 600.406 of Subpart E is amended by adding paragarph (d) to read as follows:

§ 600.406 Additions and Exceptions.

* * * * *

(d) The DOE procedural requirements for requesting additions and exceptions are specified in § 600.4.

jj. The cost principles chart in § 600.422 of Subpart E is amended by adding a second paragraph to "For-profit organization" in the "Use in principles in-" column and by adding a new entry for "Hospitals" to read as follows:

For the cost of—	Use the principles in—
* * *	* * *
For-profit organization other than a hospital and an organization named in OMB Circular A-122 as not subject to that circular.	48 CFR 931.2
Hospitals	45 CFR Part 74, Appendix E

ADDITIONAL SUPPLEMENTARY INFORMATION: The Small Business Administration is authorized to make

BEST COPY AVAILABLE

grants to State and local governments only in its 7(j) program, and is authorized to enter into cooperative agreements with State and local governments only in its Small Business Development Center (SBDC) program. At present there are no outstanding 7(j) grants to State governments and only one outstanding grant to a local government, with the city of Tuskegee, Alabama.

The SBA currently has SBDC cooperative agreements with five States, Illinois, Indiana, Ohio, North Dakota and West Virginia. However, SBA may not apply this regulation to those State SBDCs at this time. The Continuing Resolution on Appropriations for Fiscal Year 1988, Pub. L. No. 100–202, which passed on December 22, 1987, prohibits SBA from using appropriated funds to publish or implement regulations with respect to the SBDC program. Consequently, during Federal Fiscal Year (FY) 1988, all States which have entered into cooperative agreements with SBA to administer an SBDC are exempted from this regulation for purposes of the SBDC cooperative agreement. Also during FY 1988, any State or local government with which SBA might enter into an SBDC cooperative agreement is exempt from this regulation for purposes of the SBDC cooperative agreement.

List of Subjects in 13 CFR Part 143

Accounting, Administrative practice and procedure, Grant programs, Business Grants Administration, Insurance, Reporting and recordkeeping requirements, Small businesses.

Title 13 of the Code of Federal Regulations is amended by adding Part 143 as set forth at the end of this document.

Date: March 3, 1988.

James Abdnor,
Administrator.

PART 143–UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
143.1 Purpose and scope of this part.
143.2 Scope of subpart.
143.3 Definitions.
143.4 Applicability.
143.5 Effect on other issuances.
143.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

143.10 Forms for applying for grants.
143.11 State plans.
143.12 Special grant or subgrant conditions for "high risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

143.20 Standards for financial management systems.
143.21 Payment.
143.22 Allowable costs.
143.23 Period of availability of funds.
143.24 Matching or cost sharing.
143.25 Program income.
143.26 Non-Federal audit.

Changes, Property, and Subawards

143.30 Changes.
143.31 Real property.
143.32 Equipment.
143.33 Supplies.
143.34 Copyrights.
143.35 Subawards to debarred and suspended parties.
143.36 Procurement.
143.37 Subgrants.

Reports, Records Retention, and Enforcement

143.40 Monitoring and reporting program performance.
143.41 Financial reporting.
143.42 Retention and access requirements for records.
143.43 Enforcement.
143.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

143.50 Closeout.
143.51 Later disallowances and adjustments.
143.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 15 U.S.C. 634(b)(6).

BILLING CODE 8025-01-M

DEPARTMENT OF COMMERCE

15 CFR Part 24

[Docket No. 70502-8030]

FOR FURTHER INFORMATION CONTACT: Robert M. McNamara, 202–377–5617.

ADDITIONAL SUPPLEMENTARY INFORMATION: After publication of the proposed rule in Part IV, No. 110, Vol. 52 in the Federal Register, June 9, 1987, 52 FR 21825, 21848–21862, the Department of Commerce further reviewed the effects of the rule upon program activities under existing regulations and administrative practices. The amendments below reflect the Department's determination to clarify the intended impact of Part 24 upon such current activities.

Section 24.31(b) is amended by adding paragraph (b)(1), stating that Federal awarding agencies may require the recording of notices concerning real property acquired or improved with Federal grant assistance. The added paragraph is in support of the existing Department of Commerce practice, based upon existing regulations, of requiring the recording of notices of conditions applicable to grant acquired or improved property, for the benefit of persons who may not have actual knowledge of Federal use and disposition requirements applicable to the property.

Section 24.34 is revised by retitling and adding a paragraph to confirm that certain property assets which may be acquired with Department of Commerce grant program assistance are intended to be covered under the rule. For instance, the Economic Development Administration awards grants, under Title IX of the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3241–3245), to aid in the establishment of revolving loan funds. Loan notes given by borrowers to grantees in exchange for grant funds are held by the grantees as project assets. There may be uncertainty, under the law of some jurisdictions, as to whether such notes are considered tangible or intangible property, and § 24.34 is revised to eliminate any ambiguity as to that result.

The Department of Commerce interprets § 24.6(a) as authorizing the continued application of administrative requirements under pre-existing codified regulations published in the Federal Register (e.g., the requirement, at 15 CFR 2301.28, that national Telecommunications and Information Administration grantees execute and record a priority lien document on facilities purchased with the funds under the Public Telecommunications Facilities Program of the Communications Act of 1934, as amended).

List of Subjects in 15 CFR Part 24

Accounting, Grant programs, Grant administration, Insurance Reporting and recordkeeping requirements.

Sonya G. Stewart,
Director for Finance and Federal Assistance.

1. Title 15 of the Code of Federal Regulations is amended by adding part 24 as set forth at the end of this document.

PART 24—UNIFORM ADMINISTRATIVE REQUIREMENT FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
24.1 Purpose and scope of this part.
24.2 Scope of subpart.
24.3 Definitions.
24.4 Applicability.

Sec.
24.5 Effect on other issuances.
24.6 Additions and exceptions.

Subpart B—Pre-award Requirements

24.10 Form for applying for grants.
24.11 State plans.
24.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post Award Requirements

Financial Administration

24.20 Standards for financial management systems.
24.21 Payment.
24.22 Allowable costs.
24.23 Period of availability of funds.
24.24 Matching or cost sharing.
24.25 Program income.
24.26 Non-Federal audit.

Changes, Property, and Subawards

24.30 Changes.
24.31 Real property.
24.32 Equipment.
24.33 Supplies.
24.34 Other property.
24.35 Subawards to debarred and suspended parties.
24.36 Procurement.
24.37 Subgrants.

Reports, Records Retention, and Enforcement

24.40 Monitoring and reporting program performance.
24.41 Financial reporting.
24.42 Retention and access requirements for records.
24.43 Enforcement.
24.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

24.50 Closeout.
24.51 Later disallowances and adjustments.
24.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 5 U.S.C. 301.

2. Part 24 is further amended as follows:

(a) Section 24.31(b) is amended by adding paragraph (b)(1) as follows:

§ 24.31 Real property.

* * * * *

(b) * * *

(1) The Federal awarding agency may require the placing of appropriate notices of record to advise that property has been acquired or improved with Federal financial assistance, and that use and disposition conditions apply to the property.

* * * * *

(b) Section 24.34 is revised to read as follows:

§ 24.34 Other property.

(a) *Copyrights.* The Federal awarding agency reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish or otherwise use, and to authorize others to use, for Federal Government purposes:

(1) The copyright in any work developed under a grant, subgrant, or contract under a grant or subgrant; and

(2) Any rights of copyright to which a grantee, subgrantee, or a contractor purchases ownership with grant support.

(b) *Intangible property.* Title to such property as loans, notes, and other debt instruments (whether considered tangible or intangible) acquired under a grant or subgrant will vest upon acquisition in the grantee or subgrantee respectively. Such property will be used for the originally authorized purpose as long as needed for that purpose, and the grantee or subgrantee shall not dispose of or encumber its title or other interests. When no longer needed for the originally authorized purpose, disposition of such property will be made as provided in § 24.32(e).

BILLING CODE 3510-FE-M

DEPARTMENT OF STATE

22 CFR Part 135

[108.869]

FOR FURTHER INFORMATION CONTACT: James Tyckoski, Office of the Procurement Executive, Room 227, SA–6, U.S. Department of State, Washington, DC 20520. Tel. (703) 875–7044.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of State establishes this final rule as Part 135 of Title 22 of the Code of Federal Regulations.

The Department's notice of proposed rulemaking for this regulation (52 FR 21825, June 9, 1987) included the following statement.

> The Department has one program that uses cooperative agreements, but these agreements are outside the meaning of "grants," which includes "cooperative agreements," as defined in the common rule.
>
> The Department's Bureau for Refugee Programs may effect grants or cooperative agreements with state or local governments for the initial reception and placement of refugees under the authority of section 412(b) of the Immigration and Nationality Act, as amended (8 U.S.C. 1522(b)). Reception and placement cooperative agreements under this program are not subject to the proposed regulations because they are lump sum awards. The funds are not awarded to reimburse specific costs for which the recipient is required to account. Rather, subject to certain restrictions, the recipient has wide latitude in spending its money, provided that it provides the required services or ensures that those services are provided.

The Department did not receive any comments relative to this statement.

List of Subjects in 22 CFR Part 135

Administrative practice and procedure, Grant programs, Grants administration, Reporting and recordkeeping requirements.

Title 22 of the Code of Federal Regulations is amended by adding Part 135 as set forth at the end of this document.

John J. Conway,
Procurement Executive.

Subpart E—Entitlements [Reserved]

Authority: 22 U.S.C. 2858.

BILLING CODE 4710-24-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 44, 85, 111, 511, 570, 571, 575, 590, 850, 882, 905, 941, 968, 970, and 990

[Docket No. R-88-1338; FR-2178]

FOR FURTHER INFORMATION CONTACT: Edward L. Girovasi, Jr., Director, Policy and Evaluation Division, Office of Procurement and Contracts, Department of Housing and Urban Development, Room 5260, 451 Seventh Street, SW., Washington, DC 20410. Telephone (202) 755-5294. (This is not a toll-free number.)

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department has determined that the following HUD programs with codified regulations are affected by the adoption of this rule implementing OMB Circular A-102 as a new Part 85:

1. Fair Housing Assistance Program (24 CFR Part 111);
2. Rental Rehabilitation Grant Program (24 CFR Part 511);
3. Programs Authorized under Title I of the Housing and Community Development Act of 1974 and codified at 24 CFR Part 570 (Entitlement Grants, the Secretary's Fund, the HUD-Administered Small Cities Program, Urban Development Action Grants, and Loan Guarantees) but not including the State's Program;
4. Community Development Block Grant Program for Indian Tribes and Alaskan Native Villages (24 CFR Part 571);
5. Emergency Shelter Grant Program (24 CFR Part 575);
6. Housing Development Grant Program (24 CFR Part 850);
7. Indian Housing (24 CFR Part 905);
8. Public Housing Development Program (24 CFR 941);
9. Comprehensive Improvement Assistance Program (24 CFR Part 968); and
10. Annual Contributions for Operating Subsidies for Public Housing Projects (24 CFR Part 990).

These HUD program regulations are being revised by this final rule to cross reference to the requirements for State, local, and federally recognized Indian tribal governments under OMB Circular A-102, as set out in the new Part 85. These revisions serve two purposes: First, they afford grantees a ready reference to the existence and applicability of A-102 requirements set out in Part 85, and the relevance of those requirement to the particular grant program in which the cross reference appears. Second, where the requirements of A-102 (as set out in Part 85) are wholly or partially inapplicable, the cross reference in the program regulation specifies the effect of the new rulemaking on the existing grant program.

Note: Section 85.43, Enforcement, permits HUD to use any other remedies allowed by law and, therefore would not conflict with HUD's right, for example, to declare a substantial breach or default under an Annual Contributions Contract.

Exemptions and Substantive Revisions

Urban Homesteading Program

The Urban Homesteading Program (24 CFR Part 590) is not subject to Part 85. The purpose of the Urban Homesteading Program is to use existing housing stock to provide homeownership. HUD transfers federally owned properties without payment to local urban homesteading agencies and the local agencies administer a program to provide the properties to "homesteaders" at nominal cost. The properties passed through local agencies to homesteaders are not provided as "grants" to local government. The local government agency serves merely as the facilitator of a program aimed at benefitting qualified candidates for homeownership. A technical change is being made to Part 590 to remove an existing reference to OMB Circular A-102, even though Standard Form 424 is used in the program.

Section 8 Program

The several Section 8 housing assistance payments programs also remain outside the scope of A-102 and Part 85 and HUD will continue separately regulating financial management associated with the Section 8 program as part of 24 CFR Chapter VIII.

The Section 8 Existing, Moderate Rehabilitation, and Housing Voucher programs are exempted from Part 85. Under these programs, housing assistance payments are made to private owners for the purpose of subsidizing rental charges for lower income families occupying privately owned housing units. Public Housing Agencies administer these funds and assist lower income families in locating suitable housing under these programs, but the public agency essentially acts as a conduit for Federal financial assistance to the private owners.

Similarly, Section 8 assistance under the New Construction and Substantial Rehabilitation Programs is made available to owners of dwelling units that have been constructed or rehabilitated for lease to lower income families. Among the owners are profit-motivated and non-profit owners, including PHAs, the majority of which are the so-called "agency or instrumentality PHA's established under State not-for-profit laws for the purpose of owning and leasing the projects to their "parent entity PHAs" for subleasing to eligible lower income families. Less than 10 percent of Section 8 New Construction and Substantial Rehabilitation projects are owned outright by housing authorities. The great majority of the projects are privately owned. The duties and responsibilities of PHA Owners receiving housing assistance payments for eligible lower income families under the Section 8 New Construction and Substantial Rehabilitation programs do not differ from those of a private owner participating in this same program. In all cases, the assistance is being provided to lower income families; the owner is merely the conduit for the Federal financial assistance.

Accordingly, these programs are not appropriate for management under the uniform requirements of Part 85, and HUD will to continue its existing administrative requirements with reference to 24 CFR Parts 880 through 886 (HUD's program regulations governing the Section 8 program) and Part 887 (HUD's pending final regulations to govern the Housing Voucher program). This rule, nonetheless, makes a technical correction to Part 882 to remove reference to audit requirements under OMB Circular A-102 and to instead refer to the audit requirements of Part 44.

Grant Programs in General

Subpart B—Pre-award Requirements—does not apply to the Community Development Block Grant Entitlement program (24 CFR Part 570, Subpart D) or to the Rental Rehabilitation program (24 CFR Part 511) because § 85.10 (Forms for applying for grants) does not apply to formula grant programs, and § 85.11 (State plans) is inapplicable when the program statute does not require State plans. In this connection, § 85.10 does not apply to the Emergency Shelter Grant program (24 CFR Part 575) because it also is a formula grant program. Additional revisions to Parts 511, 570, and 575 are discussed below.

Rental Rehabilitation Program

Section 85.40(b)(1), regarding the submission of annual performance reports, does not apply to the Rental Rehabilitation Program (24 CFR Part 511). Section 17(m) of the Rental Rehabilitation Program statute (42 U.S.C. 1437o) requires that the annual report be submitted prior to the end of the fiscal year and provides for specific information to be included. The regulations at 24 CFR Part 511 already sufficiently implement Section 17(m).

Since the Rental Rehabilitation Program currently involves no property acquisition, § 85.31 (Real property) is inapplicable by its own terms. However, for clarity, we are specifying the inapplicability of § 85.31 to the Rental Rehabilitation Program.

With respect to program income under § 85.25, we have elected to draft a new § 511.76 *Program income* to provide specific regulatory direction consistent with the basic thrust of the common rule, but in the special context of the Rental Rehabilitation Program.

We note that although § 85.43 is applicable to the Rental Rehabilitation Program, the program regulation at § 511.82, which is statutorily based, would not be superseded but rather would provide "other remedies that may be legally available" as indicated in § 85.43(a)(5).

Community Development Block Grant (CDBG) Entitlement Program

Grant administration requirements for the CDBG Entitlement Program are described in 24 CFR Part 570 at Subpart J, "Grant Administration." The subpart has been substantially revised for clarity and for consistency with Parts 85. The sections in existing Subpart J set forth the requirements of the various attachments to A-102, as well as other grant administration requirements. Subpart J, as revised, generally consolidates the applicable sections of Part 85 into one section (§ 570.502), execises some of the options provided to the Federal agencies in Part 85, and sets forth CDBG statutory requirements.

The requirements of Part 85 have been made applicable, except to the extent differences are required by Title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301-5320) ("the HCD Act of '74") or have been authorized by the Office of Management and Budget (OMB). These differences are explained below, as are the reasons why certain provisions in Part 85 are not identified as been applicable to the CDBG program.

—The payment provisions in § 85.21 (Payment requirements) apply to the program except with respect to payments made for financing property rehabilitation activities. Section 104(g) of the HCD Act of '74 permits lump sum draws from the grantee's letter of credit to finance property rehabilitation activities. Section 570.513 of Subpart J implements this statutory requirement.

—Section 104(i) of the HCD Act of '74 permits grantees to retain any program income realized from the CDBG grant, if such income is used for eligible community development activities in accordance with program requirements. Therefore, the CDBG rules on program income reflect the "Addition" alternative for the use of program income described at § 85.25(g)(2).

—Sections 105(a) (1) and (7) of the HCD Act of '74 make the provisions at § 85.25(f) and § 85.31 on disposition of real property inapplicable to the CDBG program. These sections of the HCD Act of '74 make eligible for CDBG assistance both the acquisition and disposition "through sale, lease donation or otherwise" of real property for community development. Consequently, the sale of real property is itself an authorized use of property acquired with grant funds, rather than a disposition of property no longer needed for the grant purpose. Such properties are commonly sold by the grantee for redevelopment and the sale proceeds are appropriately treated as program income subject to the statutory provisions of the program that income may be retained by the grantee, in which case it must be used in accordance with the same requirements applicable to the use of grant funds. Accordingly, proceeds from the disposition of real property are included in the examples of program income listed in the definition of that term at § 570.500(a), and the treatment of real property acquired with CDBG funds is governed by the requirements at § 570.505.

—Section 104(d) of the HCD Act of '74 requires that each grantee submit a performance and evaluation report and describes the content of the report. This report, which is submitted annually, substitutes for the performance reports described at §§ 85.40 (b), (c), (d), and (f) and 85.41 (a), (b), and (c). The contents and timing of the statutorily required report are discussed at § 570.507.

—Section 105(a)(2)(D) of the HCD Act of '74 requires grantees to provide citizens with reasonable access to records regarding the past use of CDBG funds received by the grantee. This section provides the basis for the requirement at § 570.508 on public access to program records, and affects the implementation of § 85.42(f), "Restrictions on public access."

—Sections 104(d) and 111 of the HCD Act of '74 set forth sanction mechanisms for handling performance and compliance problems. These sections are implemented by §§ 570.910-570.913 of the CDBG regulations. It is the Department's position that the enforcement mechanisms in those regulatory sections are not superseded by the enforcement provisions in § 85.43 (Enforcement).

The applicability to the CDBG program of the various sections of Part 85 is described in § 570.502. The provisions not shown as being applicable fall into one or another of several categories:

—Four sections are inapplicable because they do not contain requirements applicable to grantees or subgrantees. These are §§ 85.1 (Purpose and scope of this part), 85.2 (Scope of subpart), 85.4 (Applicability), and 85.5 (Effect on other issuances).

—Five sections are inapplicable because, by their own terms, they do not apply to the CDBG entitlement program. Section 85.10 (Forms for applying for grants) does not apply "to formula grant programs which do not require applicants to apply for funds on a project basis." Section 85.11 (State plans) applies to programs that "require States to submit plans before receiving grants." Section 85.23 (Period of availability of funds) applies "where a funding period is specified." Section 85.24 (Matching or cost sharing) applies only where a program has matching or cost-sharing requirements. Section 85.30 (Changes under discretionary (project) awards) does not apply to formula award programs. None of the conditions which would trigger these requirements is present in the CDBG entitlement program.

—Certain provisions in Part 85 are inapplicable because they apply only to State grantees. States are not eligible applicants for CDBG Entitlement Program grants. These provisions are at §§ 85.20(a), 85.32(b), and 85.36(a).

—Certain other provisions in Part 85 are inapplicable because, as explained above, they are inconsistent with statutory requirements. These provisions are § 85.31 (Real Property) and the performance report provisions in §§ 85.40 (b), (c), (d), and (f) and in 85.41 (a), (b), and (e).

—Two sections of Part 85 are inapplicable because their provisions are covered in sections of the CDBG rule specifically tailored to the nature of the CDBG entitlement program. Rather than cross-referencing § 85.25 (Program income) and § 85.50 (Closeouts), program income provisions are covered in §§ 570.500(a) and 570.504 and closeout provisions are covered in § 570.509. Covering program income in Subpart J allows the Department to indicate which options permitted under § 85.25 it has chosen for the CDBG program. For example, the Department has chosen to permit costs incident to the generation of income to be deducted from gross income to determine program income. (This choice is permitted under § 85.25(c).) Covering program income in Subpart J also provides a forum for stating that proceeds from the disposition of real property and equipment are treated as program income in the CDBG program (for the reasons explained elsewhere in this preamble) and for providing additional examples of the types of income received under the CDBG program that fall within the definition of program income. Similarly, covering the subject of closeouts in Subpart J allows the Department to adjust the closeout provisions in Part 85 to fit the nature of the CDBG entitlement program. For example, § 85.50(a) states, "The Federal agency will close out the award when it determines that all applicable administrative actions and all required work of the grant has been completed." However, this description of when closeout shall occur does not fit the entitilement program because there is no process by which "required work" is specified. Also, the closeout provisions in Part 85 do not cover two items of major importance to the CDBG program—the future use of real property acquired with grant funds and the future use of program income.

—One provision of Part 85, § 85.32(e) on disposition of equipment, is not shown as applicable based on an exception authorized by the Office of Management and Budget. This provision reuires the proceeds from the sale of equipment with a fair market value in excess of $5,000 to be returned to the awarding agency. Sales proceeds remitted to HUD by a CDBG recipient whose program is still active would be treated as a return of grant funds and made available for disbursement (e.g., under the recipient's letter of credit). Since the amount of proceeds from the sale of equipment purchased with CDBG funds is relatively small in most cases, requiring such proceeds to returned would be burdensome both to HUD and to the recipient. Further, the typical CDBG entitlement recipient retains its entitlement status so long as funding for the CDBG program is continued and, thus, its program remains active. Consequently, proceeds from the sale of equipment are handled as program income.

The Office of Management and Budget has also authorized the addition of two grant administration requirements for the CDBG program which are not contained in Part 85:

—Section 570.503, "Agreements with subrecipients", has been added because of the need for improved control by grantees over the thousands of subrecipients receiving CDBG funds, as evidenced by reports issued by the Department's Office of the Inspector General. This area has been identified as one of high vulnerability to fraud, waste and mismanagement.

—Section 570.509(c), "Closeout agreement", has been added to facilitate the closeout process and to cover grantee responsibilities after closeout for items such as the future use of real property and program income and continued enforcement of flood insurance coverage.

Urban Development Action Grants

Urban Development Action Grants (UDAGs) are authorized under section 119 of the Housing and Community Development Act of 1974 (42 U.S.C. 5318). Regulations governing the UDAG program are provided in 24 CFR Part 570, Subpart G, and Subparts A, C, J, K, and O except to the extent that they are modified or augmented by Subpart G. As noted above, Subpart J, "Grant Administration", is being amended to implement the requirements of Part 85. The UDAG program follows the provisions of Part 85 as set forth in Subpart J.

The reasons for nonapplicability of some provisions of Part 85 to the Community Development Block Grant program (which is the primary program to which Subpart J is geared) hold true for the nonapplicability to the UDAG program, with a few exceptions:

—Section 85.10 (Forms for applying for grants) has not been made applicable to the UDAG program. Instead, OMB has approved the requirements for application forms and instructions set forth in § 570.458. Section 85.10 specifically permits the Federal agency to prescribe application forms and instructions approved by OMB.

—Section 85.25 (Program income) has not been made applicable because the definition and use of program income is specified by the UDAG grant agreement and program regulations. The definition used for the UDAG program is tailored to the program and is consistent with the definition in § 85.25.

—Section 85.30 (Changes under discretionary (project) awards) has not been made applicable. OMB has approved the requirements for amendments set forth in the UDAG regulations at § 570.463. This regulation is tailored to the UDAG program (consistent with § 85.30) and is needed to assure that the changes to the UDAG project are not such that the project would not have been funded if the changes had been part of the original project.

The provisions of § 85.43 are applicable to the UDAG program. However, that section's applicability does not affect the program regulations at §§ 570.910–570.913, which implement statutory remedies for performance and compliance problems.

CDBG Indian Program

Section 571.502(e) is being revised to cross reference the procurement requirements of § 85.36. This provision is also being amended to provide alternative requirements in the event that compliance with the bonding requirements set forth in § 85.36(h) is infeasible or incompatible with the Indian preference requirements set forth in § 571.503. The Department has found alternative arrangements to be necessary because Indian contractors whose businesses are located on tribal land may be unable to secure performance and other bonds. These Indian contractors may be unable to satisfy the security arrangements to sureties because of the trust status of Indian land. This situation may make adequate competition impracticable and makes it difficult for grantees to comply with statutory Indian preference requirements.

Emergency Shelter Grant Program

Program requirements for the Emergency Shelter Grants (ESG) Program are described in 24 CFR Part 575 at Subpart E and grant administration requirements at Subpart F. Both Subparts have been revised to be consistent with the common regulations, as codified at 24 CFR Part 85, except to the extent differences are

authorized by statute or by the Office Management and Budget. These provisions are explained below:

—Section 85.10 (Forms for applying for grants) does not apply because the ESG program is a formula grant program.

—The payment provisions described in § 85.21 provide for working capital if: (1) The grantee or subgrantee cannot establish procedures required under the advance payment method that will minimize the time elapsing between the transfer of funds from the U.S. Treasury and disbursement by the grantee or subgrantee and (2) the awarding agency determines that reimbursement is not feasible because the grantee or subgrantee lacks sufficient working capital. The ESG program requirements in § 575.63 allow for "a working capital advance for 30 days' cash needs or an advance of $5,000, whichever is greater", without any such conditions. This provision was included because of the presumption that most of the shelter grant funds would be flowing through grantees to small non-profit recipients which would not be able to meet either of the above-cited conditions in § 85.21, thereby avoiding the unnecessary step of determining this to be the case in every situation. This presumption has been borne out during the first year of the program's operation.

—The matching or cost sharing provisions in § 85.24(a)(1) refer to satisfying the matching requirement through "allowance costs". The ESG statute (Pub. L. 99–500, section 101(g)), however, contains broader language:

> **Responsibilities of Grantees**
>
> (a) Matching Amounts.—
>
> (1) Each grantee under this part shall be required to supplement the assistance provided under this part with an equal amount of funds from sources other than this part. Each grantee shall certify to the Secretary its compliance with this paragraph, and shall include with such certification a description of the sources and amounts of such supplemental funds.
>
> (2) In calculating the amount of supplemental funds provided by a grantee under this part, a grantee may include the value of any donated material or building, the value of any lease on a building, any salary paid to staff to carry out the program of the grantee, and the value of the time and service contributed by volunteers to carry out the program of the grantee at a rate determined by the Secretary.

Program regulations (§ 575.51) therefore allow any funds spent as part of the grantee's homeless program, whether or not such expenditures are allowable costs under ESG, to be counted as satisfying the matching requirements.

—The valuation of volunteer services described in § 85.24(c)(1) is set "at rates consistent with those ordinarily paid for similar work in the grantee's organization." However, the legislative history of ESG established the rate at $5 per hour and it is this rate which is reflected in the program regulations (§ 575.51(b)).

—Requirements for the contents and the timing of the submission of performance reports described in § 85.40(b)–(d) and (f) have not been made applicable. The ESG program regulations (§ 575.65(b)(2)) specify report contents and require the submission of annual reports for the period through December 31 "no later than 30 days after December 31." Given the emergency nature of the program, the streamlined program requirements,, the modest size of the grants, the intense Congressional and public interest in the way program funds are being used, and the vital role such reports will play in HUD's monitoring of grantee performance, the simplicity and brevity of the reporting format and a 30- rather than 90-day deadline seem to be not only justified but also necessary to the effective and expeditious operation of the program.

The remedies in § 85.43 have been made applicable to the ESG program. However, the remedies set forth in § 575.69 are not superseded, but are "other remedies that may be legally available" in accordance with § 85.43(a)(5).

Housing Development Grant Program

Housing Development Grants (HDG) are authorized under section 17 of the U.S. Housing Act of 1937, 42 U.S.C. 1437o ("1937 Act"). Regulations regarding the HDG program are provided at 24 CFR Part 850. Certain provisions of Part 85 are inconsistent with Federal statutory and regulatory requirements governing the HDG program. The following sections are not applicable to the HDG program for the reasons stated:

—Section 85.23 (Period of availability of funds) is not applicable because a funding period is not specified for the HDG program.

—Section 85.24 (Matching) does not apply because no matching is required for the HDG program.

—Section 85.25 (Program income) has not been made applicable to the program. Instead, HUD has exercised the options afforded to the Federal agency in § 85.25 and has tailored program income requirements to the HDG program. These requirements (including the definition and use) are specified in the HDG regulations and grant agreement. These program requirements are based in part on section 17(d)(7) of the 1937 Act and in part on the requirement of § 85.25 to the extent not inconsistent with statutory requirements.

—Section 85.30 has not been made applicable because the requirements for amendments are set forth in the HDG regulations at § 850.31(e). HDG regulations do not permit any increase in the grant amount and require HUD prior approval of any changes in costs in excess of ten percent of those orginally approved. This is in keeping with section 17(d)(5)(E) of the 1937 Act which requires that project selections be made which will bring the least cost to the Federal Government.

—Section 85.31(c) (Real Property) covering real property disposition is not applicable. HUD retains no interest after the project term (as defined in the grant agreement) in property acquired with HDG funds, and HUD would receive no payment upon disposition. The disposition during the project term of HDG acquired property is governed by the grant agreement, consistent with the 1937 Act.

—Sections 85.40 (b)–(d) and (f) (Monitoring and reporting program performance) covering reports, do not apply. These provisions of § 85.40 are inconsistent with HDG reporting requirements that are specified in section 17(m) of the 1937 Act and program regulation at § 850.75.

—Section 85.50 (Closeout) has not been made applicable to the HDG program. Instead, the HDG regulation at § 850.79, which is consistent with § 85.50 and which is written to fit more closely the HDG program, sets forth the closeout requirements and procedures.

We note that although § 85.43 (Enforcement) has been made applicable to the HDG program, the sanctions in that section are in addition to the enforcement provisions in section 17(d)(7) of the 1937 Act and in implementing regulations in §§ 850.63, 850.103, 850.105, 850.107, 850.151, and 850.155.

In addition, the Department wishes to clarify the coverage of § 85.36 (Procurement) as it relates to the HDG program. The grantee's selection of the project owner is not subject to the requirements of § 85.36 because it is not a procurement of property or services.

The project owner is not required to follow the requirements of § 85.36 because § 85.4 indicates that Part 85 applies only to State, local, and Indian tribal governments.

Public Housing

HUD previously took the position that annual contributions for public housing development and modernization were not subject to Circular A–102 requirements because the Federal assistance to public housing agencies (PHAs) was in the form of loans and loan guarantee commitments made by HUD. The Department's current method of funding public housing development and modernization by means of capital grants (as opposed to loans, as in the past) has the effect of subjecting public housing development and modernization funding to A–102 requirements. Public housing operating subsidies are administered as grants and therefore are also appropriate for A–102 grant management treatment.

In order to avoid the problem of maintaining a separate set of procedures for those few PHAs which are state agencies, the definition of "state" in § 85.3 has been revised to except PHAs from the definition, and the definition of "local government" has been revised to include specifically any PHA—State or local—under the U.S. Housing Act of 1937. These changes are necessary so that there is a consistency of treatment for all PHAs.

The standards for financial management systems contained in § 85.20, and for monitoring and reporting in § 85.41 are currently encompassed within the requirements of the Annual Contributions Contracts (ACCs) executed between HUD and each local public agency and further defined in the *Low-Rent Accounting Handbook*, HM 7510.1, and *Audits of Public Housing Agencies (PHAs) and Indian Housing Authorities (IHAs) by Independent Public Accountants (IPAs)*, 7476.1, CHG–5. These requirements are applicable to the development, operation, and modernization phases of the public housing program. Section 85.6 precludes Federal agencies from imposing additional administrative requirements except in codified regulations published in the **Federal Register**. While the principles and standards prescribed in Handbook 7510.1, which is not codified, are basically compatible with the requirements in §§ 85.20, 85.40 and 85.41, certain requirements for detailed information necessary for proper program management exceed the limited information which would be provided by completing the forms included in Circular A–102. Departmental financial management and record requirements, however, do not exceed the statutory standard established by HUD as directed by Congress in Section 814 of the Housing Act of 1954, which required local agencies to adhere to accounting and record keeping requirements prescribed by HUD. Also, because of the financial magnitude of the development, operation, and modernization phases of the public housing program, it is necessary that the Department retain a number of provisions in addition to Part 85 and that the three phases be able to utilize and rely upon the same accounting data. HUD's financial management monitoring and reporting regulations for PHA-owned rental units are added by this rule as a new paragraph (c) to 24 CFR 990.103, and as a new Subpart B for those public housing programs other than PHA-owned.

While HUD's financial reporting requirements are compatible with those in § 85.41, the Financial Management Handbook, 7475.1, was recently revised to increase the submission time for year-end financial statements from 30 to 45 days. Section 85.41(b)(4) states that annual reports will be due 90 days after year end. However, because of § 85.41(a)(3), which directs grantees to follow all applicable Federal agency instructions approved by OMB under the Paperwork Reduction Act of 1980, we have determined that HUD is not bound by § 85.41(b)(4), and the revised handbook should be followed regarding the year-end submission time.

There is one determination regarding public housing management that we wish to emphasize. Section 85.25 (Program income) provides that program income does not include interest on grant funds and, thus, might be interpreted to mean that the Department can no longer offset interest income against subsidy amounts. However, under the public housing program management phase (including modernization), interest income is treated the same as other program income in the determination of operating subsidy eligibility. Because the calculation of operating subsidy is part of the operating budget that is set from the beginning, the public housing program management phase will not be affected by the stated provisions in § 85.25 of this rule, and 24 CFR 990.109(e)(3) is being revised by this rule to reflect this variation from A–102 requirements.

In further connection with the treatment of A–102 as it impacts on public housing development and modernization, the Department has made another determination. In HUD's public housing development and modernization regulations (24 CFR Parts 941 and 968, respectively and including Part 905), alternative means are provided for the provision of bonding or other security for the performance of construction or equipment contractors beyond the single bonding procedure set out in § 85.36(h)(2). Section 85.36(h) (Procurement—Bonding requirements) requires a 100% performance or payment bond for contracts exceeding $100,000. In contrast, HUD's rules (e.g., 24 CFR 968.12(c)) provide for a variety of alternatives. While 100% bonds are among these, in 24 CFR 968.12(c) HUD allows for separate performance and payment bonds, each for 50 percent or more of the contract price, or for a 20 percent cash escrow, or for a 25 percent letter of credit. These HUD rules are intended to promote greater opportunity for participation in construction and equipment contracting by small or minority or women-owned firms, and the Department's experience with these requirements has been a successful one. Accordingly, 24 CFR 968.12(c) is being revised by this rule to continue HUD's existing rules on bonding, notwithstanding the general applicability of 24 CFR Part 85 to these programs. Also, 24 CFR 905.203 (b)(c) and (d)(2) require a 100 percent performance and payment bond or other security as may be acceptable, and 24 CFR 941.102(a) requires a 100 percent performance and payment bond or other assurances approved by the field office. These sections also are being revised to continue HUD's existing rules on bonding, notwithstanding Part 85.

Currently, the Comprehensive Improvement Assistance Program (CIAP) allows PHAs to execute architect/engineer contracts, invite bids, and issue change orders (contract modifications) without prior Field Office approval where the PHA certifies in writing that all HUD requirements have been met. However, based on an assessment of PHA past performance in modernization and PHA technical capability, Field Offices may establish dollar thresholds for PHAs in these three areas, over which the PHA is required to submit documents for prior HUD review and approval. (Recognized performers, as defined under the Decontrol Handbook, are allowed to certify in all cases.) To retain this incentive for PHAs to improve their performance and to ensure that the "scope or objective of the project" is not revised without prior HUD approval (see

§ 85.30(d)), changes are being made to §§ 968.12 (d), (e), and (g).

In this connection, changes are also being made to §§ 905.211(b) and 968.12(f), and a new paragraph (g) is added to § 941.208, to preserve the authority under these programs for prior HUD approval of the grantee's decision to award a contract. Under the public housing program, the Federal involvement is a long-term financial commitment—not a single purpose activity. HUD provides funds to pay the capital costs of developing new projects and later provides additional funds for the modernization and operation of these same projects. The quality of design and construction has a direct impact on funding for modernization and operations.

Another specific area of Part 85 that requires further discussion is the treatment of "high-risk" recipients under § 85.12 (Special grant or subgrant conditions for "high-risk" grantees). Section 85.12 sets forth special grant or subgrant conditions for "high-risk" recipients. The Department wishes to stress that this section is not being interpreted by HUD as allowing the setting of special conditions *only* for high-risk recipients. Other recipients who are not high-risk may have special conditions or restrictions imposed on them by HUD in appropriate cases. In response to public concern that agency discretion to set special conditions on grants or subgrants be limited to restrictions intended by Congress, § 85.12 is governed by paragraph 6g of the revised OMB Circular A–102, which requires agencies to keep records of all situations in which the high-risk provision of § 85.12 is used.

Part 85 makes cross-references to OMB Circular A–87 at § 85.22(b) to identify applicable cost principles. However, below are listed two of the provisions of OMB Circular A–87 which we believe require specific discussion.

1. Attachment B, Part B—Allowable Costs

—Provision (11) permits PHAs to depreciate the cost of buildings and equipment. However, the Department's accounting system does not provide for depreciation of capital assets. For the most part, PHA's capital assets are funded separately from operations through development and CIAP grants. It would be inaccurate to distort the results of the operations phase of the public housing program by including depreciation expenses for assets for which there is separate funding mechanism.

2. Attachment B, Part D—Unallowable Costs

We construe this provision as not affecting the write-off of uncollected rental charges. The very purpose of the public housing programs is to provide assistance to those who cannot pay their rent. For this reason, after PHAs/IHAs have made reasonable efforts to collect unpaid rental charges from former tenants, a resolution of the Board of Commissioners is passed to write off the receivables. In order to accomplish the write-off, a charge is made against the grant, in that an expense is reflected in the PHA/IHA accounting records. In the Public Housing Program and the Indian Housing Program, rents *charged* to tenants are accounted as income and to the extent they are not collected, as "receivables," and are a positive amount in the PHA/IHA operating reserve. Such receivables must be "written-off" in accordance with the existing financial management system in order to avoid creating a false picture of the PHA/IHA financial situation.

Additional Technical Corrections and Accommodations

Technical corrections and accommodations are being made throughout Parts 44, 111, 570, 571, 850, 905, and 968 to cross-reference to the new Part 85 and to make necessary technical changes in compliance with the new Part 85. Technical corrections are also being made in Parts 882, 905, and 968 to cross-reference to Part 44, which treats requirements under the Single Audit Act. An exception clause is added to Part 970, Demolition and Disposition of Public Housing Projects, because that part is statutorily based and, therefore, overrides inconsistent part 85 requirements (e.g., § 85.31(c)).

Responses to HUD-Specific Public Comments

Public comments focused on HUD concerns were received from four commenters: a local housing development agency, a minority contractors' association, a community and economic development agency, and the National Association of Housing and Redevelopment Officials. Most of the comments pertained to technical understanding of the application of the rule and have been addressed in the preamble to the common rule and elsewhere in this HUD-specific preamble.

A concern was raised that grantees and subgrantees may have to comply with the new requirement, *as well as* with old policies. In compliance with the common rule, all grant administration provisions in HUD program regulations which are inconsistent with this final rule are rescinded, except to the extent they are required by statute or have been approved as deviations by OMB as discussed in this preamble. All grant administration provisions of uncodified program manuals, handbooks, and other materials which are inconsistent with this final rule are superseded.

The Department received two comments concerning the prohibition in the procurement provision (§ 85.36(c)(2)) against the use of statutorily imposed in-state on local geographic preferences in the evaluation of bids or proposals. The regulation provides an exception in those cases where applicable Federal statutes expressly mandate or encourage geographic preferences.

One commenter opposed the prohibition on the basis that it would have an adverse impact on the planning process for State and local governments in regard to grantee selection. The Department believes that this prohibition will have no effect on grantee selection, because grantees are not required to be selected in accordance with § 85.36.

The other commenter strongly objected to the geographic preference prohibition, characterizing it as a sweeping change which should be studied first and which could prove damaging to a city's economic development efforts. The commenter was particularly concerned about the effects on participation of local firms, contractors, and employees in projects funded under the Urban Development Action Grant (UDAG) and Community Development Block Grant (CDBG) programs. The commenter pointed out that the so-called "Section 3 Clause" (i.e., section 3 of the Housing and Urban Development Act of 1968) would provide a basis for geographic preference, but that the geographic area would be the metropolitan area, not the city.

The Department believes that the prohibition in §85.36(c)(2) does not constitute a change from the procurement requirements that are in OMB Circular A–102, Attachment O. Although Attachment O does not specifically prohibit geographic preferences, such preferences are inconsistent with the requirement, stated in Attachement O, of maximum open and free competition.

Even though the prohibition applies to procurement by grantees and subgrantees, the prohibition will not have the consequences envisioned by the commenter. The prohibition will not affect community development activities (i.e., providing assistance to for-profits to carry out economic development projects) under the UDAG and CDBG programs. This is because the procurement requirements do not apply to the selection of the UDAG developer, and the developer does not have to follow the requirements of Part 85, because it is not a subgrantee. In addition, a private for-profit entity receiving CDBG assistance (permitted in 24 CFR 570.203) is not required to be selected in accordance with § 85.36, and such an entity does not have to follow the requirements of Part 85 because it is not a subgrantee.

The Department agrees with the commenter that section 3 of the Housing and Urban Development Act of 1968 is a Federal statute expressly encouraging geographic preference and that the geographic preference is for the metropolitan area. Section 3, implemented for the CDBG and UDAG programs in 24 CFR 570.607, requires that to the greatest extent feasible opportunities for contracts for work in connection with CDBG or UDAG projects be awarded to eligible business concerns which are located in, or owned in substantial part by persons residing in, the same metropolitan area as the project.

Other Matters

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours at the Office of the Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

This rule is listed as item number 1052 in the Department's Semiannual Agenda of Regulations published on October 26, 1987 (52 FR 40358) under Executive Order 12291 and the Regulatory Agenda.

The Catalog of Federal Domestic Assistance program numbers affected by this rule are 14.174, 14.218, 14.219, 14.221, 14.223, 14.225, 14.227, 14.230, 14.231, 14.401, 14.850, and 14.852.

List of Subjects

24 CFR Part 44

Audit requirements: Non-federal governmental entities, Reporting and recordkeeping requirements.

24 CFR Part 85

Grant administration, State and local governments, Cooperative agreements.

24 CFR Part 111

Fair housing, Cooperative agreements, Grant programs: housing and community development.

24 CFR Part 511

Rental Rehabilitation grants, Administrative practice and procedure, Grant programs: housing and community development, Low and moderate income housing, Reporting and recordkeeping requirements.

24 CFR Part 570

Community development block grants, Grant programs: housing and community development, Loan programs: Housing and community development, Low and moderate income housing, New communities, Pockets of poverty, Small cities.

24 CFR Part 571

Community development block grants, Grant programs: housing and community development, Grant programs: Indians, Indians.

24 CFR Part 575

Grant programs: Housing and community development, Emergency shelter grants, Reporting and recordkeeping requirements.

24 CFR Part 590

Government property, Homesteading, Housing, Intergovernmental relations, Loan programs: housing and community development.

24 CFR Part 850

Grant programs: Housing and commmunity development, Relocation assistance, Rental housing, Low and moderate income housing, Cooperatives.

24 CFR Part 882

Grant programs: Housing and community development, Housing, Mobile homes, Rent subsidies, Low and moderate income housing.

24 CFR Part 905

Grant programs: Housing and community development, Grant programs: Indians, Indians, Loan programs: Indians, Low and moderate income housing, Public housing, Homeownership.

24 CFR Part 941

Loan programs: Housing and community development, Public housing, Prototype costs, Cooperative agreements, Turnkey.

24 CFR Part 968

Loan programs: Housing and community development, Public housing, Reporting and recordkeeping requirements, Grant programs: Housing and community development, Indians.

24 CFR Part 970

Public housing.

24 CFR Part 990

Grant programs: Housing and community development, Low and moderate income housing, Public housing.

Accordingly, the Department of Housing and Urban Development (HUD) amends Title 24, Code of Federal Regulations, by adding a new Part 85—Administrative Requirements for State, Local, and Federally Recognized Indian Tribal Governments under OMB Circular A–102, as set forth at the end of this document and by amending Parts 44, 85, 111, 511, 570, 571, 575, 590, 850, 882, 905, 941, 968, 970, and 990 as follows:

PART 44—NON-FEDERAL GOVERNMENT AUDIT REQUIREMENTS

1. The authority citation for Part 44 continues to read as follows:

Authority: Single Audit Act of 1984 (31 U.S.C. 7501–7507); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 44.1, paragraph (d) is revised to read as follows:

§ 44.1 Purpose.

* * * * *

(d) The Act does not exempt State or local governments from maintaining records of Federal financial assistance or from providing access to such records to Federal agencies, as provided in Federal law or in 24 CFR Part 85.

* * * * *

3. Section 44.15 is revised to read as follows:

§ 44.15 Auditor selection.

In arranging for audit services, State and local governments shall follow the procurement standards prescribed in 24 CFR 85.36. The standards provide that, while recipients are encouraged to enter into intergovernmental agreements for audit and other services, analysis should be made to determine whether it would be more economical to purchase the services from private firms. In instances where use of such intergovernmental agreements are required by a State statute (e.g., audit services) the State statute will take precedence.

PART 111—FAIR HOUSING ASSISTANCE PROGRAM

4. The authority citation for Part 111 continues to read as follows:

Authority: Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601–19); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

5. In § 111.108, a new paragraph (e) is added, to read as follows:

§ 111.108 Program administration.

* * * * *

(e) Agencies receiving support (financial assistance in the form of grants or cooperative agreements) under this program shall comply with requirements and standards contained in 24 CFR Part 85.

PART 511—RENTAL REHABILITATION GRANT PROGRAM

6. The authority citation for Part 511 continues to read as follows:

Authority: Sec. 17 of the United States Housing Act of 1937 (42 U.S.C. 1437o); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

7. In § 511.11, paragraph (c) is revised to read as follows:

§ 511.11 Other Federal requirements.

* * * * *

(c) *Applicability of 24 CFR Part 85.* The Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments set forth in 24 CFR Part 85 are applicable to grants under this part, except for §§ 85.10, 85.11, 85.25, 85.31, and 85.40(b)(i). In lieu of § 85.25, HUD has adopted § 511.76 of this part.

* * * * *

8. A new §511.76 is added, to read as follows:

§ 511.76 Program income.

(a) *General.* Grantees are neither encouraged to earn nor discouraged from earning program income in using rental rehabilitation grant amounts under this part.

(b) *Definition of program income.* "Program income" means gross income received by the grantee or State recipient (or by another party at the direction of the grantee or State recipient) which is directly generated from the use of rental rehabilitation grant amounts. Primarily, it includes repayments of the principal amount of a rental rehabilition grant or loan, whether in installments or a lump-sum, and any interest or penalties in connection with the grant or loan, under the terms of the commitment or project assistance agreement between the owner and the grantee or State recipient. Program income also includes interest earned on program income. Grantees or State recipients are not authorized to deduct costs incident to the generation or management of income from gross income for purposes of determining program income. Governmental fees and taxes, including income taxes, property taxes, special assessments, transfer taxes, recording fees and other normal governmental revenues, do not constitute program income if they are imposed by generally applicable law, regulation, or ordinance and are not imposed in consideration of the project's receipt of assistance under this part. Program income also does not include grant amounts returned to HUD as a result of cancellation of a project before completion, or interest on those grant amounts, or any interest earned by the grantee or State recipient on grant funds after drawdown and before disbursement for a project. (For disposition of such interest, see 24 CFR 85.21(i)).

(c) *Eligible uses.* (1) Program income may be used for any activity which is eligible under this part, including § 511.11. In particular, the total of rental rehabilitation grant amounts and rental rehabilitation program income used for any project (except under § 511.76(c)(2)) may not exceed the amount per unit allowed under § 511.10(e)(2) or 50 percent of the total project costs (except as noted in § 511.10(e)(1)).

(2) Program income may also be used to provide rental assistance to lower income tenants in properties rehabilitated through the Rental Rehabilitation Program. This includes the use of program income to pay for administrative costs associated with the provision of rental assistance but not to exceed the amount allowed for administrative fees in the Housing Voucher Program authorized under Section 8(o) of the United States Housing Act of 1937, 42 U.S.C. 1437f. In order to use program income for rental assistance, the grantee must—

(i) Use the funds to assist lower income tenants who initially occupy properties rehabilitated with rental rehabilitation grant amounts or rental rehabilitation program income;

(ii) Have a written policy which is available to the public stating that program income will be so used and specifying who is eligible to receive such assistance; and

(iii) Have an agreement with the public housing authority stating that the PHA will utilize the program income to provide rental assistance in accordance with the written policy.

(d) *Timing the use of program income.* Grantees and State recipients shall not commit available rental rehabilitation grant amounts to specific local projects if sufficient program income is on hand and available to fund the project, or a substantial portion of the project. However, in order to avoid possible overcommitment of funds, grantees shall not anticipate the receipt of program income and enter into binding commitments with owners cumulatively exceeding the total amount of program income on hand plus uncommitted rental rehabilitation grant amounts.

(e) *Accounting for and reporting program income.* Program income shall be accounted for and reported in the grantee's Annual Performance Report under § 511.81(b) and in the Cash Management Information System under § 511.74, in the manner prescribed by HUD.

(f) *Authority of State grantees.* States administering rental rehabilitation grants have discretion to choose whether program income is to be earned at all or is to be paid to or retained by the State or paid to or retained by the State recipient. The State's determination should be contained in a written agreement between the State and its State recipients. However, once earned, program income must be used and accounted for in accordance with this section by the State or by the State recipient, as applicable.

(g) *Authority of urban counties.* Because the configuration of an urban county may change from time to time, particularly at the time of requalification of an urban county in the Community Development Block Grant program, special provisions must be made for urban county program income. The urban county may determine whether program income generated by a project located in a unit of general local government which, for whatever reason, no longer participates in the urban county shall be retained by the urban county for its rental rehabilitation program or by the unit of general local government. However, the program income must otherwise be used and accounted for by the urban county and the unit of general local government in accordance with this section.

(h) *Closeout and disposition of program income.* Program income must be accounted for by the grantee when a rental rehabilitation program is closed out. "Closeout" will occur when the following conditions have been met: all grant funds from all program years (excluding program income) have been expended; the grantee does not expect (or has elected not) to receive any

VOL. 53 ISS 48 MR 11 1988 UMI

additional rental rehabilitation grant amounts and the annual performance report covering the last program year has been submitted to HUD. Program income shall be treated in the following manner before and after a closeout:

(1) Program income received before closeout or on hand at the time of closeout shall be used for activities eligible under this section; and

(2) Program income received *after* closeout is not subject to the provisions of this section.

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

9. The authority citation for Part 570 continues to read as follows:

Authority: Title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

10. In § 570.4, paragraph (e) is revised to read as follows:

§ 570.4 Allocation of funds.

* * * * *

(e) Amounts remaining after closeout of a grant which are required to be returned to HUD under the provisions of § 570.509, Grant closeouts, shall be considered as funds available for reallocation.

11. In § 570.200, paragraphs (d)(2) and (f)(1)(ii) are revised to read as follows:

§ 570.200 General policies.

* * * * *

(d) * * *

(2) *Independent contractor relationship.* Consultant services provided under an independent contractor relationship are governed by the procurement requirements in 24 CFR 85.36 and are not subject to the GS–18 limitation.

* * * * *

(f) * * *

(1) * * *

(ii) Procurement contracts governed by the requirements of 24 CFR 85.36; or

* * * * *

12. In § 570.201, paragraph (b) is revised to read as follows:

§ 570.201 Basic eligible activities.

* * * * *

(b) *Disposition.* Disposition, through sale, lease, donation, or otherwise, of any real property acquired with CDBG funds or the property's retention for public purposes, including reasonable costs of temporarily managing such property or property acquired under urban renewal, provided that the proceeds from any such disposition shall be program income subject to the requirements set forth in § 570.504.

* * * * *

13. In § 570.402, paragraph (f)(4)(ii) is revised to read as follows:

§ 570.402 Technical assistance grants and contacts.

* * * * *

(f) * * *

(4) * * *

(ii) Standard Form 424;

* * * * *

14. In § 570.403, paragraph (i)(1) is revised to read as follows:

§ 570.403 New communities.

* * * * *

(i) *Exceptions to regulations.* (1) The provisions of Subpart J, Grant Administration, shall be applicable to recipients, except that a community association or private developer recipient eligible under § 570.403(b)(2) is not required to comply with competitive bidding requirements of 24 CFR 85.36(d)(2), (3), or (4).

* * * * *

15. In § 570.458, paragraphs (c)(1), (c)(14)(ix)(L), and (c)(14)(ix)(M) are revised to read as follows:

§ 570.458 Full applications.

* * * * *

(c) * * *

(1) Standard Form 424 and the urban development action grant application.

* * * * *

(14) * * *

(ix) * * *

(L) OMB Circular A–87 and the provisions of 24 CFR Part 85, as made applicable in § 570.502(a);

(M) All requirements imposed by HUD concerning special requirements of law, program requirements and other administrative requirements;

* * * * *

16. Section 570.464 is revised to read as follows:

§ 570.464 Project closeout

HUD will advise the recipient to initiate closeout procedures when HUD determines, in consultation with the recipient, that there are not impediments to closeout. Closeout shall be carried out in accordance with § 570.509 and applicable HUD guidelines.

17. Subpart J of Part 570 is revised to read as follows:

Subpart J—Grant Administration

Sec.
570.500 Definitions.
570.501 Responsibility for grant administration.
570.502 Applicability of uniform administrative requirements.
570.503 Agreements with subrecipients.
570.504 Program income.
570.505 Use of real property.
570.506 (Reserved.)
570.507 Performance and evaluation report.
570.508 Public access to program records.
570.509 Grant closeout procedures.
570.510 Transferring projects from urban counties to metropolitan cities.
570.511 (Reserved).
570.512 (Reserved).
570.513 Lump sum drawdowns for financing of property rehabilitation activities.

Subpart J—Grant Administration

§ 570.500 Definitions.

For the purposes of this subpart, the following terms shall apply:

(a) "Program income" means gross income received by the recipient or a subrecipient directly generated from the use of CDBG funds. When program income is generated by an activity that is only partially assisted with CDBG funds, the income shall be prorated to reflect the percentage of CDBG funds used.

(1) Program income includes, but is not limited to, the following:

(i) Proceeds from the disposition by sale or long-term lease of real property purchased or improved with CDBG funds;

(ii) Proceeds from the disposition of equipment purchased with CDBG funds;

(iii) Gross income from the use or rental of real or personal property acquired by the recipient or by a subrecipient with CDBG funds, less costs incidental to generation of the income;

(iv) Gross income from the use or rental of real property, owned by the recipient or by a subrecipient, that was constructed or improved with CDBG funds, less costs incidental to generation of the income;

(v) Payments of principal and interest on loans made using CDBG funds;

(vi) Proceeds from the sale of loans made with CDBG funds;

(vii) Proceeds from sale of obligations secured by loans made with CDBG funds;

(viii) Interest earned on funds held in a revolving fund account;

(ix) Interest earned on program income pending its disposition; and

(x) Funds collected through special assessments made against properties owned and occupied by households *not* of low and moderate income, where the assessments are used to recover all or part of the CDBG portion of a public improvement.

(2) Program income does not include interest earned (except for interest described in § 570.513) on grant advances from the U.S. Treasury. Such interest shall be remitted to HUD for transmittal to the U.S. Treasury and will not be reallocated under section 106 (c) or (d) of the Act. Examples of other receipts that are not considered program income are proceeds from fundraising activities carried out by subrecipients receiving CDBG assistance; funds collected through special assessments used to recover the non-CDBG portion of a public improvement; and proceeds from the disposition of real property acquired or improved with CDBG funds when the disposition occurs after the applicable time period specified in §.570.503(b)(7) for subrecipient-controlled property, or in § 570.505 for recipient-controlled property.

(b) "Revolving fund" means a separate fund (with a set of accounts that are independent of other program accounts) established for the purpose of carrying out specific activities which, in turn, generate payments to the fund for use in carrying out the same activities.

(c) "Subrecipient" means a public or private nonprofit agency, authority or organization, or an entity described in § 570.204(c), receiving CDBG funds from the recipient to undertake activities eligible for assistance under Subpart C. The term includes a public agency designated by a metropolitan city or urban county to receive a loan guarantee under Subpart M, but does not include contractors providing supplies, equipment, construction or services subject to the procurement requirements in 24 CFR 85.36, or in Attachment O of OMB Circular A–110, as applicable.

§ 570.501 Responsibility for grant administration.

(a) One or more public agencies, including existing local public agencies, may be designated by the chief executive officer of the recipient to undertake activities assisted by this part. A public agency so designated shall be subject to the same requirements as are applicable to subrecipients.

(b) The recipient is responsible for ensuring that CDBG funds are used in accordance with all program requirements. The use of designated public agencies, subrecipients, or contractors does not relieve the recipient of this responsibility. The recipient is also responsible for determining the adequacy of performance under subrecipient agreements and procurement contracts, and for taking appropriate action when performance problems arise, such as the actions described in § 570.910. Where a unit of general local government is participating with, or as part of, an urban county, or as part of a metropolitan city, the recipient is responsible for applying to the unit of general local government the same requirements as are applicable to subrecipients.

§ 570.502 Applicability of uniform administrative requirements.

(a) Recipients and subrecipients which are governmental entities (including public agencies) shall comply with the requirements and standards of OMB Circular No. A–87, "Principles for Determining Costs Applicable to Grants and Contracts with State, Local and Federally recognized Indian Tribal Governments", OMB Circular A–128, "Audits of State and Local Governments" (implemented at 24 CFR Part 44) and with the following sections of 24 CFR Part 85 "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments":

(1) Section 85.3, "Definitions";

(2) Section 85.6, "Exceptions";

(3) Section 85.12, "Special grant or subgrant conditions for 'high-risk' grantees";

(4) Section 85.20, "Standards for financial management systems," except paragraph (a);

(5) Section 85.21, "Payment," except as modified by § 570.513;

(6) Section 85.22, "Allowable costs";

(7) Section 85.26, "Non-federal audits";

(8) Section 85.32, "Equipment," except in all cases in which the equipment is sold, the proceeds shall be program income;

(9) Section 85.33, "Supplies";

(10) Section 85.34, "Copyrights";

(11) Section 85.35, "Subawards to debarred and suspended parties";

(12) Section 85.36, "Procurement," except paragraph (a);

(13) Section 85.37, "Subgrants";

(14) Section 85.40, "Monitoring and reporting program performance," except paragraphs (b) through (d) and paragraph (f);

(15) Section 85.41, "Financial reporting," except paragraphs (a), (b), and (e);

(16) Section 85.42, "Retention and access requirements for records";

(17) Section 85.43, "Enforcement";

(18) Section 85.44, "Termination for convenience";

(19) Section 85.51 "Later disallowances and adjustments" and

(20) Section 85.52, "Collection of amounts due."

(b) Subrecipient except subrecipients which are governmental entities, shall comply with the requirements and standards of OMB Circular No. A–122, "Cost Principles for Non Profit Organizations" or OMB Circular No. A–21, "Cost Principles for Educational Institutions," as applicable, and with the following Attachments to OMB Circular No. A–110:

(1) Attachment A, "Cash Depositories", except for paragraph 4 concerning deposit insurance;

(2) Attachment B, "Bonding and Insurance";

(3) Attachment C, "Retention and Custodial Requirements for Records", except that in lieu of the provisions in paragraph 4 , the retention period for records pertaining to individual CDBG activities starts from the date of submission of the annual performance and evaluation report, as prescribed in § 570.507, in which the specific activity is reported on for the final time;

(4) Attachment F, "Standards for Financial Management Systems";

(5) Attachment H, "Monitoring and Reporting Program Performance", Paragraph 2;

(6) Attachment N, "Property Management Standards", except for paragraph 3 concerning the standards for real property, and except that paragraphs 6 and 7 are modified so that—

(i) In all cases in which personal property is sold, the proceeds shall be program income, and

(ii) Personal property not needed by the subrecipient for CDBG activities shall be transferred to the recipient for the CDBG program or shall be retained after compensating the recipient; and

(7) Attachment O, "Procurement Standards."

§ 570.503 Agreements with subrecipients.

(a) Before disbursing any CDBG funds to a subrecipient, the recipient shall sign a written agreement with the subrecipient. The agreement shall remain in effect during any period that the subrecipient has control over CDBG funds, including program income.

(b) At a minimum, the written agreement with the subrecipient shall include provisions concerning the following following items:

(1) *Statement of work.* The agreement shall include a description of the work to be performed, a schedule for completing the work, and a budget. These items shall be in sufficient detail to provide a sound basis for the recipient effectively to monitor performance under the agreement.

OL 53 ISS 48 MR 11 988 MI

(2) *Records and reports.* The recipient shall specify in the agreement the particular records the subrecipient must maintain and the particular reports the subrecipient must submit in order to assist the recipient in meeting its recordkeeping and reporting requirements.

(3) *Program income.* The agreement shall include the program income requirements set forth in § 570.504(c).

(4) *Uniform administrative requirements.* The agreement shall require the subrecipient to comply with applicable uniform administrative requirements, as described in § 570.502.

(5) *Other program requirements.* The agreement shall require the subrecipient to carry out each activity in compliance with all Federal laws and regulations described in Subpart K of these regulations, except that:

(i) The subrecipient does not assume the recipient's environmental responsibilities described at § 570.604; and

(ii) The subrecipient does not assume the recipient's responsibility for initiating the review process under the provisions of 24 CFR Part 52.

(6) *Conditions for religious organizations.* Where applicable, the conditions prescribed by HUD for the use of CDBG funds by religious organizations shall be included in the agreement.

(7) *Suspension and termination.* The agreement shall specify that, in accordance with 24 CFR 85.43, suspension or termination may occur if the subrecipient materially fails to comply with any term of the award, and that the award may be terminated for convenience in accordance with 24 CFR 85.44.

(8) *Reversion of assets.* The agreement shall specify that upon its expiration the subrecipient shall transfer to the recipient any CDBG funds on hand at the time of expiration and any accounts receivable attributable to the use of CDBG funds. It shall also include provisions designed to ensure that any real property under the subrecipient's control that was acquired or improved in whole or in part with CDBG funds in excess of $25,000 is either:

(i) Used to meet one of the national objectives in § 570.901 until five years after expiration of the agreement, or for such longer period of time as determined to be appropriate by the recipient; or

(ii) Disposed of in a manner that results in the recipient's being reimbursed in the amount of the current fair market value of the property less any portion of the value attributable to expenditures of non-CDBG funds for acquisition of, or improvement to, the property. (Reimbursement is not required after the period of time specified in paragraph (b)(8)(i) of this section.)

§ 570.504 Program income.

(a) *Recording program income.* The receipt and expenditure of program income as defined in § 570.500(a) shall be recorded as part of the financial transactions of the grant program.

(b) *Disposition of program income received by recipients.* (1) Program income received before grant closeout may be retained by the recipient if the income is treated as additional CDBG funds subject to all applicable requirements governing the use of CDBG funds.

(2) If the recipient chooses to retain program income, that income shall affect withdrawals of grant funds from the U.S. Treasury as follows:

(i) Program income in the form of repayments to, or interest earned on, a revolving fund as defined in § 570.500(b) shall be substantially disbursed from the fund before additional cash withdrawals are made from the U.S. Treasury for the same activity. (This rule does not prevent a lump sum disbursement to finance the rehabilitation of privately owned properties as provided for in § 570.513.)

(ii) Substantially all other program income shall be disbursed for eligible activities before additional cash withdrawals are made from the U.S. Treasury.

(3) Program income on hand at the time of closeout shall continue to be subject to the eligibility requirements in Subpart C and all other applicable provisions of this part until it is expended.

(4) Unless otherwise provided in any grant closeout agreement, and subject to the requirements of paragraph (b)(5) of this section, income received after closeout shall not be governed by the provisions of this part, except that, if at the time of closeout the recipient has another ongoing CDBG grant received directly from HUD, funds received after closeout shall be treated as program income of the ongoing grant program.

(5) If the recipient does not have another ongoing grant received directly from HUD at the time of closeout, income received after closeout from the disposition of real property or from loans outstanding at the time of closeout shall not be governed by the provisions of this part, except that such income shall be used for activities that meet one of the national objectives in § 570.901 and the eligibility requirements described in section 105 of the Act.

(c) *Disposition of program income received by subrecipients.* The written agreement between the recipient and the subrecipient, as required by § 570.503, shall specify whether program income received is to be returned to the recipient or retained by the subrecipient. Where program income is to be retained by the subrecipient, the agreement shall specify the activities that will be undertaken with the program income and that all provisions of the written agreement shall apply to the specified activities. When the subrecipient retains program income, transfers of grant funds by the recipient to the subrecipient shall be adjusted according to the principles described in paragraphs (b)(2) (i) and (ii) of this section. Any program income on hand when the agreement expires, or received after the agreement's expiration, shall be paid to the recipient as required by § 570.503(b)(8).

(d) *Disposition of certain program income received by urban counties.* Program income derived from urban county program activities undertaken by or within the jurisdiction of a unit of general local government which thereafter terminates its participation in the urban county shall continue to be program income of the urban county. The urban county may transfer the program income to the unit of general local government, upon its termination of urban county participation, provided that the unit of general local government has become an entitlement grantee and agrees to use the program income in its own CDBG entitlement program.

§ 570.505 Use of real property.

The standards described in this section apply to real property within the recipient's control which was acquired or improved in whole or in part using CDBG funds in excess of $25,000. These standards shall apply from the date CDBG funds are first spent for the property until five years after closeout of an entitlement recipient's participation in the entitlement CDBG program or, with respect to other recipients, until five years after the closeout of the grant from which the assistance to the property was provided.

(a) A recipient may not change the use or planned use of any such property (including the beneficiaries of such use) from that for which the acquisition or improvement was made unless the recipient provides affected citizens with reasonable notice of, and opportunity to comment on, any proposed change, and either:

(1) The new use of such property qualifies as meeting one of the national objectives in § 570.901 and is not a building for the general conduct of government; or

(2) The requirements in paragraph (b) of this section are met.

(b) If the recipient determines, after consultation with affected citizens, that it is appropriate to change the use of the property to a use which does not qualify under paragraph (a)(1) of this section, it may retain or dispose of the property for the changed use if the recipient's CDBG program is reimbursed in the amount of the current fair market value of the property, less any portion of the value attributable to expenditures of non-CDBG funds for acquisition of, and improvements to, the property.

(c) If the change of use occurs after closeout, the provisions governing income from the disposition of the real property in § 570.504(b) (4) or (5), as applicable, shall apply to the use of funds reimbursed.

(d) Following the reimbursement of the CDBG program in accordance with paragraph (b) of this section, the property no longer will be subject to any CDBG requirements.

§ 570.506 [Reserved].

§ 570.507 Performance and evaluation report.

(a) *Content.* Each performance and evaluation report must contain completed copies of all forms and narratives prescribed by the Secretary and approved by the Office of Management and Budget, including a summary of the citizen comments received on the report, as prescribed in paragraph (c) of this section.

(b) *Timing.*

(1) *Entitlement grants.* Each entitlement grant recipient shall submit a performance and evaluation report:

(i) No later than 90 days after the completion of the most recent program year, showing the status of all activities as of the end of the program year;

(ii) No later than November 30 of each year, showing housing assistance performance as of the end of the Federal fiscal year; and

(iii) No later than 90 days after the recipient has met the criteria for grant closeout, as described in § 570.509(a).

(2) *HUD-administered small cities grants.* Each small cities recipient shall submit a performance and evaluation report on each grant:

(i) No later than 12 months after the date of the grant award and annually thereafter on the date of the award until completion of the activities funded under the grant; and

(ii) No later than 90 days after the recipient has met the criteria for grant closeout, as described in § 570.509(a). If HUD determines that the previous report adequately describes project results, HUD will notify the recipient that a final report is not necessary.

(c) *Citizen comments on the report.* Each recipient shall make copies of the performance and evaluation report available to its citizens in sufficient time to permit the citizens to comment on the report before its submission to HUD. Each recipient may determine the specific manner and time the report will be made available to citizens, consistent with the preceding sentence.

(Approved by the Office of Management and Budget under control No. 2506-0077)

§ 570.508 Public access to program records.

Notwithstanding 24 CFR 85.42(f), recipients shall provide citizens with reasonable access to records regarding the past use of CDBG funds, consistent with applicable State and local laws regarding privacy and obligations of confidentiality.

§ 570.509 Grant closeout procedures.

(a) *Criteria for closeout.* A grant will be closed out when HUD determines, in consultation with the recipient, that the following criteria have been met:

(1) All costs to be paid with CDBG funds have been incurred, with the exception of closeout costs (e.g., audit costs) and costs resulting from contingent liabilities described in the closeout agreement pursuant to paragraph (c) of this section. Contingent liabilities include, but are not limited to, third-party claims against the recipient, as well as related administrative costs.

(2) With respect to activities (such as rehabilitation of privately owned properties) which are financed by means of escrow accounts, loan guarantees, or similar mechanisms, the work to be assisted with CDBG funds (but excluding program income) has actually been completed.

(3) Other responsibilities of the recipient under the grant agreement and applicable laws and regulations appear to have been carried out satisfactorily or there is no further Federal interest in keeping the grant agreement open for the purpose of securing performance.

(b) *Closeout actions.* (1) Within 90 days of the date it is determined that the criteria for closeout have been met, the recipient shall submit to HUD a copy of the final performance and evaluation report described in § 570.507. If an acceptable report is not submitted, an audit of the recipient's grant activities may be conducted by HUD.

(2) Based on the information provided in the performance report and other relevant information, HUD, in consultation with the recipient, will prepare a closeout agreement in accordance with paragraph (c) of this section.

(3) HUD will cancel any unused portion of the awarded grant, as shown in the signed grant closeout agreement. Any unused grant funds disbursed from the U.S. Treasury which are in the possession of the recipient shall be refunded to HUD.

(4) Any costs paid with CDBG funds which were not audited previously shall be subject to coverage in the recipient's next single audit performed in accordance with 24 CFR Part 44. The recipient may be required to repay HUD any disallowed costs based on the results of the audit, or on additional HUD reviews provided for in the closeout agreement.

(c) *Closeout agreement.* Any obligations remaining as of the date of the closeout shall be covered by the terms of a closeout agreement. The agreement shall be prepared by the HUD field office in consultation with the recipient. The agreement shall identify the grant being closed out, and include provisions with respect to the following:

(1) Identification of any closeout costs or contingent liabilities subject to payment with CDBG funds after the closeout agreement is signed;

(2) Identification of any unused grant funds to be canceled by HUD;

(3) Identification of any program income on deposit in financial institutions at the time the closeout agreement is signed;

(4) Description of the recipient's responsibility after closeout for:

(i) Compliance with all program requirements, certifications and assurances in using program income on deposit at the time the closeout agreement is signed and in using any other remaining CDBG funds available for closeout costs and contingent liabilities;

(ii) Use of real property assisted with CDBG funds in accordance with the principles described in § 570.505;

(iii) Compliance with requirements governing program income received subsequent to grant closeout, as described in § 570.504(b) (4) and (5); and

(iv) Ensuring that flood insurance coverage for affected property owners is maintained for the mandatory period;

(5) Other provisions appropriate to any special circumstances of the grant closeout, in modification of or in addition to the obligations in paragraphs (c) (1) through (4) of this section. The agreement shall authorize monitoring by HUD, and shall provide that findings of noncompliance may be taken into

account by HUD, as unsatisfactory performance of the recipient, in the consideration of any future grant award under this part.

(d) *Status of housing assistance plan after closeout.* Unless otherwise provided in a closeout agreement, the housing assistance plan (HAP) will remain in effect after closeout until the expiration of the fiscal year covered by the last approved HAP. The HAP will be used for allocations of HUD-assisted housing and local review and comment under 24 CFR Part 791 for purposes of achieving the housing goals under the performance criteria of § 570.903.

(e) *Termination of grant for convenience.* Grant assistance provided under this part may be terminated for convenience in whole or in part before the completion of the assisted activities, in accordance with the provisions of 24 CFR 85.44. The recipient shall not incur new obligations for the terminated portions after the effective date, and shall cancel as many outstanding obligations as possible. HUD shall allow full credit to the recipient for those portions of obligations which could not be canceled and which had been properly incurred by the recipient in carrying out the activities before the termination. The closeout policies contained in this section shall apply in such cases, except where the approved grant is terminated in its entirety. Responsibility for the environmental review to be performed under 24 CFR Part 50 or 24 CFR Part 58, as applicable, shall be determined as part of the closeout process.

(f) *Termination for cause.* In cases in which the Secretary terminates the recipient's grant under the authority of Subpart O of this part, or under the terms of the grant agreement, the closeout policies contained in this section shall apply, except where the approved grant is cancelled in its entirety. The provisions in 24 CFR 85.43(c) on the effects of termination shall also apply. HUD shall determine whether an environmental assessment or finding of inapplicability is required, and if such review is required, HUD shall perform it in accordance with 24 CFR Part 50.

§ 570.510 Transferring projects from urban counties to metropolitan cities.

Section 106(c)(3) of the Act authorizes the Secretary to transfer unobligated grant funds from an urban county to a new metropolitan city, provided: the city was an included unit of general local government in the urban county immediately before its qualification as a metropolitan city; the funds to be transferred were received by the county before the qualification of the city as a metropolitan city; the funds to be transferred had been programmed by the urban county for use in the city before such qualification; and the city and county agree to transfer responsibility for the administration of the funds being transferred from the county's letter of credit to the city's letter of credit. The following rules apply to the transfer of responsibility for an activity from an urban county to the new metropolitan city.

(a) The urban county and the metropolitan city must execute a legally binding agreement which shall specify:

(1) The amount of funds to be transferred from the urban county's letter of credit to the metropolitan city's letter of credit;

(2) The activities to be carried out by the city with the funds being transferred;

(3) The county's responsibility for all expenditures and unliquidated obligations associated with the activities before the time of transfer, including a statement that responsibility for all audit and monitoring findings associated with those expenditures and obligations shall remain with the county;

(4) The responsibility of the metropolitan city for all other audit and monitoring findings;

(5) How program income (if any) from the activities specified shall be divided between the metropolitan city and the urban county; and

(6) Such other provisions as may be required by HUD.

(b) Upon receipt of a request for the transfer of funds from an urban county to a metropolitan city and a copy of the executed agreement, HUD, in consultation with the Department of the Treasury, shall establish a date upon which the funds shall be transferred from the letter of credit of the urban county to the letter of credit of the metropolitan city, and shall take all necessary actions to effect the requested transfer of funds.

(c) HUD shall notify the metropolitan city and urban county of any special audit and monitoring rules which apply to the transferred funds when the date of the transfer is communicated to the city and the county.

§§ 570.511 and 570.512 [Reserved]

§ 570.513 Lump sum drawdown for financing of property rehabilitation activities.

Subject to the conditions prescribed in this section, recipients may draw funds from the letter of credit in a lump sum to establish a rehabilitation fund in one or more private financial institutions for the purpose of financing the rehabilitation of privately owned properties. The fund may be used in conjunction with various rehabilitation financing techniques, including loans, interest subsidies, loan guarantees, loan reserves, or such other uses as may be approved by HUD consistent with the objectives of this section. The fund may also be used for making grants, but only for the purpose of leveraging non-CDBG funds for the rehabilitaton of the same property.

(a) *Limitation on drawdown of grant funds.* (1) The funds that a recipient deposits to a rehabilitation fund shall not exceed the grant amount that the recipient reasonably expects will be required, together with anticipated program income from interest and loan repayments, for the rehabilitation activities during the period specified in the agreement to undertake activities, based on either:

(i) Prior level of rehabilitation activity; or

(ii) Rehabilitation staffing and management capacity during the period specified in the agreement to undertake activities.

(2) No grant funds may be deposited under this section solely for the purpose of investment, notwithstanding that the interest or other income is to be used for the rehabilitation activities.

(3) The recipient's rehabilitation program administrative costs and the administrative costs of the financial institution may not be funded through lump sum drawdown. Such costs must be paid from periodic letter of credit withdrawals in accordance with standard procedures or from program income, other than program income generated by the lump sum distribution.

(b) *Standards to be met.* The following standards shall apply to all lump sum drawdowns of CDBG funds for rehabilitation:

(1) *Eligible rehabilitation activities.* The rehabilitation fund shall be used to finance the rehabilitation of privately owned properties eligible under the general policies in § 570.200 and the specific provisions of either § 570.202, including the acquisition of properties for rehabilitation, or § 570.203.

(2) *Requirements for agreement.* The recipient shall execute a written agreement with one or more private financial institutions for the operation of the rehabilitation fund. The agreement shall specify the obligations and responsibilities of the parties, the terms and conditions on which CDBG funds are to be deposited and used or returned, the anticipated level of rehabilitation activities by the financial institution, the rate of interest and other

benefits to be provided by the financial institution in return for the lump sum deposit, and such other terms as are necessary for compliance with the provisions of this section. Upon execution of the agreement, a copy must be provided to the HUD field office for its record and use in monitoring. Any modifications made during the term of the agreement must also be provided to HUD.

(3) *Period to undertake activities.* The agreement must provide that the rehabilitation fund may only be used for authorized activities during a period of no more than two years. The lump sum deposit shall be made only after the agreement is fully executed.

(4) *Time limit on use of deposited funds.* Use of the deposited funds for rehabilitation financing assistance must start (e.g., first loan must be made, subsidized or guaranteed) within 45 days of the deposit. In addition, substantial disbursements from the fund must occur within 180 days of the receipt of the deposit. (Where CDBG funds are used as a guarantee, the funds that must be substantially disbursed are the guaranteed funds.) For a recipient with an agreement specifying two years to undertake activities, the disbursement of 25 percent of the fund (deposit plus any interest earned) within 180 days will be regarded as meeting this requirement. If a recipient with an agreement specifying two years to undertake activities determines that it has had substantial disbursement from the fund within the 180 days although it had not met this 25 percent threshold, the justification for the recipient's determination shall be included in the program file. Should use of deposited funds not start within 45 days, or substantial disbursement from such fund not occur within 180 days, the recipient may be required by HUD to return all or part of the deposited funds to the recipient's letter of credit.

(5) *Progam activity.* Recipients shall review the level of program activity on a yearly basis. Where activity is substantially below that anticipated, program funds shall be returned to the recipient's letter of credit.

(6) *Termination of agreement.* In the case of substantial failure by a private financial institution to comply with the terms of a lump sum drawdown agreement, the recipient shall terminate its agreement, provide written justification for the action, withdraw all unobligated deposited funds from the private financial institution, and return the funds to the recipient's letter of credit.

(7) *Return of unused deposits.* At the end of the period specified in the agreement for undertaking activities, all unobligated deposited funds shall be returned to the recipient's letter of credit unless the recipient enters into a new agreement conforming to the requirements of this section. In addition, the recipient shall reserve the right to withdraw any unobligated deposited funds required by HUD in the exercise of corrective or remedial actions authorized under §§ 570.910(b), 570.911, 570.912 or 570.913.

(8) *Rehabilitation loans made with non-CDBG funds.* If the deposited funds or program income derived from deposited funds are used to subsidize or guarantee repayment of rehabilitation loans made with non-CDBG funds, or to provide a supplemental loan or grant to the borrower of the non-CDBG funds, the rehabilitation activities are considered to be CDBG-assisted activities subject to the requirements applicable to such activities, except that repayment of non-CDBG funds shall not be treated as program income.

(9) *Provision of consideration.* In consideration for the lump sum deposit by the recipient in a private financial institution, the deposit must result in appropriate benefits in support of the recipient's local rehabilitation program. Minimum requirements for such benefits are:

(i) Grantees shall require the financial institution to pay interest on the lump sum deposit.

(A) The interest rate paid by the financial institution shall be no more than three points below the rate on one year Treasury obligations at constant maturity.

(B) When an agreement sets a fixed interest rate for the entire term of the agreement, the rate should be based on the rate at the time the agreement is excuted.

(C) The agreement may provide for an interest rate that would fluctuate periodically during the term of the agreement, but at no time shall the rate be established at more than three points below the rate on one year Treasury obligations at constant maturity.

(ii) In addition to the payment of interest, at least one of the following benefits must be provided by the financial institution:

(A) Leverage of the deposited funds so that the financial institution commits private funds for loans in the rehabilitation program in an amount substantially in excess of the amount of the lump sum deposit;

(B) Commitment of private funds by the financial institution for rehabilitation loans at below market interest rates, at higher than normal risk, or with longer than normal repayment periods; or

(C) Provision of administrative services in support of the rehabilitation program by the participating financial institution at no cost or at lower than actual cost.

(c) *Program income.* Interest earned on lump sum deposits and payments on loans made from such deposits are program income and, during the period of the agreement, shall be used for rehabilitation activities under the provisions of this section.

(d) *Outstanding findings.* Notwithstanding any other provision of this section, no recipient shall enter into a new agreement during any period of time in which an audit or monitoring finding on a previous lump sum drawdown agreement remains unresolved.

(e) *Prior notification.* The recipient shall provide the HUD field office with written notification of the amount of funds to be distributed to a private financial institution before distribution under the provisions of this section.

(f) *Recordkeeping requirements.* The recipient shall maintain in its files a copy of the written agreement and related documents establishing conformance with this section and concerning performance by a financial institution in accordance with the agreement.

18. Section 570.610 is revised to read as follows:

§ 570.610 Uniform administrative requirements.

The recipient, its agencies or instrumentalities, and subrecipients shall comply with the policies, guidelines, and requirements of 24 CFR Part 85 and OMB Circulars A–87, A–110, A–122, and A–128 (implemented at 24 CFR Part 44), as applicable, as they relate to the acceptance and use of Federal funds under this part. The applicable sections of 24 CFR Part 85 and OMB Circular A–110 are set forth at § 570.502.

19. In § 570.611, paragraphs (a) (1) and (2) are revised to read as follows:

§ 570.611 Conflict of interest.

(a) *Applicability.* (1) In the procurement of supplies, equipment, construction, and services by recipients, and by subrecipients (including those specified at § 570.204(c)), the conflict of interest provisions in 24 CFR 85.36 and OMB Circular A–110, respectively, shall apply.

(2) In all cases not governed by 24 CFR 85.36 and OMB Circular A–110, the provisions of this section shall apply.

Such cases include the acquisition and disposition of real property and the provision of assistance by the recipient, by its subrecipients, or to individuals, businesses and other private entities under eligible activities which authorize such assistance (e.g., rehabilitation, preservation, and other improvements of private properties of facilities pursuant to § 570.202, or grants, loans and other assistance to businesses, individuals and other private entities pursuant to § 570.203, § 570.204 or § 570.455).

* * * * *

20. In § 570.801, paragraph (c)(2) is revised to read as follows:

§ 570.801 Payment of the cost of completing a project.

* * * * *

(c) * * *

(2) In the subsequent disposition of project land acquired by the unit of general local government pursuant to paragraph (c)(l) of this section, the provisions of section 110(c)(4) of Title I of the Housing Act of 1949, regarding fair use value shall not apply. Any proceeds received by the unit of general local government in the event of such disposition shall be treated as program income in accordance with § 570.504;

* * * * *

21. In § 570.804, paragraph (b)(7)(i) is revised to read as follows:

§ 570.804 Application for approval of financial settlement.

* * * * *

(b) * * *

(7) * * *

(i) All remaining project property owned by the local public agency shall be identified and the proceeds from the sale or lease of such property after financial settlement shall be treated as program income of the unit of general local government under the provisions § 570.504; provided, however, that such proceeds may be applied to the reimbursement of any funds of the unit of general local government, other than funds made available under this part for cash local grants-in-aid required on the basis of incurred net project costs, which were used for the payment of temporary loans for the project. Any remaining project land may be retained for disposition by the local public agency, or transferred to the unit of general local government for use or disposition subject to the covenants specified in § 570.801(c)(l)(i), (ii), (iii) and (iv). In the disposition of such land, the provisions of section 110(c)(4) of title I of the Housing Act of 1949, as amended, regarding fair use value shall not apply.

* * * * *

22. In § 570.905, paragraph (b) is revised to read as follows:

§ 570.905 Reports to be submitted by recipients.

* * * * *

(b) *Financial management.* Each recipient shall submit such financial reports as are determined to be necessary by the Secretary, consistent with the requirements of 24 CFR Part 85.

§ 570.906 [Removed and Reserved].

23. § 570.906 is removed and reserved.

24. In § 570.907, paragraph (a) is revised to read as follows:

§ 570.907 Records to be maintained by recipients.

(a) *Financial Management.* Recipients are to maintain records, in accordance with 24 CFR 85.20, which identify adequately the source and application of funds for grant supported activities. The records shall contain information pertaining to grant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income.

* * * * *

PART 571—COMMUNITY DEVELOPMENT BLOCK GRANTS FOR INDIAN TRIBES AND ALASKAN NATIVE VILLAGES

25. The authority citation for Part 571 continues to read as follows:

Authority: Title I of the Housing and Community Development Act of 1974 (42) U.S.C. 5301–5320); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

26. In § 571.502, paragraph (e) is revised to read as follows:

§ 571.502 Force account construction.

* * * * *

(e) The contracting and procurement standards set forth in 24 CFR 85.36 apply to material, equipment, and supply procurements from outside vendors under this section, but not to other activities undertaken by force account. HUD may approve alternative requirements in lieu of bonding if compliance with the bonding requirements specified in § 85.36(h) is determined by HUD to be infeasible or incompatible with the Indian preference requirements set forth in § 571.503.

27. In § 571.503, paragraphs (d)(2)(iii) and (d)(3) are revised to read as follows:

§ 571.503 Indian preference requirements.

* * * * *

(d) * * *

(2) * * *

(iii) If one approvable bid is received, request Field Office review and approval of the proposed contract and related procurement documents, in accordance with 24 CFR 85.36, in order to award the contract to the single bidder.

(3) Procurements that are within the dollar limitations established for small purchases under 24 CFR 85.36 need not follow the formal bid procedures of paragraph (d) of this section, since these procurements are governed by the small purchase procedures of 24 CFR 85.36. However, a grantee's small purchase procurement shall, to the greatest extent feasible, provide Indian preference in the award of contracts.

* * * * *

28. § 571.607, paragraphs (a)(1) and (2) are revised to read as follows:

§ 571.607 Conflict of interest.

(a) *Applicability.* (1) In the procurement of supplies, equipment, construction, and services by grantees and subrecipients, the conflict of interest provisions in 24 CFR 85.36 and OMB Circular A–110 shall apply.

(2) In all cases not governed by 24 CFR 85.36 and OMB Circular A–110, the provisions of this section shall apply. Such cases include the provision of assistance by the recipient or by its subrecipients to individuals, business, and other private entities under eligible activities that authorize such assistance (e.g., rehabilitation, preservation, and other improvements of private properties or facilities under § 570.202; or grants, loans, and other assistance to businesses, individuals and other private entities under § 570.203 or § 570.204)

* * * * *

PART 575—EMERGENCY SHELTER GRANTS

29. The authority citation for Part 575 continues to read as follows:

Authority: Sec. 101(g), Pub. L. 99–500 (approved October 18, 1986), making appropriations as provided for in sec. 525(a) of H.R. 5313, 99th Cong., 2d Sess. (1986) (as passed by the House of Representatives and by the Senate), to the extent and in the manner provided for in H.R. Rep. No. 977, 99th Cong. 2d Sess. (1986); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

30. In § 575.59, paragraphs (b) and (e) are revised to read as follows:

§ 575.59 Other Federal requirements

* * * * *

(b) *Grant Administration.* The policies, guidelines, and requirements of OMB Circulars Nos. A–110 and A–112, as they relate to the acceptance and use of emergency shelter grant amounts by

private nonprofit organizations, and OMB Circular A–87 and OMB Circular A–102 (as set forth in 24 CFR Part 85), as they relate to the acceptance and use of emergency shelter grant amounts by States and units of general local government, except that 24 CFR 85.10, 85.24(a)(1) and (c)(1), 85.40(b)–(d) and (f) do not apply. Program income is authorized to be used in accordance with § 85.25(g)(2).

* * * * *

(e) *Conflicts of interest.* In addition to the conflict of interest requirements in OMB Circular A–110 and 24 CFR Part 85, no person (1) who is an employee, agent, consultant, officer, or elected or appointed official of the grantee, State recipient, or nonprofit recipient (or of any designated public agency) that receives emergency shelter grant amounts and who exercises or has exercised any functions or responsibilities with respect to assisted activities or (2) who is in a position to participate in a decision making process or gain inside information with regard to such activities, may obtain a personal or financial interest or benefit from the activity, or have an interest in any contract, subcontract, or agreement with respect to the activity, or the proceeds of any contract, subcontract, agreement related to the activity, either for his or herself or those with whom he or she has family or business ties, during his or her tenure or for one year thereafter. (HUD may grant an exception to this exclusion as provided in § 570.611(d) and (e) of this chapter.)

31. Section 575.63 is revised to read as follows:

§ 575.63 Method of payment

Payments are made to a grantee upon its request and may include a working capital advance for 30 days' cash needs or an advance of $5,000, whichever is greater. Thereafter, the grantee would be reimbursed for the amount of its actual cash disbursement needs. If a grantee requests a working capital advance, it must base the request on a realistic, firm estimate of the amounts required to be disbursed over the 30–day period in payment of eligible activity costs. Payments with respect to grants of $120,000 or more will be made by letter of credit if the grantee meets the requirements of 24 CFR Part 85.

PART 590—URBAN HOMESTEADING

32. The authority citation for Part 590 continues to read as follows:

Authority: Sec. 810 of the Housing and Community Development Act of 1974 (12 U.S.C. 1706e); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

33. In § 590.11, paragraph (a)(1) is revised to read as follows:

§ 590.11 Applications.

(a) * * *

(1) Standard Form–424;

* * * * *

PART 850—HOUSING DEVELOPMENT GRANTS

34. The authority citation for Part 850 continues to read as follows:

Authority: Sec. 17 of the U.S. Housing Act of 1937 (42 U.S.C. 1437o); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C: 3535(d)).

35. In § 850.33, paragraph (a) is revised to read as follows:

§ 850.33 Submission requirements.

* * * * *

(a) *Standard form.* Standard Form 424.

* * * * *

36. In § 850.35, paragraph (g) is revised to read as follows:

§ 850.35 Other program requirements.

* * * * *

(g) *Grant administration.* The policies, guidelines, and requirements of 24 CFR Part 85 (except fo §§ 85.23, 85.24, 85.25, 85.30, 85.31(c) 85.40(b)–(d) and (f), and 85.50) and OMB Circular A–122, as they relate to the acceptance and use of housing development grant amounts under this part. (24 CFR 85.36 does not apply to a grantee's selection of a project owner, because that selection is not a procurement of property or services. A project owner is not required to follow the requirements of 24 CFR 85.36 because Part 85 applies only to State, local, and Indian tribal governments.)

* * * * *

37. Section 850.69 is revised to read as follows:

§ 850.69 Financial management systems.

Each grantee is required to maintain a financial management system that complies with 24 CFR 85.20.

PART 882—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING

38. The authority citation for Part 882 continues to read as follows:

Authority: Secs. 3, 5, and 8 of the U.S. Housing Act of 1937 (42 U.S.C. 1437a, 1437c and 1437f); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

39. In § 882.516, paragraph (e) is revised to read as follows:

§ 882.516 Maintenance, operation and inspections.

* * * * *

(e) Periodic PHA audits must be conducted as required by HUD, in accordance with guidelines prescribed by 24 CFR Part 44.

PART 905—INDIAN HOUSING

40. The authority citation for Part 905 continues to read as follows:

Authority: Sec. 3, 4, 5, 6, 9, 11, 12, and 16 of the United States Housing Act of 1937 (42 U.S.C. 1437a, 1437b, 1437d, 1437g, 1437j; and 1437n); sec. 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

41. In § 905.107, new paragraphs (g) and (h) are added to read as follows:

§ 905.107 Compliance with other Federal requirements.

* * * * *

(g) *Audits.* IHAs that receive financial assistance under this part shall comply with audit requirements in 24 CFR Part 44.

(h) *Applicability of 24 CFR Part 85.* The Administrative Requirements for Grants and Cooperative Agreements to State, Local, and Federally Recognized Indian Tribal Governments set forth in 24 CFR Part 85 are applicable to grants under this part, except as specified in this part and in 24 CFR 990.103(c) and in 24 CFR Part 990, Subpart B.

42. In § 905.203, paragraph (d)(1) is republished and paragraphs (b), (c), and (d)(2) are revised to read as follows:

§ 905.203 Production methods and requirements.

* * * * *

(b) *Turnkey method.* Under the Turnkey method, the IHA advertises for developers to submit proposals to build a Project described in the IHA's invitation for proposals. The Invitation for Proposals may, when approved by HUD, prescribe the sites to be used. The IHA selects, subject to HUD approval, the best of the proposals received, taking into consideration price, design, the developer's experience and other evidence of the developer's ability to complete the Project. After HUD approval of the proposal selected by the IHA, the working drawings and specifications are agreed to by the developer, the IHA, and HUD, and the developer and the IHA enter into a Contract of Sale. Upon completion of the project in accordance with the contract of sale, the IHA purchases the Project from the developer. The IHA may employ an architect to assist in evaluating proposals and negotiating the working drawings and specifications. The IHA provides inspection services by an architect, engineer or other qualified person. Notwithstanding 24 CFR 85.36(h), the IHA may require the developer to furnish assurance in the form of 100 percent performance and payment bonds, or other security as may be acceptable. The decision by the IHA whether or not to require bonding or other security shall be included in the invitation for bids or proposals.

(c) *Conventional method.* Under the Conventional Method, the IHA, after HUD approval of the plans and specifications, shall advertise for contractors to build the project, and the award shall be made to the lowest, responsible bidder. The contractor shall be required to provide assurance in the form of 100 percent performance and payment bonds or, notwithstanding 24 CFR 85.36(h), a lesser percentage or other security approved by HUD. The contractor receives progress payments during construction, and a final HUD-approved payment upon completion in accordance with the contract.

(d) *Modified Turnkey (or Modified Conventional) Method.* Under this modified method the procedure is the same as under the Conventional Method, except that:

(1) The developer will receive no progress payments from the IHA and will be responsible for acceptable completion before receiving any payment from the IHA; and

(2) Notwithstanding 24 CFR 85.36(h), the IHA may, but need not, require the developer to furnish assurance in the form of 100 percent performance and payment bonds, or other security as may be acceptable. The decision by the IHA whether or not to require bonding or other security shall be included in the invitation for bids or proposals.

* * * * *

43. In § 905.211, paragraph (b) is revised to read as follows:

§ 905.211 Contracts in connection with development

* * * * *

(b) Notwithstanding 24 CFR 85.36(g), the IHA shall not, without HUD approval, enter into any contract in connection with the development of a Project, including contracts for work, materials or equipment, or for architectural, engineering, consultant, legal, or other professional services. This requirement does not apply to MHO Agreements in the form prescribed by HUD, or to such other types of contracts as HUD may specify.

* * * * *

PART 941—PUBLIC HOUSING DEVELOPMENT

44. The authority citation for Part 941 continues to read as follows:

Authority: Secs. 4, 5, and 9 of the United States Housing Act of 1937 (42 U.S.C. 1437b, 1437c, and 1437g); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

45. In § 941.102, the introductory text is republished and paragraph (a) is revised to read as follows:

§ 941.102 Development methods.

A PHA may use one of three different methods to develop a project. The following are brief summaries of these development methods.

(a) Conventional. The conventional method may be used for either new construction or rehabilitation. The PHA is responsible for selecting a site or property and designing the project. After field office approval of a PHA proposal which identifies a site or property, the ACC is executed, site engineering studies or property inspections are performed, and the PHA acquires the sites or property. The PHA contracts with an architect to prepare the project design and construction documents. Following field office approval of these documents, the PHA advertises for competitive bids to build or rehabilitate the project on the PHA-owned site and, after field office approval, awards a construction contract to the lowest responsible bidder. The contractor is required to furnish a 100 percent performance and payment bond or, notwithstanding 24 CFR 85.36(h), other assurances approved by the field office. The contractor receives progress payments from the PHA during construction or rehabilitation and a final payment upon completion of the project in accordance with the construction contract.

* * * * *

46. In § 941.208, a new paragraph (g) is added to read as follows:

§ 941.208 Other Federal requirements.

* * * * *

(g) *Applicability of 24 CFR Part 85.* The Administrative Requirements for Grants and Cooperative Agreements to State, Local, and Federally Recognized Indian Tribal Governments set forth in 24 CFR Part 85 are applicable to grants made under this part on or after October 1, 1986, except that § 941.502 is not subject to § 85.36(g), and as otherwise specified in this part.

PART 968—COMPREHENSIVE IMPROVEMENT ASSISTANCE PROGRAM

47. The authority citation for Part 968 continues to read as follows:

Authority: Secs. 6 and 14, United States Housing Act of 1937 (42 U.S.C. 1437d and 1437l); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

48. In § 968.9, paragraph (j) is revised to read as follows:

§ 968.9 Other program requirements.

* * * * *

(j) *Applicability 24 CFR Part 85.* The Administrative Requirements for Grants and Cooperative Agreements to State, Local, and Federally Recognized Indian Tribal Governments set forth in 24 CFR Part 85 are applicable to grants under this part, except as specified in this part and in 24 CFR 990.103(c) and 24 CFR 990.201.

49. In § 968.12, paragraphs (b), (c), (d), (e), (f), and (g) are revised to read as follows:

§ 968.12 Contracting requirements.

* * * * *

(b) *Formal advertising requirements.* For each construction or equipment contract over $25,000, the PHA shall conduct formal advertising as discussed in 24 CFR 85.36(d)(2), except for procurement under the HUD Consolidated Supply Program.

(c) *Bonding requirements.* For each construction or equipment contract over $25,000, the contractors shall furnish a performance and payment bond for 100 percent of the contract price or, notwithstanding 24 CFR 85.36(h) and as may be required by law, separate performance and payment bonds, each for 50 percent or more of the contract price, or a 20 percent cash escrow, or a 25 percent letter of credit.

(d) *PHA agreement with architect/engineer.* The PHA shall obtain architectural/engineering services through the competitive negotiation process, except where FFY 1981 or subsequent year funds are being used to finance additional services under an existing contract. Notwithstanding 24 CFR 85.36(g), the PHA shall comply with HUD requirements either to submit the contract for prior HUD approval before execution or to certify that the scope of work is consistent with any agreements reached with HUD, and that the fee is appropriate and does not exceed the HUD-approved budget amount.

(e) *Construction and bid documents.* Notwithstanding 24 CFR 85.36(g), the PHA shall comply with HUD requirements either to—

(1) Submit for prior HUD approval complete construction and bid documents before inviting bids or

(2) Certify to receipt of the required architect's/engineer's certification that the construction documents accurately reflect HUD-approved work and that the bid documents are complete and include all mandatory items.

(f) *Contract award.* The PHA shall obtain HUD approval of the proposed award of modernization construction and equipment contracts if the bid amount exceeds the HUD-approved budget amount or if the procurement meets the criteria set forth in 24 CFR 85.36(g)(2) (i) through (iv). In all other instances, the PHA shall make the award without HUD approval after the PHA has certified that—

(1) The bidding procedures and award were conducted in compliance with State, tribal or local laws and Federal requirements,

(2) The award does not exceed the approved budget amount and does not meet the criteria in § 85.36(g)(2) (i) through (iv) for prior HUD approval, and

(3) HUD clearance has been obtained for the award under previous participation procedures, including absence of the contractor from the HUD Consolidated List of Debarred, Suspended or Ineligible Contractors and Grantees.

(g) *Contract modifications.* Notwithstanding 24 CFR 85.36, except in an emergency endangering life or property, the PHA shall comply with HUD requirements either to submit for prior HUD approval the proposed contract modifications or to certify that such modifications are within the scope of the contract and that any additional costs are within the latest HUD-approved budget or otherwise approved by HUD.

* * * * *

50. Section 968.13 is revised to read as follows:

§ 968.13 Fund requisitions.

To request modernization funds against the total approved modernization budget, the PHA shall:

(a) Submit, in a form prescribed by HUD, a request to the HUD office for only the amount of modernization funds needed for actual cash disbursements, identifying the amounts by account and date due; and

(b) Submit the latest required progress reports under § 968.14, unless the first required report is not yet due.

51. Section 968.17 is revised to read as follows:

§ 968.17 Fiscal closeout of a modernization program.

Upon completion of a modernization program, the PHA shall submit the actual modernization cost certificate, in a form prescribed by HUD, to the HUD office for review, audit verification and approval. The audit shall follow the guidelines prescribed by 24 CFR Part 44. If the audited modernization cost certificate indicates that excess funds have been approved, the PHA shall dispose of the excess funds as directed by HUD. If the audited modernization cost certificate discloses unauthorized expenditures, the PHA shall take such corrective actions as HUD may direct.

(Approved by the Office of Management and Budget under control number 2577–0040)

PART 970—PUBLIC HOUSING PROGRAM—DEMOLITION OR DISPOSITION OF PUBLIC HOUSING PROJECTS

52. The authority citation for Part 970 continues to read as follows:

Authority: Sec. 18, of the United States Housing Act of 1937 (42 U.S.C. 1437p); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

53. Section 970.1 is revised to read as follows:

§ 970.1 Purpose.

This part sets forth requirements for HUD approval of a public housing agency's application for demolition or disposition (in whole or in part) of public housing projects assisted under the U.S. Housing Act of 1937 (the "Act"). The rules and procedures contained in 24 CFR Part 85 are inapplicable.

PART 990—ANNUAL CONTRIBUTIONS FOR OPERATING SUBSIDY

54. The authority citation for Part 990 continues to read as follows:

Authority: Sec. 9 of the U.S. Housing Act of 1937 (42 U.S.C. 1437g); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

55. In § 990.103, a new paragraph (c) is added to read as follows:

§ 990.103 Applicability of PFS.

* * * * *

(c) *Financial management, monitoring and reporting.* The financial management system, monitoring and reporting on program performance and financial reporting will be in compliance with 24 CFR 85.20, 85.40 and 85.41 except to the extent that HUD requirements provide for additional specialized procedures which are determined by HUD to be necessary for the proper management of the program in accordance with the requirements of the U.S. Housing Act of 1937 and the Annual Contributions Contracts between the PHAs and HUD.

56. Section 990.109, paragraph (e)(3) is revised to read as follows:

§ 990.109 Projected income level.

* * * * *

(e) * * *

(3) *Total.* The estimated total amount of income for investments and Other Income, as approved, shall be divided by the number of Unit Months Available to obtain a per unit per month amount. This amount shall be added to the projected average dwelling rental income per unit to obtain the Projected Operating Income Level. This amount shall not be subject to the provisions regarding program income in 24 CFR 85.25.

57. A new Subpart B—Financial Management systems, Monitoring and reporting—is added to Part 990, to read as follows:

Subpart B—Financial Management Systems, Monitoring and Reporting

§ 990.201 Purpose—General policy on financial management, monitoring and reporting.

The financial management systems, reporting and monitoring on program performance and financial reporting will be in compliance with the requirements of 24 CFR 85.20, 85.40 and 85.41 except to the extent that HUD requirements provide for additional specialized procedures necessary to permit the Secretary to make the determinations regarding the payment of operating subsidy specified in section 9(a)(1) of the United States Housing Act of 1937.

§ 990.202 Applicability.

The provisions of this Subpart B are applicable to the development, modernization (CIAP), and operation of the Turnkey III and Turnkey IV Homeownership Opportunity Programs and the housing owned by the PHAs of the Virgin Islands, Guam, Puerto Rico and Alaska.

PART 85—ADMINISTRATIVE REQUIREMENTS FOR STATE, LOCAL AND FEDERALLY RECOGNIZED INDIAN TRIBAL GOVERNMENTS UNDER OMB CIRCULAR A–102

58. A new Part 85 is added, to read as set forth at the end of this document.

The part heading is revised to read as set forth below.

PART 85—ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE, LOCAL AND FEDERALLY RECOGNIZED INDIAN TRIBAL GOVERNMENTS

Subpart A—General

Sec.
85.1 Purpose and scope of this part.
85.2 Scope of subpart.
85.3 Definitions.
85.4 Applicability.
85.5 Effect on other issuances.
85.6 Additions and Exceptions.

Subpart B—Pre-Award Requirements

85.10 Forms for applying for grants.
85.11 State plans.
85.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

85.20 Standards for financial management systems.
85.21 Payment requirements.
85.22 Allowable costs.
85.23 Period of availability of funds.
85.24 Matching or cost sharing.
85.25 Program income.
85.26 Non-Federal audits.

Changes; Property, and Subawards

85.30 Changes under discretionary (project) awards.
85.31 Real property.
85.32 Equipment.
85.33 Supplies.
85.34 Copyrights.
85.35 Subawards to debarred and suspended parties.
85.36 Procurement.
85.37 Subgrants.

Reports, Records Retention, and Enforcement

85.40 Monitoring and reporting program performance.
85.41 Financial reporting.
85.42 Retention and access requirements for records.
85.43 Enforcement.
85.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

85.50 Closeout.
85.51 Later disallowances and adjustments.
85.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 10, 1988.

Carl D. Covitz,
Acting Secretary.

BILLING CODE 4210-32-M

DEPARTMENT OF JUSTICE

28 CFR Part 66

[Atty. Gen. Order No. 1252-88]

FOR FURTHER INFORMATION CONTACT: Jack A. Nadol, Department of Justice, Office of Justice Programs, 633 Indiana Ave., NW., Room 942, Washington, DC 20531, (202) 724-7611.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Justice has adopted uniform administrative rules for Federal grants and cooperative agreements and subawards to State, local and Indian tribal governments which will be applicable to nonprocurement assistance activities of components of the Department of Justice which have grant-making authority. These include: The Office of Justice Programs, the National Institute of Justice, the Bureau of Justice Assistance, the Office of Juvenile Justice and Delinquency Prevention, the Bureau of Justice Statitics, the National Institute of Corrections, the Bureau of Prisons, the U.S. Marshals Service, the Immigration and Naturalization Service, the Federal Bureau of Investigation, and the Drug Enforcement Administration.

Drug Enforcement Administration (DEA) contracts that are issued under 21 U.S.C. 873(a)(7) are exempt. However, in the event DEA is authorized to fund grants to state and local agencies in the future, DEA would be subject to the common grants management regulation.

With respect to grants and cooperative agreements of the Office of Justice Programs (OJP), this regulation replaces Appendix 3 of OJP Guideline Manual 7100.1C, Financial and Administrative Guide for Grants.

List of Subjects in 28 CFR Part 66

Administrative practice and procedures, Grant programs—Law Grant administration, Reporting and recordkeeping requirements.

Title 28 of the Code of Federal Regulations is amended as set forth below.

Edwin Meese III,
Attorney General.
February 25, 1988.

1. Part 66 is added to read as set forth at the end of this document.

PART 66—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
66.1 Purpose and scope of the part.
66.2 Scope of subpart.
66.3 Definitions.
66.4 Applicability.
66.5 Effect on other issuances.
66.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

66.10 Forms for applying for grants.
66.11 State plans.
66.12 Special grant or subgrant conditions for "high-risk" recipients.

Subpart C—Post-Award Requirements

Financial Administration

66.20 Standards for financial management systems.
66.21 Payment requirements.
66.22 Allowable costs.
66.23 Period of availability of funds.
66.24 Marching or cost sharing.
66.25 Program Income.
66.26 Non-Federal audits.

Changes, Property, and Subawards

66.30 Changes.
66.31 Real Property.
66.32 Equipment.
66.33 Supplies.
66.34 Copyrights.
66.35 Subawards to debarred and suspended parties.
66.36 Procurement.
66.37 Subgrants.

Reports, Records Retention, and Enforcement

66.40 Monitoring and reporting program performance.
66.41 Financial reporting.
66.42 Retention and access requirements for records.
66.43 Enforcement.
66.44 Termination for convenience.

Subpart D—After the Grant Requirements

66.50 Closeout.
66.51 Later disallowances and adjustments.
66.52 Collections of amounts due.

Subpart E—Entitlements [Reserved]

Authority: The Omnibus Crime Control and Safe Streets Act of 1968, 42 U.S.C. 3711, *et seq.* (as amended); Juvenile Justice and Delinquency Prevention Act of 1974, 42 U.S.C. 5601, *et seq.* (as amended); Victims of Crime Act of 1984, 42 U.S.C. 10601, *et seq.* (as amended); 18 U.S.C. 4042; and U.S.C. 4351-4353.

2. Newly added Part 66 is further amended by revising §§ 66.32(a) and 66.33(a) to read as follows:

§ 66.32 Equipment.

(a) The Omnibus Crime Control and Safe Streets Act of 1968, as amended, Pub. L. 90-351, Section 808, requires that the title to all equipment and supplies purchased with Section 403 or 1302 (block or formula funds) shall vest in the criminal justice agency or nonprofit organization that purchased the property if it certifies to the State office described in Section 408 or 1308 that it will use the property for criminal justice purposes. If such certification is not made, title to the property shall vest in the State office, which shall seek to have the property used for criminal purposes elsewhere in the State prior to using it or disposing of it in any other manner.

* * * * *

§56.33 Supplies

(a) The Omnibus Crime Control and Safe Streets Act of 1968, as amended, Pub. L. 90-351, Section 808, requires that the title to all equipment and supplies purchased with Section 403 or 1302 (block or formula funds) shall vest in the criminal justice agency or nonprofit organization that purchased the property if it certifies to the State office described in Section 408 or 1308 that it will use the property for criminal justice purposes. If such certification is not made, title to the property shall vest in the State office, which shall seek to have the property used for criminal justice purposes elsewhere in the State prior to using it or disposing of it in any other manner.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

29 CFR Part 97

FOR FURTHER INFORMATION CONTACT: Theodore Goldberg, Telephone: 202-523-9174.

ADDITIONAL SUPPLEMENTARY INFORMATION: As indicated in the previously-published Department of Labor specific NPRM preamble to these rules, (52 FR 21830, June 9, 1987), the Department of Labor had previously published regulations implementing both OMB Circulars A-102, *Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments*, and A-110, Uniform Administrative Requirements for Grants and Cooperative Agreements to Non-profit Institutions, at 41 CFR Part 29-70. With the adoption of this common rulemaking, notice is given that 41 CFR Part 29-70 is no longer applicable to grants to State and local governments (including federally recognized Indian Tribal governments) and Indian and Native American entities.

List of Subjects in 29 CFR Part 97

Accounting, Administrative practice and procedure, Grant programs—grants and administration, Insurance, Reporting and recordkeeping requirements.

Title 29 of the Code of Federal Regulations is amended by adding Part 97 as set forth at the end of this document.

Ann McLaughlin,
Secretary of Labor.

PART 97—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
97.1 Purpose and scope of this part.
97.2 Scope of subpart.
97.3 Definitions.
97.4 Applicability.
97.5 Effect on other issuances.
97.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

97.10 Forms for applying for grants.
97.11 State plans.
97.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

97.20 Standards for financial management systems.
97.21 Payment.
97.22 Allowable costs.
97.23 Period of availability of funds.
97.24 Matching or cost sharing.
97.25 Program income.
97.26 Non-Federal audit.

Changes, Property, and Subawards

97.30 Changes.
97.31 Real property.
97.32 Equipment.
97.33 Supplies.
97.34 Copyrights.
97.35 Subawards to debarred and suspended parties.
97.36 Procurement.
97.37 Subgrants.

Reports, Records Retention, and Enforcement

97.40 Monitoring and reporting program performance.
97.41 Financial reporting.
97.42 Retention and access requirements for records.
97.43 Enforcement.
97.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

97.50 Closeout.
97.51 Later disallowances and adjustments.
97.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 5 U.S.C. 301; OMB Circular A-102.

BILLING CODE 4510-23-M

FEDERAL MEDIATION AND CONCILIATION SERVICE

29 CFR Part 1470

FOR FURTHER INFORMATION CONTACT: Lee Buddendeck—202-653-5320.

ADDITIONAL SUPPLEMENTARY INFORMATION: Due to the nature of the grantees of the Federal Mediation and Conciliation Service and/or their representatives as tax supported or dues paying entities, the Service does not consider in kind contributions to be an acceptable grantee match. Because the grants program has a very small annual appropriation, grantee changes to their grant projects for indirect costs are discouraged.

List of Subjects in 29 CFR Part 1470

Grant programs, Grants Administration, reporting and recordkeeping requirements.

Title 29 of the Code of Federal Regulations is amended by adding Part 1470 as set forth at the end of this document.

Kay McMurray,
Director.

PART 1470—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
1470.1 Purpose and scope of this part.
1470.2 Scope of subpart.
1470.3 Definitions.
1470.4 Applicability.
1470.5 Effect on other issuances.
1470.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

1470.10 Forms for applying for grants.
1470.11 State plans.
1470.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

1470.20 Standards for financial management systems.
1470.21 Payment.
1470.22 Allowable costs.
1470.23 Period of availability of funds.
1470.24 Matching or cost sharing.
1470.25 Program income.
1470.26 Non-Federal audit.

Changes, Property, and Subawards

1470.30 Changes.
1470.31 Real property.
1470.32 Equipment.
1470.33 Supplies.
1470.34 Copyrights.
1470.35 Subawards to debarred and suspended parties.

1470.36 Procurement.
1470.37 Subgrants.

Reports, Records Retention, and Enforcement

1470.40 Monitoring and reporting program performance.
1470.41 Financial reporting.
1470.42 Retention and access requirements for records.
1470.43 Enforcement.
1470.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

1470.50 Closeout.
1470.51 Later disallowances and adjustments.
1470.52 Collections of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 29 U.S.C. 175a.

BILLING CODE 6732-01-M

DEPARTMENT OF DEFENSE

32 CFR Part 278

FOR FURTHER INFORMATION CONTACT: Mr. Ronald D. Good, or Mr. William L. Blumberg. Telephone (202) 697-8282.

ADDITIONAL SUPPLEMENTARY INFORMATION: With this rule, the Department of Defense will adopt rules and regulations governing the administration and use of grants and cooperative agreements with state and local government. This "common" rule establishes consistency and uniformity among the Office of the Secretary of Defense, Military Departments and Defense Agencies in the employment and management of grants and cooperative agreements with state, local, and federally recognized indian tribal governments. There are no deviations or differences between the model regulation promulgated by the Office of Management and Budget, which forms the basis for the "common" rule, and the Department of Defense regulation governing the same.

List of Subjects in 32 CFR Part 278

Accounting, Administrative practice and procedure, Grant programs, Grants administration, Insurance, Reporting and Recordkeeping requirements.

Title 32 of the Code of Federal Regulations is amended by adding Part 278 as set forth at the end of this document.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

February 18, 1988.

PART 278—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
278.1 Purpose and scope of this part.
278.2 Scope of subpart.
278.3 Definitions.
278.4 Applicability
278.5 Effect on other issuances.
278.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

278.10 Forms for applying for grants.
278.11 State plans.
278.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

278.20 Standards for financial management systems.
278.21 Payment.
278.22 Allowable costs.
278.23 Period of availability of funds.
278.24 Matching or cost sharing.
278.25 Program income.
278.26 Non-Federal audit.

Changes, Property, and Subawards

278.30 Changes.
278.31 Real property.
278.32 Equipment.
278.33 Supplies.
278.34 Copyrights.
278.35 Subawards to debarred and suspended parties.
278.36 Procurement.
278.37 Subgrants.

Reports, Records Retention, and Enforcement

278.40 Monitoring and reporting program performance.
278.41 Financial reporting.
278.42 Retention and access requirements for records.
278.43 Enforcement.
278.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

278.50 Closeout.
278.51 Later disallowances and adjustments.
278.52 Collections of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 5 U.S.C. 301; 10 U.S.C. 113.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

34 CFR Parts 74 and 80

FOR FURTHER INFORMATION CONTACT: Mary Hughes, Telephone (202) 732-7400.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Secretary establishes a new Part 80 to implement the common regulations to be used by all Federal agencies under Office of Management and Budget (OMB) Circular A-102. The Secretary simultaneously makes technical amendments to the existing Part 74 to limit its application to the institutions covered by OMB Circular A-110. The changes to Part 74 are contained in a separate final rulemaking document published elsewhere in this issue of the **Federal Register.**

The Department of Education currently implements both OMB Circulars A-102 and A-110 in Part 74 of the Department's regulations (34 CFR Part 74). Circular A-110 applies to institutions of higher education, hospitals, and other nonprofit organizations and contains provisions similar to those contained in Circular A-102 for State and local governments and Indian tribal organizations. However, due to the significant changes contained in the common regulations implementing revised Circular A-102, the common regulations and current Circular A-110 can no longer conveniently be implemented together.

As a result, State and local governments and Indian tribal organizations are now subject to the less burdensome requirements in Part 80 and and other grantees are subject to the requirements of Part 74. However, the Department is aware that the President's Council on Management Improvement has initiated a task force to review Circular A-110. If, as a result of that review, the differences between A-110 and A-102 are reduced sufficiently, the Department may again implement the two Circulars in a single set of regulations.

The Secretary published in the **Federal Register** of June 9, 1987 (52 FR 21864) proposed technical amendments to 34 CFR Part 74. These proposed amendments were designed to limit the applicability of Part 74 to institutions of higher education, hospitals, and other nonprofit organizations. The Secretary is publishing those amendments as final regulations elsewhere in this issue of the **Federal Register.**

Section ____.5 of the common regulations provides—

> All other grants administration provisions of codified program regulations, program manuals, handbooks and other nonregulatory materials which are inconsistent with this part are superseded, except to the extent they are required by statute, or authorized in accordance with the exception provision in § ____.6.

As stated in the general preamble to this rulemaking document, each agency must specify those regulations that are revoked under this section. The Department is in the process of identifying those program regulations that must be revoked and in the near future will publish a notice of propsoed rulemaking to take appropriate action. The Secretary plans to publish the final rulemaking document regarding revocations before the effective date for Part 80, October 1, 1988.

There are hundreds of cross references to the current Part 74 throughout the Department's program regulations. These cross references are being reviewed to determine which of them should be amended to refer only to Part 80, to Part 74, or only to Part 74. The technical amendments necessary to make these changes will be published in the document addressing inconsistent program regulations.

In the notice of proposed rulemaking for the common regulations the Secretary proposed three changes to the common regulations. The Secretary did not receive any comments on these proposed changes. They are discussed below.

The first change is necessary under section 412 of the Department of Education Organization Act (DEOA). 20 U.S.C. 3472. Under this section the Secretary may delegate the functions of the Department only to officers and employees of the Department. However, § ____.6(b) of the common regulations has the effect of delegating one of the Secretary's functions to employees of the Office of Management and Budget—authorizing OMB to grant exceptions to the common regulations as promulgated by the Secretary for the programs administered by the Department of Education. In order to avoid any conflict with the DEOA, the Secretary revises § ____.6(b) so that the Secretary may authorize exceptions to the common regulations after consultation with appropriate officials of OMB.

The second change is necessary to ensure that disaster assistance under 20 U.S.C. 241-1(b)-(c) and the construction provisions of the Impact Aid program (20 U.S.C. 631-647) are administered consistently with their statutory purpose. Under the disaster assistance program the Department provides assistance to local educational agencies (LEAs) that have been affected by certain major disasters. Under the construction program the Department provides assistance to LEAs to build educational facilities. Under the statute an LEA must use the facility to educate eligible children. However, if there are no longer any eligible children to educate at the facility, the facility may be used for any purpose subject only to the requirement that the LEA maintain accessibility to the facility for 20 years after its construction. The application of § ____.31(c) is inappropriate in the context of these statutory programs. A similar analysis applies to the equipment provisions of § ____.32 (c), (d), (e), and (g). Therefore the Secretary excepts the disaster assistance program and the Impact Aid construction program from the requirements of §§ 80.31(c) and 80.32 (c), (d), (e), and (g).

The third change is necessary to implement the five-year record retention rule required by section 437 of the General Education Provisions Act (GEPA) (20 U.S.C. 1232f). Section ____.42(b) of the common regulations requires a recipient to maintain a record for only 3 years unless a longer retention period is necessary to resolve issues pursuant to any litigation, claim, negotiation, audit, or other action involving the record. The Secretary adds a paragraph (b)(4) to § ____.42 of the common regulations to clarify that a recipient must maintain a record for a minimum of five years after the completion of the activity for which funds are used under an "applicable program" covered by GEPA.

This amendment has the effect of establishing a minimum 5-year record retention period under most programs administered by the Department. However, we note that certain programs such as those programs administered by the Commissioner of the Rehabilitative Services Administration under the Rehabilitation Act of 1973, as amended, still are subject to the 3-year record retention rule contained in the common regulations.

Finally, the Secretary adds authority citations after every substantive provision of the common regulations. These authority citations are required under section 431 of GEPA (20 U.S.C. 1232(a)(2)).

List of Subjects in 34 CFR Part 80

Accounting, Administrative practice and procedures, Grant programs—education, Grants administration, Insurance, Reporting and recordkeeping requirements.

Dated: February 16, 1988.

(Catalog of Federal Domestic Assistance Number: Not Applicable)

William J. Bennett,

Secretary of Education.

The Secretary amends Title 34 of the Code of Federal Regulations by adding a new 34 CFR Part 80 as set forth below.

1. Part 80 is added as set forth at the end of this document:

PART 80—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
80.1 Purpose and scope of this part.
80.2 Scope of subpart.
80.3 Definitions.
80.4 Applicability.
80.5 Effect on other issuances.
80.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

80.10 Forms of applying for grants.
80.11 State plans.
80.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

80.20 Standards for financial management systems.
80.21 Payment.
80.22 Allowable costs.
80.23 Period of availability of funds.
80.24 Matching or cost sharing.
80.25 Program income.
80.26 Non-Federal audit.

Changes, Property, and Subawards

80.30 Changes.
80.31 Real property.
80.32 Equipment.
80.33 Supplies.
80.34 Copyrights.
80.35 Subawards to debarred and suspended parties.
80.36 Procurement.
80.37 Subgrants.

Reports, Records Retention, and Enforcement

80.40 Monitoring and reporting program performance.
80.41 Financial reporting.
80.42 Retention and access requirements for records.
80.43 Enforcement.
80.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

80.50 Closeout.
80.51 Later disallowances and adjustments.
80.52 Collections of amounts due.

Subpart E—Entitlements [Reserved]

Appendix to Part 80—Audit Requirements for State and Local Governments

Authority: 20 U.S.C. 3474; OMB Circular A-102, unless otherwise noted.

2. Part 80 is further amended, as follows.

a. Section 80.3 is amended by adding paragraph (1) following the definition of "State" to read as follows:

§ 80.3 Definitions

* * * * *

(1) The definition of "State" in this section is used for the purpose of determining the scope of Part 80 regulations. Some program regulations contain different definitions for "State" based on program statute eligibility requirements.

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

b. Section 80.6, paragraph (b), is revised to read as follows:

§ 80.6 Additions and exceptions.

* * * * *

(b) Exceptions for classes of grants or grantees may be authorized only by the Secretary after consultation with OMB.

* * * * *

c. Section 80.22 is amended by revising paragraph (b) to read as follows:

§ 80.22 Allowable costs.

* * * * *

(b) For each kind of organization, there is a set of Federal principles for determining allowable costs. For the costs of a State, local, or Indian tribal government, the Secretary applies the cost principles in OMB Circular A–87, as amended on June 9, 1987.

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

d. A note is added following § 80.26, to read as follows:

§ 80.26 Non-Federal audit.

* * * * *

Note: The requirements for non-Federal audits are contained in the Appendix to Part 80—Audit Requirements for State and Local Governments.

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

e. Section 80.31 is amended by adding a new paragraph (d) to read as follows:

§ 80.31 Real property.

* * * * *

(d) The provisions of paragraph (c) of this section do not apply to disaster assistance under 20 U.S.C. 241–1(b)–(c) and the construction provisions of the Impact Aid Program, 20 U.S.C. 631–647.

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

f. Section 80.32 is amended by adding a new paragraph (h) to read as follows:

§ 80.32 Equipment.

* * * * *

(h) The provisions of paragraphs (c), (d), (e), and (g) of this section do not apply to disaster assistance under 20 U.S.C. 241–1(b)–(c) and the construction provisions of the Impact Aid Program, 20 U.S.C. 631–647.

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

g. Section 80.42(b) is amended by adding a new paragraph (b)(4) to read as follows:

§ 80.42 Retention and access requirements for records.

* * * * *

(b) *Length of retention period.* * * *

(4) A recipient that receives funds under a program subject to 20 U.S.C. 1232f (section 437 of the General Education Provisions Act) shall retain records for a minimum of five years after the starting date specified in paragraph (c) of this section.

* * * * *

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

h. An authority citation is added after each section in Part 80 to read as follows:

(Authority: 20 U.S.C. 3474; OMB Circular A–102.)

PART 74—[AMENDED]

Appendix G to Part 74—[Redesignated as Appendix to Part 80]

i. Appendix G—Audit Requirements for State and Local Governments at the end of 34 CFR Part 74 is redesignated as "Appendix to Part 80—Audit Requirements for State and Local Governments" and added to the end of Part 80.

BILLING CODE 4000-01-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1207

FOR FURTHER INFORMATION CONTACT: Adrienne C. Thomas at 202–523–3214 (FTS 523–3214).

ADDITIONAL SUPPLEMENTARY INFORMATION: The National Historical Publications and Records Commission (NHPRC) program provides grants, when funds are available, to State and local governments, historical societies, archives, libraries and associations for the preservation, arrangement and description of historical records and for a broad range of archival training and development programs. The Catalog of Federal Domestic Assistance number is 89.003.

List of Subjects in 36 CFR Part 1207

Accounting, Administrative practice and procedure, Grant programs—Archives and records, Grants administration, Insurance, Reporting and recordkeeping requirements.

Title 36 of the Code of Federal Regulations is amended by adding Part 1207 as set forth at the end of this document.

Dated: February 17, 1988.

Don W. Wilson,
Archivist of the United States.

PART 1207—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
1207.1 Purpose and scope of this part.
1207.2 Scope of subpart.
1207.3 Definitions.
1207.4 Applicability.
1207.5 Effect on other issuances.
1207.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

1207.10 Forms for applying for grants.
1207.11 State plans.
1207.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

1207.20 Standards for financial management systems.
1207.21 Payment.
1207.22 Allowable costs.
1207.23 Period of availability of funds.
1207.24 Matching and cost sharing.
1207.25 Program income.
1207.26 Non-Federal audit.

Changes, Property, and Subawards

1207.30 Changes.
1207.31 Real property.
1207.32 Equipment.
1207.33 Supplies.
1207.34 Copyrights.
1207.35 Subawards to debarred and suspended parties.
1207.36 Procurement.
1207.37 Subgrants.

Reports, Records Retention, and Enforcement

1207.40 Monitoring and reporting program performance.
1207.41 Financial reporting.
1207.42 Retention and access requirements for records.
1207.43 Enforcement.
1207.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

1207.50 Closeout.
1207.51 Later disallowances and adjustments.
1207.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 44 U.S.C. 2104.

BILLING CODE 7515-01-M

VETERANS ADMINISTRATION

38 CFR Part 43

FOR FURTHER INFORMATION CONTACT: Gail A. Gompf, Director, Office of Intergovernmental Affairs (00A1), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–3116.

ADDITIONAL SUPPLEMENTARY INFORMATION: This new authority codifies the long-standing OMB Circular A–102 used in whole or in part by all Federal agencies in their grant programs. The effect upon the Veterans Administration (VA) will be felt in its State home acquisition or construction grants and its State cemetery grants. Specifically, the regulations will affect applicants for Federal assistance from the VA for acquisition or construction of State extended care facilities and State cemeteries.

Applicants shall follow all applicable standard instructions promulgated by these final regulations. All other grant administration provisions of codified program regulations, program manuals, handbooks, and other nonregulatory materials which are inconsistent with these final regulations are superseded, except to the extent that they are required by statute, or authorized in accordance with certain exceptions (see § 43.6).

These regulations will not apply to payments to States at statutorily required per diem rates for each eligible veteran who receives care in a recognized State home (38 U.S.C. 641(a)). These payments are excepted from these regulations because the payments are computed on a per diem basis (38 CFR 43.4(a)).

List of Subjects in 38 CFR Part 43

Accounting, Administrative practice and procedure, Grant programs—State cemeteries and State home facilities, Grants administration, Insurance, Reporting and recordkeeping requirements.

Title 38 of the Code of Federal Regulations is amended by adding Part 43 as set forth at the end of this document.

Thomas K. Turnage,
Administrator.

Approved: February 3, 1988.

PART 43—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
43.1 Purpose and scope of this part.
43.2 Scope of subpart.
43.3 Definitions.
43.4 Applicability.
43.5 Effect on other issuances.
43.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

43.10 Forms for applying for grants.
43.11 State plans.
43.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

43.20 Standards for financial management systems.
43.21 Payment.
43.22 Allowable costs.
43.23 Period of availability of funds.
43.24 Matching or cost sharing.
43.25 Program income.
43.26 Non-Federal audit.

Changes, Property, and Subawards

43.30 Changes.
43.31 Real property.
43.32 Equipment.
43.33 Supplies.
43.34 Copyrights.
43.35 Subawards to debarred and suspended parties.
43.36 Procurement.
43.37 Subgrants.

Reports, Records Retention, and Enforcement

43.40 Monitoring and reporting program performance.
43.41 Financial reporting.
43.42 Retention and access requirements for records.
43.43 Enforcement.
43.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

43.50 Closeout.
43.51 Later disallowances and adjustments.
43.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 38 U.S.C. 210, 38 U.S.C. 612, E.O. 11541.

Newly added Part 43 is further amended by adding paragraph § 43.4(a)(10) to read as follows:

§ 43.4 Applicability.

(a) * * *

(10) Payments to States at per diem rates for veterans receiving care in recognized State homes.

(Authority: 38 U.S.C. 641–643)

* * * * *

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 30, 31, and 33

[FRL 3320–9]

FOR FURTHER INFORMATION CONTACT: Richard Mitchell, Grants Policy and Procedures Branch (PM–216F), United States Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382–5297 (This is not a toll free number.)

ADDITIONAL SUPPLEMENTARY INFORMATION: On March 12, 1987, President Reagan directed all Federal assistance awarding agencies to publish for State and local government grantees "common regulations that adopt the government-wide terms and conditions *verbatim* (emphasis added), except where there are inconsistent statutory requirements." The President's directive calls for promulgation of the final rule on March 11, 1988. To that end, Federal Agencies are jointly publishing a common rule to establish consistency and uniformity among all Federal assistance awarding agencies in the administration of grants and cooperative agreements to State, local, and federally recognized Indian tribal governments. The common rule, as part of the President's regulatory relief program, is further designed to reduce the burden of regulation and paperwork for the Environmental Protection Agency's (EPA) grantees. When effective (on October 1, 1988), this rule will become 40 CFR Part 31 and will supersede certain of EPA's general assistance regulations at 40 CFR Parts 30 and 33.

In the **Federal Register** of June 9, 1987, EPA, along with other agencies, published its proposed agency-specific preamble to the common rule. EPA's preamble discussed certain proposed additiions to the rule and changes to the current 40 CFR Parts 30 and 33. These additions/changes will be applicable only to grants and cooperative agreements awarded by EPA. EPA requested that its readers comment on the proposed additons/changes. EPA received no comments specifically addressing our proposed additions/changes. The Office of Management and Budget (OMB), however, received a number of comments on the common rule itself. Those comments and their reconciliation are discussed in detail in the common preamble to the rule,

VOL
53
ISS
48
MR
11
988
MI

published in conjunction with this notice.

In the June 9, 1987, **Federal Register** EPA indicated that, after the effective date of the common rule, our general assistance regulation at 40 CFR Part 30 would consist of two Subparts: Subpart A, the common rule with EPA's additions; and Subpart B, the current Part 30 paragraphs applicable to grantees other than State and local governments. Subsequent to that publication, it was determined that such a format might be confusing. Therefore, EPA has decided to publish the common rule with EPA's additions at 40 CFR Part 31. Part 31 will be applicable to State, local and federally recognized Indian tribal governments. Part 30 will be revised so as to consist of those paragraphs which are applicable to grantees other than State and local governments.

Inasmuch as no negative comments were received on EPA's other proposed additions/changes as discussed in the June 9, 1987, **Federal Register**, they are being adopted.

Following is a summary of EPA's additions/changes:

The common rule with EPA's additions will become 40 CFR Part 31 and will be applicable to State, local and federally recognized Indian tribal governments. 40 CFR Part 30 will consist of those paragraphs of the current Part 30 which are applicable to grantees other than State and local governments.

The additions which are part of the common rule at Part 31 include:

(1) A list of the principal environmental statutory provisions applicable to EPA assistance programs. This list is at § 31.13.

(2) Buy American, 40 CFR 33.710 (required by section 215 of the Clean Water Act) is part of § 31.36 at subparagraph (c)(5) and applies only to the wastewater treatment construction grants program.

(3) Payments to Consultants, 40 CFR 33.280 (required by Pub. L. 99–591) is part of § 31.36 at subparagraph (j).

(4) Quality Assurance, 40 CFR 30.503. Many of EPA's grant awards involve the development and use of scientific and technical data. Reports, findings, data, etc., developed under such grants are used for a variety of purposes, each having a potential for wide-ranging environmental impacts. Beause of the sensitive nature of these impacts, it is imperative that EPA's grantees develop a quality assurance program designed to ensure that the project will result in the highest quality scientific and technical data possible. This will be § 31.45.

(5) 40 CFR Part 30, Subpart L, "How are Disputes Between EPA Officials and Me Resolved?" is 40 CFR Part 31, Subpart F: Disputes.

(6) 40 CFR Part 30, Appendix E—Part 30 Audit Requirements for State and Local Government Recipients, will become 40 CFR Part 31, Appendix A—Audit Requirements for State and Local Government Grantees.

EPA's Part 30 contains those sections of current 40 CFR Part 30 which will be applicable to grantees other than State and local governments (i.e., institutions of higher education, hospitals, or other nonprofit organizations). Listed below are those sections of the current 40 CFR Part 30 which are deleted. Those sections *not* listed will remain at 40 CFR Part 30 (for grantees other than State and local governments) and are renumbered as appropriate.

40 CFR	*Reason for deletion/revision*
§ 30.302(d) (2) and (3).	Application requirements for State and local governments only.
§ 30.501(a)(2)	State and local requirement for submitting Financial Status Report (SF269).
§ 30.503 (e), (g), and (h).	State and local requirement for submitting a quality assurance plan.
§ 30.505(b)(2)	Report submittal required only for construction grant projects.
§ 30.540(b) and Appendix E.	Requirements for audits of State and local governments only.

Publication of the common rule requires changes in our current regulation at 40 CFR Part 33, Procurement Under Assistance Agreements, to delete or revise certain sections which are applicable only to State and local governments and, therefore, are superseded by the common rule. Those remaining are applicable only to institutions of higher education, hospitals, and other nonprofit organizations. Listed below are those sections which EPA is deleting or revising:

40 CFR	*Reason for Deletion*
§ 33.110(a)(5)	Delete this section because it is a procurement requirement related only to Superfund remedial action construction awards.
§ 30.210(f)	Delete this section as it relates to formal advertising only for remedial action awards under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).
§ 33, Subpart C	Delete this Subpart because it is applicable only to the wastewater treatment construction grant program.
§ 33, Subpart E	Delete this Subpart because it is applicable only to remedial action awards under CERCLA and are not required for grantees other than State and local governments.
§ 33, Subpart F, § 33.1021 and § 33.1030, paragraphs 3, 4, 8, and 12.	Delete these provisions in Subpart F because they do not apply to institutions of higher education, hospitals, and other nonprofit organizations.

In the June 9, 1987, Notice of Proposed Rulemaking, EPA specifically requested its readers to comment on two additional matters being considered for inclusion in the common rule. These were:

(1) The current 40 CFR Part 30, Subpart I includes a provision for annulling assistance agreements if the grantee, without good cause, inordinately delayed or made no substantial progress on the project, obtained the award by fraud or misrepresentation, or practices corrupt administrative procedures. Annulment can result in recovery of all funds received for the project including those already expended.

(2) In the conduct of EPA's wastewater treatment construction grants program, grantees may be allowed to retain the services of the same architect or engineer during subsequent work on the project. This provision has been invaluable in this program as it helps ensure continuity through the life of a project since the architect or engineer is familiar with the project and it minimizes procurement actions for the grantee.

Since no negative comments were received, EPA is adding these provisions to EPA's version of the common rule. The information collection requirements for the application procedures in this rule were approved by OMB under the *Paperwork Reduction Act*, 44 U.S.C. 3501 *et seq.* (OMB control number 2030–0020).

List of Subjects in 40 CFR Parts 30, 31, and 33

Accounting, Administrative practice and procedures, Grant programs, Grants Administration, Reporting and recordkeeping requirements

Title 40 of the Code of Federal Regulations is amended as set forth below.

Lee M. Thomas,
Administrator.
March 3, 1988.

1. Part 31 is added as set forth at the end of this document.

PART 31—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
31.1 Purpose and scope of this part.
31.2 Scope of subpart.
31.3 Definitions.
31.4 Applicability.
31.5 Effect on other issuances.
31.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

31.10 Forms for applying for grants.
31.11 State plans.
31.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

31.20 Standards for financial management systems.
31.21 Payment.
31.22 Allowable costs.
31.23 Period of availability of funds.
31.24 Matching or cost sharing.
31.25 Program income.
31.26 Non-Federal audit.

Changes, Property, and Subawards

31.30 Changes.
31.31 Real Property.
31.32 Equipment.
31.33 Supplies.
31.34 Copyrights.
31.35 Subawards to debarred and suspended parties.
31.36 Procurement.
31.37 Subgrants.

Reports, Record Retention, and Enforcement

31.40 Monitoring and reporting program performance.
31.41 Financial reporting.
31.42 Retention and access requirements for records.
31.43 Enforcement.
31.44 Termination for convenience.

Subpart D—After-The-Grant Requirements

31.50 Closeout.
31.51 Later disallowances and adjustments.
31.52 Collection of amounts due.

Subpart E—Entitlement [Reserved]

Subpart F—Disputes

31.70 Disputes.

Authority: 33 U.S.C. 1251 et seq.; 42 U.S.C. 7401 et seq.; 42 U.S.C. 6901 et seq.; 42 U.S.C. 300f et seq.; 7 U.S.C. 136 et seq.; 15 U.S.C. 2601 et seq.; 42 U.S.C. 9601 et seq.; 20 U.S.C. 4011 et seq.; 33 U.S.C. 1401 et seq.

2. Further amend Part 31 as follows:

a. Amend § 31.6 by adding new paragraphs (c)(1) and (d) to read follows:

§ 31.6 Additions and exceptions.

* * * * *

(c) * * *

(1) In the Environmental Protection Agency, the Director, Grants Administration Division, is authorized to grant the exceptions.

(d) The EPA Director is also authorized to approve exceptions, on a class or an individual case basis, to EPA program—specific assistance regulations other than those which implement statutory and executive order requirements.

b. Add a new § 31.13 to Subpart B to read as follows:

§ 31.13 Principal environmental statutory provisions applicable to EPA assistance awards.

Grantees shall comply with all applicable Federal laws including:

(a) Section 306 of the Clean Air Act, (42 U.S.C. 7606).

(b) Section 508 of the Federal Water Pollution Control Act, as amended, (33 U.S.C. 1368).

(c) Section 1424(e) of the Safe Drinking Water Act, (42 U.S.C. 300h–3(e)).

c. Amend § 31.36 by adding new paragraphs (c)(5), (j), and (k) to read as follows:

§ 31.36 Procurement.

* * * * *

(c) * * *

(5) Construction grants awarded under Title II of the Clean Water Act are subject to the following "Buy American" requirements in paragraphs (c)(5)(i)–(iii) of this section. Section 215 of the Clean Water Act requires that contractors give preference to the use of domestic material in the construction of EPA-funded treatment works.

(i) Contractors must use domestic construction materials in preference to nondomestic material if it is priced no more than 6 percent higher than the bid or offered price of the nondomestic material, including all costs of delivery to the construction site and any applicable duty, whether or not assessed. The grantee will normally base the computations on prices and costs in effect on the date of opening bids or proposals.

(ii) The award official may waive the Buy American provision based on factors the award official considers relevant, including:

(A) Such use is not in the public interest;

(B) The cost is unreasonable;

(C) The Agency's available resources are not sufficient to implement the provision, subject to the Deputy Administrator's concurrence;

(D) The articles, materials or supplies of the class or kind to be used or the articles, materials or supplies from which they are manufactured are not mined, produced or manufactured in the United States in sufficient and reasonably available commerical quantities or satisfactory quality for the particular project; or

(E) Application of this provision is contrary to multilateral government procurement agreements, subject to the Deputy Administrator's concurrence.

(iii) All bidding documents, subagreements, and, if appropriate, requests for proposals must contain the following "Buy American" provision: In accordance with section 215 of the Clean Water Act (33 U.S.C. 1251 et seq.) and implementing EPA regulations, the contractor agrees that preference will be given to domestic construction materials by the contractor, subcontractors, materialmen and suppliers in the performance of this subagreement.

* * * * *

(j) *Payment to consultants.*

(1) EPA will limit its participation in the salary rate (excluding overhead) paid to individual consultants retained by grantees or by a grantee's contractors or subcontractors to the maximum daily rate for a GS–18. (Grantees may, however, pay consultants more than this amount). This limitation applies to consultation services of designated individuals with specialized skills who are paid at a daily or hourly rate. This rate does not include transportation and subsistence costs for travel performed; grantees will pay these in accordance with their normal travel reimbursement practices. (Public Law 99–591)

(2) Subagreements with firms for services which are awarded using the procurement requirements in this part are not affected by this limitation.

(k) *Use of the same architect or engineer during construction.*

(1) If the grantee is satisfied with the qualifications and performance of the architect or engineer who provided any or all of the facilities planning or design services for a waste-water treatment works project and wishes to retain that firm or individual during construction of the project, it may do so without further public notice and evaluation of qualifications, provided:

(i) The grantee received a facilities planning (Step 1) or design grant (Step 2), and selected the architect or engineer in accordance with EPA's procurement regulations in effect when EPA awarded the grant; or

(ii) The award official approves noncompetitive procurement under § 31.36(d)(4) for reasons other than simply using the same individual or firm that provided facilities planning or design services for the project; or

(iii) The grantee attests that:

(A) The initial request for proposals clearly stated the possibility that the firm or individual selected could be awarded a subagreement for services during construction; and

(B) The firm or individual was selected for facilities planning or design services in accordance with procedures specified in this section.

(C) No employee, officer or agent of the grantee, any member of their immediate families, or their partners have financial or other interest in the firm selected for award; and

(D) None of the grantee's officers, employees or agents solicited or accepted gratuities, favors or anything of monetary value from contractors or other parties to subagreements.

(2) However, if the grantee uses the procedures in paragraph (k)(1) of this section to retain an architect or engineer, any Step 3 subagreements between the architect or engineer and the grantee must meet all of the other procurement provisions in § 31.36.

d. Section 31.43 is amended by adding paragraph (a)(3)(i) to read as follows:

§ 31.43 Enforcement.

(a) * * *

(3) * * * (i) EPA can also wholly or partly annul the current award for the grantee's or subgrantee's program.

(e) Add a new § 31.45 to Subpart C to read as follows:

§ 31.45 Quality assurance.

If the grantee's project involves environmentally related measurements or data generation, the grantee shall develop and implement quality assurance practices consisting of policies, procedures, specifications, standards, and documentation sufficient to produce data of quality adequate to meet project objectives and to minimize loss of data due to out-of-control conditions or malfunctions.

f. Add a new 40 CFR Part 31, Subpart F, consisting of § 31.70 to read as follows:

Subpart F—Disputes

§ 31.70 Disputes.

(a) Disagreements should be resolved at the lowest level possible.

(b) If an agreement cannot be reached, the EPA disputes decision official will provide a written final decision. The EPA disputes decision official is the individual designated by the award official to resolve disputes concerning assistance agreements.

(c) The disputes decision official's decision will constitute final agency action unless a request for review is filed by registered mail, return receipt requested, within 30 calendar days of the date of the decision.

(1) For final decisions issued by an EPA disputes decision official at Headquarters, the request for review shall be filed with the Assistant Administrator responsible for the assistance program.

(2) For final decisions issued by a Regional disputes decision official, the request for review shall be filed with the Regional Administrator. If the Regional Administrator issued the final decision, the request for reconsideration shall be filed with the Regional Administrator.

(d) The request shall include:

(1) A copy of the EPA disputes decision official's final decision;

(2) A statement of the amount in dispute;

(3) A description of the issues involved; and

(4) A concise statement of the objections to the final decision.

(e) The disputant(s) may be represented by counsel and may submit documentary evidence and briefs for inclusion in a written record.

(f) Disputants are entitled to an informal conference with EPA officials.

(g) Disputants are entitled to a written decision from the appropriate Regional or Assistant Administrator.

(h) A decision by the Assistant Administrator to confirm the final decision of a Headquarters disputes decision official will constitute the final Agency action.

(i) A decision by the Regional Administrator to confirm the Regional disputes decision official's decision will constitute the final Agency action. However, a petition for discretionary review by the Assistant Administrator responsible for the assistance program may be filed within 30 calendar days of the Regional Administrator's decision. The petition shall be sent to the Assistant Administrator by registered mail, return receipt requested, and shall include:

(1) A copy of the Regional Administrator's decision; and

(2) A concise statement of the objections to the decision.

(j) If the Assistant Administrator decides not to review the Regional Administrator's decision, the Assistant Administrator will advise the disputant(s) in writing that the Regional Administrator's decision remains the final Agency action.

(k) If the Assistant Administrator decides to review the Regional Administrator's decision, the review will generally be limited to the written record on which the Regional Administrator's decision was based. The Assistant Administrator may allow the disputant(s) to submit briefs in support of the petition for review and may provide an opportunity for an informal conference in order to clarify technical or legal issues. After reviewing the Regional Administrator's decision, the Assistant Administrator will issue a written decision which will then become the final Agency action.

(l) Reviews may not be requested of:

(1) Decisions on requests for exceptions under § 31.6;

(2) Bid protest decisions under § 31.36(b)(12);

(3) National Environmental Policy Act decisions under Part 6;

(4) Advanced wastewater treatment decisions of the Administrator; and

(5) Policy decisions of the EPA Audit Resolution Board.

PART 30—GENERAL REGULATION FOR ASSISTANCE PROGRAMS FOR OTHER THAN STATE AND LOCAL GOVERNMENTS

3. Amend Part 30 by revising the title to read as set forth above; the authority citation continues to read as follows:

Authority: 33 U.S.C. 1251 et seq.; 42 U.S.C. 7401 et seq.; 42 U.S.C. 6901 et seq.; 42 U.S.C. 300f et seq.; 7 U.S.C. 136 et seq.; 15 U.S.C. 2601 et seq.; 42 U.S.C. 9601 et seq.

4. Further amend Part 30 as follows:

§ 30.302 [Amended]

a. Amend § 30.302 by removing paragraphs (d) (2) and (3).

§ 30.501 [Amended]

b. Amend § 30.501 by removing paragraph (a)(2) and redesignating (a)(3) as (a)(2).

§ 30.503 [Amended]

c. Amend § 30.503 by removing paragraphs (e), (g) and (h) and redesignating (f) as (e).

§ 30.505 [Amended]

d. Amend § 30.505 by removing paragraph (b)(2) and redesignating (b)(3) as (b)(2).

§ 30.540 [Amended]

e. Amend § 30.540 by removing paragraph (b) and redesignating (c) as (b).

Appendix E—Redesignated as Appendix A to Part 31

f. Appendix E is redesignated as Appendix A to Part 31.

PART 33—PROCUREMENT UNDER ASSISTANCE AGREEMENTS

5. Amend Part 33 as follows:

a. The authority citation for Part 33 continues to read as follows:

Authority: 7 U.S.C. 135 et seq.; 15 U.S.C. 2601 et seq.; 33 U.S.C. 1251 et seq.; 42 U.S.C. 241, 242b, 243, 246, 300j–1, 300j–2, 300j–3, 1857 et seq., 6901 et seq.; and 42 U.S.C. 9601 et seq.

§ 33.110 [Amended]

b. Amend § 33.110 by removing paragraph (e)(5) and redesignating (e)(6) as (e)(5).

§ 33.210 [Amended]

c. Amend § 33.210 by removing paragraph (f) and redesignating (g) and (h) as (f) and (g) respectively.

Subparts C and E—[Removed and Reserved]

d. Subparts C and E are removed and reserved.

§ 33.1021 [Removed and Reserved]

e. § 33.1021 is removed and reserved.

§ 33.1030 [Amended]

f. Amend § 33.1030 by removing clauses 3, 4, 8, and 12 and redesignating 5 as 3, 6 as 4, 7 as 5, 9 as 6, 10 as 7, 11 as 8, 13 as 9, and 14 as 10.

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

43 CFR Part 12

FOR FURTHER INFORMATION CONTACT: Colonel C. Armstrong, Deputy Director, Office of Acquisition and Property Management, Room 5512, Department of the Interior, Washington, DC 20240, Phone: 202–343–6431.

ADDITIONAL SUPPLEMENTARY INFORMATION:

Rescissions

Provisions of Department of the Interior regulations listed at 43 CFR 12.2(b) which are inconsistent with the common rule are hereby rescinded. 43 CFR 12.3(b) has been revised accordingly.

Comments on the Proposed Rule

Comments received by the Department of the Interior were reproduced and exchanged among all of the agencies and used to prepare this final rule.

One commentor suggested that all statutes applicable to Indian tribal governments be listed as exceptions to the common rule because of the unique status of tribal governments. Since § 12.44 (§ ____.4) provides a preference for Federal statutes which are inconsistent with the provisions of the common rule, no change has been made.

Another comment recommended that § 12.72(b) (§ ____.32(b)) be changed to allow equipment acquired by tribal governments under grants to be used, managed and disposed of in accordance with tribal laws and procedures. This recommendation cannot be adopted since local governments and Indian tribal governments will administer direct grants according to the requirements of the common rule (i.e., paragraphs (c) through (e) of § 12.45 (§ ____.32)). "Pass-through" funds subgranted by a State to an Indian tribal government are administered according to State laws and procedures.

This rule is effective for grants and cooperative agreements awarded on or after October 1, 1988, the start of the next Federal fiscal year.

List of Subjects in 43 CFR Part 12

Cooperative agreements, Grants administration, Grant program, Indians.'

Title 43, Part 12, of the Code of Federal Regulations is amended as set forth below.

Rick Ventura,

Assistant Secretary-Policy, Budget and Administration.

Date: February 1, 1988.

PART 12—ADMINISTRATIVE REQUIREMENTS AND COST PRINCIPLES FOR ASSISTANCE PROGRAMS

1. The authority citation for Part 12 is revised to read as follows:

Authority: 5 U.S.C. 301; Pub. L. 98–502; OMB Circular A–102; OMB Circular A–110; OMB Circular A–128.

Subpart A—Administrative Requirements and Cost Principles

2. Subpart A is amended as set forth below.

a. Section 12.2 (b)(1) is amended by adding an additional sentence to the end of the paragraph to read as follows:

§ 12.2 Policy.

* * * * *

(b)(1) * * * Departmental regulations implementing Circular A–102 are contained in Subpart C, 43 CFR Part 12.

* * * * *

b. Section 12.3 (b) is amended by revising "All" to read "all" and inserting the following words at the beginning of the sentence to read as follows:

§ 12.3 Effect on prior issuances.

* * * * *

(b) Except to the extent inconsistent with the regulations in 43 CFR Part 12, Subpart C, * * *

3. Subpart C is added to read as set forth at the end of this document.

Subpart C—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments

General

Sec.
12.41 (____.1) Purpose and scope of this part.
12.42 (____.2) Scope of subpart.
12.43 (____.3) Definitions.
12.44 (____.4) Applicability.
12.45 (____.5) Effect on other issuances.
12.46 (____.6) Additions and exceptions

Pre-Award Requirements

12.50 (____.10) Forms for applying for grants.
12.51 (____.11) State plans.
12.52 (____.12) Special grant or subgrant conditions for "high-risk" grantees.

Post-Award Requirements

Financial Administration

12.60 (____.20) Standards for financial management systems.
12.61 (____.21) Payment.
12.62 (____.22) Allowable costs.
12.63 (____.23) Period of availability of funds.
12.64 (____.24) Matching or cost sharing.
12.65 (____.25) Program income.
12.66 (____.26) Non-Federal audit.

Changes, Property, and Subawards

12.70 (____.30) Changes.
12.71 (____.31) Real Property
12.72 (____.32) Equipment
12.73 (____.33) Supplies.
12.74 (____.34) Copyrights
12.75 (____.35) Subawards to debarred and suspended parties.
12.76 (____.36) Procurement.

12.82 (____.42) Retention and access requirements for records.
12.83 (____.43) Enforcement.
12.84 (____.44) Termination for convenience

After the Grant Requirements

12.90 (____.50) Closeout.
12.91 (____.51) Later disallowances and adjustments.
12.92 (____.52) Collection of amounts due.

Entitlements [Reserved]

BILLING CODE 4310-RF-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 13

FOR FURTHER INFORMATION CONTACT: Arthur E. Curry, Office of the

Comptroller Policy Division (202) 646–3717.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency intends to incorporate the proposed rule as Part 13 of Title 44 of the Code of Federal Regulations.

Though the agency has never issued formal Assistance Standards in the Code of Federal Regulations, it did issue guidance for its recipients in FEMA's issuance of Financial Assistance Guidelines, CPG 1–32. These guidelines were issued to all of our assistance programs with the exception of the Disaster Assistance Program for the reasons cited:

As a general comment, the proposed revision to OMB Circular A–102 may work well for most Federal assistance grant programs under which predetermined amounts of Federal funds from annual appropriations are made available to grantees with expenditures governed by OMB's applicable administrative standards and cost-principles. By contrast, FEMA's Disaster Relief Assistance Program immediately follows unanticipated major disasters and consists of open-ended reimbursement-type grants made from no-year appropriations to large numbers of disasters affected communities, many of which are very small and do not have approved indirect cost agreements.

It is difficult to assess the full impact of the final common rule on FEMA's administration of the disaster relief program, and the public assistance program in particular, without further indepth review. Some of the significant impacts contained in the draft final rule include:

—An effective date of October 1, 1988, (or earlier) for grants awarded after that date or an earlier date. This could result in major disasters declared prior to October 1, 1988, with some grants awarded before and some awarded after the effective date.

—The supersession of program regulations and handbooks not in compliance (Subpart A, Section 5, page 8). Presumably, grants awarded prior to October 1, 1988, would be governed by the existing regulations and handbooks.

—The possible requirement for State plans for major disasters declared after October 1, 1988 (Subpart B, Section 1), page 10). This would also imply that a State Plan would be required for grants awarded subsequent to October 1, 1988, on previously declared major disasters.

—The application of Allowable Costs in OMB Circular A–87 to State and local governments for grants awarded subsequent to October 1, 1988 (Subpart C, Section 22, page 13). Also, it would require the use of OMB Circular A–21 and A–122 for grants made to private nonprofit organizations and educational institutions after October 1, 1988.

—The application of the value of third-party in-kind contributions to meet FEMA cost sharing requirements on grants awarded subsequently to October 1, 1988 (Subpart C, Section 24, page 14). Although such records must be verifiable, this provision will weaken the existing cost-sharing requirement for disaster relief assistance.

—The requirement that State grantees and subgrantees develop and utilize comprehensive procurement policies and procedures, including a contract administration system (Subpart C, Section 36, page 24).

FEMA will submit a formal request to exempt the Disaster Assistance Program prior to October 1, 1988.

In the future, we may amend Part 13 of Title 44 as future needs dictate.

List of Subjects in 44 CFR Part 13

Accounting, Administrative practice and procedure, Grant programs—civil defense, disaster, hazardous materials and fire training, Grants Administration, Insurance, Reporting and recordkeeping requirements.

It is proposed that Title 44 of the Code of Federal Regulations be amended by adding Part 13 as set forth at the end of this document.

Arthur E. Curry,
Chief, Policy Division.

PART 13—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
13.1 Purpose and scope of this part.
13.2 Scope of subpart.
13.3 Definitions.
13.4 Applicability.
13.5 Effect on other issuances.
13.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

13.10 Forms for applying for grants.
13.11 State plans.
13.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

13.20 Standards for financial management systems.
13.21 Payment.
13.22 Allowable costs.
13.23 Period of availability of funds.
13.24 Matching or cost sharing.
13.25 Program income.
13.26 Non-Federal audit.

Changes, Property, and Subawards

13.30 Changes.
13.31 Real property.
13.32 Equipment.
13.33 Supplies.

13.35 Subawards to debarred and suspended parties.
13.36 Procurement.
13.37 Subgrants.

Reports, Records Retention, and Enforcement

13.40 Monitoring and reporting program performance.
13.41 Financial reporting.
13.42 Retention and access requirements for records.
13.43 Enforcement.
13.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

13.50 Closeout.
13.51 Later Disallowances and adjustments.
13.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: Reorg. Plan No. 3 1978, EO 12127; EO 12148.

BILLING CODE 6718-21-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Parts 74 and 92

FOR FURTHER INFORMATION CONTACT: Mr. Gary Houseknecht, Acting Director, Division of Assistance and Cost Policy, Department of Health and Human Services, Room 513–D, 200 Independence Avenue SW., Washington, DC 20201. Telephone (202) 245–7565.

ADDITIONAL SUPPLEMENTARY INFORMATION: Currently, the administration of most HHS grants, including grants to State and local governments, is governed by 45 CFR Part 74, which contains the HHS implementation of OMB Circulars A–102 and A–110, plus HHS grant rules which do not derive from OMB circulars.

With the adoption of 45 CFR Part 92, "Uniform Administrative Requirements For Grants and Cooperative Agreements to State and Local Governments," as a final rule, (effective on October 1, 1988), 45 CFR Part 74 for the most part will no longer be applicable to the grants covered by Part 92. However, Part 74 will continue to apply to grants to nongovernmental recipients—institutions of higher education,

hospitals, other nonprofit organizations and for-profit concerns. Also, Part 74, in its entirety, would continue to govern HHS's grants to States under open-ended entitlement programs under the Social Security Act, as set forth in § 92.4(a)(3).

In addition, there are a number of provisions affecting governmental grantees that are now in 45 CFR Part 74, but not in 45 CFR Part 92, which we believe should remain in effect for grants to governments even after Part 92 is in effect. Therefore with the adoption of 45 CFR Part 92 (effective October 1, 1988) it is necessary to preserve the applicability of certain longstanding HHS Rules to grants which will be subject to Part 92. We described this plan in the Part 92 Notice of Proposed Rulemaking, on June 9, 1987 (52 FR 21820 and 21839), and gave examples of the rules which would be preserved. At that time we planned to issue a separate Notice of Proposed Rulemaking on the subject. However that step has proved unnecessary because no new rules are being adopted.

The Part 74 provisions which will continue to apply to grants under Part 92 are:

1. Section 74.62(a) which simplifies submission of audit reports;
2. Section 74.173 which specifies cost principles for hospitals;
3. Section 74.174(b) which establishes certain special cost rules for nonprofit organizations;
4. Section 74.304 which describes grantee responsibilities regarding final decisions in disputes; and
5. Sections 74.710 and 74.715 which apply special conditions to grants and subgrants to for-profit organizations.

Additionally, § 74.62(a) is being amended to update its internal reference to the previsous version of OMB Circular A–102, which continues to apply to prior periods.

Finally, two other Part 74 policies are being retained, and incorporated in Part 92 itself. We are adding the following provisions to Part 92 to reflect these two policies:

1. Section 92.30(a) which specifies the HHS officials who may approve project changes. (See § 74.102(a).); and
2. Section 92.30(d)(5) which requires prior approval for research patient care. (See § 74.103(d)(3).)

Grantees should also note that 45 CFR Part 92 will not apply to block grant programs covered by 45 CFR Part 96.

List of Subjects in 45 CFR Parts 74 and 92

Accounting, Administrative practice and procedures, Grant programs—health; Grant programs—social programs, Grant administration, Reporting and recordkeeping requirements.

Accordingly Title 45 of the Code of Federal Regulations is amended as set forth below.

Dated: February 1, 1988.

Otis R. Bowen,
Secretary of Health and Human Services.

1. Part 92 is added as set forth at the end of this document.

PART 92—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
92.1 Purpose and scope of this part.
92.2 Scope of subpart.
92.3 Definitions.
92.4 Applicability.
92.5 Effect on other issuances.
92.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

92.10 Forms for applying for grants.
92.11 State plans.
92.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

92.20 Standards for financial management systems.
92.21 Payment.
92.22 Allowable costs.
92.23 Period of availability of funds.
92.24 Matching or cost sharing.
92.25 Program income.
92.26 Non-Federal audit.

Changes, Property, and Subawards

92.30 Changes.
92.31 Real property.
92.32 Equipment.
92.33 Supplies.
92.34 Copyrights.
92.35 Subawards to debarred and suspended parties.
92.36 Procurement.
92.37 Subgrants.

Reports, Records Retention, and Enforcement

92.40 Monitoring and reporting program performance.
92.41 Financial reporting.
92.42 Retention and access requirements for records.
92.43 Enforcement.
92.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

92.50 Closeout.
92.51 Later disallowances and adjustments.
92.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 5 U.S.C. 301.

2. New Part 92 is amended as follows:

a. Section 92.30 is amended by adding paragraphs (a)(1) and (d)(5) to read as follows:

§ 92.30 Changes.

(a) * * * (1) Approvals shall not be valid unless they are in writing, and signed by at least one of the following officials of the Department of Health and Human Services (HHS):

(i) The responsible Grants Officer or his or her designee;

(ii) The head of the HHS Operating or Staff Division that awarded the grant; or

(iii) The head of the Regional Office of the HHS Operating or Staff Division that awarded the grant.

* * * * *

(d) *Programmatic changes* * * *

(5) Providing medical care to individuals under research grants.

* * * * *

PART 74—ADMINISTRATION OF GRANTS

3. Part 74 is amended as follows:

a. The authority citation for Part 74 continues to read:

Authority: 5 U.S.C. 301; § 74.62(a) and Appendix J also issued under sec. 7505 Pub. L. 98–502, 98 Stat. 2333 (31 U.S.C. 7505).

b. Section 74.4 is amended by designating the text following "*General.*" in paragraph (a) as paragraph (a)(1) and by adding a new paragraph (a)(2) to read as follows:

§ 74.4 Applicability of this part.

(a) *General.* * * *

(2) For grants which are subject to 45 CFR Part 92, only the following provisions of this part apply:

(i) Section 74.62(a);
(ii) Section 74.173;
(iii) Section 74.174(b);
(iv) Section 74.304;
(v) Section 74.710; and
(vi) Section 74.715.

* * * * *

c. Section 74.62 is amended by revising paragraph (a)(1) to read as follows:

§ 74.62 Non-Federal audits.

(a) *Governmental recipients*—(1) *Fiscal periods of recipients beginning before January 1, 1985.* Recipients that are governments shall comply with the requirements concerning non-Federal audits in Attachment P to OMB Circular A–102 (October 1979).[1]

* * * * *

BILLING CODE 5150-04-M

NATIONAL SCIENCE FOUNDATION

45 CFR Part 602

FOR FURTHER INFORMATION CONTACT: Sharon Graham, Policy Office, Division of Grants and Contracts, telephone (202) 357–7880.

ADDITIONAL SUPPLEMENTARY INFORMATION: Because the National Science Foundation (NSF) does not differentiate in its administrative practices among types of organizations, and because State and local governments make up less than 30 of its 1500 grantees, NSF expects all prospective and existing grantees to continue following the policies and procedures found in NSF's publications and forms which have received OMB clearance. These policies and procedures, which are consistent with or less restrictive than the common rule, are found in: "Grants for Research and Education in Science and Engineering" which outlines the procedures for applying for NSF grants, and contains the necessary cover page, forms and format for submitting a proposal; NSF F.L. 200, "Grant General Conditions," which contains the terms and conditions which are usually applicable to NSF grants; and "NSF Grant Policy Manual" which outlines NSF's grant administration provisions. Where existing requirements appear inconsistent with the common rule, grantees should consult with NSF.

List of Subjects in 45 CFR Part 602

Accounting, Administration practice and procedures, Grant administration, Grant programs—education, Grant programs—science and technology, Insurance, Reporting and recordkeeping requirements.

Title 45 of the Code of Federal Regulations is amended by adding Part 602 as set forth at the end of this document.

Jeff Fenstermacher,

Assistant Director for Administration.

PART 602—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
602.1 Purpose and scope of this part.
602.2 Scope of subpart.
602.3 Definitions.
602.4 Applicability.
602.5 Effect of other issuances.
602.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

602.10 Forms for applying for grants.
602.11 State plans.
602.12 Special grant or subgrant conditions for "high risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

602.20 Standard for financial management systems.
602.21 Payment.
602.22 Allowable costs.
602.23 Period of availability of funds.
602.24 Matching or cost sharing.
602.25 Program income.
602.26 Non-Federal audit.

Changes, Property, and Subawards

602.30 Changes.
602.31 Real property.
602.32 Equipment.
602.33 Supplies.
602.34 Copyrights.
602.35 Subawards to debarred and suspended parties.
602.36 Procurements.
602.37 Subgrants.

Reports, Records Retention, and Enforcement

602.40 Monitoring and reporting program performance.
602.41 Financial reporting.
602.42 Retention and access requirements for records.
602.43 Enforcement.
602.44 Termination for convenience.

Subpart D—After-the-Grant Requirements

602.50 Closeout.
602.51 Later disallowances and adjustments.

BILLING CODE 7555-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

45 CFR Part 1157

FOR FURTHER INFORMATION CONTACT: Arthur Warren, Deputy General Counsel, or Laurence Baden, Grants Officer, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202) 682–5403.

ADDITIONAL SUPPLEMENTARY INFORMATION: The National Endowment for the Arts (hereinafter "Arts Endowment") received three comments concerning the notice of proposed rulemaking regarding Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments published in the **Federal Register** on June 9, 1987. Two comments addressed state plans requirements; one of these specifically noted the legislative override of § ___.11 discussed in the Arts Endowment's agency specific preamble. The third comment was unrelated to matters addressed in the Arts Endowment's agency specific preamble. These comments were shared with all agencies participating in the common rulemaking and considered in preparing the final rule. The exceptions described by the National Endowment for the Arts in its preamble in the June 9, 1987, **Federal Register** publication of the notice of proposed rulemaking remain.

Legislative Overrides

1. Section ___.4 makes the final common rule applicable to all grant programs except where the regulation is inconsistent with federal statutes or regulations. The common rule has been determined to be inconsistent with the Challenge Program of the National Endowment for the Arts [20 U.S.C. 954(1)]. In creating the Challenge Program, Congress recognized the necessity of broadening the range and enlarging the number of sources of financial support for arts institutions as well as increasing the levels of support, thus creating a more effective private-public sector partnership. The Challenge Program encourages grantees to improve and integrate their program, audience, and financial development planning to build new and continuing sources of support and a more stable pattern of future operations and growth. In meeting its mandate, the Challenge Program is unique in every phase of the grant process—the application, the grant purposes, the allowable use of grant funds, and the reporting requirements.

For the reasons stated above, §§ ___.10, ___.41 and certain portions of § ___.22 of the common rule are not applicable to grant funds awarded pursuant to subsection 5(l) of the National Foundation of the Arts and the Humanities Act of 1965, as amended (hereinafter "NFAH Act"), [20 U.S.C. 954(l)] unless otherwise provided in the grant agreement. Congress intended Challenge grants to assist arts organizations in obtaining nonfederal support and to improve their financial stability through long-range financial and program planning. Challenge grant applications must supply specifically tailored financial and programmatic data to the agency to allow the agency to review applications in a manner consistent with the statutory purpose of the program. Challenge grantees are subject to the applicable cost principles except where provided otherwise by the NFAH Act (e.g., endowment, cash reserve, fundraising, notes payable, deficit elimination, and capital funds).

Finally, grantees must maintain and report financial data beyond that required by standard forms to demonstrate achievement of matching and other program requirements.

2. Section ___.11 of the final common rule allows states to "simplify, consolidate, and substitute plans" required to be submitted to federal agencies in order to receive federal assistance. Pursuant to subsection 5(g)(2) of the NFAH Act [20 U.S.C. 954(g)(2)], state applicants are required to submit a specifically described state plan in order to receive basic state operating grant assistance. Because this Agency's authorizing legislation specifies certain information and assurances which must be included in this state plan, it would not be legally permissible to substitute a different state plan for this purpose, or to simplify the state plan requirements. Given timing requirements, it would be impractical to consolidate these plans with other state plans. Also, Congress has directed, at 20 U.S.C. 954(m), that information gathered through these plans be used to provide biennial reports to Congress on the state of the arts. These legal mandates were not considered by the comment received on this.

In addition, it should be noted that for the purposes of section ___.10 of the final common rule, the Arts Endowment considers the basic state grant program to be a "formula grant program" not subject to the application froms provision of § ___.10 of the OMB common regulation. However, as a matter of policy, the Agency has determined to adopt the "Changes" provisions at § ___.30 of the common regulation for these grants. Adoption of this provision would be consistent with the intent of Congress for the administration of this program as reflected in the statutory state plan requirements and in the statutory requirement [20 U.S.C. 954(g)(1)] that these funds be used only for projects and productions in the arts which meet certain statutory standards or goals.

3. Sections ___.40(e) and ___.41(a)(7) of the final common rule provide that grantor agencies may waive any performance or financial reports required by the common rule if they are needed. Subsections 10(d)(1) and 10(d)(2)(A) of the Arts Endowment's authorizing legislation [20 U.S.C. 959(d)] require specific performance and financial reports. Because of the statutory requirements, the Arts Endowment is unable to waive the various provisions of the common rule regarding the performance and financial reports.

Application Form

Also concerning section .10 of the final common rule, the agency specific preamble to the June 9, 1987 **Federal Register** publication requested public comment as to the impact of the use of the standard application forms with the Arts Endowment's existing application forms as supplements would have for state and local government applicants.

No comments were received as a result of the notice in the June 9 **Federal Register** and the Arts Endowment thus concluded that potential applicants concurred with the Endowment's existing practice. However, the Arts Endowment published an additional notice in the **Federal Register** (52 FR 42687–42688) on November 6, 1987 to provide the public with an additional opportunity to comment.

In response to this notice, the Endowment received two comments. The National Assembly of State Arts Agencies (NASAA), which represents the 56 states and jurisdictional arts agencies, concurred strongly with the Endowment's position: "We submit this public comment in support of the recommendation of the National Endowment for the Arts that applicants to a program use the application forms specifically developed for each program. It appears that the new OMB proposal to require a standard form for state and local governments would place an undue burden on state arts agency applicants." NASAA's comment also discussed the problems of comparability of information. It should be noted that NASAA represents organizations that receive state appropriations of over $200 million annually in support of the arts.

The Endowment also received a comment from a public school district. It advised that units of state and local government should not be required to use forms developed for nonprofits, but those published in OMB Circular A–102. The comment did not address how to achieve comparability of information for application review if different forms were required. It should be noted that a public school system would be eligible for few categories of support within the programs designed for nonprofits. It should also be recognized that, according to our records, this commenter has not made an application to the Endowment during the past five years.

Upon consideration of these comments and based on the experience of the Agency, the Arts Endowment intends to continue its use of forms approved under the Paperwork Reduction Act of 1980 for all applicants to programs oriented to nonprofits. This practice is consistent with § ___.10(b) of the final common rule.

List of Subjects in 45 CFR Part 1157

Accounting, Administrative practice and procedures, Grant programs, Grants administration, Insurance, Reporting and recordkeeping requirements.

Title 45 of the Code of Federal Regulations is amended by adding Part 1157 as set forth at the end of this document.

Peter J. Basso,

Deputy Chairman for Management.

PART 1157—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
1157.1 Purpose and scope of this part.
1157.2 Scope of subpart.
1157.3 Definitions.
1157.4 Applicability.
1157.5 Effect on other issuances.
1157.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

1157.10 Forms for applying for grants.
1157.11 State plans.
1157.12 Special grant or subgrant conditions for "high-risk" grantees.

Subpart C—Post-Award Requirements

Financial Administration

1157.20 Standards for financial management systems.
1157.21 Payment.
1157.22 Allowable costs.
1157.23 Period of availability of funds.
1157.24 Matching or cost sharing.
1157.25 Program income.
1157.26 Non-Federal audit.

Changes, Property, and Subawards

1157.30 Changes.
1157.31 Real property.
1157.32 Equipment.
1157.33 Supplies.

BILLING CODE 7537-01-M

National Endowment for the Humanities

45 CFR Part 1174

FOR FURTHER INFORMATION CONTACT: David Wallace, Grants Officer, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202) 786-0494.

ADDITIONAL SUPPLEMENTARY INFORMATION: The National Endowment for the Humanities received two comments during the comment period concerning the notice of proposed rulemaking published in the **Federal Register** on June 9, 1987, regarding Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments. These comments were shared with all of the agencies and considered in preparing the final rule. The exceptions described by the National Endowment for the Humanities in its preamble in the June 9, 1987, publication in the **Federal Register** of the notice of proposed rulemaking remain.

Section ____.4 makes the final common rule applicable to all grant programs except where the regulation is inconsistent with federal statutes or regulations. The common rule has been determined to be inconsistent with the challenge grant program of the National Endowment for the Humanities [20 U.S.C. 956(h)]. In creating challenge grants as a unique program of grants, Congress recognized the necessity of broadening the range and enlarging the number of sources of financial support for cultural institutions as well as increasing the levels of support, thus creating a more effective private-public sector partnership. The challenge grant program encourages grantees to improve and integrate their program, audience, and financial development planning to build new and continuing sources of support and a more stable pattern of future operations and growth. Thus the challenge grant program in meeting its mandate is unique in every phase of the grant process—the application, the grant purposes, the allowable use of grant funds, and the reporting requirements.

For the reasons stated above, certain portins of § __.22, "Allowable Costs," of the common rule are not applicable to challenge grant funds awarded pursuant to subsection 7(h) of the National Foundation of the Arts and the Humanities Act of 1965, as amended (hereinafter "NFAH Act"), [20 U.S.C. 956(h)] unless otherwise provided in the grant agreement. Congress intended challenge grants to assist humanities organizations in obtaining nonfederal support and to improve their financial stability through long-range financial and program planning. Challenge grantees are subject to the applicable cost principles except when provided otherwise by the NFAH Act. For example, under the challenge grant program grantees may expend funds for endowments, cash reserves, reduction or deferral of debts, notes or mortgages, or fundraising.

Section ____.11 allows states to "simplify, consolidate, and substitute plans" required to be submitted to federal agencies in order to receive federal assistance. However, subsection 7(f) of the NFAH Act, [20 U.S.C. 956(f)], provides that an applicant may apply for grant assistance either as a state humanities agency or, in the absence of a state agency application, as a private group within the state. Applicants, whether a state humanities agency or a private group, are required to submit a specific, statutorily described, state plan in order to receive basic grant assistance. Although thus far no state has chosen to create a state humanities agency to apply under this provision, were a state agency to apply, because the Humanities Endowment's authorizing legislation specifies certain information and assurances that must be included in the state plan, it would not be legally permissible for a state to substitute a different state plan for this purpose, or to simplify the state plan requirements. One comment stated that under Executive Order 12372 and the common rule states would still be required to meet federal statutory requirements in simplified and consolidated plans. The National Endowment for the Humanities agrees that were a state humanities agency formed and applied for funding it would be required to meet federal statutory requirements, but because of timing requirements, it would be impracticable to consolidate these plans with other state plans.

In the event a state chose to apply for a grant under the provisions under 20 U.S.C. 956(f), the Humanities Endowment would consider that application to be a "formula grant program" not subject to the application forms provision of section .10 of the common rule.

Sections ____.40(e) and ____.41(a)(7) provide that grantor agencies may waive any performance or financial reports required by the common rule if they are not needed. Subsections 10(d)(1) and 10(d)(2)(A) of the Humanities Endowment's authorizing legislation [20 U.S.C. 959(d)] require performance and financial reports. Because of the statutory requirements, the Humanities Endowment would be unable to waive the various provisions of the common rule regarding the performance and financial reports.

In its preamble to the notice of proposed rulemaking, the National Endowment for the Humanities explained the reasons why it requests applicants to submit multiple copies of applications. The reasons are as follows. Applications are evaluated by the staff of the Humanities Endowment, its panels, its reviewers, and members of the National Council on the Humanities. To be able to insure that applications receive a thorough and objective review in the Endowment's comprehensive peer review process, the Endowment has traditionally requested applicants to submit multiple copies of an application. The Endowment administers purely voluntary, non-entitlement, grant programs, rather than legally mandated entitlement grant programs. Once any applicant voluntarily elects to apply to the Endowment for discretionary public funds, the applicant should properly bear the costs of applying, not the American taxpayer. No negative comments were received with respect to this matter. Therefore, the Endowment intends to continue to request multiple copies of applications.

BILLING CODE 7536-01-M

Institute of Museum Services

45 CFR Part 1183

FOR FURTHER INFORMATION CONTACT: Rebecca Danvers, (202) 786-0539.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Institute of Museum Services, by notice in the **Federal Register** published on June 9, 1987, 52 FR 21842, proposed the inclusion in its regulations of a new Part 1183 that would incorporate the revised OMB Circular A-102 containing government-wide application and other requirements applicable to grants to State, Local and federally recognized Indian tribal-governments. Public comments on the proposed common regulations were received and changes have been made in response to those comments. This document incorporates the common, uniform regulatory provisions reflecting the revised circular, as changed in response to public comment. As revised, the uniform regulations will become a new Part 1183 of the IMS regulations. Except as otherwise provided by regulation, Part 1183 as set forth below will apply generally to applications by those applicants to the Institute of Museum Services for grants under general operating support and conservation project support programs, as well as to other forms of federal financial assistance provided by IMS.

For the most part these regulations should involve little change in the administration of IMS programs. The previous regulations indicated the applicability of A-102 principles to record keeping requirements and fiscal control and fund accounting precedures. However, inclusion of the text of the circular in comprehensive regulations may result in greater focus on those provisions in the administration and monitoring of IMS grants. Moreover, in a few areas, significant change may be encountered. IMS staff will seek to work will applicants and grantees in adjusting to this change. IMS believes that the changes made to § 1183.10, as explained in the explanation of the general purpose to public comments under "Subpart B—Pre-Award Requirements," adequately addresses concerns expressed by commenters regarding the effect of the new Part 1183 on application procedures. With respect to the use of application forms, IMS expects to proceed under the alternative procedures set forth in § 1183.10.

BILLING CODE 6340-01-M

DEPARTMENT OF TRANSPORTATION

Office of The Secretary

49 CFR Part 18

[Docket 44910]

EFFECTIVE DATE: This rule is effective October 1, 1988, except for the $5,000 threshold for the definition of "equipment" in § 18.3, the $5,000 threshold for desposition of equipment in § 18.32(e), and the $25,000 threshold for the use of small purchase procedures in § 18.36(d)(1), which are effective March 12, 1988. For a discussion of implementation, see the additional supplementary information below.

FOR FURTHER INFORMATION CONTACT: Charles E. Ventura, Department of Transportation, Office of Acquisition and Grant Management—M–63, 400 Seventh Street SW., Room 9100, Washington, DC 20590, (202) 366–4286.

ADDITIONAL SUPPLEMENTARY INFORMATION:

Background

Most significant changes are noted in the common preamble. The Department of Transportation has chosen to implement the higher thresholds for the definition and disposition of equipment, and for the use of small purchase procedures, on the date the regulation is issued. The revised threshold for equipment also applies to equipment owned by grantees that had been acquired with grants that are currently active or have been closed. The Department views these changes as beneficial to the efficient operation of our grant programs and a signficant step in reducing the red tape associated with grant administrative requirements.

The "Federalism" provisions of §§ 18.20(a), 18.32(b), 18.36(a), and 18.37(a) that allow States to use their own procedures for financial management, equipment, procurement management, and managing subgrants are extended to all grants active on October 1, 1988. Because many of our programs fund projects that will cross over the October 1, 1988 implementation date, the Department has chosen to extend the Federalism provisions to grants active as of October 1, 1988. This will allow our State grantees to use the same provisions for current grants as they will use for new grants. This authority does not apply if the awarding agency specifically withholds the authority from a grantee.

The payment requirements of § 18.21(g)(3) do not allow payments to grantees for amounts withheld from payments to contractors to assure satisfactory completion of work. We define payments to contractors to include amounts paid to escrow accounts which can be withdrawn by the contractor upon satisfactory completion of work. The rule has been changed to note that payments to escrow accounts are allowable costs.

The disposition requirements for equipment in § 18.32(e)(3) allow the awarding agency to direct a grantee or subgrantee to take appropriate excess and disposition actions if the grantee or subgrantee fails to take such actions. Section 18.31(c) does not contain an identical provisions for real property; however, the policy of the Department of Transportation is that grantees or subgrantees who do not take appropriate disposition actions for real property can be directed by the awarding agency to take such actions.

Section 18.36(b)(7) encourages grantees to use value engineering clauses in contracts for construction projects. The intent of this subsection is to ensure that the essential function is provided at the lowest life-cycle cost. In this regard, design contracts, as well as, construction contracts are possible candidates for value engineering clauses.

The Federal Highway Administration (FHWA) had proposed requiring its own application forms and procedures. The FHWA had been exempted from the application requirements of OMB Circular A–102, and FHWA application forms and procedures have been approved by OMB. The common rule has been revised to allow Federal agencies to use their own forms and procedures provided they have been approved by OMB. This change eliminates the need for a deviation. However, the rule has been amended to highlight the payment procedures that are used for FHWA programs.

Deviations

Because of existing statutory requirements which do not conform with the provisions of the common regulation, or due to special efforts to reduce Federal red tape, the Department will not comply with some of the sections of the common rule. The deviations not required by statute received no negative comments, and these deviations have been approved by the Office of Management and Budget (OMB). A new airport State Block Grant Pilot Program was authorized in section 534 of the Airport and Airway Improvement Act of 1982, as amended. The Federal Aviation Administration has requested an exemption from the requirements of this rule for this program, although no specific program regulations have been developed. A formal request for exemption will be made when regulations for the program are developed.

Additional statutory deviations, such as one required by the recently passed aviation legislation, and the non-statutory deviations approved by OMB are listed below.

Section____.21, Payment. Section 404 of the Surface Transportation Assistance Act of 1982 directs the Secretary to reimburse States for the Federal share of costs incurred.

Section____.36, Procurement. 23 U.S.C. 112(a) directs the Secretary to require recipients of highway construction grants to use bidding methods that are "effective in securing competition." Detailed construction contracting procedures are contained in 23 CFR Part 635, Subpart A.

Section____.36, Procurement. 23 U.S.C. 112(d) requires concurrence by the Secretary before highway construction contracts can be awarded. One comment was received that this provision does not apply for projects approved under certification acceptance or the Secondary Road Plan. Subsection 18.36(q) has been revised to note this exception.

Section____.36, Procurement. The requirement for the use of qualifications-based (e.g., architectural and engineering services) contract selection procedures in § 18.36(t) has been revised to highlight that subgrantees as well as grantees are covered by this requirement. Grantees or subgrantees must either use qualifications-based procedures, use equivalent State procedures, or choose to establish a formal procurement procedure by State statute. A similar provision has also been added for the Airport Improvement Program in section 511 of the Airport and Airway Improvement Act of 1982, as amended. The Subsection has also been revised to note that this procedure can only be used in certain areas, specific areas will be noted in highway, mass tranportation, and airport directives.

Section____.41, Financial Reporting. FHWA will require State recipients to use FHWA or State financial reports as opposed to the standard forms referenced in the common rule.

Section____.41, Financial Reporting. The National Highway Traffic Safety Administration (NHTSA) will use existing State forms for financial reporting.

Impact Analyses

Executive Order 12291 and DOT Regulatory Policies and Procedures

Executive Order 12291 requires that a regulatory impact analysis be prepared for "major" rules which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects.

We intend the regulations to result in savings to State and local governments in the costs of administering grants. However, we do not believe that the regulations will have an annual economic effect of $100 million or more or the other effects listed in the Order. For this reason, we have determined that these regulations are not a major rule within the meaning of the Order.

This common rule restates, in regulatory form, most of the provisions of OMB Circular A-102 that had been implemented in our program regulations and directives. In addition, some of provisions of the regulation that were not in Circular A-102, or are different from Circular A-102, will reduce the red tape burden on our grantees. Because of this, we certify that this regulation is nonsignificant under the Department of Transportation's Regulatory Policies and Procedures.

Regulatory Flexibility Act of 1980

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that, for each rule with a "significant economic impact on a substantial number of small entities," an analysis be prepared describing the rule's impact on small entities and identifying any significant alternatives to the rule that would minimize the economic impact on small entities.

We certify that these regulations will not have a significant economic impact on a substantial number of small entities because they do not affect the amount of funds provided in the covered programs, but rather modify and update administrative and procedural requirements.

Paperwork Reduction Act

The recordkeeping and information collection requirements included in these regulations were submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h), and were approved August 11, 1987. The OMB approval number is 2105–0520.

List of Subjects in 49 CFR Part 18

Accounting, Administrative practice and procedure, Grant programs, Grants Administration, Insurance, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, Title 49 of the Code of Federal Regulations, is amended as set forth below:

Issued this 3rd day of March, 1988 at Washington, D.C.

Jim Burnley,

Secretary of Transportation.

1. Part 18 is added as set forth at the end of this document.

PART 18—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Subpart A—General

Sec.
18.1 Purpose and scope of this part.
18.2 Scope of subpart.
18.3 Definitions.
18.4 Applicability.
18.5 Effect on other issuances.
18.6 Additions and exceptions.

Subpart B—Pre-Award Requirements

18.10 Forms for applying for grants.
18.11 State plans.
18.12 Special grant or subgrant conditions for "high risk" recipients.

Subpart C—Post-Award Requirements

Financial Administration

18.20 Standards for financial management systems.
18.21 Payment.
18.22 Allowable costs.
18.23 Period of availability of funds.
18.24 Matching or cost sharing.
18.25 Program income.
18.26 Non-Federal audits.

Changes, Property, and Subawards

18.30 Changes.
18.31 Real property.
18.32 Equipment.
18.33 Supplies.
18.34 Copyrights.
18.35 Subawards to debarred and suspended parties.
18.36 Procurement.
18.37 Subgrants.

Reports, Records Retention, and Enforcement

18.40 Monitoring and reporting program performance.
Sec.
18.41 Financial reporting.
18.42 Retention and access requirements for records.
18.43 Enforcememt.
18.44 Termination of convenience.

Subpart D—After-the-Grant Requirements

18.50 Closeout.
18.51 Later disallowances and adjustments.
18.52 Collection of amounts due.

Subpart E—Entitlements [Reserved]

Authority: 49 U.S.C. 322(a).

2. New Part 18 is further amended as follows:

a. Section 18.10 is amended by adding paragraph (a)(3) to read as follows:

§ 18.10 Forms for applying for grants.

(a) * * *

(3) Forms and procedures for Federal Highway Administration (FHWA) projects are contained in 23 CFR Part 630, Subpart B, 23 CFR Part 420, Subpart A, and 49 CFR Part 450.

* * * * *

b. Section 18.20 is amended by adding paragraph (d) to read as follows:

§ 18.20 Standards for financial management systems.

* * * * *

(d) Certain Urban Mass Transportation Administration (UMTA) grantees shall comply with the requirements of section 15 of the Urban Mass Transportation (UMT) Act of 1964, as amended, as implemented by 49 CFR Part 630, regarding a uniform system of accounts and records and a uniform reporting system for certain grantees.

c. Section 18.21 is amended by adding paragraphs (j) and (k) to read as follows:

§ 18.21 Payment.

* * * * *

(j) 23 U.S.C. 121 limits payments to States for highway construction projects to the Federal share of the costs of construction incurred to date, plus the Federal share of the value of stockpiled materials.

(k) Section 404 of the Surface Transportation Assistance Act of 1982 directs the Secretary to reimburse States for the Federal share of costs incurred.

d. Section 18.22 is amended by adding paragraphs (c), (d), and (e) to read as follows:

§ 18.22 Allowable costs.

* * * * *

(c) The overhead cost principles of OMB Circular A–87 shall not apply to State highway agencies for FHWA funded grants.

(d) Sections 3(1) and 9(p) of the UMT Act of 1964, as amended, authorize the Secretary to include in the net project cost eligible for Federal assistance, the amount of interest earned and payable on bonds issued by the State or local public body to the extent that the proceeds of such bonds have actually been expended in carrying out such project or portion thereof. Limitations are established in Sections 3 and 9 of the UMT Act of 1964, as amended.

(e) Section 9 of the UMT Act of 1964, as amended, authorizes grants to finance the leasing of facilities and equipment for use in mass transportation services provided leasing is more cost effective than acquisition or construction.

e. Section 18.24 is amended by adding paragraphs (b)(8), (9), and (10) and (c)(3) to read as follows:

§ 18.24 Matching or cost sharing.

* * * * *

(b) * * *

(8) 23 U.S.C. 121(a) permits reimbursement for actual construction cost incurred by States for highway construction projects. Except for private donations of right-of-way, contributions and donations shall not be considered State costs, and shall not be allowable for matching purposes for highway construction contracts. 23 U.S.C. 323 permits private donations of right-of-way to be used for a State's matching share, and establishes procedures for determining the fair market value of such donated right-of-way.

(9) Section 4(a) of the UMT Act of 1964, as amended, provides that the Federal grant for any project to be assisted under section 3 of the UMT Act of 1964, as amended, shall be in an amount equal to 75 percent of the net project costs. Net project cost is defined as that portion of the cost of the project which cannot be reasonably financed from revenues.

(10) Section 18(e) of the UMT Act of 1964, as amended, limits the Federal share to 80 percent of the net cost of construction, as determined by the Secretary of Transportation. The Federal share for the payment of subsidies for operating expenses, as defined by the Secretary, shall not exceed 50 percent of the net cost of such operating expense projects.

(c) * * *

(3) Section 5(g) of the Department of Transportation Act (49 U.S.C. 1654(g)) limits in-kind service contributions under the local Rail Service Assistance Program to "the cash equivalent of State salaries for State public employees working in the State rail assistance program, but not including overhead and general administrative costs."

* * * * *

f. Section 18.25 is amended by adding paragraphs (g)(4), (5), (6), and (7) to read as follows:

§ 18.25 Program income.

* * * * *

(g) * * *

(4) Section 3(a)(1)(D) of the UMT Act of 1964, as amended, provides that the Secretary shall establish requirements for the use of income derived from appreciated land values for certain UMTA grants. Specific requirements shall be contained in grant agreements.

(5) UMTA grantees may retain program income for allowable capital or operating expenses.

(6) For grants awarded under Section 9 of the UMT Act of 1964, as amended, any revenues received from the sale of advertising and concessions in excess of fiscal year 1985 levels shall be excluded from program income.

(7) 23 U.S.C. 156 requires that States shall charge fair market value for the sale, lease, or use of right-of-way airspace for non-transportation purposes and that such income shall be used for projects eligible under 23 U.S.C.

* * * * *

g. Section 18.31 is amended by adding paragraph (d) to read as follows:

§ 18.31 Real property.

* * * * *

(d) If the conditions in 23 U.S.C. 103(e)(5), (6), or (7), as appropriate, are met and approval is given by the Secretary, States shall not be required to repay the Highway Trust Fund for the cost of right-of-way and other items when certain segments of the Interstate System are withdrawn.

h. Section 18.36 is amended by adding paragraphs (j) through (t) to read as follows:

§ 18.36 Procurement.

* * * * *

(j) 23 U.S.C. 112(a) directs the Secretary to require recipients of highway construction grants to use bidding methods that are "effective in securing competition." Detailed construction contracting procedures are contained in 23 CFR Part 635, Subpart A.

(k) Section 3(a)(2)(C) of the UMT Act of 1964, as amended, prohibits the use of grant or loan funds to support procurements utilizing exclusionary or discriminatory specifications.

(l) 46 U.S.C. 1241(b)(1) and 46 CFR Part 381 impose cargo preference requirements on the shipment of foreign made goods.

(m) Section 165 of the Surface Transportation Assistance Act of 1982, 49 U.S.C. 1601, Section 337 of the Surface Transportation and Uniform Relocation Assistance Act of 1987, and 49 CFR Parts 660 and 661 impose Buy America provisions on the procurement of foreign products and materials.

(n) Section 105(f) of the Surface Transportation Assistance Act of 1982, section 106(c) of the Surface Transportation and Uniform Relocation Assistance Act of 1987, and 49 CFR Part 23 impose requirements for the participation of disadvantaged business enterprises.

(o) Section 308 of the Surface Transportation Assistance Act of 1982, 49 U.S.C. 1068(b)(2), authorizes the use of competitive negotiation for the purchase of rolling stock as appropriate.

(p) 23 U.S.C. 112(b) provides for an exemption to competitive bidding requirements for highway construction contracts in emergency situations.

(g) 23 U.S.C. 112 requires concurrence by the Secrectary before highway construction contracts can be awarded, except for projects authorized under the provisions of 23 U.S.C. 171

(r) 23 U.S.C. 112(e) requires standardized contract clauses concerning site conditions, suspension or work, and material changes in the scope of the work for highway construction contracts.

(s) 23 U.S.C. 140(b) authorizes the preferential employment of Indians on Indian Reservation road projects and contracts.

(t) FHWA, UMTA, and Federal Aviation Administration (FAA) grantees and subgrantees shall extend the use of qualifications-based (e.g., architectural and engineering services) contract selection procedures to certain other related areas and shall award such contracts in the same manner as Federal contracts for architectural and engineering services are negotiated under Title IX of the Federal Property and Administrative Services Act of 1949, or equivalent State (or airport sponsor for FAA) qualifications-based requirements. For FHWA and UMTA programs, this provision applies except to the extent that a State adopts or has adopted by statute a formal procedure for the procurement of such services.

i. Section 18.40 is amended by adding paragraph (c)(1) to read as follows:

§ 18.40 Monitoring and reporting program performance.

* * * * *

(c) * * *

(1) Section 12(h) of the UMT Act of 1964, as amended, requires pre-award testing of new buses models.

* * * * *

j. Section 18.41 is amended by adding paragraph (f) to read as follows:

§ 18.41 Financial reporting.

* * * * *

(f) Notwithstanding the provisions of paragraphs (a)(1) of this section, recipients of FHWA and National Highway Traffic Safety Administration (NHTSA) grants shall use FHWA, NHTSA or State financial reports.

BILLING CODE 4910-62-M

Subpart E—Entitlements [Reserved]

Subpart A—General

§ ___.1 Purpose and scope of this part.

This part establishes uniform administrative rules for Federal grants and cooperative agreements and subawards to State, local and Indian tribal governments.

§ ___.2 Scope of subpart.

This subpart contains general rules pertaining to this part and procedures for control of exceptions from this part.

§ ___.3 Definitions.

As used in this part:

"Accrued expenditures" mean the charges incurred by the grantee during a given period requiring the provision of funds for: (1) Goods and other tangible property received; (2) services performed by employees, contractors, subgrantees, subcontractors, and other payees; and (3) other amounts becoming owed under programs for which no current services or performance is required, such as annuities, insurance claims, and other benefit payments.

"Accrued income" means the sum of: (1) Earnings during a given period from services performed by the grantee and goods and other tangible property delivered to purchasers, and (2) amounts becoming owed to the grantee for which no current services or performance is required by the grantee.

"Acquisition cost" of an item of purchased equipment means the net invoice unit price of the property including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the grantee's regular accounting practices.

"Administrative" requirements mean those matters common to grants in general, such as financial management, kinds and frequency of reports, and retention of records. These are distinguished from "programmatic" requirements, which concern matters that can be treated only on a program-by-program or grant-by-grant basis, such as kinds of activities that can be supported by grants under a particular program.

"Awarding agency" means (1) with respect to a grant, the Federal agency, and (2) with respect to a subgrant, the party that awarded the subgrant.

"Cash contributions" means the grantee's cash outlay, including the outlay of money contributed to the grantee or subgrantee by other public agencies and institutions, and private organizations and individuals. When authorized by Federal legislation, Federal funds received from other assistance agreements may be considered as grantee or subgrantee cash contributions.

"Contract" means (except as used in the definitions for "grant" and "subgrant" in this section and except where qualified by "Federal") a procurement contract under a grant or subgrant, and means a procurement subcontract under a contract.

"Cost sharing or matching" means the value of the third party in-kind contributions and the portion of the costs of a federally assisted project or program not borne by the Federal Government.

"Cost-type contract" means a contract or subcontract under a grant in which the contractor or subcontractor is paid on the basis of the costs it incurs, with or without a fee.

"Equipment" means tangible, nonexpendable, personal property having a useful life of more than one year and an acquisition cost of $5,000 or more per unit. A grantee may use its own definition of equipment provided that such definition would at least include all equipment defined above.

"Expenditure report" means: (1) For nonconstruction grants, the SF–269 "Financial Status Report" (or other equivalent report); (2) for construction grants, the SF–271 "Outlay Report and Request for Reimbursement" (or other equivalent report).

"Federally recognized Indian tribal government" means the governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any Native village as defined in section 3 of the Alaska Native Claims Settlement Act, 85 Stat 688) certified by the Secretary of the Interior as eligible for the special programs and services provided by him through the Bureau of Indian Affairs.

"Government" means a State or local government or a federally recognized Indian tribal government.

"Grant" means an award of financial assistance, including cooperative agreements, in the form of money, or property in lieu of money, by the Federal Government to an eligible grantee. The term does not include technical assistance which provides services instead of money, or other assistance in the form of revenue sharing, loans, loan guarantees, interest subsidies, insurance, or direct appropriations. Also, the term does not include assistance, such as a fellowship or other lump sum award, which the grantee is not required to account for.

"Grantee" means the government to which a grant is awarded and which is accountable for the use of the funds provided. The grantee is the entire legal entity even if only a particular component of the entity is designated in the grant award document.

"Local government" means a county, municipality, city, town, township, local public authority (including any public and Indian housing agency under the United States Housing Act of 1937) school district, special district, intrastate district, council of governments (whether or not incorporated as a nonprofit corporation under state law), any other regional or interstate government entity, or any agency or instrumentality of a local government.

"Obligations" means the amounts of orders placed, contracts and subgrants awarded, goods and services received, and similar transactions during a given period that will require payment by the grantee during the same or a future period.

"OMB" means the United States Office of Management and Budget.

"Outlays" (expenditures) mean charges made to the project or program. They may be reported on a cash or accrual basis. For reports prepared on a cash basis, outlays are the sum of actual cash disbursement for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the amount of cash advances and payments made to contractors and subgrantees. For reports prepared on an accrued expenditure basis, outlays are the sum of actual cash disbursements, the amount of indirect expense incurred, the value of inkind contributions applied, and the new increase (or decrease) in the amounts owed by the grantee for goods and other property received, for services performed by employees, contractors, subgrantees, subcontractors, and other payees, and other amounts becoming owed under programs for which no current services or performance are required, such as annuities, insurance claims, and other benefit payments.

"Percentage of completion method" refers to a system under which payments are made for construction work according to the percentage of completion of the work, rather than to the grantee's cost incurred.

"Prior approval" means documentation evidencing consent prior to incurring specific cost.

"Real property" means land, including land improvements, structures and appurtenances thereto, excluding movable machinery and equipment.

"Share", when referring to the awarding agency's portion of real property, equipment or supplies, means the same percentage as the awarding agency's portion of the acquiring party's total costs under the grant to which the acquisition costs under the grant to which the acquisition cost of the property was charged. Only costs are to be counted—not the value of third-party in-kind contributions.

"State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments. The term does not include any public and Indian housing agency under United States Housing Act of 1937.

"Subgrant" means an award of financial assistance in the form of money, or property in lieu of money, made under a grant by a grantee to an eligible subgrantee. The term includes financial assistance when provided by contractual legal agreement, but does not include procurement purchases, nor does it include any form of assistance which is excluded from the definition of "grant" in this part.

"Subgrantee" means the government or other legal entity to which a subgrant is awarded and which is accountable to the grantee for the use of the funds provided.

"Supplies" means all tangible personal property other than "equipment" as defined in this part.

"Suspension" means depending on the context, either (1) temporary withdrawal of the authority to obligate grant funds pending corrective action by the grantee or subgrantee or a decision to terminate the grant, or (2) an action taken by a suspending official in accordance with agency regulations implementing E.O. 12549 to immediately exclude a person from participating in grant transactions for a period, pending completion of an investigation and such legal or debarment proceedings as may ensue.

"Termination" means permanent withdrawal of the authority to obligate previously-awarded grant funds before that authority would otherwise expire. It also means the voluntary relinquishment of that authority by the grantee or subgrantee. "Termination" does not include: (1) Withdrawal of funds awarded on the basis of the grantee's underestimate of the unobligated balance in a prior period; (2) Withdrawal of the unobligated balance as of the expiration of a grant; (3) Refusal to extend a grant or award additional funds, to make a competing or noncompeting continuation, renewal, extension, or supplemental award; or (4) voiding of a grant upon determination that the award was obtained fraudulently, or was otherwise illegal or invalid from inception.

"Terms of a grant or subgrant" mean all requirements of the grant or subgrant, whether in statute, regulations, or the award document.

"Third party in-kind contributions" mean property or services which benefit a federally assisted project or program and which are contributed by non-Federal third parties without charge to the grantee, or a cost-type contractor under the grant agreement.

"Unliquidated obligations" for reports prepared on a cash basis mean the amount of obligations incurred by the grantee that has not been paid. For reports prepared on an accrued expenditure basis, they represent the amount of obligations incurred by the grantee for which an outlay has not been recorded.

"Unobligated balance" means the portion of the funds authorized by the Federal agency that has not been obligated by the grantee and is determined by deducting the cumulative obligations from the cumulative funds authorized.

§ ___.4 Applicability.

(a) *General.* Subparts A–D of this part apply to all grants and subgrants to governments, except where inconsistent with Federal statutes or with regulations authorized in accordance with the exception provision of § ___.6, or:

(1) Grants and subgrants to State and local institutions of higher education or State and local hospitals.

(2) The block grants authorized by the Omnibus Budget Reconciliation Act of 1981 (Community Services; Preventive Health and Health Services; Alcohol, Drug Abuse, and Mental Health Services; Maternal and Child Health Services; Social Services; Low-Income Home Energy Assistance; States' Program of Community Development Block Grants for Small Cities; and Elementary and Secondary Education other than programs administered by the Secretary of Education under Title V, Subtitle D, Chapter 2, Section 583—the Secretary's discretionary grant program) and Titles I–III of the Job Training Partnership Act of 1982 and under the Public Health Services Act (Section 1921), Alcohol and Drug Abuse Treatment and Rehabilitation Block Grant and Part C of Title V, Mental Health Service for the Homeless Block Grant).

(3) Entitlement grants to carry out the following programs of the Social Security Act:

(i) Aid to Needy Families with Dependent Children (Title IV–A of the Act, not including the Work Incentive Program (WIN) authorized by section 402(a)19(G); HHS grants for WIN are subject to this part);

(ii) Child Support Enforcement and Establishment of Paternity (Title IV–D of the Act);

(iii) Foster Care and Adoption Assistance (Title IV–E of the Act);

(iv) Aid to the Aged, Blind, and Disabled (Titles I, X, XIV, and XVI–AABD of the Act); and

(v) Medical Assistance (Medicaid) (Title XIX of the Act) not including the State Medicaid Fraud Control program authorized by section 1903(a)(6)(B).

(4) Entitlement grants under the following programs of The National School Lunch Act:

(i) School Lunch (section 4 of the Act),

(ii) Commodity Assistance (section 6 of the Act),

(iii) Special Meal Assistance (section 11 of the Act),

(iv) Summer Food Service for Children (section 13 of the Act), and

(v) Child Care Food Program (section 17 of the Act).

(5) Entitlement grants under the following programs of The Child Nutrition Act of 1966:

(i) Special Milk (section 3 of the Act), and

(ii) School Breakfast (section 4 of the Act).

(6) Entitlement grants for State Administrative expenses under The Food Stamp Act of 1977 (section 16 of the Act).

(7) A grant for an experimental, pilot, or demonstration project that is also supported by a grant listed in paragraph (a)(3) of this section;

(8) Grant funds awarded under subsection 412(e) of the Immigration and Nationality Act (8 U.S.C. 1522(e)) and subsection 501(a) of the Refugee Education Assistance Act of 1980 (Pub. L. 96–422, 94 Stat. 1809), for cash assistance, medical assistance, and supplemental security income benefits to refugees and entrants and the administrative costs of providing the assistance and benefits;

(9) Grants to local education agencies under 20 U.S.C. 236 through 241–1(a), and 242 through 244 (portions of the Impact Aid program), except for 20 U.S.C. 238(d)(2)(c) and 240(f) (Entitlement Increase for Handicapped Children); and

(10) Payments under the Veterans Administration's State Home Per Diem Program (38 U.S.C. 641(a)).

(b) *Entitlement programs.* Entitlement programs enumerated above in § ____.4(a) (3)-(8) are subject to Subpart E.

§ ____.5 Effect on other issuances.

All other grants administration provisions of codified program regulations, program manuals, handbooks and other nonregulatory materials which are inconsistent with this part are superseded, except to the extent they are required by statute, or authorized in accordance with the exception provision in § ____.6.

§ ____.6 Additions and exceptions.

(a) For classes of grants and grantees subject to this part, Federal agencies may not impose additional administrative requirements except in codified regulations published in the Federal Register.

(b) Exceptions for classes of grants or grantees may be authorized only by OMB.

(c) Exceptions on a case-by-case basis and for subgrantees may be authorized by the affected Federal agencies.

Subpart B—Pre-Award Requirements

§ ____.10 Forms for applying for grants.

(a) *Scope.* (1) This section prescribes forms and instructions to be used by governmental organizations (except hospitals and institutions of higher education operated by a government) in applying for grants. This section is not applicable, however, to formula grant programs which do not require applicants to apply for funds on a project basis.

(2) This section applies only to applications to Federal agencies for grants, and is not required to be applied by grantees in dealing with applicants for subgrants. However, grantees are encouraged to avoid more detailed or burdensome application requirements for subgrants.

(b) *Authorized forms and instructions for governmental organizations.* (1) In applying for grants, applicants shall only use standard application forms or those prescribed by the granting agency with the approval of OMB under the Paperwork Reduction Act of 1980.

(2) Applicants are not required to submit more than the original and two copies of preapplications or applications.

(3) Applicants must follow all applicable instructions that bear OMB clearance numbers. Federal agencies may specify and describe the programs, functions, or activities that will be used to plan, budget, and evaluate the work under a grant. Other supplementary instructions may be issued only with the approval of OMB to the extent required under the Paperwork Reduction Act of 1980. For any standard form, except the SF-424 facesheet, Federal agencies may shade out or instruct the applicant to disregard any line item that is not needed.

(4) When a grantee applies for additional funding (such as a continuation or supplemental award) or amends a previously submitted application, only the affected pages need be submitted. Previously submitted pages with information that is still current need not be resubmitted.

§ ____.11 State plans.

(a) *Scope.* The statutes for some programs require States to submit plans before receiving grants. Under regulations implementing Executive Order 12372, "Intergovernmental Review of Federal Programs," States are allowed to simplify, consolidate and substitute plans. This section contains additional provisions for plans that are subject to regulations implementing the Executive Order.

(b) *Requirements.* A State need meet only Federal administrative or programmatic requirements for a plan that are in statutes or codified regulations.

(c) *Assurances.* In each plan the State will include an assurance that the State shall comply with all applicable Federal statutes and regulations in effect with respect to the periods for which it receives grant funding. For this assurance and other assurances required in the plan, the State may:

(1) Cite by number the statutory or regulatory provisions requiring the assurances and affirm that it gives the assurances required by those provisions,

(2) Repeat the assurance language in the statutes or regulations, or

(3) Develop its own language to the extent permitted by law.

(d) *Amendments.* A State will amend a plan whenever necessary to reflect: (1) New or revised Federal statutes or regulations or (2) a material change in any State law, organization, policy, or State agency operation. The State will obtain approval for the amendment and its effective date but need submit for approval only the amended portions of the plan.

§ ____.12 Special grant or subgrant conditions for "high-risk" grantees.

(a) A grantee or subgrantee may be considered "high risk" if an awarding agency determines that a grantee or subgrantee:

(1) Has a history of unsatisfactory performance, or

(2) Is not financially stable, or

(3) Has a management system which does not meet the management standards set forth in this part, or

(4) Has not conformed to terms and conditions of previous awards, or

(5) Is otherwise not responsible; and if the awarding agency determines that an award will be made, special conditions and/or restrictions shall correspond to the high risk condition and shall be included in the award.

(b) Special conditions or restrictions may include:

(1) Payment on a reimbursement basis;

(2) Withholding authority to proceed to the next phase until receipt of evidence of acceptable performance within a given funding period;

(3) Requiring additional, more detailed financial reports;

(4) Additional project monitoring;

(5) Requiring the grante or subgrantee to obtain technical or management assistance; or

(6) Establishing additional prior approvals.

(c) If an awarding agency decides to impose such conditions, the awarding official will notify the grantee or subgrantee as early as possible, in writing, of:

(1) The nature of the special conditions/restrictions;

(2) The reason(s) for imposing them;

(3) The corrective actions which must be taken before they will be removed and the time allowed for completing the corrective actions and

(4) The method of requesting reconsideration of the conditions/restrictions imposed.

Subpart C—Post-Award Requirements

Financial Administration

§ ____.20 Standards for financial management systems.

(a) A State must expand and account for grant funds in accordance with State laws and procedures for expending and accounting for its own funds. Fiscal control and accounting procedures of the State, as well as its subgrantees and cost-type contractors, must be sufficient to—

(1) Permit preparation of reports required by this part and the statutes authorizing the grant, and

(2) Permit the tracing of funds to a level of expenditures adequate to establish that such funds have not been used in violation of the restrictions and prohibitions of applicable statutes.

(b) The financial management systems of other grantees and subgrantees must meet the following standards:

(1) *Financial reporting.* Accurate, current, and complete disclosure of the financial results of financially assisted activities must be made in accordance with the financial reporting requirements of the grant or subgrant.

(2) *Accounting records.* Grantees and subgrantees must maintain records which adequately identify the source and application of funds provided for financially-assisted activities. These records must contain information pertaining to grant or subgrant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays or expenditures, and income.

(3) *Internal control.* Effective control and accountability must be maintained for all grant and subgrant cash, real and personal property, and other assets. Grantees and subgrantees must adequately safeguard all such property and must assure that it is used solely for authorized purposes.

(4) *Budget control.* Actual expenditures or outlays must be compared with budgeted amounts for each grant or subgrant. Financial information must be related to performance or productivity data, including the development of unit cost information whenever appropriate or specifically required in the grant or subgrant agreement. If unit cost data are required, estimates based on available documentation will be accepted whenever possible.

(5) *Allowable cost.* Applicable OMB cost principles, agency program regulations, and the terms of grant and subgrant agreements will be followed in determining the reasonableness, allowability, and allocability of costs.

(6) *Source documentation.* Accounting records must be supported by such source documentation as cancelled checks, paid bills, payrolls, time and attendance records, contract and subgrant award documents, etc.

(7) *Cash management.* Procedures for minimizing the time elapsing between the transfer of funds from the U.S. Treasury and disbursement by grantees and subgrantees must be followed whenever advance payment procedures are used. Grantees must establish reasonable procedures to ensure the receipt of reports on subgrantees' cash balances and cash disbursements in sufficient time to enable them to prepare complete and accurate cash transactions reports to the awarding agency. When advances are made by letter-of-credit or electronic transfer of funds methods, the grantee must make drawdowns as close as possible to the time of making disbursements. Grantees must monitor cash drawdowns by their subgrantees to assure that they conform substantially to the same standards of timing and amount as apply to advances to the grantees.

(c) An awarding agency may review the adequacy of the financial management system of any applicant for financial assistance as part of a preaward review or at any time subsequent to award.

§ ____.21 Payment.

(a) *Scope.* This section prescribes the basic standard and the methods under which a Federal agency will make payments to grantees, and grantees will make payments to subgrantees and contractors.

(b) *Basic standard.* Methods and procedures for payment shall minimize the time elapsing between the transfer of funds and disbursement by the grantee or subgrantee, in accordance with Treasury regulations at 31 CFR Part 205.

(c) *Advances.* Grantees and subgrantees shall be paid in advance, provided they maintain or demonstrate the willingness and ability to maintain procedures to minimize the time elapsing between the transfer of the funds and their disbursement by the grantee or subgrantee.

(d) *Reimbursement.* Reimbursement shall be the preferred method when the requirements in paragraph (c) of this section are not met. Grantees and subgrantees may also be paid by reimbursement for any construction grant. Except as otherwise specified in regulation, Federal agencies shall not use the percentage of completion method to pay construction grants. The grantee or subgrantee may use that method to pay its construction contractor, and if it does, the awarding agency's payments to the grantee or subgrantee will be based on the grantee's or subgrantee's actual rate of disbursement.

(e) *Working capital advances.* If a grantee cannot meet the criteria for advance payments described in paragraph (c) of this section, and the Federal agency has determined that reimbursement is not feasible because the grantee lacks sufficient working capital, the awarding agency may provide cash or a working capital advance basis. Under this procedure the awarding agency shall advance cash to the grantee to cover its estimated disbursement needs for an initial period generally geared to the grantee's disbursing cycle. Thereafter, the awarding agency shall reimburse the grantee for its actual cash disbursements. The working capital advance method of payment shall not be used by grantees or subgrantees if the reason for using such method is the unwillingness or inability of the grantee to provide timely advances to the subgrantee to meet the subgrantee's actual cash disbursements.

(f) *Effect of program income, refunds, and audit recoveries on payment.* (1) Grantees and subgrantees shall disburse repayments to and interest earned on a revolving fund before requesting additional cash payments for the same activity.

(2) Except as provided in paragraph (f)(1) of this section, grantees and subgrantees shall disburse program income, rebates, refunds, contract settlements, audit recoveries and interest earned on such funds before requesting additional cash payments.

(g) *Withholding payments.* (1) Unless otherwise required by Federal statute, awarding agencies shall not withhold payments for proper charges incurred by grantees or subgrantees unless—

(i) The grantee or subgrantee has failed to comply with grant award conditions or

(ii) The grantee or subgrantee is indebted to the United States.

(2) Cash withheld for failure to comply with grant award condition, but without suspension of the grant, shall be released to the grantee upon subsequent compliance. When a grant is suspended, payment adjustments will be made in accordance with § ____.43(c).

(3) A Federal agency shall not make payment to grantees for amounts that are withheld by grantees or subgrantees from payment to contractors to assure satisfactory completion of work. Payments shall be made by the Federal agency when the grantees or subgrantees actually disburse the withheld funds to the contractors or to escrow accounts established to assure satisfactory completion of work.

(h) *Cash depositories.* (1) Consistent with the national goal of expanding the opportunities for minority business enterprises, grantees and subgrantees are encouraged to use minority banks (a bank which is owned at least 50 percent by minority group members). A list of minority owned banks can be obtained from the Minority Business Development Agency, Department of Commerce, Washington, DC 20230.

(2) A grantee or subgrantee shall maintain a separate bank account only when required by Federal-State agreement.

(i) *Interest earned on advances.* Except for interest earned on advances of funds exempt under the

Intergovernmental Cooperation Act (31 U.S.C. 6501 et seq.) and the Indian Self-Determination Act (23 U.S.C. 450), grantees and subgrantees shall promptly, but at least quarterly, remit interest earned on advances to the Federal agency. The grantee or subgrantee may keep interest amounts up to $100 per year for administrative expenses.

§ ____.22 Allowable costs.

(a) *Limitation on use of funds.* Grant funds may be used only for:

(1) The allowable costs of the grantees, subgrantees and cost-type contractors, including allowable costs in the form of payments to fixed-price contractors; and

(2) Reasonable fees or profit to cost-type contractors but not any fee or profit (or other increment above allowable costs) to the grantee or subgrantee.

(b) *Applicable cost principles.* For each kind of organization, there is a set of Federal principles for determining allowable costs. Allowable costs will be determined in accordance with the cost principles applicable to the organization incurring the costs. The following chart lists the kinds of organizations and the applicable cost principles.

For the costs of a—	Use the principles in—
State, local or Indian tribal government.	OMB Circular A-87.
Private nonprofit organization other than an (1) institution of higher education, (2) hospital, or (3) organization named in OMB Circular A-122 as not subject to that circular.	OBM Circular A-122.
Educational institutions	OMB Circular A-21.
For-profit organization other than a hospital and an organization named in OBM Circular A-122 as not subject to that circular.	48 CFR Part 31. Contract Cost Principles and Procedures, or uniform cost accounting standards that comply with cost principles acceptable to the Federal agency.

§ ____.23 Period fo availability of funds.

(a) *General.* Where a funding period is specified, a grantee may charge to the award only costs resulting from obligations of the funding period unless carryover of unobligated balances is permitted, in which case the carryover balances may be charged for costs resulting from obligations of the subsequent funding period.

(b) *Liquidation of obligations.* A grantee must liquidate all obligations incurred under the award not later than 90 days after the end of the funding period (or as specified in a program regulation) to coincide with the submission of the annual Financial Status Report (SF–269). The Federal agency may extend this deadline at the request of the grantee.

§ ____.24 Matching or cost sharing.

(a) *Basic rule: Costs and contributions acceptable.* With the qualifications and exceptions listed in paragraph (b) of this section, a matching or cost sharing requirement may be satisfied by either or both of the following:

(1) Allowable costs incurred by the grantee, subgrantee or a cost-type contractor under the assistance agreement. This includes allowable costs borne by non-Federal grants or by others cash donations from non-Federal third parties.

(2) The value of third party in-kind contributions applicable to the period to which the cost sharing or matching requirements applies.

(b) *Qualifications and exceptions*—(1) *Costs borne by other Federal grant agreements.* Except as provided by Federal statute, a cost sharing or matching requirement may not be met by costs borne by another Federal grant. This prohibition does not apply to income earned by a grantee or subgrantee from a contract awarded under another Federal grant.

(2) *General revenue sharing.* For the purpose of this section, general revenue sharing funds distributed under 31 U.S.C. 6702 are not considered Federal grant funds.

(3) *Cost or contributions counted towards other Federal costs-sharing requirements.* Neither costs nor the values of third party in-kind contributions may count towards satisfying a cost sharing or matching requirement of a grant agreement if they have been or will be counted towards satisfying a cost sharing or matching requirement of another Federal grant agreement, a Federal procurement contract, or any other award of Federal funds.

(4) *Costs financed by program income.* Costs financed by program income, as defined in § ____.25, shall not count towards satisfying a cost sharing or matching requirement unless they are expressly permitted in the terms of the assistance agreement. (This use of general program income is described in § ____.25(g).)

(5) *Services or property financed by income earned by contractors.* Contractors under a grant may earn income from the activities carried out under the contract in addition to the amounts earned from the party awarding the contract. No costs of services or property supported by this income may count toward satisfying a cost sharing or matching requirement unless other provisions of the grant agreement expressly permit this kind of income to be used to meet the requirement.

(6) *Records.* Costs and third party in-kind contributions counting towards satisfying a cost sharing or matching requirement must be verifiable from the records of grantees and subgrantee or cost-type contractors. These records must show how the value placed on third party in-kind contributions was derived. To the extent feasible, volunteer services will be supported by the same methods that the organization uses to support the allocability of regular personnel costs.

(7) *Special standards for third party in-kind contributions.* (i) Third party in-kind contributions count towards satisfying a cost sharing or matching requirement only where, if the party receiving the contributions were to pay for them, the payments would be allowable costs.

(ii) Some third party in-kind contributions are goods and services that, if the grantee, subgrantee, or contractor receiving the contribution had to pay for them, the payments would have been an indirect costs. Costs sharing or matching credit for such contributions shall be given only if the grantee, subgrantee, or contractor has established, along with its regular indirect cost rate, a special rate for allocating to individual projects or programs the value of the contributions.

(iii) A third party in-kind contribution to a fixed-price contract may count towards satisfying a cost sharing or matching requirement only if it results in:

(A) An increase in the services or property provided under the contract (without additional cost to the grantee or subgrantee) or

(B) A cost savings to the grantee or subgrantee.

(iv) The values placed on third party in-kind contributions for cost sharing or matching purposes will conform to the rules in the succeeding sections of this part. If a third party in-kind contribution is a type not treated in those sections, the value placed upon it shall be fair and reasonable.

(c) *Valuation of donated services*—(1) *Volunteer services.* Unpaid services provided to a grantee or subgrantee by individuals will be valued at rates consistent with those ordinarily paid for similar work in the grantee's or subgrantee's organization. If the grantee or subgrantee does not have employees performing similar work, the rates will be consistent with those ordinarily paid by other employers for similar work in the same labor market. In either case, a reasonable amount for fringe benefits may be included in the valuation.

(2) *Employees of other organizations.* When an employer other than a grantee, subgrantee, or cost-type contractor furnishes free of charge the services of an employee in the employee's normal line of work, the services will be valued at the employee's regular rate of pay exclusive of the employee's fringe benefits and overhead costs. If the services are in a different line of work, paragraph (c)(1) of this section applies.

(d) *Valuation of third party donated supplies and loaned equipment or space.* (1) If a third party donates supplies, the contribution will be valued at the market value of the supplies at the time of donation.

(2) If a third party donates the use of equipment or space in a building but retains title, the contribution will be valued at the fair rental rate of the equipment or space.

(e) *Valuation of third party donated equipment, buildings, and land.* If a third party donates equipment, buildings, or land, and title passes to a grantee or subgrantee, the treatment of the donated property will depend upon the purpose of the grant or subgrant, as follows:

(1) *Awards for capital expenditures.* If the purpose of the grant or subgrant is to assist the grantee or subgrantee in the acquisition of property, the market value of that property at the time of donation may be counted as cost sharing or matching.

(2) *Other awards.* If assisting in the acquisition of property is not the purpose of the grant or subgrant, paragraphs (e)(2) (i) and (ii) of this section apply:

(i) If approval is obtained from the awarding agency, the market value at the time of donation of the donated equipment or buildings and the fair rental rate of the donated land may be counted as cost sharing or matching. In the case of a subgrant, the terms of the grant agreement may require that the approval be obtained from the Federal agency as well as the grantee. In all cases, the approval may be given only if a purchase of the equipment or rental of the land would be approved as an allowable direct cost. If any part of the donated property was acquired with Federal funds, only the non-federal share of the property may be counted as cost-sharing or matching.

(ii) If approval is not obtained under paragraph (e)(2)(i) of this section, no amount may be counted for donated land, and only depreciation or use allowances may be counted for donated equipment and buildings. The depreciation or use allowances for this property are not treated as third party in-kind contributions. Instead, they are treated as costs incurred by the grantee or subgrantee. They are computed and allocated (usually as indirect costs) in accordance with the cost principles specified in § ____.22, in the same way as depreciation or use allowances for purchased equipment and buildings. The amount of depreciation or use allowances for donated equipment and buildings is based on the property's market value at the time it was donated.

(f) *Valuation of grantee or subgrantee donated real property for construction/acquisition.* If a grantee or subgrantee donates real property for a construction or facilities acquisition project, the current market value of that property may be counted as cost sharing or matching. If any part of the donated property was acquired with Federal funds, only the non-federal share of the property may be counted as cost sharing or matching.

(g) *Appraisal of real property.* In some cases under paragraphs (d), (e) and (f) of this section, it will be necessary to establish the market value of land or a building or the fair rental rate of land or of space in a building. In these cases, the Federal agency may require the market value or fair rental value be set by an independent appraiser, and that the value or rate be certified by the grantee. This requirement will also be imposed by the grantee on subgrantees.

§ ____.25 Program income.

(a) *General.* Grantees are encouraged to earn income to defray program costs. Program income includes income from fees for services performed, from the use or rental of real or personal property acquired with grant funds, from the sale of commodities or items fabricated under a grant agreement, and from payments of principal and interest on loans made with grant funds. Except as otherwise provided in regulations of the Federal agency, program income does not include interest on grant funds, rebates, credits, discounts, refunds, etc. and interest earned on any of them.

(b) *Definition of program income.* Program income means gross income received by the grantee or subgrantee directly generated by a grant supported activity, or earned only as a result of the grant agreement during the grant period. "During the grant period" is the time between the effective date of the award and the ending date of the award reflected in the final financial report.

(c) *Cost of generating program income.* If authorized by Federal regulations or the grant agreement, costs incident to the generation of program income may be deducted from gross income to determine program income.

(d) *Governmental revenues.* Taxes, special assessments, levies, fines, and other such revenues raised by a grantee or subgrantee are not program income unless the revenues are specifically identified in the grant agreement or Federal agency regulations as program income.

(e) *Royalties.* Income from royalties and license fees for copyrighted material, patents, and inventions developed by a grantee or subgrantee is program income only if the revenues are specifically identified in the grant agreement or Federal agency regulations as program income. (See § ____.34.)

(f) *Property.* Proceeds from the sale of real property or equipment will be handled in accordance with the requirements of §§ ____.31 and ____.32.

(g) *Use of program income.* Program income shall be deducted from outlays which may be both Federal and non-Federal as described below, unless the Federal agency regulations or the grant agreement specify another alternative (or a combination of the alternatives). In specifying alternatives, the Federal agency may distinguish between income earned by the grantee and income earned by subgrantees and between the sources, kinds, or amounts of income. When Federal agencies authorize the alternatives in paragraphs (g) (2) and (3) of this section, program income in excess of any limits stipulated shall also be deducted from outlays.

(1) *Deduction.* Ordinarily program income shall be deducted from total allowable costs to determine the net allowable costs. Program income shall be used for current costs unless the Federal agency authorizes otherwise. Program income which the grantee did not anticipate at the time of the award shall be used to reduce the Federal agency and grantee contributions rather than to increase the funds committed to the project.

(2) *Addition.* When authorized, program income may be added to the funds committed to the grant agreement by the Federal agency and the grantee. The program income shall be used for the purposes and under the conditions of the grant agreement.

(3) *Cost sharing or matching.* When authorized, program income may be used to meet the cost sharing or matching requirement of the grant agreement. The amount of the Federal grant award remains the same.

OL 53 ISS 48 MR 11 988 MI

(h) *Income after the award period.* There are no Federal requirements governing the disposition of program income earned after the end of the award period (i.e., until the ending date of the final financial report, see paragraph (a) of this section), unless the terms of the agreement or the Federal agency regulations provide otherwise.

§ ____.26 Non-Federal audit.

(a) *Basic Rule.* Grantees and subgrantees are responsible for obtaining audits in accordance with the Single Audit Act of 1984 (31 U.S.C. 7501–7) and Federal agency implementing regulations. The audits shall be made by an independent auditor in accordance with generally accepted government auditing standards covering financial and compliance audits.

(b) *Subgrantees.* State or local governments, as those terms are defined for purposes of the Single Audit Act, that receive Federal financial assistance and provide $25,000 or more of it in a fiscal year to a subgrantee shall:

(1) Determine whether State or local subgrantees have met the audit requirements of the Act and whether subgrantees covered by OMB Circular A–110, "Uniform Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals and Other Nonprofit Organizations" have met the audit requirement. Commercial contractors (private forprofit and private and governmental organizations) providing goods and services to State and local governments are not required to have a single audit performed. State and local govenments should use their own procedures to ensure that the contractor has complied with laws and regulations affecting the expenditure of Federal funds;

(2) Determine whether the subgrantee spent Federal assistance funds provided in accordance with applicable laws and regulations. This may be accomplished by reviewing an audit of the subgrantee made in accordance with the Act, Circular A–110, or through other means (e.g., program reviews) if the subgrantee has not had such an audit;

(3) Ensure that appropriate corrective action is taken within six months after receipt of the audit report in instance of noncompliance with Federal laws and regulations;

(4) Consider whether subgrantee audits necessitate adjustment of the grantee's own records; and

(5) Require each subgrantee to permit independent auditors to have access to the records and financial statements.

(c) *Auditor selection.* In arranging for audit services, § ____.36 shall be followed.

Changes, Property, and Subawards

§ ____.30 Changes

(a) *General.* Grantees and subgrantees are permitted to rebudget within the approved direct cost budget to meet unanticipated requirements and may make limited program changes to the approved project. However, unless waived by the awarding agency, certain types of post-award changes in budgets and projects shall require the prior written approval of the awarding agency.

(b) *Relation to cost principles.* The applicable cost principles (see § ____.22) contain requirements for prior approval of certain types of costs. Except where waived, those requirements apply to all grants and subgrants even if paragraphs (c) through (f) of this section do not.

(c) *Budget changes.* (1) *Nonconstruction projects.* Except as stated in other regulations or an award document, grantees or subgrantees shall obtain the prior approval of the awarding agency whenever any of the following changes is anticipated under a nonconstruction award:

(i) Any revision which would result in the need for additional funding.

(ii) Unless waived by the awarding agency, cumulative transfers among direct cost categories, or, if applicable, among separately budgeted programs, projects, functions, or activities which exceed or are expected to exceed ten percent of the current total approved budget, whenever the awarding agency's share exceeds $100,000.

(iii) Transfer of funds allotted for training allowances (i.e., from direct payments to trainees to other expense categories).

(2) *Construction projects.* Grantees and subgrantees shall obtain prior written approval for any budget revision which would result in the need for additional funds.

(3) *Combined construction and nonconstruction projects.* When a grant or subgrant provides funding for both construction and nonconstruction activities, the grantee or subgrantee must obtain prior written approval from the awarding agency before making any fund or budget transfer from nonconstruction to construction or vice versa.

(d) *Programmatic changes.* Grantees or subgrantees must obtain the prior approval of the awarding agency whenever any of the following actions is anticipated:

(1) Any revision of the scope or objectives of the project (regardless of whether there is an associated budget revision requiring prior approval).

(2) Need to extend the period of availability of funds.

(3) Changes in key persons in cases where specified in an application or a grant award. In research projects, a change in the project director or principal investigator shall always require approval unless waived by the awarding agency.

(4) Under nonconstruction projects, contracting out, subgranting (if authorized by law) or otherwise obtaining the services of a third party to perform activities which are central to the purposes of the award. This approval requirement is in addition to the approval requirements of § ____.36 but does not apply to the procurement of equipment, supplies, and general support services.

(e) *Additional prior approval requirements.* The awarding agency may not require prior approval for any budget revision which is not described in paragraph (c) of this section.

(f) *Requesting prior approval.* (1) A request for prior approval of any budget revision will be in the same budget formal the grantee used in its application and shall be accompanied by a narrative justification for the proposed revision.

(2) A request for a prior approval under the applicable Federal cost principles (see § ____.22) may be made by letter.

(3) A request by a subgrantee for prior approval will be addressed in writing to the grantee. The grantee will promptly review such request and shall approve or disapprove the request in writing. A grantee will not approve any budget or project revision which is inconsistent with the purpose or terms and conditions of the Federal grant to the grantee. If the revision, requested by the subgrantee would result in a change to the grantee's approved project which requires Federal prior approval, the grantee will obtain the Federal agency's approval before approving the subgrantee's request.

§ ____.31 Real property.

(a) *Title.* Subject to the obligations and conditions set forth in this section, title to real property acquired under a grant or subgrant will vest upon acquisition in the grantee or subgrantee respectively.

(b) *Use.* Except as otherwise provided by Federal statutes, real property will be used for the originally authorized purposes as long as needed for that purposes, and the grantee or subgrantee shall not dispose of or encumber its title or other interests.

(c) *Disposition.* When real property is no longer needed for the originally authorized purpose, the grantee or subgrantee will request disposition instructions from the awarding agency. The instructions will provide for one of the following alternatives:

(1) *Retention of title.* Retain title after compensating the awarding agency. The amount paid to the awarding agency will be computed by applying the awarding agency's percentage of participation in the cost of the original purchase to the fair market value of the property. However, in those situations where a grantee or subgrantee is disposing of real property acquired with grant funds and acquiring replacement real property under the same program, the net proceeds from the disposition may be used as an offset to the cost of the replacement property.

(2) *Sale of property.* Sell the property and compensate the awarding agency. The amount due to the awarding agency will be calculated by applying the awarding agency's percentage of participation in the cost of the original purchase to the proceeds of the sale after deduction of any actual and reasonable selling and fixing-up expenses. If the grant is still active, the net proceeds from sale may be offset against the original cost of the property. When a grantee or subgrantee is directed to sell property, sales procedures shall be followed that provide for competition to the extent practicable and result in the highest possible return.

(3) *Transfer of title.* Transfer title to the awarding agency or to a third-party designated/approved by the awarding agency. The grantee or subgrantee shall be paid an amount calculated by applying the grantee or subgrantee's percentage of participation in the purchase of the real property to the current fair market value of the property.

§ ____.32 Equipment.

(a) *Title.* Subject to the obligations and conditions set forth in this section, title to equipment acquired under a grant or subgrant will vest upon acquisition in the grantee or subgrantee respectively.

(b) *States.* A State will use, manage, and dispose of equipment acquired under a grant by the State in accordance with State laws and procedures. Other grantees and subgrantees will follow paragraphs (c) through (e) of this section.

(c) *Use.* (1) Equipment shall be used by the grantee or subgrantee in the program or project for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds. When no longer needed for the original program or project, the equipment may be used in other activities currently or previously supported by a Federal agency.

(2) The grantee or subgrantee shall also make equipment available for use on other projects or programs currently or previously supported by the Federal Government, providing such use will not interfere with the work on the projects or program for which it was originally acquired. First preference for other use shall be given to other programs or projects supported by the awarding agency. User fees should be considered if appropriate.

(3) Notwithstanding the encouragement in § ____.25(a) to earn program income, the grantee or subgrantee must not use equipment acquired with grant funds to provide services for a fee to compete unfairly with private companies that provide equivalent services, unless specifically permitted or contemplated by Federal statute.

(4) When acquiring replacement equipment, the grantee or subgrantee may use the equipment to be replaced as a trade-in or sell the property and use the proceeds to offset the cost of the replacement property, subject to the approval of the awarding agency.

(d) *Management requirements.* Procedures for managing equipment (including replacement equipment), whether acquired in whole or in part with grant funds, until disposition takes place will, as a minimum, meet the following requirements:

(1) Property records must be maintained that include a description of the property, a serial number or other identification number, the source of property, who holds title, the acquisition date, and cost of the property, percentage of Federal participation in the cost of the property, the location, use and condition of the property, and any ultimate disposition data including the date of disposal and sale price of the property.

(2) A physical inventory of the property must be taken and the results reconciled with the property records at least once every two years.

(3) A control system must be developed to ensure adequate safeguards to prevent loss, damage, or theft of the property. Any loss, damage, or theft shall be investigated.

(4) Adequate maintenance procedures must be developed to keep the property in good condition.

(5) If the grantee or subgrantee is authorized or required to sell the property, proper sales procedures must be established to ensure the highest possible return.

(e) *Disposition.* When original or replacement equipment acquired under a grant or subgrant is no longer needed for the original project or program or for other activities currently or previously supported by a Federal agency, disposition of the equipment will be made as follows:

(1) Items of equipment with a current per-unit fair market value of less than $5,000 may be retained, sold or otherwise disposed of with no further obligation to the awarding agency.

(2) Items of equipment with a current per unit fair market value in excess of $5,000 may be retained or sold and the awarding agency shall have a right to an amount calculated by multiplying the current market value or proceeds from sale by the awarding agency's share of the equipment.

(3) In cases where a grantee or subgrantee fails to take appropriate disposition actions, the awarding agency may direct the grantee or subgrantee to take excess and disposition actions.

(f) *Federal equipment.* In the event a grantee or subgrantee is provided federally-owned equipment:

(1) Title will remain vested in the Federal Government.

(2) Grantees or subgrantees will manage the equipment in accordance with Federal agency rules and procedures, and submit an annual inventory listing.

(3) When the equipment is no longer needed, the grantee or subgrantee will request disposition instructions from the Federal agency.

(g) *Right to transfer title.* The Federal awarding agency may reserve the right to transfer title to the Federal Government or a third part named by the awarding agency when such a third party is otherwise eligible under existing statutes. Such transfers shall be subject to the following standards:

(1) The property shall be identified in the grant or otherwise made known to the grantee in writing.

(2) The Federal awarding agency shall issue disposition instruction within 120 calendar days after the end of the Federal support of the project for which it was acquired. If the Federal awarding agency fails to issue disposition instructions within the 120 calendar-day period the grantee shall follow ____.32(e).

(3) When title to equipment is transferred, the grantee shall be paid an amount calculated by applying the percentage of participation in the purchase to the current fair market value of the property.

§ ___.33 Supplies.

(a) *Title.* Title to supplies acquired under a grant or subgrant will vest, upon acquisition, in the grantee or subgrantee respectively.

(b) *Disposition.* If there is a residual inventory of unused supplies exceeding $5,000 in total aggregate fair market value upon termination or completion of the award, and if the supplies are not needed for any other federally sponsored programs or projects, the grantee or subgrantee shall compensate the awarding agency for its share.

§ ___.34 Copyrights.

The Federal awarding agency reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish or otherwise use, and to authorize others to use, for Federal Government purposes:

(a) The copyright in any work developed under a grant, subgrant, or contract under a grant or subgrant; and

(b) Any rights of copyright to which a grantee, subgrantee or a contractor purchases ownership with grant support.

§ ___.35 Subawards to debarred and suspended parties.

Grantees and subgrantees must not make any award or permit any award (subgrant or contract) at any tier to any party which is debarred or suspended or is otherwise excluded from or ineligible for participation in Federal assistance programs under Executive Order 12549, "Debarment and Suspension."

§ ___.36 Procurement

(a) *States.* When procuring property and services under a grant, a State will follow the same policies and procedures it uses for procurements from its non-Federal funds. The State will ensure that every purchase order or other contract includes any clauses required by Federal statutes and executive orders and their implementing regulations. Other grantees and subgrantees will follow paragraphs (b) through (i) in this section.

(b) *Procurement standards.* (1) Grantees and subgrantees will use their own procurement procedures which reflect applicable State and local laws and regulations, provided that the procurements conform to applicable Federal law and the standards identified in this section.

(2) Grantees and subgrantees will maintain a contract administration system which ensures that contractors perform in accordance with the terms, conditions, and specifications of their contracts or purchase orders.

(3) Grantees and subgrantees will maintain a written code of standards of conduct governing the performance of their employees engaged in the award and administration of contracts. No employee, officer or agent of the grantee or subgrantee shall participate in selection, or in the award or administration of a contract supported by Federal funds if a conflict of interest, real or apparent, would be involved. Such a conflict would arise when:

(i) The employee, officer or agent,

(ii) Any member of his immediate family,

(iii) His or her partner, or

(iv) An organization which employs, or is about to employ, any of the above, has a financial or other interest in the firm selected for award. The grantee's or subgrantee's officers, employees or agents will neither solicit nor accept gratuities, favors or anything of monetary value from contractors, potential contractors, or parties to subagreements. Grantee and subgrantees may set minimum rules where the financial interest is not substantial or the gift is an unsolicited item of nominal intrinsic value. To the extent permitted by State or local law or regulations, such standards or conduct will provide for penalties, sanctions, or other disciplinary actions for violations of such standards by the grantee's and subgrantee's officers, employees, or agents, or by contractors or their agents. The awarding agency may in regulation provide additional prohibitions relative to real, apparent, or potential conflicts of interest.

(4) Grantee and subgrantee procedures will provide for a review of proposed procurements to avoid purchase of unnecessary or duplicative items. Consideration should be given to consolidating or breaking out procurements to obtain a more economical purchase. Where appropriate, an analysis will be made of lease versus purchase alternatives, and any other appropriate analysis to determine the most economical approach.

(5) To foster greater economy and efficiency, grantees and subgrantees are encouraged to enter into State and local intergovernmental agreements for procurement or use of common goods and services.

(6) Grantees and subgrantees are encouraged to use Federal excess and surplus property in lieu of purchasing new equipment and property whenever such use is feasible and reduces project costs.

(7) Grantees and subgrantees are encouraged to use value engineering clauses in contracts for construction projects of sufficient size to offer reasonable opportunities for cost reductions. Value engineering is a systematic and creative anaylsis of each contract item or task to ensure that its essential function is provided at the overall lower cost.

(8) Grantees and subgrantees will make awards only to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement. Consideration will be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

(9) Grantees and subgrantees will maintain records sufficient to detail the significant history of a procurement. These records will include, but are not necessarily limited to the following: rationale for the method of procurement, selection of contract type, contractor selection or rejection, and the basis for the contract price.

(10) Grantees and subgrantees will use time and material type contracts only—

(i) After a determination that no other contract is suitable, and

(ii) If the contract includes a ceiling price that the contractor exceeds at its own risk.

(11) Grantees and subgrantees alone will be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements. These issues include, but are not limited to source evaluation, protests, disputes, and claims. These standards do not relieve the grantee or subgrantee of any contractual responsibilities under its contracts. Federal agencies will not substitute their judgment for that of the grantee or subgrantee unless the matter is primarily a Federal concern. Violations of law will be referred to the local, State, or Federal authority having proper jurisdiction.

(12) Grantees and subgrantees will have protest procedures to handle and resolve disputes relating to their procurements and shall in all instances disclose information regarding the protest to the awarding agency. A protestor must exhaust all administrative remedies with the grantee and subgrantee before pursuing a protest with the Federal agency.

Reviews of protests by the Federal agency will be limited to:

(i) Violations of Federal law or regulations and the standards of this section (violations of State or local law will be under the jurisdiction of State or local authorities) and

(ii) Violations of the grantee's or subgrantee's protest procedures for failure to review a complaint or protest. Protests received by the Federal agency other than those specified above will be referred to the grantee or subgrantee.

(c) *Competition.* (1) All procurement transactions will be conducted in a manner providing full and open competition consistent with the standards of §___.36. Some of the situations considered to be restrictive of competition include but are not limited to:

(i) Placing unreasonable requirements on firms in order for them to qualify to do business,

(ii) Requiring unnecessary experience and excessive bonding,

(iii) Noncompetitive pricing practices between firms or between affiliated companies,

(iv) Noncompetitive awards to consultants that are on retainer contracts,

(v) Organizational conflicts of interest,

(vi) Specifying only a "brand name" product instead of allowing "an equal" product to be offered and describing the performance of other relevant requirements of the procurement, and

(vii) Any arbitrary action in the procurement process.

(2) Grantees and subgrantees will conduct procurements in a manner that prohibits the use of statutorily or administratively imposed in-State or local geographical preferences in the evaluation of bids or proposals, except in those cases where applicable Federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts State licensing laws. When contracting for architectural and engineering (A/E) services, geographic location may be a selection criteria provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.

(3) Grantees will have written selection procedures for procurement transactions. These procedures will ensure that all solicitations:

(i) Incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured, and when necessary, shall set forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided if at all possible. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a "brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement. The specific features of the named brand which must be met by offerors shall be clearly stated; and

(ii) Identify all requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.

(4) Grantees and subgrantees will ensure that all prequalified lists of persons, firms, or products which are used in acquiring goods and services are current and include enough qualified sources to ensure maximum open and free competition. Also, grantees and subgrantees will not preclude potential bidders from qualifying during the solicitation period.

(d) *Methods of procurement to be followed.* (1) Procurement by *small purchase procedures.* Small purchase procedures are those relatively simple and informal procurement methods for securing services, supplies, or other property that do not cost more than $25,000 in the aggregate. If small purchase procurements are used, price or rate quotations will be obtained from an adequate number of qualified sources.

(2) Procurement by *sealed bids* (formal advertising). Bids are publicly solicited and a firm-fixed-price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is the lowest in price. The sealed bid method is the preferred method for procuring construction, if the conditions in § ____.36(d)(2)(i) apply.

(i) In order for sealed bidding to be feasible, the following conditions should be present:

(A) A complete, adequate, and realistic specification or purchase description is available;

(B) Two or more responsible bidders are willing and able to compete effectively for the business; and

(C) The procurement lends itself to a firm fixed price contract and the selection of the successful bidder can be made principally on the basis of price.

(ii) If sealed bids are used, the following requirements apply:

(A) The invitation for bids will be publicly advertised and bids shall be solicited from an adequate number of known suppliers, providing them sufficient time prior to the date set for opening the bids;

(B) The invitation for bids, which will include any specifications and pertinent attachments, shall define the items or services in order for the bidder to properly respond;

(C) All bids will be publicly opened at the time and place prescribed in the invitation for bids;

(D) A firm fixed-price contract award will be made in writing to the lowest responsive and responsible bidder. Where specified in bidding documents, factors such as discounts, transportation cost, and life cycle costs shall be considered in determining which bid is lowest. Payment discounts will only be used to determine the low bid when prior experience indicates that such discounts are usually taken advantage of; and

(E) Any or all bids may be rejected if there is a sound documented reason.

(3) Procurement by *competitive proposals.* The technique of competitive proposals is normally conducted with more than one source submitting an offer, and either a fixed-price or cost-reimbursement type contract is awarded. It is generally used when conditions are not appropriate for the use of sealed bids. If this method is used, the following requirements apply:

(i) Requests for proposals will be publicized and identify all evaluation factors and their relative importance. Any response to publicized requests for proposals shall be honored to the maximum extent practical;

(ii) Proposals will be solicited from an adequate number of qualified sources;

(iii) Grantees and subgrantees will have a method for conducting technical evaluations of the proposals received and for selecting awardees;

(iv) Awards will be made to the responsible firm whose proposal is most advantageous to the program, with price and other factors considered; and

(v) Grantees and subgrantees may use competitive proposal procedures for qualifications-based procurement of architectural/engineering (A/E) professional services whereby competitors' qualifications are evaluated and the most qualified competitor is selected, subject to negotiation of fair and reasonable compensation. The method, where price is not used as a selection factor, can only be used in procurement of A/E professional services. It cannot be used to purchase other types of services though A/E firms are a potential source to perform the proposed effort.

(4) Procurement by *noncompetitive proposals* is procurement through solicitation of a proposal from only one source, or after solicitation of a number of sources, competition is determined inadequate.

(i) Procurement by noncompetitive proposals may be used only when the award of a contract is infeasible under small purchase procedures, sealed bids or competitive proposals and one of the following circumstances applies:

(A) The item is available only from a single source;

(B) The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation.

(C) The awarding agency authorizes noncompetitive proposals; or

(D) After solicitation of a number of sources, competition is determined inadequate.

(ii) Cost analysis, i.e., verifying the proposed cost data, the projections of the data, and the evaluation of the specific elements of costs and profit, is required.

(iii) Grantees and subgrantees may be required to submit the proposed procurement to the awarding agency for pre-award review in accordance with paragraph (g) of this section.

(e) *Contracting with small and minority firms, women's business enterprise and labor surplus area firms.* (1) The grantee and subgrantee will take all necessary affirmative steps to assure that minority firms, women's business enterprises, and labor surplus area firms are used when possible.

(2) Affirmative steps shall include:

(i) Placing qualified small and minority businesses and women's business enterprises on solicitation lists;

(ii) Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;

(iii) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority business, and women's business enterprises;

(iv) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority business, and women's business enterprises;

(v) Using the services and assistance of the Small Business Administration, and the Minority Business Development Agency of the Department of Commerce; and

(vi) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (e)(2) (i) through (v) of this section.

(f) *Contract cost and price.* (1) Grantees and subgrantees must perform a cost or price analysis in connection with every procurement action including contract modifications. The method and degree of analysis is dependent on the facts surrounding the particular procurement situation, but as a starting point, grantees must make independent estimates before receiving bids or proposals. A cost analysis must be performed when the offeror is required to submit the elements of his estimated cost, e.g., under professional, consulting, and architectural engineering services contracts. A cost analysis will be necessary when adequate price competition is lacking, and for sole source procurements, including contract modifications or change orders, unless price resonableness can be established on the basis of a catalog or market price of a commercial product sold in substantial quantities to the general public or based on prices set by law or regulation. A price analysis will be used in all other instances to determine the reasonableness of the proposed contract price.

(2) Grantees and subgrantees will negotiate profit as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. To establish a fair and reasonable profit, consideration will be given to the complexity of the work to be performed, the risk borne by the contractor, the contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

(3) Costs or prices based on estimated costs for contracts under grants will be allowable only to the extent that costs incurred or cost estimates included in negotiated prices are consistent with Federal cost principles (see § ____.22). Grantees may reference their own cost principles that comply with the applicable Federal cost principles.

(4) The cost plus a percentage of cost and percentage of construction cost methods of contracting shall not be used.

(g) *Awarding agency review.* (1) Grantees and subgrantees must make available, upon request of the awarding agency, technical specifications on proposed procurements where the awarding agency believes such review is needed to ensure that the item and/or service specified is the one being proposed for purchase. This review generally will take place prior to the time the specification is incorporated into a solicitation document. However, if the grantee or subgrantee desires to have the review accomplished after a solication has been developed, the awarding agency may still review the specifications, with such review usually limited to the technical aspects of the proposed purchase.

(2) Grantees and subgrantees must on request make available for awarding agency pre-award review [delete ","] procurement documents, such as requests for proposals or invitations for bids, independent cost estimates, etc., when:

(i) A grantee's or subgrantee's procurement procedures or operation fails to comply with the procurement standards in this seciton; or

(ii) The procurement is expected to exceed $25,000 and is to be awarded without competition or only one bid or offer is received in response to a solicitation; or

(iii) The procurement, which is expected to exceed $25,000, specifies a "brand name" product; or

(iv) The proposed award over $25,000 is to be awarded to other than the apparent low bidder under a sealed bid procurement; or

(v) A proposed contract modification changes the scope of a contract or increases the contract amount by more than $25,000.

(3) A grantee or subgrantee will be exempt from the pre-award review in paragraph (g)(2) of this section if the awarding agency determines that its procurement systems comply with the standards of this section.

(i) A grantee or subgrantee may request that its procurement system be reviewed by the awarding agency to determine whether its system meets these standards in order for its system to be certified. Generally, these reviews shall occur where there is a continuous high-dollar funding, and third-party contracts are awarded on a regular basis;

(ii) A grantee or subgrantee may self-certify its procurement system. Such self-certification shall not limit the awarding agency's right to survey the system. Under a self-certification procedure, awarding agencies may wish to rely on written assurances from the grantee or subgrantee that it is complying with these standards. A grantee or subgrantee will cite specific procedures, regulations, standards, etc., as being in compliance with these requirements and have its system available for review.

(h) *Bonding requirements.* For construction or facility improvement contracts or subconstracts exceeding $100,000, the awarding agency may accept the bonding policy and requirements of the grantee or subgrantee provided the awarding agency has made a determination that the awarding agency's interest is adequately protected. If such a determination has not been made, the minimum requirements shall be as follows:

(1) *A bid guarantee from each bidder equivalent to five percent of the bid price.* The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of his bid, execute such contractual documents as may be required within the time specified.

(2) *A performance bond on the part of the contractor for 100 percent of the contract price.* A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

(3) *A payment bond on the part of the contractor for 100 percent of the contract price.* A "payment bond" is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

(i) *Contract provisions.* A grantee's and subgrantee's contracts must contain provisions in paragraph (i) of this Section. Federal agencies are permitted to require changes, remedies, changed conditions, access and records retention, suspension of work, and other clauses approved by the Office of Procurement Policy.

(1) Administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate. (Contracts other than small purchases)

(2) Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of $10,000)

(3) Compliance with Executive Order 11246 of September 24, 1965 entitled "Equal Employment Opportunity," as amended by Executive Order 11375 of October 13, 1967 and as supplemented in Department of Labor regulations (41 CFR Part 60). (All construction contracts awarded in excess of $10,000 by grantees and their contractors or subgrantees)

(4) Compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3). (All contracts and subgrants for construction or repair)

(5) Compliance with the Davis-Bacon Act (40 U.S.C. 276a to a–7) as supplemented by Department of Labor regulations (29 CFR Part 5). (Construction contracts in excess of $2,000 awarded by grantees and subgrantees when required by Federal grant program legislation)

(6) Compliance with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as supplemented by Department of Labor regulations (29 CFR Part 5). (Construction contracts awarded by grantees and subgrantees in excess of $2,000, and in excess of $2,500 for other contracts which involve the employment of mechanics or laborers)

(7) Notice of awarding agency requirements and regulations pertaining to reporting.

(8) Notice of awarding agency requirements and regulations pertaining to patent rights with respect to any discovery or invention which arises or is developed in the course of or under such contract.

(9) Awarding agency requirements and regulations pertaining to copyrights and rights in data.

(10) Access by the grantee, the subgrantee, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.

(11) Retention of all required records for three years after grantees or subgrantees make final payments and all other pending matters are closed.

(12) Compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR Part 15). (Contracts, subcontracts, and subgrants of amounts in excess of $100,000)

(13) Mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94–163).

§ ____.37 Subgrants.

(a) *States.* States shall follow state law and procedures when awarding and administering subgrants (whether on a cost reimbursement or fixed amount basis) of financial assistance to local and Indian tribal governments. States shall:

(1) Ensure that every subgrant includes any clauses required by Federal statute and executive orders and their implementing regulations;

(2) Ensure that subgrantees are aware of requirements imposed upon them by Federal statute and regulation;

(3) Ensure that a provision for compliance with Section ____.42 is placed in every cost reimbursement subgrant; and

(4) Conform any advances of grant funds to subgrantees substantially to the same standards of timing and amount that apply to cash advances by Federal agencies.

(b) *All other grantees.* All other grantees shall follow the provisions of this part which are applicable to awarding agencies when awarding and administering subgrants (whether on a cost reimbursement or fixed amount basis) of financial assistance to local and Indian tribal governments. Grantees shall:

(1) Ensure that every subgrant includes a provision for compliance with this part;

(2) Ensure that every subgrant includes any clauses required by Federal statute and executive orders and their implementing regulations; and

(3) Ensure that subgrantees are aware of requirements imposed upon them by Federal statutes and regulations.

(c) *Exceptions.* By their own terms, certain provisions of this part do not apply to the award and administration of subgrants:

(1) Section ____.10;

(2) Section ____.11;

(3) The letter-of-credit procedures specified in Treasury Regulations at 31 CFR Part 205, cited in § ____.21; and

(4) Section ____.50.

Reports, Records, Retention, and Enforcement

§ ____.40 Monitoring and reporting program performance.

(a) *Monitoring by grantees.* Grantees are responsible for managing the day-to-day operations of grant and subgrant supported activities. Grantees must monitor grant and subgrant supported activities to assure compliance with applicable Federal requirements and that performance goals are being

VOL
53
ISS
48
MR
11
1988
UMI

achieved. Grantee monitoring must cover each program, function or activity.

(b) *Nonconstruction performance reports.* The Federal agency may, if it decides that performance information available from subsequent applications contains sufficient information to meet its programmatic needs, require the grantee to submit a performance report only upon expiration or termination of grant support. Unless waived by the Federal agency this report will be due on the same date as the final Financial Status Report.

(1) Grantees shall submit annual performance reports unless the awarding agency requires quarterly or semi-annual reports. However, performance reports will not be required more frequently than quarterly. Annual reports shall be due 90 days after the grant year, quarterly or semi-annual reports shall be due 30 days after the reporting period. The final performance report will be due 90 days after the expiration or termination of grant support. If a justified request is submitted by a grantee, the Federal agency may extend the due date for any performance report. Additionally, requirements for unnecessary performance reports may be waived by the Federal agency.

(2) Performance reports will contain, for each grant, brief information on the following:

(i) A comparison of actual accomplishments to the objectives established for the period. Where the output of the project can be quantified, a computation of the cost per unit of output may be required if that information will be useful.

(ii) The reasons for slippage if established objectives were not met.

(iii) Additional pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.

(3) Grantees will not be required to submit more than the original and two copies of performance reports.

(4) Grantees will adhere to the standards in this section in prescribing performance reporting requirements for subgrantees.

(c) *Construction performance reports.* For the most part, on-site technical inspections and certified percentage-of-completion data are relied on heavily by Federal agencies to monitor progress under construction grants and subgrants. The Federal agency will require additional formal performance reports only when considered necessary, and never more frequently than quarterly.

(d) *Significant developments.* Events may occur between the scheduled performance reporting dates which have significant impact upon the grant or subgrant supported activity. In such cases, the grantee must inform the Federal agency as soon as the following types of conditions become known:

(1) Problems, delays, or adverse conditions which will materially impair the ability to meet the objective of the award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.

(2) Favorable developments which enable meeting time schedules and objectives sooner or at less cost than anticipated or producing more beneficial results than originally planned.

(e) Federal agencies may make site visits as warranted by program needs.

(f) *Waivers, extensions.* (1) Federal agencies may waive any performance report required by this part if not needed.

(2) The grantee may waive any performance report from a subgrantee when not needed. The grantee may extend the due date for any performance report from a subgrantee if the grantee will still be able to meet its performance reporting obligations to the Federal agency.

§ ___.41 Financial Reporting.

(a) *General.* (1) Except as provided in paragraphs (a) (2) and (5) of this section, grantees will use only the forms specified in paragraphs (a) through (e) of this section, and such supplementary or other forms as may from time to time be authorized by OMB, for:

(i) Submitting financial reports to Federal agencies, or

(ii) Requesting advances or reimbursements when letters of credit are not used.

(2) Grantees need not apply the forms prescribed in this section in dealing with their subgrantees. However, grantees shall not impose more burdensome requirements on subgrantees.

(3) Grantees shall follow all applicable standard and supplemental Federal agency instructions approved by OMB to the extend required under the Paperwork Reduction Act of 1980 for use in connection with forms specified in paragraphs (b) through (e) of this section. Federal agencies may issue substantive supplementary instructions only with the approval of OMB. Federal agencies may shade out or instruct the grantee to disregard any line item that the Federal agency finds unnecessary for its decisionmaking purposes.

(4) Grantees will not be required to submit more than the original and two copies of forms required under this part.

(5) Federal agencies may provide computer outputs to grantees to expedite or contribute to the accuracy of reporting. Federal agencies may accept the required information from grantees in machine usable format or computer printouts instead of prescribed forms.

(6) Federal agencies may waive any report required by this section if not needed.

(7) Federal agencies may extend the due date of any financial report upon receiving a justified request from a grantee.

(b) *Financial Status Report.*—(1) *Form.* Grantees will use Standard Form 269 or 269A, Financial Status Report, to report the status of funds for all nonconstruction grants and for construction grants when required in accordance with paragraph § ___.41(e)(2)(iii) of this section.

(2) *Accounting basis.* Each grantee will report program outlays and program income on a cash or accrual basis as prescribed by the awarding agency. If the Federal agency requires accrual information and the grantee's accounting records are not normally kept on the accural basis, the grantee shall not be required to convert its accounting system but shall develop such accrual information through and analysis of the documentation on hand.

(3) *Frequency.* The Federal agency may prescribe the frequency of the report for each project or program. However, the report will not be required more frequently than quarterly. If the Federal agency does not specify the frequency of the report, it will be submitted annually. A final report will be required upon expiration or termination of grant support.

(4) *Due date.* When reports are required on a quarterly or semiannual basis, they will be due 30 days after the reporting period. When required on an annual basis, they will be due 90 days after the grant year. Final reports will be due 90 days after the expiration or termination of grant support.

(c) *Federal Cash Transactions Report*—(1) *Form.* (i) For grants paid by letter or credit, Treasury check advances or electronic transfer of funds, the grantee will submit the Standard Form 272, Federal Cash Transactions Report, and when necessary, its continuation sheet, Standard Form 272a, unless the terms of the award exempt the grantee from this requirement.

(ii) These reports will be used by the Federal agency to monitor cash advanced to grantees and to obtain disbursement or outlay information for each grant from grantees. The format of the report may be adapted as

appropriate when reporting is to be accomplished with the assistance of automatic data processing equipment provided that the information to be submitted is not changed in substance.

(2) *Forecasts of Federal cash requirements.* Forecasts of Federal cash requirements may be required in the "Remarks" section of the report.

(3) *Cash in hands of subgrantees.* When considered necessary and feasible by the Federal agency, grantees may be required to report the amount of cash advances in excess of three days' needs in the hands of their subgrantees or contractors and to provide short narrative explanations of actions taken by the grantee to reduce the excess balances.

(4) *Frequency and due date.* Grantees must submit the report no later than 15 working days following the end of each quarter. However, where an advance either by letter of credit or electronic transfer of funds is authorized at an annualized rate of one million dollars or more, the Federal agency may require the report to be submitted within 15 working days following the end of each month.

(d) *Request for advance or reimbursement*—(1) *Advance payments.* Requests for Treasury check advance payments will be submitted on Standard Form 270, Request for Advance or Reimbursement. (This form will not be used for drawdowns under a letter of credit, electronic funds transfer or when Treasury check advance payments are made to the grantee automatically on a predetermined basis.)

(2) *Reimbursements.* Requests for reimbursement under nonconstruction grants will also be submitted on Standard Form 270. (For reimbursement requests under construction grants, see paragraph (e)(1) of this section.)

(3) The frequency for submitting payment requests is treated in § ___.41(b)(3).

(e) *Outlay report and request for reimbursement for construction programs.* (1) Grants that support construction activities paid by reimbursement method.

(i) Requests for reimbursement under construction grants will be submitted on Standard Form 271, Outlay Report and Request for Reimbursement for Construction Programs. Federal agencies may, however, prescribe the Request for Advance or Reimbursement form, specified in § ___.41(d), instead of this form.

(ii) The frequency for submitting reimbursement requests is treated in § ___.41(b)(3).

(2) Grants that support construction activities paid by letter of credit, electronic funds transfer or Treasury check advance.

(i) When a construction grant is paid by letter of credit, electronic funds transfer or Treasury check advances, the grantee will report its outlays to the Federal agency using Standard Form 271, Outlay Report and Request for Reimbursement for Construction Programs. The Federal agency will provide any necessary special instruction. However, frequency and due date shall be governed by § ___.41(b) (3) and (4).

(ii) When a construction grant is paid by Treasury check advances based on periodic requests from the grantee, the advances will be requested on the form specified in § ___.41(d).

(iii) The Federal agency may substitute the Financial Status Report specified in § ___.41(b) for the Outlay Report and Request for Reimbursement for Construction Programs.

(3) *Accounting basis.* The accounting basis for the Outlay Report and Request for Reimbursement for Construction Programs shall be governed by § ___.41(b)(2).

§ ___.42 Retention and access requirements for records.

(a) *Applicability.* (1) This section applies to all financial and programmatic records, supporting documents, statistical records, and other records of grantees or subgrantees which are:

(i) Required to be maintained by the terms of this Part, program regulations or the grant agreement, or

(ii) Otherwise reasonably considered as pertinent to program regulations or the grant agreement.

(2) This section does not apply to records maintained by contractors or subcontractors. For a requirement to place a provision concerning records in certain kinds of contracts, see § ___.36(i)(10).

(b) *Length of retention period.* (1) Except as otherwise provided, records must be retained for three years from the starting date specified in paragraph (c) of this section.

(2) If any litigation, claim, negotiation, audit or other action involving the records has been started before the expiration of the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later.

(3) To avoid duplicate recordkeeping, awarding agencies may make special arrangements with grantees and subgrantees to retain any records which are continuously needed for joint use. The awarding agency will request transfer of records to its custody when it determines that the records possess long-term retention value. When the records are transferred to or maintained by the Federal agency, the 3-year retention requirement is not applicable to the grantee or subgrantee.

(c) *Starting date of retention period*—(1) *General.* When grant support is continued or renewed at annual or other intervals, the retention period for the records of each funding period starts on the day the grantee or subgrantee submits to the awarding agency its single or last expenditure report for that period. However, if grant support is continued or renewed quarterly, the retention period for each year's records starts on the day the grantee submits its expenditure report for the last quarter of the Federal fiscal year. In all other cases, the retention period starts on the day the grantee submits its final expenditure report. If an expenditure report has been waived, the retention period starts on the day the report would have been due.

(2) *Real property and equipment records.* The retention period for real property and equipment records starts from the date of the disposition or replacement or transfer at the direction of the awarding agency.

(3) *Records for income transactions after grant or subgrant support.* In some cases grantees must report income after the period of grant support. Where there is such a requirement, the retention period for the records pertaining to the earning of the income starts from the end of the grantee's fiscal year in which the income is earned.

(4) *Indirect cost rate proposals, cost allocations plans, etc.* This paragraph applies to the following types of documents, and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(i) *If submitted for negotiation.* If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the grantee) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission.

(ii) *If not submitted for negotiation.* If the proposal, plan, or other computation is not required to be submitted to the Federal Government (or to the grantee) for negotiation purposes, then the 3-year retention period for the proposal plan, or computation and its supporting records starts from end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

(d) *Substitution of microfilm.* Copies made by microfilming, photocopying, or similar methods may be substituted for the original records.

(e) *Access to records*—(1) *Records of grantees and subgrantees.* The awarding agency and the Comptroller General of the United States, or any of their authorized representatives, shall have the right of access to any pertinent books, documents, papers, or other records of grantees and subgrantees which are pertinent to the grant, in order to make audits, examinations, excerpts, and transcripts.

(2) *Expiration of right of access.* The rights of access in this section must not be limited to the required retention period but shall last as long as the records are retained.

(f) *Restrictions on public access.* The Federal Freedom of Information Act (5 U.S.C. 552) does not apply to records Unless required by Federal, State, or local law, grantees and subgrantees are not required to permit public access to their records.

§ ____.43 Enforcement.

(a) *Remedies for noncompliance.* If a grantee or subgrantee materially fails to comply with any term of an award, whether stated in a Federal statute or regulation, an assurance, in a State plan or application, a notice of award, or elsewhere, the awarding agency may take one or more of the following actions, as appropriate in the circumstances:

(1) Temporarily withhold cash payments pending correction of the deficiency by the grantee or subgrantee or more severe enforcement action by the awarding agency,

(2) Disallow (that is, deny both use of funds and matching credit for) all or part of the cost of the activity or action not in compliance,

(3) Wholly or partly suspend or terminate the current award for the grantee's or subgrantee's program,

(4) Withhold further awards for the program, or

(5) Take other remedies that may be legally available.

(b) *Hearings, appeals.* In taking an enforcement action, the awarding agency will provide the grantee or subgrantee an opportunity for such hearing, appeal, or other administrative proceeding to which the grantee or subgrantee is entitled under any statute or regulation applicable to the action involved.

(c) *Effects of suspension and termination.* Costs of grantee or subgrantee resulting from obligations incurred by the grantee or subgrantee during a suspension or after termination of an award are not allowable unless the awarding agency expressly authorizes them in the notice of suspension or termination or subsequently. Other grantee or subgrantee costs during suspension or after termination which are necessary and not reasonably avoidable are allowable if:

(1) The costs result from obligations which were properly incurred by the grantee or subgrantee before the effective date of suspension or termination, are not in anticipation of it, and, in the case of a termination, are noncancellable, and,

(2) The costs would be allowable if the award were not suspended or expired normally at the end of the funding period in which the termination takes effect.

(d) *Relationship to Debarment and Suspension.* The enforcement remedies identified in this section, including suspension and termination, do not preclude grantee or subgrantee from being subject to "Debarment and Suspension" under E.O. 12549 (see § ____.35).

§ ____.44 Termination for convenience.

Except as provided in § ____.43 awards may be terminated in whole or in part only as follows:

(a) By the awarding agency with the consent of the grantee or subgrantee in which case the two parties shall agree upon the termination conditions, including the effective date and in the case of partial termination, the portion to be terminated, or

(b) By the grantee or subgrantee upon written notification to the awarding agency, setting forth the reasons for such termination, the effective date, and in the case of partial termination, the portion to be terminated. However, if, in the case of a partial termination, the awarding agency determines that the remaining portion of the award will not accomplish the purposes for which the award was made, the awarding agency may terminate the award in its entirety under either § ____.43 or paragraph (a) of this section.

Subpart D—After-The-Grant Requirements

§ ____.50 Closeout.

(a) *General.* The Federal agency will close out the award when it determines that all applicable administrative actions and all required work of the grant has been completed.

(b) *Reports.* Within 90 days after the expiration or termination of the grant, the grantee must submit all financial, performance, and other reports required as a condition of the grant. Upon request by the grantee, Federal agencies may extend this timeframe. These may include but are not limited to:

(1) *Final performance or progress report.*

(2) *Financial Status Report (SF 269) or Outlay Report and Request for Reimbursement for Construction Programs (SF–271) (as applicable.)*

(3) *Final request for payment (SF–270) (if applicable).*

(4) *Invention disclosure (if applicable).*

(5) *Federally-owned property report:* In accordance with § ____.32(f), a grantee must submit an inventory of all federally owned property (as distinct from property acquired with grant funds) for which it is accountable and request disposition instructions from the Federal agency of property no longer needed.

(c) *Cost adjustment.* The Federal agency will, within 90 days after receipt of reports in paragraph (b) of this section, make upward or downward adjustments to the allowable costs.

(d) *Cash adjustments.* (1) The Federal agency will make prompt payment to the grantee for allowable reimbursable costs.

(2) The grantee must immediately refund to the Federal agency any balance of unobligated (unencumbered) cash advanced that is not authorized to be retained for use on other grants.

§ ____.51 Later disallowances and adjustments.

The closeout of a grant does not affect:

(a) The Federal agency's right to disallow costs and recover funds on the basis of a later audit or other review;

(b) The grantee's obligation to return any funds due as a result of later refunds, corrections, or other transactions;

(c) Records retention as required in § ____.42;

(d) Property management requirements in §§ ____.31 and § ____.32; and

(e) Audit requirements in § ____.26.

§ ____.52 Collection of amounts due.

(a) Any funds paid to a grantee in excess of the amount to which the grantee is finally determined to be entitled under the terms of the award constitute a debt to the Federal

Government. If not paid within a reasonable period after demand, the Federal agency may reduce the debt by:

(1) Making an adminstrative offset against other requests for reimbursements,

(2) Withholding advance payments otherwise due to the grantee, or

(3) Other action permitted by law.

(b) Except where otherwise provided by statutes or regulations, the Federal agency will charge interest on an overdue debt in accordance with the Federal Claims Collection Standards (4 CFR Ch. II). The date from which interest is computed is not extended by litigation or the filing of any form of appeal.

Part IV

Department of Education

34 CFR Part 74

Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations; Final Regulations

DEPARTMENT OF EDUCATION

34 CFR Part 74

Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends 34 CFR Part 74 of the Education Department General Administrative Regulations (EDGAR) to limit the applicability of that Part to institutions of higher education, hospitals, and other nonprofit organizations. Part 74 establishes grant management requirements and currently applies to institutions of higher education, hospitals, and other nonprofit organizations under Office of Management and Budget (OMB) Circular A–110 and to State and local governments and Indian tribal organizations under OMB Circular A–102. This amendment is necessary because, in a separate document published in this issue of the **Federal Register**, the Secretary establishes a new Part 80 to implement proposed revisions to OMB Circular A–102, which applies only to State and local governments and Indian tribal organizations.

EFFECTIVE DATE: These regulations take effect on October 1, 1988.

FOR FURTHER INFORMATION CONTACT: Mary Hughes, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue SW. (Room 3122, GSA Regional Office Building No. 3), Washington, DC 20202. Telephone (202) 732–7400.

SUPPLEMENTARY INFORMATION: In a separate document published in this issue of the **Federal Register**, the Secretary has joined with the heads of 22 other Federal agencies to promulgate common regulations implementing revisions to OMB Circular A–102. In that document the Secretary implements the common regulations in a new Part 80. The Director of OMB also publishes in this issue of the **Federal Register** a notice containing the revisions to the Circular upon which the common regulations are based.

The Department of Education is one of six agencies that uses departmentwide regulations to implement the current Circulars A–102 and A–110. The Secretary now implements Circular A–102 in a new Part 80. The Secretary, therefore, limits the applicability of Part 74 to those institutions covered only by OMB Circular A–110—institutions of higher education, hospitals, and other nonprofit organizations.

For a discussion of the background of the common regulations and a statement about the general issues raised by the common regulations see the general preamble to the final rulemaking document for the common regulations. As discussed earlier, that document is published elsewhere in this issue of the **Federal Register**. The Secretary has also included in that document an ED-specific preamble discussing certain issues raised by the Department's implementation of the proposed common regulations. Please see that other rulemaking document for the agency-specific preamble discusses the specific changes necessary to Part 74 in order to limit its applicability to institutions subject to Circular A–110—institutions of higher education, hospitals, and other nonprofit organizations.

A majority of programs administered by the Secretary that apply to institutions of higher education, hospitals, or other nonprofit organizations are direct grant programs. The Secretary does not permit subgrants under direct grant programs (34 CFR 75.708(a)). Thus, the Secretary removes the provisions in Part 74 that tell a grantee what is permissible for inclusion in a subgrant issued by the grantee. However, for example, nonprofit organizations are eligible to receive subgrants under Title III, Part A, of the Carl D. Perkins Vocational Education Act (20 U.S.C. 2351, 2352). Thus, those provisions of Part 74 that apply directly to subgrantees have not been removed by the Secretary.

The Secretary removes Appendix C from Part 74. Appendix C establishes cost principles for State and local governments and Indian tribal organizations. The new Part 80 requires these entities to comply with the cost principles in OMB Circular A–87. Thus, there is no need for Appendix C in Part 74. In the rule adopting the new Part 80, the Secretary removed Appendix G from Part 74 and added that Appendix to the new Part 80. The Secretary made this move because Part 80 applies to State and local governments and the appendix implements the Single Audit Act of 1984 which applies only to State and local governments.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Assessment of Education Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed regulations and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 74

Accounting, Administrative practice and procedure, Grant programs—education, Grants administration, Insurance, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance number does not apply)

Dated: February 16, 1988.

William J. Bennett,
Secretary of Education.

The Secretary amends Title 34 of the Code of Federal Regulations, Part 74, as follows:

1. In Part 74 the table of contents and §§ 74.1 through 74.176 are revised and Appendix C is removed and reserved, to read as follows:

PART 74—ADMINISTRATION OF GRANTS TO INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS AND NONPROFIT ORGANIZATIONS

Subpart A—General

Sec.
74.1 Purpose and scope of this part.
74.2 Scope of subpart.
74.3 Definitions.
74.4 Applicability of this part.
74.6 Deviations.
74.7 Special grant conditions.

Subpart B—Cash Depositories

74.10 Physical segregation and eligibility.
74.11 Checks-paid basis letter of credit.
74.12 Minority-owned banks.

Subpart C—Bonding and Insurance

74.15 General.
74.16 Construction and facility improvements.
74.17 Fidelity bonds.
74.18 Source of bonds.

Subpart D—Retention and Access Requirements for Records

74.20 Applicability.
74.21 Length of retention period.
74.22 Starting date of retention period.
74.23 Substitution of microfilm.
74.24 Access to records.
74.25 Restrictions on public access.

Subpart E—[Reserved]

Subpart F—Grant-Related Income

74.40 Scope of subpart.
74.41 Meaning of program income.
74.42 General program income.
74.43 Program income—proceeds from sale of real property and from sale of equipment and supplies acquired for use.
74.44 Program income—royalties and other income earned from a copyrighted work.
74.45 Program income—royalties or equivalent income earned from patents or from inventions.
74.46 Program income—income after grant or subgrant support not otherwise treated.
74.47 Interest earned on advance of grant funds.

Subpart G—Cost Sharing or Matching

74.50 Scope of subpart.
74.51 Definitions.
74.52 Basic rule: Costs and contributions acceptable.
74.53 Qualifications and exceptions.
74.54 Valuation of donated services.
74.55 Valuation of donated supplies and loaned equipment or space.
74.56 Valuation of donated equipment, buildings, and land.
74.57 Appraisal of real property.

Subpart H—Standards for Grantee and Subgrantee Financial Management Systems and Non-Federal Audits

74.60 Scope of subpart.
74.61 Financial management standards.

Subpart I—Financial Reporting Requirements

74.70 Scope and applicability of subpart.
74.71 Definitions.
74.72 General.
74.73 Financial Status Report.
74.74 Federal Cash Transactions Report.
74.75 Request for Advance or Reimbursement.
74.76 Outlay report and request for reimbursement for construction programs.

Subpart J—Monitoring and Reporting of Program Performance

74.80 Scope of subpart.
74.81 Monitoring by recipients.
74.82 Performance reports under nonconstruction grants.
74.83 Performance reports under construction grants.
74.84 Significant developments between scheduled reporting dates.
74.85 Site visits.

Subpart K—Grant and Subgrant Payment Requirements

74.90 Scope of subpart.
74.91 Definitions.
74.92 Basic standard.
74.93 Payment methods under nonconstruction grants.
74.94 Payment methods under construction grants.
74.95 Withholding of payments.
74.96 Requesting advances or reimbursements.

Subpart L—Programmatic Changes and Budget Revisions

74.100 Scope and applicability of this subpart.
74.101 Relationship to cost principles.
74.102 Prior approval procedures.
74.103 Programmatic changes.
74.104 Budgets generally.
74.105 Budget revisions-nonconstruction projects.
74.106 Budget revisions-construction projects.
74.107 Construction and nonconstruction work under the same grant.
74.108 Authorized funds exceeding needs.

Subpart M—Grant and Subgrant Closeout, Suspension, and Termination

74.110 Definitions.
74.111 Closeout.
74.112 Amounts payable to the Federal Government.
74.113 Violation of terms.
74.114 Suspension.
74.115 Termination.

Subpart N—Forms for Applying for Grants

74.120 Scope of subpart.
74.121 [Reserved].
74.122 Preapplications for Federal assistance.
74.123 Notice of preapplication review action.
74.124 [Reserved]
74.125 [Reserved]
74.126 [Reserved]
74.127 Authorized forms and instructions for nongovernmental organizations.

Subpart O—Property

General

74.130 Scope and applicability of this subpart.
74.131 Prohibition against additional requirements.
74.132 Definitions.
74.133 Title to real property, equipment, and supplies.

Real Property

74.134 Real property.

Equipment and Supplies

74.135 Exemptions for equipment and supplies subject to certain statutes.
74.136 Rights to require transfer of equipment.
74.137 Use of equipment.
74.138 Replacement of equipment.
74.139 Disposition of equipment.
74.140 Equipment management requirements.
74.141 Supplies.

Federal Share of Real Property, Equipment, and Supplies

74.142 Federal share of property.
74.143 Subgrantee's share of market value or sales proceeds.

Intangible Personal Property

74.144 Inventions and patents.
74.145 Copyrights.

Subpart P—Procurement Standards

74.160 Scope of subpart; terminology.
74.161 General.
74.162 Code of conduct.
74.163 Free competition.
74.164 Procedural requirements.
74.165 [Reserved]
74.166 Contract provisions.

Subpart Q—Cost Principles

74.170 Scope of subpart.
74.171 [Reserved]
74.172 Institutions of higher education.
74.173 Hospitals.
74.174 Other nonprofit organizations.
74.175 Subgrants and cost-type contracts.
74.176 Costs allowable with approval.
Appendix A—[Reserved]
Appendix B—[Reserved]
Appendix C—[Reserved]
Appendix D—Part 1—Principles for determining costs applicable to research and development under grants and contracts with educational institutions
  Part II—Principles for determining costs applicable to training and other educational services under grants and contracts with educational institutions
Appendix E—Principles for determining costs applicable to research and development under grants and contracts with hospitals.

Authority: 20 U.S.C. 3474; OMB Circular A–110, unless otherwise noted.

Subpart A—General

§ 74.1 Purpose and scope of this part.

(a) This part establishes uniform requirements for the administration of ED grants and principles for determining costs applicable to activities assisted by ED grants for all grantees other than State and local governments and Indian tribal organizations.

(b) Uniform requirements for State and local governments and Indian tribal organizations are in 34 CFR Part 80—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments.

(c) Recipients subject to this part are also subject to 34 CFR Parts 75, 76, 77, 78, and 79, to the extent applicable.

§ 74.2 Scope of subpart.

This subpart contains general rules pertaining to this Part 74 (definitions, purpose and scope, applicability, and appeals) and procedures for control of deviations from the part.

§ 74.3 Definitions.

As used in this part:

"Awarding party" means (1) with respect to a grant, ED, and (2) with respect to a subgrant, the grantee. (See § 74.4(b))

"Contract" means (except as used in the definitions for "grant" in this section and except where qualified by "Federal") a procurement contract under a grant and "subcontract" means a

BEST COPY AVAILABLE

OL
53
ISS
48
MR
11
988
MI

procurement subcontract under such a contract.

"Cost-type contract" means a contract or subcontract in which the contractor or subcontractor is paid on the basis of the costs it incurs, but the term does not include such subcontracts under a non-cost-type contract or subcontract.

"ED" means the U.S. Department of Education.

"Expenditure report" means: (1) For nonconstruction grants, the "Financial Status Report" (or other equivalent report); (2) for construction grants, the "Outlay Report and Request for Reimbursement for Construction Programs" (or other equivalent report). (See Subpart I of this part.)

"Grant" means an award of financial assistance in the form of money, or property in lieu of money, by the Federal Government to an eligible recipient. The term does not include any Federal procurements subject to the procurement regulations in 48 CFR, nor does it include technical assistance, which provides services instead of money, or other assistance in the form of revenue sharing, loans, loan guarantees, interest subsidies, insurance, or direct appropriations. Also, the term does not include assistance, such as a fellowship or other lump sum award, which the recipient is not required to account for on an actual cost basis.

"Grantee" means the nonprofit corporation or other legal entity to which a grant is awarded and which is accountable to the Federal Government for the use of the funds provided. The grantee is the entire legal entity even if only a particular component of the entity is designated in the award document. For example, a grant award document may name as the grantee one school or campus of a university. In this case, the granting agency usually intends, or actually requires, that the named component assume primary or sole responsibility for administering the grant-assisted project or program. Nevertheless, the naming of a component of a legal entity as the grantee in a grant award document shall not be construed as relieving the whole legal entity from accountability to the Federal Government for the use of the funds provided. (This definition is not intended to affect the eligibility provision of grant programs in which eligibility is limited to organizations, such as State educational agencies, which may be only components of a legal entity.) The term "grantee" does not include any secondary recipients such as subgrantees, contractors, etc., who may receive funds from a grantee pursuant to a grant.

"OMB" means the Office of Management and Budget within the Executive Office of the President.

"Recipient" means grantee or subgrantee.

"Terms of a grant or subgrant" means all requirements of the grant or subgrant, whether in statute, regulations, the award document or elsewhere.

§ 74.4 Applicability of this part.

(a) *General.* (1) Except as provided in paragraphs (a) (2) and (3) of this section or where inconsistent with Federal statutes, regulations, or other terms of a grant, this part applies to all ED grants.

(2) With the exception of 34 CFR 74.62, which applies to Chapter 1, this part does not apply to the programs authorized under Chapter 1 and Subchapters A through C of Chapter 2 of the Education Consolidation and Improvement Act of 1981.

(3) Unless expressly made applicable by ED, this part does not apply when the grantee is a Federal agency, foreign government or organization, international organization such as the United Nations, for profit organization, or individual.

(b) *Public institutions of higher education and hospitals.* Grants and subgrants to institutions of higher education and hospitals operated by a government shall be subject to provisions of this subpart.

§ 74.6 Deviations.

(a) Except as provided in § 74.7, a deviation is any exception to this part not required by Federal statute without allowance of agency discretion. A deviation may be either:

(1) Use of any policy, procedure, form, standard, or grant term which is inconsistent with an applicable provision of this part, or

(2) Failure to use any applicable policy, procedure, form, standard, or grant term which is required by this part.

(b) In order to maintain uniformity to the greatest extent feasible, deviations shall be kept to a minimum. A deviation, whether proposed by an applicant, a recipient, or an official of ED may be authorized only when it is necessary to meet programmatic objectives, or to conserve grant funds, or when it is otherwise essential in the public interest.

(c) A deviation from this part may be made only when authorized by the Secretary.

§ 74.7 Special grant conditions.

(a) Without regard to the deviation control procedures of § 74.6, special grant conditions more restrictive than those prescribed in this Part 74 may be imposed as needed when ED has determined that the grantee:

(1) Is financially unstable.

(2) Has a history of poor performance, or

(3) Has a management system which does not meet the standards of this part.

(b) When special conditions are imposed under paragraph (a) of this section, the grantee will be notified in writing:

(1) Why the special conditions were imposed and

(2) What corrective action is needed. Furthermore, in accordance with OMB Circular A–110, OMB and other Federal agencies in a granting relationship with the grantee will be provided copies of the notice to the grantee.

Subpart B—Cash Depositories

§ 74.10 Physical segregation and eligibility.

Except as provided in § 74.11, awarding parties shall not impose grant terms which:

(a) Require the recipient to use a separate bank account for the deposit of grant funds, or

(b) Establish any eligibility requirements for banks or other financial institutions in which recipients deposit grant funds.

§ 74.11 Checks-paid basis letter of credit.

A separate bank account shall be used when payments under letter of credit are made on a "checks-paid" basis. A checks-paid basis letter of credit is one under which funds are not drawn until the recipient's checks have been presented to its bank for payment. (See Subpart K for definition of "letter of credit.")

§ 74.12 Minority-owned banks.

Consistent with the national goal of expanding opportunities for minority business enterprises, grantees and subgrantees are encouraged to use minority-owned banks. Upon request, ED will furnish a list of minority-owned banks.

Subpart C—Bonding and Insurance

§ 74.15 General.

In administering grants and subgrants, recipients shall observe their regular requirements and practices with respect to bonding and insurance. No additional bonding and insurance requirements, including fidelity bonds, shall be imposed by the terms of the grant or subgrant except as provided in §§ 74.16 through 74.18.

§ 74.16 Construction and facility improvements.

(a) *Scope of this section.* This section covers requirements for bid guarantees, performance bonds, and payment bonds when the recipient will contract for construction or facility improvement (including alterations and renovations of real property) under a grant or subgrant.

(b) *Definitions.* (1) "Bid guarantee" means a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, if its bid is accepted, execute the required contractual documents within the time specified.

(2) "Performance bond" means a bond executed in connection with a contract to secure fulfillment of all the contractor's obligations under the contract.

(3) "Payment bond" means a bond executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

(c) *Bids and contacts of $100,000 or less.* The recipient shall follow its own requirements and practices relating to bid guarantees, performance bonds, and payment bonds.

(d) *Bids and contracts exceeding $100,000.* The recipient may follow its own regular policy and requirements if the Secretary has determined that the Federal Government's interest will be adequately protected. If this determination has not been made, the minimum requirements shall be as follows:

(1) A bid guarantee from each bidder equivalent to 5 percent of the bid price;

(2) A performance bond on the part of the contractor for 100 percent of the contract price; and

(3) A payment bond on the part of the contractor for 100 percent of the contract price.

§ 74.17 Fidelity bonds.

(a) ED may require a grantee to carry adequate fidelity bond coverage where the absence of coverage for the grant-supported activity is considered as creating an unacceptable risk.

(b) A fidelity bond is a bond indemnifying the recipient against losses resulting from the fraud or lack of integrity, honesty or fidelity of one or more employees, officers or other persons holding a position of trust.

§ 74.18 Source of bonds.

Any bonds required under § 74.16(d)(1) through (3) or § 74.17 shall be obtained from companies holding certificates of authority as acceptable sureties (31 CFR Part 223). A list of these companies is published annually by the Department of the Treasury in its Circular 570.

Subpart D—Retention and Access Requirements for Records

§ 74.20 Applicability.

(a) Except as provided in paragraph (b) of this section, this subpart applies to all financial and programmatic records, supporting documents, statistical records and other records of recipients and of contractors and subcontractors under grants and subgrants, which are:

(1) Required to be maintained by the terms of an ED grant, or

(2) Otherwise reasonably considered as pertinent to an ED grant.

(b) This subpart does not apply to records maintained by the contractor or subcontractor for any of the following types of awards it has received under a grant or subgrant:

(1) Any contract or subcontract of $10,000 or less, or

(2) Any contract or subcontract awarded using the formal advertising method of procurement, whether or not required to be so awarded, or

(3) Any subcontract awarded under a contract or subcontract described in paragraph (b)(2) of this section.

§ 74.21 Length of retention period.

(a) Except as provided in paragraphs (b) and (c) of this section, records shall be retained for 3-years from the starting date specified in § 74.22.

(b) If any litigation, claim, negotiation, audit or other action involving the records has been started before the expiration of the 3 year period, the records shall be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later.

(c) In order to avoid duplicate recordkeeping, awarding parties may make special arrangements with recipients to retain any records which are continuously needed for joint use. The awarding party will request transfer of records to its custody when it determines that the records possess long-term retention value. When the records are transferred to or maintained by the awarding party the 3-year retention requirement is not applicable to the recipient.

Cross-reference: See 34 CFR 75.734—Record retention period. Section 75.734 contains record retention requirements imposed by the General Education Provisions Act.

§ 74.22 Starting date of retention period.

(a) *General.* (1) Where ED grant support is continued or renewed at annual or other intervals, the retention period for the records of each funding period starts on the day the grantee submits to ED its single or last expenditure report for that period. However, if ED grant support is continued or renewed quarterly, the retention period for each year's records starts on the day the grantee submits to ED its expenditure report for the last quarter of the Federal fiscal year. In all other cases, the retention period starts on the day the grantee submits its final expenditure report to ED. If an expenditure report has been waived, the retention period starts on the day the report would have been due. "Expenditure report" is defined in § 74.3.

(2) Exceptions to this paragraph are contained in paragraphs (b) through (d) of this section.

(b) *Equipment records.* The retention period for the equipment records required by § 74.140(a) starts from the date of the equipment's disposition (§ 74.139) or replacement (§ 74.138) or transfer at the direction of the awarding party (§ 74.136).

(c) *Records for income transactions after grant or subgrant support.* (1) In some cases an ED requirement concerning the disposition of program income, as defined in Subpart F of this part, will be satisfied by applying the income to costs incurred after expiration or termination of grant or subgrant support for the activity giving rise to the income. In such a case, the retention period for the records pertaining to the costs starts from the end of the recipient's fiscal year in which the costs are incurred.

(2) In some cases, there may be an ED requirement concerning the disposition of copyright royalties or other program income which is earned after expiration or termination of grant or subgrant support. Where there is such a requirement, the retention period for the records pertaining to the earning of the income starts from the end of the recipient's fiscal year in which the income is earned. (See Subpart F of this part.)

(d) *Indirect cost rate proposals, cost allocation plant, etc.*—(1) *Applicability.* This paragraph applies to the following types of documents, and their supporting records:

(i) Indirect cost rate computations or proposals;

(ii) Any similar accounting computations of the rate at which a particular group of costs is chargeable

VOL. 53 ISS 48 MR 11 988 UMI

(such as computer usage chargeback rates or composite fringe benefit rates).

(2) *If submitted for negotiation.* If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the grantee) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission.

(3) *If not submitted for negotiation.* If the proposal, plan, or other computation is not required to be submitted to the Federal Government for negotiation purposes, then the 3-year retention period for the proposal, plan, or computation and its supporting records starts from the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

Cross-Reference: See 34 CFR 75.734—Record retention period. Section 75.734 contains record retention requirements imposed by the General Education Provisions Act.

§ 74.23 Substitution of microfilm.

Copies made by microfilming, photocopying, or similar methods may be substituted for the original records.

§ 74.24 Access to records.

(a) *Records of grantees.* The Secretary and the Comptroller General of the United States, or any of their authorized representatives, shall have the right of access to any books, documents, papers, or other records of the grantee which are pertinent to the ED grant, in order to make audit, examination, excerpts, and transcripts.

(b) *Records of subgrantees.* The Secretary, the Comptroller General of the United States, and the grantee, or any of their authorized representatives, shall have the right of access to any books, documents, papers, or other records of the subgrantee which are pertinent to the ED grant, in order to make audit, examination, excerpts, and transcripts.

(c) *Records of contractors and subcontractors.* Except as provided in § 74.20(b), the Secretary, the Comptroller General of the United States, the grantee, and (if the contract was awarded under a subgrant) the subgrantee, or any of their authorized representatives, shall have the right of access to any books, documents, papers, or other records of the contractor or subcontractor which are pertinent to the ED grant, in order to make audit, examination, excerpts, and transcripts.

(d) *Expiration of right of access.* The rights of access in this section shall not be limited to the required retention period but shall last as long as the records are retained.

§ 74.25 Restrictions on public access.

Unless required by Federal statutes, awarding parties may not impose grant terms which limit public access to records covered by this subpart except after a determination by ED that the records must be kept confidential and would have been excepted from disclosure under ED's "Freedom of Information" regulation (Part 5 of this title) if the records had belonged to ED. This section does not require recipients or their contractors and subcontractors to permit public access to their records.

Subpart E [Reserved]

Subpart F—Grant-Related Income

§ 74.40 Scope of subpart.

This subpart contains policies and requirements relating to (a) program income and (b) interest and other investment income earned on advances of grant funds.

§ 74.41 Meaning of program income.

(a) Except as explained in paragraphs (b) and (c) of this section, program income means gross income earned by a recipient from activities part or all of the cost of which is either borne as a direct cost by a grant or counted as a direct cost towards meeting a cost sharing or matching requirement of a grant. It includes but is not limited to such income in the form of fees for services performed during the grant or subgrant period, proceeds from sale of tangible personal or real property, usage or rental fees, and patent or copyright royalties. If income meets this definition, it shall be considered program income regardless of the method used to calculate the amount paid to the recipient—whether, for example, by a cost-reimbursement method or fixed price arrangement. Nor will the fact that the income is earned by the recipient from a Federal procurement contract or from a procurement contract under a Federal grant awarded to another party affect the income's classification as program income.

(b) For research grants that are subject to an institutional cost-sharing agreement, income shall be considered program income only if it is earned from an activity part of all or the cost of which is borne as a direct cost by the Federal grant funds. An institutional cost-sharing agreement is one entered into between ED and a grantee covering all of ED's research project grants to the grantee in the aggregate.

(c) The following shall not be considered program income:

(1) [Reserved]

(2) Tuition and related fees received by an institution of higher education for a regularly offered course taught by an employee performing under a grant or subgrant.

(d) For the purposes of this subpart, program income is divided into several categories. Each category is treated in a separate section of this subpart.

§ 74.42 General program income.

(a) *Definition.* General program income means all program income accruing to a grantee during the period of grant support or to a subgrantee during the period of subgrant support, other than the special categories of such income treated in §§ 74.43 through 74.45.

(b) *Use.* General program income shall be retained by the recipient and used in accordance with one or a combination of the alternatives in paragraphs (c), (d), and (e) of this section, as follows: The alternative in paragraph (c) of this section may always be used by recipients and must be used if neither of the other two alternatives is permitted by the terms of the grant. The alternatives in paragraph (d) or (e) of this section may be used only if expressly permitted by the terms of the grant. In specifying alternatives that may be used, the terms of the grant may distinguish between income earned by the grantee and income earned by subgrantees and between the sources, kinds, or amounts of income.

(c) *Deduction alternative.* (1) Under this alternative, the income is used for allowable costs of the project or program. If there is a cost-sharing or matching requirement, costs borne by the income may not count toward satisfying that requirement. Therefore, the maximum percentage of Federal participation is applied to the net amount determined by deducting the income from total allowable costs and third-party in-kind contributions. The income shall be used for current costs unless ED authorizes deferral to a later period.

(2) To illustrate this alternative, assume a project in which the grantee incurs $100,000 of allowable costs and receives no third-party in-kind contributions. If the grantee earns $10,000 in general program income and this alternative applies, that $10,000 must be deducted from the $100,000 before applying the maximum percentage of Federal participation. If that percentage is 90 percent, the most that could be paid to the grantee would therefore be $81,000 (90 percent times $90,000).

(d) *Cost-sharing or matching alternative.* (1) Under this alternative, the income is used for allowable costs of the project or program but, in this case the costs borne by the income may count toward satisfying a cost-sharing or matching requirement. Therefore, the maximum percentage of Federal participation is applied to total allowable costs and third-party in-kind contributions. The income shall be used for current costs unless ED authorizes deferral to a later period.

(2) To illustrate this alternative, assume the same situation as in paragraph (c)(2) of this section. Under this alternative, the 90 percent maximum percentage of participation would be applied to the full $100,000, and $90,000 could therefore be paid to the grantee. (It should be noted that if $20,000 of general program income is earned, only $80,000 could be paid, since a grant cannot pay for costs which have been borne by general program income.)

(e) *Additional cost alternative.* Under this alternative, the income is used for costs which are in addition to the allowable costs of the project or program but which nevertheless further the objectives of the Federal statute under which the grant was made, Provided that the costs borne by the income further the broad objectives of that statute, they need not be of a kind that would be permissible as charges to Federal funds. Examples of purposes for which the income may be used are:

(1) Expanding the project or program.

(2) Continuing the project or program after grant or subgrant support ends.

(3) Suporting other projects or programs that further the broad objectives of the statute.

(4) Obtaining equipment or other assets needed for the project or program or for other activities that further the statute's objectives.

§ 74.43 Program income—proceeds from sale of real property and from sale of equipment and supplies acquired for use.

The following kinds of program income shall be governed by Subpart O of this part:

(a) Proceeds from the sale of real property purchased or constructed under a grant or subgrant.

(b) Proceeds from the sale of equipment and supplies fabricated or purchased under a grant or subgrant and intended primarily for use in the grant- or subgrant-supported project or program rather than for sale or rental.

§ 74.44 Program income—royalties and other income earned from a copyrighted work.

(a) This section applies to royalties, license fees, and other income earned by a recipient from a copyrighted work developed under the grant or subgrant. Income of that kind is covered by this section whether a third party or the recipient itself acts as the publisher, seller, exhibitor, or performer of the copyrighted work. In some cases the recipient incurs costs to earn the income but does not charge these costs to ED grant funds, to required cost-sharing or matching funds, or to other program income. Costs of that kind may be deducted from the gross income in order to determine how much must be treated as program income.

(b) The terms of the grant govern the disposition of income subject to this section. If the terms do not treat this kind of income, there are no ED requirements governing the disposition.

§ 74.45 Program income—royalties or equivalent income earned from patents or from inventions.

Disposition of royalties or equivalent income earned on patents or inventions arising out of activities assisted by a grant or subgrant shall be governed by determinations made or agreements entered into under ED's patent regulations. (See Parts 6 and 8 of this title.) If the determination or agreement does not provide for the disposition of the royalties or equivalent income, the disposition shall be in accordance with the recipients' own policies.

§ 74.46 Program income—income after grant or subgrant support not otherwise treated.

(a) This section applies to program income not treated elsewhere in this part which arises from or is attributable to an activity while supported by a grant or subgrant but which does not accrue until after the period of grant or subgrant support. An example is proceeds from the sale or rental of a residual inventory or merchandise fabricated or purchased by a grant-supported workshop during the period of support.

(b) The terms of the grant govern the disposition of income subject to this section. If the terms do not treat this kind of income, there are no ED requirements governing the disposition.

§ 74.47 Interest earned on advances of grant funds.

(a) Except when exempted by Federal statute grantees shall remit to the Federal Government any interest or other investment income earned on advances of ED grant funds. This includes any interest or investment income earned by cost-type contractors on advances to them that are attributable to advances of ED grant funds to the grantee. Unless the grantee receives other instructions from the responsible ED official, the grantee shall remit the amount due by check or money order payable to the Department of Education.

(b) Recipients are cautioned that they are subject to the provisions in § 74.61(e) for minimizing the time between the transfer of advances and their disbursement. Those provisions apply even if there is no accountability to the Federal Government for interest or other investment income earned on the advances.

Subpart G—Cost Sharing or Matching

§ 74.50 Scope of subpart.

(a) This subpart contains rules for satisfying Federal requirements for cost sharing or matching. These rules apply whether the cost sharing or matching is required by Federal statute or by other terms of the grant.

(b) ED and a grantee may enter into an institutional cost-sharing argeement covering all of ED's research project grants to that grantee in the aggregate. Except as provided by the institutional cost-sharing agreement, this subpart applies to the satisfaction of the grantee's obligation under the agreement, as well as to the satisfaction of cost-sharing or matching requirements that apply only to a single grant.

§ 74.51 Definitions.

For purposes of this subpart:

"Cost sharing or matching" means the value of third-party in-kind contributions and that portion of the costs of a grant-supported project or program not borne by the Federal Government.

"Equipment" has the same meaning given to that term in § 74.132, except that instead of "acquisition cost," the words "market value at the time of donation" shall be substituted.

"Supplies" means all tangible personal property other than "equipment" as defined in this section.

"Third-party in-kind contributions" means property or services which benefit a grant-supported project or program and which are contributed by non-Federal third parties without charge to the grantee, the subgrantee, or a cost-type contractor under the grant or subgrant.

§ 74.52 Basic rule: Costs and contributions acceptable.

With the qualifications and exceptions listed in § 74.53, a cost-sharing or matching requirement may be satisfied by either or both of the following:

VOL
53
ISS
48
MR
11
988
UMI

(a) Allowable costs incurred by the grantee, the subgrantee, or a cost-type contractor under the grant or subgrant. This includes allowable costs borne by non-Federal grants or by other cash donations from non-Federal third parties.

(b) The value of third-party in-kind contributions applicable to the period to which the cost-sharing or matching requirement applies.

§ 74.53 Qualifications and exceptions.

(a) *Costs borne by other Federal grants.* Except as provided by Federal statute, a cost-sharing or matching requirement may not be met by costs borne by another Federal grant. This prohibition does not apply to costs borne by general program income earned from a contract awarded under another Federal grant.

(b) *Costs or contributions counted towards other Federal cost-sharing requirements.* Neither costs nor the values of third-party in-kind contributions may count towards satisfying a cost-sharing or matching requirement of an ED grant if they have been or will be counted towards satisfying a cost-sharing or matching requirement of another Federal grant, a Federal procurement contract, or any other award of Federal funds.

(c) *Costs financed by general program income.* Costs financed by general program income, as defined in § 74.42, shall not count towards satisfying a cost-sharing or matching requirement of the ED grant supporting the activity giving rise to the income unless the terms of the grant expressly permit the income to be used for cost sharing or matching. (This is the alternative for use of general program income described in § 74.42(d).)

(d) *Records.* Costs and third-party in-kind contributions counting towards satisfying a cost-sharing or matching requirement must be verifiable from the records of recipients or cost-type contractors. These records must show how the value placed on third-party in-kind contributions was arrived at. To the extent feasible, volunteer services shall be supported by the same methods that the organization uses to support the allocability of its regular personnel costs.

(e) *Special standards for third-party in-kind contributions.* (1) Third-party in-kind contributions shall count towards satisfying a cost-sharing or matching requirement only where, if the party receiving the contributions were to pay for them, the payments would be allowable costs.

(2) A third-party in-kind contribution shall not count as direct cost sharing or matching where, if the party receiving the contribution were to pay for it, the payment would be an indirect cost. Cost-sharing or matching credit for such contributions shall be given only if the recipient or contractor has established, along with its regular indirect cost rate, a special rate for allocating to individual projects or programs the value of the contributions.

(3) The values placed on third-party in-kind contributions for cost-sharing or matching purposes shall conform to the rules in the succeeding sections of this subpart. If a third party in-kind contribution is of a type not treated in those sections, the value placed upon it shall be fair and reasonable.

§ 74.54 Valuation of donated services.

(a) *Volunteer services.* Unpaid services provided to a recipient by individuals shall be valued at rates consistent with those ordinarily paid for similar work in the recipient's organization. If the recipient does not have employees performing similar work, the rates shall be consistent with those ordinarily paid by other employers for similar work in the same labor market. In either case, a reasonable amount for fringe benefits may be included in the valuation.

(b) *Employees of other organizations.* When an employer other than a recipient or cost-type contractor furnishes free of charge the services of an employee in the employee's normal line of work, the services shall be valued at the employee's regular rate of pay exclusive of the employer's fringe benefits and overhead costs. If the services are in a different line of work, paragraph (a) of this section shall apply.

§ 74.55 Valuation of donated supplies and loaned equipment or space.

(a) If a third party donates supplies, the contribution shall be valued at the market value of the supplies at the time of donation.

(b) If a third party donates the use of equipment or space in a building but retains title, the contribution shall be valued at the fair rental rate of the equipment or space.

§ 74.56 Valuation of donated equipment, buildings, and land.

If a third party donates equipment, buildings or land, and title passes to a recipient, the treatment of the donated property shall depend upon the purpose of the grant, as follows:

(a) *Awards for capital expenditures.* If the purpose of the grant is to assist the recipient in the acquisition of property, the market value of that property at the time of donation may be counted as cost sharing or matching.

(b) *Other awards.* If assisting in the acquisition of property is not the purpose of the grant, the following rules apply:

(1) If approval is obtained from the awarding party, the market value at the time of donation of the donated equipment or buildings and the fair rental rate of the donated land may be counted as cost sharing or matching. In all cases, the approval may be given only if a purchase of the equipment or buildings or a purchase or rental of the land would be approved as an allowable direct cost.

(2) If approval is not obtained under paragraph (b)(1) of this section, no amount may be counted for donated land, and only depreciation or use allowances may be counted for donated equipment and buildings. The depreciation or use allowances for this property are not treated as third party in-kind contributions. Instead, they are treated as costs incurred by the recipient. They are computed and allocated (usually as indirect costs) in accordance with the cost principles specified in Subpart Q of this part, in the same way as depreciation or use allowances for purchased equipment and buildings. The amount of depreciation or use allowances for donated equipment and buildings is based on the property's market value at the time it was donated.

§ 74.57 Appraisal of real property.

In some cases under §§ 74.55 and 74.56, it will be necessary to establish the market value of land or a building or the fair rental rate of land or of space in a building. In these cases, ED may require that the market value or fair rental rate be established by a certified real property appraiser (or by a representative of the U.S. General Services Administration, if available) and that the value or rate be certified by a responsible official of the party to which the property or its use is donated.

Subpart H—Standards for Grantee and Subgrantee Financial Management Systems and Non-Federal Audits

§ 74.60 Scope of subpart.

(a) This subpart contains standards for financial management systems and non-Federal audits of recipients.

(b) Awarding parties may not impose on recipients additional financial management standards or requirements concerning non-Federal audits. The awarding parties may, however, provide recipients with suggestions and assistance on these subjects.

§ 74.61 Financial management standards.

Grantees and subgrantees shall meet the following standards for their grant and subgrant financial management systems.

(a) *Financial reporting.* Accurate, current, and complete disclosure of the financial results of each project or program shall be made in accordance with the financial reporting requirements of the grant or subgrant. The terms of grants and subgrants shall not require financial reporting on the accrual basis if the recipient's accounting system is maintained on the cash basis. When accrual reporting is statutorily required, a recipient whose accounting system is not maintained on that basis shall not be required to convert it to the accrual basis; the recipient may develop the accrual information through an analysis of the documentation on hand.

(b) *Accounting records.* Records which identify adequately the source and application of funds for grant or subgrant-supported activities shall be maintained. These records shall contain information pertaining to grant or subgrant awards, authorizations, obligations, unobligated balances, assets, outlays, income, and, if the recipient is a government, liabilities.

(c) *Internal control.* Effective control and accountability shall be maintained for all grant or subgrant cash, real and personal property covered by Subpart O of this part, and other assets. Recipients shall adequately safeguard all such property and shall assure that it is used solely for authorized purposes.

(d) *Budgetary control.* The actual and budgeted amounts for each grant or subgrant shall be compared. If appropriate or specifically required, recipients shall relate financial information to performance or productivity data, including the production of unit cost information. If unit cost data are required, estimates based on available documentation will be accepted whenever possible.

(e) *Advance payments.* Procedures shall be established to minimize the time elapsing between the advance of Federal grant or subgrant funds and their disbursement by the recipient. When advances are made by a letter-of-credit method, the recipient shall make drawdowns as close as possible to the time of making disbursements. Grantees advancing cash to subgrantees shall conform substantially to the same standards of timing and amount as apply to advances by Federal agencies to grantees, including requirements for timely reporting of cash disbursements and balances. (See Subpart K of this part.)

(f) *Allowable costs.* Procedures shall be established for determining the reasonableness, allowability, and allocability of costs in accordance with the applicable cost principles prescribed by Subpart Q of this part and the terms of the grant.

(g) *Source documentation.* Accounting records shall be supported by source documentation such as cancelled checks, paid bills, payrolls, contract and subgrant award documents, etc.

(h) *Audit—(1) General.* (i) This paragraph applies to each recipient that is not subject to the audit requirements in the appendix to 34 CFR Part 80.

(ii) Public hospitals and public colleges and universities are subject to this paragraph if excluded under paragraph 4 of the appendix to 34 CFR Part 80.

(iii) A financial and compliance audit shall be made in accordance with generally accepted auditing standards, including the standards of the U.S. General Accounting Office's publication "Standards for Audit of Governmental Organizations, Programs, Activities, and Functions." [1] The auditors engaged by a recipient shall meet the criteria for qualifications and independence in that publication.

(2) *Purpose and scope.* The purpose of these audits shall be to determine the effectiveness of the financial management systems and internal procedures established by the recipient to meet the terms of its grants and subgrants. The recipient's auditors need not examine every grant or subgrant awarded to the recipient. Rather, audits generally should be made on an organization-wide basis to test the fiscal integrity of financial transactions and compliance with the terms of awards. These tests would include an appropriate sampling of Federal grants and subgrants.

(3) *Frequency.* These audits shall be conducted on a continuing basis or at scheduled intervals, usually once a year, but at least every two years. The frequency shall depend on the nature, size and complexity of the recipient's grant- or subgrant-supported activities.

(4) *Relation to Federal audit.* These audits may affect the frequency and scope of Federal audit. However, nothing in this section is intended to limit the right of the Federal Government to conduct an audit of a grant- or subgrant-supported activity.

(5) *Audit resolution.* The recipient shall follow a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

(6) *Copies of audit reports.* A copy of each audit report, and a description of its resolution, shall be furnished to ED.

Subpart I—Financial Reporting Requirements

§74.70 Scope and applicability of subpart.

This subpart prescribes requirements and forms for grantees to report financial information to ED, and to request grant payments when a letter of credit is not used.

§74.71 Definitions.

As used in this subpart or in the forms identified by this subpart:

"Accrued expenditures" are the charges by grantee during a given period requiring the provision of funds for: (a) Goods and other tangible property received; (b) services performed by employees, contractors, and other payees; and (c) amounts "becoming owed" for which no current services or performance is required, such as annuities, insurance claims, and other benefit payments.

"Accrued income" is the sum of (a) earnings during a given period from services performed by the grantee and from goods and other tangible property delivered to purchasers, and (b) amounts becoming owed to the grantee for which no current services or performance is required by the grantee.

"Federal funds authorized" means the total amount of Federal funds obligated by the Federal Government and authorized for use by the grantee.

"In-kind contributions" means "third party in-kind contributions" as defined in Subpart G of this part.

"Obligations" are the amounts of orders placed, contracts awarded, services received, and similar transactions during a given period, which will require payment during the same or a future period.

"Outlays" are charges made to the grant project or program. Outlays may be reported on a cash or accrual basis.

"Program income" has the same meaning it has in Subpart F of this part.

"Unliquidated obligations," for reports prepared on a cash basis, are the amount of obligations incurred by the grantee that has not been paid. For reports prepared on an accrued expenditure basis, they are the amount of obligations incurred by the grantee for which an outlay has not been recorded.

---

[1] Available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

"Unobligated balance" is the portion of the Federal funds authorized which has not been obligated by the grantee and is determined by deducting the grantee's cumulative obligations from the cumulative Federal funds authorized.

§ 74.72 General.

(a) Except as provided in paragraphs (d) and (e) of this section, grantees shall use only the forms specified in §§ 74.73 through 74.76, and such supplementary or other forms as may from time to time be authorized by ED, for:

(1) Submitting grant financial reports to granting agencies, or

(2) Requesting advances or reimbursements when letters of credit are not used.

(b) Grantees shall follow all applicable standard instructions issued by OMB for use in connection with the forms specified in §§ 74.73 through 74.76. ED may issue substantive supplementary instructions. ED may shade out or instruct the grantee to disregard any line item that ED finds unnecessary for its decision making purposes.

(c) Grantees will not be required to submit more than the original and two copies of forms required under this subpart.

(d) ED may provide computer outputs to grantees to expedite or contribute to the accuracy of reporting. ED may accept the required information from grantees in machine usable format or computer printouts instead of prescribed formats.

(e) When ED has determined that a grantee's accounting system does not meet the standards for financial management systems contained in Subpart H of this part, it may require financial reports with more frequency or more detail (or both), upon written notice to the grantee (without regard to § 74.7), until such time as the standards are met.

(f) ED may waive any report required by this subpart if not needed.

(g) ED may extend the due date for any financial report upon receiving a justfied request from the grantee.

§ 74.73 Financial Status Report.

(a) *Form.* Grantees shall use Standard Form 269, Financial Status Report, to report the Status of funds for all nonconstruction grants.

(b) *Accounting basis.* Each grantee shall report program outlays and program income on the same accounting basis, i.e., cash or accrued expenditure (accrual), which it uses in its accounting system.

(c) *Frequency.* ED may prescribe the frequency of the report for each project or program. However, the report shall not be required more frequently than quarterly except as provided in §§ 74.7 and 74.72(e). If ED does not specify the frequency of the report, it shall be submitted annually. A final report shall be required upon expiration or termination of grant support.

(d) *Due date.* When reports are required on a quarterly or semiannual basis, they shall be due 30 days after the reporting period. When required on an annual basis, they shall be due 90 days after the grant year. Final reports shall be due 90 days after the expiration or termination of grant support.

§ 74.74 Federal Cash Transactions Report.

(a) *Form.* (1) For grants paid by letters of credit (or Treasury check advances) through any ED payment office except the Departmental Federal Assistance Financing System (DFAFS), the grantee shall submit to the payment office Standard Form 272, Federal Cash Transactions Report, and when necessary, its continuation sheet, Standard Form 272a. For grants paid by DFAFS, the grantee shall submit DFAFS Report 27, Recipient Report of Expenditures, to DFAFS.

(2) These reports will be used by the ED payment office to monitor cash advanced to grantees and to obtain disbursement or outlay information for each grant from grantees. The format of the report may be adapted as appropriate when reporting is to be accomplished with the assistance of automatic data processing equipment: *Provided,* That the information to be submitted is not changed in substance.

(b) *Forecasts of Federal cash requirements.* Forecasts of Federal cash requirements may be required in the "Remarks" section of the report.

(c) *Cash in hands of secondary recipients.* When considered necessary and feasible by the ED payment office, grantees may be required to report the amount of cash subadvances in excess of three days' needs in the hands of their contractors and to provide short narrative explanations of actions taken by the grantee to reduce the excess balances.

(d) *Frequency and due date.* Grantees shall submit the report no later than 15 working days following the end of each quarter. However, where a letter of credit authorizes advances at an annualized rate of one million dollars or more, the ED payment office may require the report to be submitted within 15 working days following the end of each month.

§ 74.75 Request for Advance or Reimbursement.

(a) (1) *Advance payments.* Requests for Treasury check advance payments shall be submitted on Standard Form 270, Request for Advance or Reimbursement. (This form is not used for drawdowns under a letter of credit or when Treasury check advance payments are made to the grantee automatically on a predetermined basis.)

(2) *Reimbursements.* Requests for reimbursement under non-construction grants shall also be submitted on Standard Form 270. (For reimbursement requests under construction grants, see § 74.76(a).)

(b) The frequency for submitting payment requests is treated in § 74.96.

§ 74.76 Outlay report and request for reimbursement for construction programs.

(a) *Construction grants paid by reimbursement method.* (1) Requests for reimbursement under construction grants shall be submitted on Standard Form 271, Outlay Report and Request for Reimbursement for Construction Programs. ED may, however, prescribe the Request for Advance or Reimbursement form specified in § 74.75 instead of this form.

(2) The frequency for submitting reimbursement requests is treated in § 74.96

(b) *Construction grants paid by letter of credit or Treasury check advance.* (1) When a construction grant is paid by letter of credit or Treasury check advances, the grantee shall report its outlays to ED using Standard Form 271, Outlay Report and Request for Reimbursement for Construction Programs. ED will provide any necessary special instruction. However, frequency and due date shall be governed by § 74.73 (c) and (d).

(2) When a construction grant is paid by Treasury check advances based on periodic requests from the grantee, the advances shall be requested on the form specified in § 74.75.

(3) ED may substitute the Financial Status Report specified in § 74.73 for the Outlay Report and Request for Reimbursement.

(c) *Accounting basis.* The accounting basis for the Outlay Report and Request for Reimbursement for Construction Programs shall be governed by § 74.73(b).

Subpart J—Monitoring and Reporting of Program Performance

§ 74.80 Scope of subpart.

This subpart sets forth the procedures for monitoring and reporting program performance of recipients. These procedures are designed to place reliance on recipients to manage the day-to-day operations of their grant- and subgrant-supported activities.

§ 74.81 Monitoring by recipients.

Recipients shall monitor the performance of grant- and subgrant-supported activities. They shall review each program, function, or activity to assure that adequate progress is being made towards achieving the goals of the grant or subgrant.

§ 74.82 Performance reports under nonconstruction grants.

(a) Where ED determines that performance information sufficient to meet its programmatic needs will be available from subsequent applications, ED will require the grantee to submit a performance report only upon expiration or termination of grant support. This report will be due on the same date as the final financial Status Report unless waived by ED. Note that the "Application for Federal Assistance (Nonconstruction Programs)" prescribed by Subpart N of this part, when used to request continued support, provides information substantially equivalent to a performance report.

(b) Except as provided in paragraph (a) of this section, grantees shall submit annual performance reports unless ED requires quarterly or semiannual reports. Annual reports shall be due 90 days after the grant year; quarterly or semiannual reports shall be due 30 days after the reporting period. A final performance report shall be due 90 days after the expiration or termination of grant support. ED may extend the due date for any performance report upon receiving a justified request from the grantee. In addition, ED may waive the requirement for any performance report which is not needed.

(c) The content of performance reports shall conform to any instructions issued by the granting agency, including, to the extent appropriate to the particular grant, a brief presentation of the following for each program, function, or activity involved:

(1) A comparison of actual accomplishments to the goals established for the period. Where the output of the project or program can be readily expressed in numbers, a computation of the cost per unit of output may be required if that information will be useful.

(2) The reasons for slippage if established goals were not met.

(3) Other pertinent information including, when appropriate, analysis and explanation of unexpectedly high overall or unit costs.

(d) Grantees will not be required to submit more than the original and two copies of performance reports.

§ 74.83 Performance reports under construction grants.

In general, awarding parties rely heavily on on-site technical inspection and certified percentage-of-completion data to keep themselves informed as to progress under construction grants. Formal performance reports to supplement those sources of information shall be required only if considered necessary by the awarding party, and in no case more frequently than quarterly.

§ 74.84 Significant developments between scheduled reporting dates.

Between the scheduled performance reporting dates, events may occur which have significant impact upon the grant- or subgrant-supported activity. In such cases, the recipient shall inform the awarding party as soon as the following types of conditions become known:

(a) Problems, delays, or adverse conditions which will materially impair the ability to attain the objective of the award. This disclosure shall be accompanied by a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.

(b) Favorable developments which enable meeting time schedules and goals sooner or at less cost than anticipated or producing more beneficial results than originally projected.

§ 74.85 Site visits.

Site visits may be made as necessary by representatives of ED to:

(a) Review program accómplishments and management control systems.

(b) Provided such technical assistance as may be required.

Subpart K—Grant and Subgrant Payment Requirements

§ 74.90 Scope of subpart.

This subpart prescribes the basic standard and the methods under which ED will make grant payments to grantees.

§ 74.91 Definitions.

As used in this subpart:

"Advance by Treasury check" is a payment made by a Treasury check to a grantee, upon its periodic request or through the use of predetermined payment schedules, before payments are made by the grantee.

"Letter of credit" is an instrument certified by an authorized official which authorizes a recipient to draw funds needed for immediate disbursement in accordance with Treasury Circular No. 1075.

"Percentage of completion method" refers to a system under which payments are made for construction work according to the percentage of completion of the work, rather than to the grantee's rate of disbursements.

§ 74.92 Basic standard.

Methods and procedures for making payments to recipients shall minimize the time elapsing between the transfer of funds and the recipient's disbursements.

§ 74.93 Payment methods under nonconstruction grants.

(a) Letters of credit will be used to pay ED grantees when all of the following conditions exist:

(1) There is or will be a continuing relationship between the grantee and the ED payment office for at least a year and the total amount of advances to be received from the ED payment office is $120,000 or more per year,

(2) The grantee has maintained, or demonstrated to ED the willingness and ability to maintain, procedures that minimize the time elapsing between the transfer of funds from the Treasury and their disbursement by the grantee, and

(3) The grantee's financial management system meets the standards for fund control and accountability in Subpart H of this part.

(b) Advances by Treasury check will be used, in accordance with Treasury Circular No. 1075, when the grantee does not meet the requirements in paragraph (a)(1) of this section but does meet the requirements in paragraphs (a)(2) and (3) of this section.

(c) Reimbursement by Treasury check will be preferred method when the requirements of either paragraph (a)(2) or paragraph (a)(3) of this section are not met. This method may also be used when the major portion of the program is accomplished through private market financing or Federal loans, and the Federal grant assistance constitutes a minor portion of the program.

§ 74.94 Payment methods under construction grants.

(a) Reimbursement by Treasury check shall be the preferred method when the grantee does not meet the requirements specified in § 74.93(a) (2) or (3), and may be used for any ED construction grant unless ED has entered into an agreement with the grantee to use a letter of credit for all ED grants, including construction grants.

(b) When the reimbursement by Treasury check method is not used, § 74.93 (a) and (b) shall apply to the construction grant. Implementing procedures under § 74.93 (a) and (b) will be insofar as possible the same for construction grants as for nonconstruction grants awarded to the same grantee.

(c) ED will not use the percentage of completion method to pay its construction grants. The grantee may use that method to pay its construction contractor, but if it does, ED's payments to the grantee will nevertheless be based on the grantee's actual rate of disbursements.

§ 74.95 Withholding of payments.

(a) Unless otherwise required by Federal statute, payments for proper charges incurred by grantees will not be withheld unless (1) the grantee has failed to comply with Federal reporting requirements or (2) the grant is suspended pursuant to § 74.114 or (3) the grantee owes money to the United States and collection of the debt by withholding grant payments will not impair the accomplishment of the objectives of any grant program sponsored by the United States.

(b) Cash withheld for failure to comply with reporting requirements but without suspension of the grant will be released to the grantee upon subsequent compliance. When a grant is suspended, payment adjustments will be made in accordance with § 74.114. When a debt is to be collected, ED may withhold payments or require appropriate accounting adjustments to recorded grant cash balances for which the grantee is accountable to the Federal Government, in order to liquidate the indebtedness.

§ 74.96 Requesting advances or reimbursements.

(a) If advances are made by Treasury check and the advances are not prescheduled, the grantee shall submit its requests for payment monthly. Less frequent requests are not permitted because they would result in advances covering excessive periods of time.

(b) If payments are made through reimbursement by Treasury check, the grantee may submit its requests for reimbursement monthly and may submit them more often if authorized. The grantee will be paid as promptly as possible, ordinarily within 30 days after receipt of a proper request for reimbursement.

(c) The forms for requesting advances or reimbursements are identified in Subpart I of this part.

Subpart L—Programmatic Changes and Budget Revisions

§ 74.100 Scope and applicability of this subpart.

This subpart deals with prior approval requirements for post-award programmatic changes and budget revisions by recipients.

§ 74.101 Relationship to cost principles.

The cost principles in Appendices D and E to this part contain requirements for prior approval of certain types of cost (see § 74.176). Except when waived, those requirements apply to all grants and subgrants even if § § 74.103 through 74.106 do not.

§ 74.102 Prior approval procedures.

(a) *For grants.* When requesting a prior approval required by this subpart, grantees shall address their requests to the responsible ED grants officer. Approvals shall not be valid unless they are in writing and signed by the authorized ED official.

(b) *Timing.* Within 30 days from the date of receipt of a request for approval, the approval authority shall review the request and notify the recipient of its decision. If the request for approval is still under consideration at the end of 30 days, the approval authority shall inform the recipient in writing as to when to expect the decision.

§ 74.103 Programmatic changes.

(a) *Scope.* This section contains requirements for prior approval of departures, other than budget revisions, from approved project plans. In addition to the requirements in this section, awarding parties may require prior approval for other kinds of programmatic changes to an approved grant project.

(b) *Changes to project scope or objectives.* The recipient shall obtain prior approval for any change to the scope or objectives of the approved project. (For construction projects, any material change in approved space utilization or functional layout shall be considered a change in scope.)

(c) *Changes in key people.* The recipient of a grant or subgrant for research (or any other kind of grant or subgrant if the terms of the award make this rule applicable) shall obtain prior approval:

(1) To continue the project during any continuous period of more than 3 months without the active direction of an approved project director or principal investigator; or

(2) To replace the project director or principal investigator (or any other persons named and expressly identified as key project people in the notice of grant or subgrant award) or to permit any such people to devote substantially less effort to the project than was anticipated when the grant or subgrant was awarded.

(d) *Other programmatic changes.* The following shall require prior approval except to the extent explicitly included in the project plan as approved by the awarding party at the time of award:

(1) Transferring to a third party, by contracting or any other means, the actual performance of the substantive programmatic work. The term "substantive programmatic work" means activities which are central to carrying out the purpose of the project, and not merely incidental. Transfer of substantive programmatic work does not include purchase of supplies, materials, or equipment; acquisition of general or incidental support services; obtaining advice; or transfer of activities whose cost is treated as an indirect cost.

(2) Providing medical care to individuals under research grants.

Cross-Reference: See 34 CFR 75.708—Prohibition of subgrants.

§ 74.104 Budgets generally.

(a) *Definitions.* In this subpart:

(1) "Budget" means the recipient's financial plan for carrying out the project or program.

(2) "Approved budget" means a budget (including any revised budget) which has been approved by the awarding party.

(b) *Research project budgets.* For research projects, approved budgets shall not include the recipient's share of project costs.

(c) *Non-research project budgets.* For non-research projects which involve cost sharing or matching, approved budgets shall ordinarily consist of a single set of figures covering total project cost (the sum of the awarding party's share and the recipient's share). However, the awarding party may specify that the recipient's share not be included in the approved budget. In no case, however, shall the approved budget be in the form of a separate set of figures for each share.

(d) *Subdivision by programmatic segments.* Some grants encompass two or more programmatic segments (such as discrete programs, projects, functions, or types of activities). In these cases, the awarding party may require that the approved budget be subdivided to show the anticipated cost of each programmatic segment.

§ 74.105 Budget revisions—nonconstruction projects.

(a) Except as provided in paragraph (b) of this section, the recipient of a grant or subgrant having an approved budget shall obtain prior approval for any budget revision which will:

(1) Involve transfer of amounts budgeted for indirect costs to absorb increases in direct costs, or

(2) Involve transfer of amounts previously budgeted for student support (tuition waivers, stipends, and other payments to or for trainees), or

(3) Result in a need for the award of additional funds, e.g., an increase in the base upon which indirect costs are calculated which will increase allocable indirect costs and result in a claim for a supplementary award.

(b) Any or all of the prior approval requirements in paragraph (a) of this section may be waived by the awarding party.

(c) Except as provided in §§ 74.107 and 74.176, other budget changes under nonconstruction grants do not require approval.

§ 74.106 Budget revisions—construction projects.

Unless provided otherwise by the terms of the grant or subgrant, revisions to construction project budgets do not require approval.

§ 74.107 Construction and nonconstruction work under the same grant.

When a grant provides support for both construction and nonconstruction work, the awarding party may require prior approval before any fund or budget transfers between the two types of work.

§ 74.108 Authorized funds exceeding needs.

The recipient shall notify the awarding party promptly whenever the amount of grant or subgrant authorized funds is expected to exceed needs by more than $5,000 or 5 percent of the grant or subgrant, whichever is greater. This notification will not be required under continuing grants or subgrants if the application for the next period's funding will include an estimate of what the unobligated balance of authorized funds will be at the end of the current period.

Subpart M—Grant and Subgrant Closeout, Suspension, and Termination

§ 74.110 Definitions.

"Grant closeout" means the process by which ED determines that all applicable administrative actions and all required work of the grant have been completed by the grantee and ED.

"Suspension" of a grant means temporary withdrawal of the grantee's authority to obligate grant funds pending corrective action by the grantee or a decision to terminate the grant.

"Termination" of a grant means permanent withdrawal of the grantee's authority to obligate previously awarded grant funds before that authority would otherwise expire. It also means the voluntary relinquishment of that authority by the grantee. "Termination" does not include:

(a) Withdrawal of funds awarded on the basis of the grantee's underestimate of the unobligated balance in a prior period;

(b) Refusal by ED to extend a grant or award additional funds (such as refusal to make a competing or noncompeting continuation, renewal, extension, or supplemental award);

(c) Withdrawal of the unobligated balance as of the expiration of a grant;

(d) Annulment, i.e., voiding, of a grant upon determination that the award was obtained fraudulently, or was otherwise illegal or invalid from inception.

§ 74.111 Closeout.

(a) Each grant shall be closed out as promptly as is feasible after expiration or termination.

(b) In closing out ED grants, the following shall be observed:

(1) Upon request, ED shall promptly pay the grantee for any allowable reimbursable costs not covered by previous payments.

(2) The grantee shall immediately refund or otherwise dispose of, in accordance with instructions from ED, any unobligated balance of cash advanced to the grantee.

(3) The grantee shall submit, within 90 days of the date of expiration or termination, all financial, performance, and other reports required by the terms of the grant. ED may extend the due date for any report upon receiving a justified request from the grantee, and may waive any report which is not needed.

(4) ED shall make a settlement for any upward or downward adjustment of the Federal share of costs, to the extent called for by the terms of the grant.

(c)(1) The closeout of a grant does not affect the retention period for, or Federal rights of access to, grant records. See Subpart D of this part.

(2) If a grant is closed out without audit, ED retains the right to disallow and recover an appropriate amount after fully considering any recommended disallowances resulting from an audit which may be conducted later.

(3) The closeout of a grant does not affect the grantee's responsibilities with respect to property under Subpart O of this part, or with respect to any program income for which the grantee is still accountable under Subpart F of this part.

§ 74.112 Amounts payable to the Federal Government.

For each grant, the following sums shall constitute a debt or debts owed by the grantee to the Federal Government, and shall, if not paid upon demand, be recovered from the grantee or its successor or assignees by setoff or other action as provided by law:

(a) Any grant funds paid to the grantee by the Federal Government in excess of the amount to which the grantee is finally determined to be entitled under the terms of the grant;

(b) Any interest or other investment income earned on advances of grant funds which is due the Federal Government pursuant to § 74.47;

(c) Any royalties or other special classes of program income which, under the terms of the grant, are required to be remitted to the Federal Government (see Subpart F of this part);

(d) Any amounts due the Federal Government under Subpart O of this part; and

(e) Any other amounts finally determined to be due the Federal Government under the terms of the grant.

§ 74.113 Violation of terms.

(a) When a grantee has materially failed to comply with the terms of a grant, ED may suspend the grant, in accordance with § 74.114, terminate the grant for cause, as provided in § 74.115, or take such other remedies as may be legally available and appropriate in the circumstances.

(b) If a project or program is supported over two or more funding periods, a grant may be suspended or terminated in the current period for failure to submit a report still due from a prior period.

§ 74.114 Suspension.

(a) When a grantee has materially failed to comply with the terms of a grant, ED may, upon reasonable notice to the grantee, suspend the grant in whole or in part. The notice of suspension will state the reasons for the suspension, any corrective action required of the grantee, and the effective date. The suspension may be made effective at once if a delayed effective date would be unreasonable considering ED's responsibilities to protect the

Federal Government's interest. Suspensions shall remain in effect until the grantee has taken corrective action satisfactory to ED or given evidence satisfactory to ED that such corrective action will be taken, or until ED terminates the grant.

(b) New obligations incurred by the grantee during the suspension period will not be allowed unless ED expressly authorizes them in the notice of suspension or an amendment to it. Necessary and otherwise allowable costs which the grantee could not reasonably avoid during the suspension period will be allowed if they result from obligations properly incurred by the grantee before the effective date of the suspension and not in anticipation of suspension or termination. At the discretion of ED, third-party in-kind contributions applicable to the suspension period may be allowed in satisfaction of cost sharing or matching requirements.

(c) Appropriate adjustments to payments under the suspended grant will be made either by withholding subsequent payments or by not allowing the grantee credit for disbursements made in payment of unauthorized obligations incurred during the suspension period.

§ 74.115 Termination.

(a) *Termination for cause.* ED may terminate any grant in whole, or in part, at any time before the date of expiration, whenever ED determines that the grantee has materially failed to comply with the terms of the grant. ED shall promptly notify the grantee in writing of the determination and the reasons for the termination, together with the effective date.

(b) *Termination on other grounds.* Except as provided in paragraph (a) of this section, grants may be terminated in whole or in part only as follows:

(1) By ED with the consent of the grantee, in which case the two parties shall agree upon the termination conditions, including the effective date and in the case of partial terminations, the portion to be terminated, or

(2) By the grantee, upon written notification to ED, setting forth the reasons for such termination, the effective date, and in the case of partial terminations, the portion to be terminated. However, if, in the case of a partial termination, ED determines that the remaining portion of the grant will not accomplish the purposes for which the grant was made, ED may terminate the grant in its entirety under either paragraph (a) or paragraph (b)(1) of this section.

(c) *Termination settlements.* When a grant is terminated, the grantee shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. ED will allow full credit to the grantee for the Federal share of the noncancellable obligations properly incurred by the grantee prior to termination.

Subpart N—Forms for Applying for Grants

§ 74.120 Scope of subpart.

(a) This subpart is not applicable to mandatory or formula grant programs which do not require applicants to apply to ED for funds on a project basis.

(b) ED may prescribe the form of applications by nongovernmental organizations (including hospitals and institutions of higher education operated by a government), and may use a standard facesheet for these applications.

§ 74.121 [Reserved]

§ 74.122 Preapplications for Federal assistance.

The purposes of preapplications shall be to:

(a) Establish communications between the applicant and ED;

(b) Determine the applicant's eligibility;

(c) Determine how well the project can compete with similar applications from others in order to discourage proposals which have little or no chance for Federal funding before applicants incur significant expenditures for preparing an application.

§ 74.123 Notice of preapplication review action.

(a) ED will inform applicants of the results of the review of the preapplications submitted to them.

(b) ED will send a notice to the applicant ordinarily within 45 days of the receipt of the preapplication form.

(c) If the review cannot be made within 45 days, the applicant will be informed by letter as to when the review will be completed.

§ 74.124–74.126 [Reserved]

§ 74.127 Authorized forms and instructions for nongovernmental organizations.

Nongovernmental organizations shall use application forms and instructions prescribed by ED, except that the facesheet of such applications shall be standard form 424 for grants under programs covered by Executive Order 12372.

Subpart O—Property

General

§ 74.130 Scope and applicability of this subpart.

(a) Except as explained in paragraphs (c), (d), and (e) of this section this subpart applies to real property, equipment, and supplies acquired with grant support. To be considered acquired with grant support, some or all of the property's acquisition cost must be a direct cost under the grant, a subgrant, or a cost-type contract and must be either borne by grant funds or counted toward satisfying a grant cost-sharing or matching requirement.

(b) This subpart also deals with inventions, patents, and copyrights arising out of activities assisted by a grant or subgrant.

(c) This subpart does not apply to—

(1) Property for which only depreciation or use allowances are charged;

(2) Property donated entirely as a third-party in-kind contribution (as defined in § 74.51); or

(3) Equipment or supplies acquired primarily for sale or rental rather than for use.

(d) Equipment or supplies acquired by a contractor under a grant or subgrant shall be subject to this subpart only if, by terms of the contract, title vests in the grantee or subgrantee.

(e) For research grants that are subject to an institutional cost-sharing agreement (see § 74.50(b)), real property, equipment, and supplies shall be subject to this subpart only if at least some part of the acquisition cost is borne as a direct cost by Federal grant funds.

§ 74.131 Prohibition against additional requirements.

Recipients may follow their own property management policies and procedures: *Provided,* They observe the requirements of this subpart. Awarding parties may not impose on recipients property requirements (including property reporting requirements) not authorized by this subpart, unless specifically required by Federal statutes or Executive Orders.

§ 74.132 Definitions.

As used in this subpart:

"Acquisition" of property includes purchase, construction, or fabrication of property, but does not include rental of property or alterations and renovations of real property.

"Acquisition cost" of an item of purchased equipment means the net invoice price of the equipment, including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the equipment usable for the purpose for which it was acquired. Other charges such as the cost of installation, transportation, taxes, duty or protective in-transit insurance shall be included in or excluded from the unit acquisition cost in accordance with the regular accounting practices of the organization purchasing the equipment. If the item is acquired by trading in another item and paying an additional amount, "acquisition cost" means the amount received for trade-in plus the additional outlay.

"Amount received for trade-in" of an item of equipment traded in for replacement equipment means the amount that would have been paid for the replacement equipment without a trade-in minus the amount paid with the trade-in. The term refers to the actual difference, not necessarily the trade-in value shown on an invoice.

"Equipment" means tangible personal property having a useful life of more than one year and an acquisition cost of $300 or more per unit except that organizations subject to Cost Accounting Standards Board (CASB) regulations may use the CASB standard of $500 or more per unit and useful life of two years. An organization may use its own definition of equipment: *Provided,* That such definition would at least include all tangible personal property as defined herein.

"Personal property" means property of any kind except real property. It may be tangible—having physical existence, or intangible—having no physical existence, such as patents, inventions, and copyrights.

"Real property" means land, including land improvements, structures and appurtenances thereto, but excluding movable machinery and equipment.

"Replacement equipment" means property acquired to take the place of other equipment. To qualify as replacement equipment, it must serve the same function as the equipment replaced and must be of the same nature or character, although not necessarily the same model, grade, or quality.

"Supplies" means all tangible personal property other than equipment.

§ 74.133 Title to real property, equipment, and supplies.

Subject to the obligations and conditions set forth in this subpart, title to real property, equipment, and supplies acquired under a grant or subgrant shall vest, upon acquisition, in the grantee or subgrantee respectively.

Real Property

§ 74.134 Real property.

Except as otherwise provided by Federal statutes, real property to which this subpart applies shall be subject to the following requirements, in addition to any other requirements imposed by the terms of the grant:

(a) *Use.* The property shall be used for the originally authorized purpose as long as needed for that purpose. When no longer so needed, approval of the Secretary may be requested to use the property for other purposes. Use for other purposes shall be limited to:

(1) Projects or programs supported by other Federal grants or assistance agreements.

(2) Activities not supported by other Federal grants or assistance agreements but having, nevertheless, purposes consistent with those of the legislation under which the original grant was made.

(b) *Transfer of title.* Approval may be requested from ED to transfer title to an eligible third party for continued use for authorized purposes in accordance with paragraph (a) of this section. If approval is permissable under Federal statutes and is given, the terms of the transfer shall provide that the transferee shall assume all the rights and obligations of the transferor set forth in this subpart or in other terms of the grant or subgrant.

(c) *Disposition.* When the real property is no longer to be used as provided in paragraphs (a) and (b) of this section, the disposition instructions of ED shall be followed. Those instructions will provide for one of the following alternatives:

(1) The property shall be sold and the Federal Government shall be paid an amount computed by multiplying the Federal share of the property (see § 74.142) times the proceeds from sale (after deducting actual and reasonable selling and fix-up expenses, if any, from the sales proceeds). Proper sales procedures shall be used that provide for competition to the extent practicable and result in the highest possible return.

(2) The recipient shall have the option either of selling the property in accordance with paragraph (c)(1) of this section or of retaining title. If title is retained, the Federal Government shall be paid an amount computed by multiplying the market value of the property by the Federal share of the property.

(3) The recipient shall transfer the title to either the Federal Government or an eligible non-Federal party named by ED. The grantee shall be entitled to be paid an amount computed by multiplying the market value of the property by the non-Federal share of the property. If the property belonged to a subgrantee, see § 74.143 for subgrantee's share.

Equipment and Supplies

§ 74.135 Exemptions for equipment and supplies subject to certain statutes.

(a) Some Federal statutes, in certain circumstances, permit title to equipment or supplies acquired with grant funds to vest in the recipient without further obligation to the Federal Government or on such terms and conditions as deemed appropriate. An example of such a statute is the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. 95–224, which provides this authority for equipment and supplies purchased with the funds of grants (and Federal contracts and cooperative agreements) for the conduct of basic or applied scientific research at nonprofit institutions of higher education or at nonprofit organizations whose primary purpose is the conduct of scientific research.

(b) If equipment is subject to a statute of the kind described in paragraph (a) of this section, it shall be exempt from the requirements in the remaining sections of this subpart. However, an item of such equipment having a unit acquisition cost of $1,000 or more shall be subject to § 74.136, concerning rights to require transfer, and, while subject to such a right, to the rules on replacement in § 74.138.

(c) If supplies are subject to a statute of the kind described in paragraph (a) of this section, they shall be exempt from all provisions of the remainder of this subpart which would otherwise apply.

§ 74.136 Rights to require transfer of equipment.

(a) *ED right.* For items of equipment having a unit acquisition cost of $1,000 or more, ED shall have the right to require transfer of the equipment (including title) to the Federal Government or to an eligible non-Federal party named by ED. This right will normally be exercised by ED only if the project or program for which the equipment was acquired is transferred from one grantee to another. The right shall be subject to the following conditions:

(1) In order for ED to exercise the right, a specific notice that it is exercising the right or considering doing so must be issued no later than the 120th day after the end of ED grant support for the project or program for which the equipment was acquired. Furthermore:

(i) If the equipment is eligible for the exemptions in § 74.135 and ceases to be needed for the project or program for

VOL. 53 ISS 48 MR 11 1988 UMI

which it was acquired while the project or program is still being performed by the recipient, the notice must have been received by the grantee while the equipment was still needed for that project or program.

(ii) If the equipment is not eligible for those exemptions, the notice must have been received by the grantee before other permissible disposition of the equipment took place in accordance with § 74.139.

(2) If the right is exercised, the grantee shall be entitled to be paid any reasonable, resulting shipping or storage costs incurred, plus an amount computed by multiplying the market value of the equipment by the non-Federal share of the equipment. (See §§ 74.142 and 74.143.)

(b) *Equipment lists.* If at any time an awarding party is considering exercising its right to require transfer of equipment, it may require the recipient to furnish it a listing of all items of equipment that are subject to the right. This will enable the awarding party to determine which items, if any, should be transferred.

§ 74.137. Use of equipment.

(a) *Basic rule.* Equipment which has not been transferred under § 74.136 shall be used by the recipient in the project or program for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds. When no longer needed for the original project or program, the recipient shall use the equipment, if needed, in other projects or programs currently or previously sponsored by the Federal Government, in the following order of priority:

(1) Projects or programs currently or previously sponsored by ED.

(2) Projects or programs currently or previously sponsored by other Federal agencies.

(b) *Shared use.* If equipment is being used less than full time in the project or program for which it was originally acquired, the recipient shall make it available for use in other projects or programs currently or previously sponsored by the Federal Government: *Provided,* Such other use will not interfere with the work on the original project or program. First preference for such other use shall be given to other projects or programs sponsored by ED.

(c) *Use by other recipients.* When the recipient can no longer use the equipment as required by paragraph (a) of this section, it may voluntarily make the equipment available for use on projects or programs currently or previously sponsored by the Federal Government which the recipient is supporting through subgrants or through non-Federal grants. If the recipient is a subgrantee, it may also voluntarily make the equipment available for use on projects or programs currently or previously sponsored by the Federal Government which are being conducted or supported by the grantee.

(d) *Other uses.* Unless ED provides otherwise, while equipment is being used as described in the preceding paragraphs of this section, it may also be used part time for other purposes. However, use as described in those paragraphs shall be given priority over other uses.

§ 74.138 Replacement of equipment.

(a) Equipment may be exchanged for replacement equipment if needed. The replacement may take place either through trade-in or through sale and application of the proceeds to the acquisition cost of the replacement equipment. In either case, the transaction must be one which a prudent person would make in like circumstances.

(b) If an additional outlay to acquire the replacement equipment is charged as a direct cost to either Federal funds or required cost-sharing or matching under a Federal award, the replacement equipment shall be subject to whatever property requirements or exemptions are applicable to that award. If the award is a grant from ED the full acquisition cost of the replacement equipment shall determine which provisions of this subpart apply.

(c) For any replacement not covered by paragraph (b) of this section, the provisions of this subpart applicable to the equipment replaced shall carry over to the replacement equipment. However, none of the provisions of this subpart shall carry over if (1) the Federal share of the equipment replaced was 10 percent or less or (2) the product of that share times the amount received for trade-in or sale is $100 or less.

§ 74.139 Disposition of equipment.

When original or replacement equipment is no longer to be used in projects or programs currently or previously sponsored by the Federal Government, disposition of the equipment shall be made as follows:

(a) *Equipment with a unit acquisition cost of less than $1,000 and equipment with no further use value.* The equipment may be retained, sold, or otherwise disposed of, with no further obligation to the Federal Government.

(b) *All other equipment.* (1) The equipment may be retained or sold, and the Federal Government shall have a right to an amount calculated by multiplying the current market value or the proceeds from sale by the Federal share of the equipment (see § 74.142). If part of the Federal share in the equipment came from an award under which the exemptions in § 74.135 were applicable, the amount due shall be reduced pro rata. In any case, if the equipment is sold, $100 or 10 percent of the total sales proceeds, whichever is greater, may be deducted and retained from the amount otherwise due for selling and handling expenses.

(2) If the grantee's project or program for which or under which the equipment was acquired is still receiving grant support from the same Federal program and if ED approves, the net amount due may be used for allowable costs of that project or program. Otherwise, the net amount must be remitted to the granting agency by check.

§ 74.140 Equipment management requirements.

Procedures for managing equipment (including replacement equipment) until transfer, replacement, or disposition takes place shall, as a minimum, meet the following requirements:

(a) Property records shall be maintained accurately. (Retention and access requirements for these records are explained in Subpart D of this part.) For each item of equipment, the records shall include:

(1) A description of the equipment, including manufacturer's model number, if any.

(2) An identification number, such as the manufacturer's serial number.

(3) Identification of the grant under which the recipient acquired the equipment.

(4) The information needed to calculate the Federal share of the equipment. (See § 74.142.)

(5) Acquisition date and unit acquisition cost.

(6) Location, use, and condition of the equipment and the date the information was reported.

(7) All pertinent information on the ultimate transfer, replacement, or disposition of the equipment.

(b) A physical inventory of equipment shall be taken and the results reconciled with the property records at least once every 2 years to verify the existence, current utilization, and continued need for the equipment. A statistical sampling basis is acceptable. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the differences.

(c) A control system shall be in effect to insure adequate safeguards to prevent

loss, damage, or theft of the equipment. Any loss, damage, or theft of equipment shall be investigated and fully documented.

(d) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.

(e) Where equipment is to be sold and the Federal Government is to have a right to part or all of the proceeds, selling procedures shall be established which will provide for competition to the extent practicable and result in the highest possible return.

§ 74.141 Supplies.

(a) If supplies exceeding $1,000 in total aggregate market value are left over upon termination or expiration of the grant or subgrant for which they were acquired and the supplies are not needed for any project or program currently or previously sponsored by the Federal Government, the grant shall be credited by an amount computed by multiplying the Federal share of the supplies times the current market value or, if the supplies are sold, the proceeds from sale. If the supplies are sold, 10 percent of the proceeds may be deducted and retained from the credit, for selling and handling expenses.

(b) For possible exemptions from this section, see § 74.135.

Federal Share of Real Property, Equipment, and Supplies

§ 74.142 Federal share of property.

Several sections of this subpart require a determination of the Federal (or non-Federal) share of real property, equipment, or supplies. In making such a determination, the following principles shall be observed:

(a) *General.* (1) Except as explained in the succeeding paragraphs of this section, the Federal share of the property shall be the same percentage as the Federal share of the acquiring party's total costs under the grant during the grant or subgrant year (or other funding period) to which the acquisition cost of the property was charged. For this purpose, "costs under the grant" means allowable costs which are either borne by the grant or counted towards satisfying a cost-sharing or matching requirement of the grant. Only costs are to be counted—not the value of third-party in-kind contributions.

(2) If the property is acquired by a subgrantee, the Federal share of the subgrantee's costs under the grant and hence of the property shall be calculated by multiplying the Federal share of the grantee's costs by the latter's share of the subgrantee's costs. For example, if the Federal share of a grantee's costs is 50 percent and the subgrant bears only 50 percent of a subgrantee's costs, then the Federal share of that subgrantee's costs (and of the property acquired by that subgrantee) is 25 percent.

(b) *Property acquired only partly under a grant.* (1) Sometimes only a part of the acquisition cost of an item of property is borne as a direct cost by the grant or counted as a direct cost towards a cost-sharing or matching requirement. The remainder might, for example, represent voluntary cost sharing or matching, or it might be charged to a different activity. Occasionally, the amount paid for the property is only a part of its value, and the remainder is donated as an in-kind contribution by the party that provided the property.

(2) To calculate the Federal share of such property, first determine the Federal share of the acquiring party's total costs under the grant, as explained in the paragraph (a) of this section. Then multiply that share by the percentage of the property's acquisition cost (or its market value, if the item was partly donated) which was borne as a direct cost by the grant or counted as a direct cost towards a cost-sharing or matching requirement.

(c) *Replacement equipment.* The Federal share of replacement equipment shall be calculated as follows:

(1) *Step 1.* Determine the Federal share (percentage) of the equipment replaced.

(2) *Step 2.* Determine the percentage of the replacement equipment's cost that was covered by the amount received for trade-in or the sales proceeds from the equipment replaced.

(3) *Step 3.* Multiply the step 1 percentage by the step 2 percentage.

(4) *Step 4.* If an additional outlay for the replacement equipment was charged as a direct cost either to ED grant funds or to required cost-sharing or matching funds, calculate the Federal share attributable to that additional outlay as explained in paragraph (b)(2) of this section. Add that additional percentage to the step 3 percentage.

(d) *Institutional cost-sharing agreements.* If a grant is subject to an institutional cost-sharing agreement (see § 74.130(e)), the Federal share of property acquired under the grant shall be calculated as though there were no cost-sharing requirements applicable to the grant (that is, as if all the grantee's cost sharing were voluntary).

§ 74.143 Subgrantee's share of market value or sales proceeds.

Where this subpart requires a sharing of the market value or sales proceeds of property acquired under a subgrant, the non-Federal share shall be proportionally divided between the grantee and the subgrantee. The subgrantee shall be entitled to the amount it would have received or retained if the award to it had been made directly by the Federal Government. The remainder of the non-Federal share shall belong to the grantee.

Intangible Personal Property

§ 74.144 Inventions and patents.

ED's regulations on inventions and patents arising out of activities assisted by a grant are set forth in Parts 6 and 8 of this title.

§ 74.145 Copyrights.

(a) *Works under grants.* Unless otherwise provided by the terms of the grant, when copyrightable material is developed in the course of or under a grant, the grantee is free to copyright the material or permit others to do so.

(b) *Works under subgrants.* Unless otherwise provided by the terms of the grant or subgrant, when copyrightable material is developed in the course of or under a subgrant, the subgrantee is free to copyright the material or permit others to do so.

(c) *ED rights.* If any copyrightable material is developed in the course of or under an ED grant or subgrant, ED shall have a royalty-free, nonexclusive, and irrevocable right to reproduce, publish, or otherwise use, and to authorize others to use, the work for Federal Government purposes.

(d) *Exemption of student-developed works.* ED awards training grants and other kinds of grants under which individuals are provided stipends or other financial assistance for the primary purpose of aiding them to further their education or training. Except as provided by the terms of the grant, copyrightable material developed by an individual or group of individuals in the course of education or training pursued with such assistance shall be subject to the ED right described in paragraph (c) of this section, unless the development of the material also receives other forms of support under the same or another ED grant (such as a research grant).

Subpart P—Procurement Standards

§ 74.160 Scope of subpart; terminology.

(a) This subpart contains standards for use by recipients in establishing procedures for the procurement of supplies, equipment, construction, and other services whose cost is borne in whole or in part as a direct cost by Federal grant funds.

VOL 53 ISS 48 MR 11 1988 UMI

(b) No additional procurement standards or requirements shall be imposed by awarding parties upon recipients unless specifically required by Federal statutes or Executive Orders.

(c) As used in this subpart:

(1) "Formal advertising" refers to that procurement method which involves adequate purchase description, sealed bids, and public opening of bids.

(2) "Negotiation" refers to any method of procurement other than formal advertising.

§ 74.161 General.

(a) Recipients may use their own procurement policies: *Provided*, That procurements subject to this subpart are made in accordance with the standards in this subpart.

(b) The standards in this subpart do not relieve the recipient of the contractual responsibilities arising under its contracts. The recipient is the responsible authority, without recourse to ED, regarding issues arising out of its procurements. This includes but is not limited to: Disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State, or Federal authority as may have proper jurisdiction.

§ 74.162 Code of conduct.

(a) The recipient shall maintain a code of standards of conduct that shall govern the performance of its officers, employees or agents engaged in the awarding and administration of contracts that are subject to this subpart. The code or standards shall provide for disciplinary actions to be applied for violations of the code or standards by the recipient's officers, employees, or agents. For governmental recipients, such disciplinary actions are required only to the extent otherwise permissible under the Government's laws, rules, or regulations. To the extent permissible under its laws, rules, or regulations, the governmental recipient shall also provide for actions to be taken against contractors or their agents who wrongfully take part in a violation of the code or standards of conduct.

(b) The recipient's officers, employees or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. This is not intended to preclude bona-fide institutional fund-raising activities.

(c) No employee, officer, or agent of a nongovernmental recipient shall participate in the selection, award, or administration of a contract subject to this subpart where, to his or her knowledge, any of the following has a financial interest in that contract:

(1) The employee, officer, or agent;

(2) Any member of his or her immediate family;

(3) His or her partner;

(4) An organization in which any of the above is an officer, director, or employee;

(5) A person or organization with whom any of the above individuals is negotiating or has any arrangement concerning prospective employment.

§ 74.163 Free competition.

(a) All procurement transactions shall be conducted in a manner to provide, to the maximum extent practicable, open and free competition.

(b) The recipient should be alert to organizational conflicts of interest or noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In particular, a contractor that develops or drafts specifications, requirements, a statement of work, an invitation for bids or a request for proposals for a particular procurement by a nongovernmental recipient should be excluded from competing for that procurement except when, upon request of the recipient, ED waives this requirement for a particular procurement.

(c) Solicitations shall clearly set forth all requirements that the bidder/offeror must fulfill in order for his bid/offer to be evaluated. Awards shall be made to the responsible bidder/offeror whose bid/offer is responsive to the solicitation and is most advantageous to the recipient, price and other factors considered. Factors such as discounts, transportation costs, and taxes may be considered in determining the lowest bid. Any and all bids/offers may be rejected when it is in the recipient's interest to do so, and, in the case of governmental recipients, such rejections are in accordance with the government's applicable law, rules, or regulations.

§ 74.164 Procedural requirements.

The recipient shall establish procurement procedures which provide for, as a minimum, the following:

(a) Proposed procurement actions shall follow a procedure to assure that unnecessary or duplicative items are not purchased. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(b) Solicitations for goods and services shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance of other salient requirements of a procurement, and when so used the specific features of the named brand which must be met by bidders/offerors should be clearly specified.

(c) Where applicable, section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b)) shall be observed.

(d) Positive efforts shall be made by procuring parties to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts subject to this subpart.[1]

(e) The type of procuring instruments used—e.g., fixed-price contracts, cost reimbursable contracts, purchase orders, incentive contracts—shall be determined by the recipient but must be appropriate for the particular procurement and for promoting the best interest of the grant project or program involved. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(f) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources.

(g) The terms of the grant may require that the following be submitted for prior approval of ED if the aggregate expenditure is expected to exceed $5,000: (1) Any proposed sole source contract and (2) any contract which a nongovernmental recipient proposes to award after seeking competition but receiving only one bid or proposal.

(h) Non governmental recipients should make some form of price or cost analysis in connection with every negotiated procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost proposed by the offeror to determine reasonableness, allocability and allowability.

(i) Procurement records and files for purchases in excess of $10,000 shall include the following:

(1) Basis for contractor selection;

(2) Justification for lack of competition when competitive bids or offers are not obtained;

(3) Basis for award cost or price.

(j) A system for contract administration shall be maintained to ensure contractor conformance with terms, conditions and specifications of the contract, and to ensure adequate and timely followup of all purchases.

§ 74.165 [Reserved]

§ 74.166 Contract provisions.

(a) *Scope.* This section contains requirements relating to provisions that must be included in contracts that are subject to this part. The requirements shall also apply to subcontracts of any tier under such contracts, and the term "contracts" in this section shall be construed as including subcontracts.

(b) *General.* All contracts shall contain sufficient provisions to define a sound and complete agreement.

(c) *Administrative remedies for violations.* Contracts in excess of $10,000 shall contain contractual provisions or conditions that will allow for administrative, contractual or legal remedies in instances in which contractors violate or breach contract terms, and provide for such remedial actions as appropriate.

(d) *Termination provisions.* Contracts in excess of $10,000 shall contain suitable provisions for termination by the party awarding the contract, including the manner by which termination will be effected and the basis for settlement. These contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(e) *Executive Order 11246.* Where applicable, construction contracts in excess of $10,000 shall contain a provision requiring compliance with Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (41 CFR Part 60).

(f) *Copeland Act.* Contracts in excess of $2,000 for construction or repair shall include a provision for compliance with the Copeland "Anti-Kick-Back Act" (18 U.S.C. 874) as supplemented in Department of Labor regulation (29 CFR Part 3). All suspected or reported violations shall be reported to the granting agency by the grantee.

(g) *Davis-Bacon Act.* When required by the Federal legislation governing the grant program, all construction contracts in excess of $2,000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a–7) as supplemented by Department of Labor regulations (29 CFR Part 5). All suspected or reported violations shall be reported to the granting agency by the grantee.

(h) *Contract Work Hours and Safety Standards Act.* All contracts subject to the Contract Work Hours and Safety Standards Act (40 U.S.C. 327 et seq.) shall include a provision requiring the contractor to comply with the applicable sections of the act and the Department of Labor's supplementing regulations (29 CFR Parts 5 and 1926).

(i) *Inventions and patents.* Contracts which may give rise to inventions subject to Part 6 of this title shall include a provision requiring compliance with those parts.

(j) *Access to Records.* Contracts that are subject to Subpart D of this part shall include a provision reflecting § 74.24(c) on rights of access to the contractor's records.

(k) *Clean Air and Water Acts.* Contracts in excess of $100,000 shall contain provisions requiring compliance with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act as amended (42 U.S.C. 1857 et seq.) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 et seq.). Violations shall be reported in writing to the appropriate regional office of the Environmental Protection Agency, and a copy of the report shall be submitted to the granting agency. (See 40 CFR Part 15 for relevant regulations of the Environmental Protection Agency.)

Subpart Q—Cost Principles

§ 74.170 Scope of subpart.

This subpart identifies the principles to be used in determining costs applicable to grants, subgrants, and cost-type contracts under grants and subgrants.

§ 74.171 [Reserved]

§ 74.172 Institutions of higher education.

(a) *Research and development.* The principles for determining the allowable costs of research and development work performed by institutions of higher education (other than for-profit institutions) are in Part I of Appendix D to this part.

(b) *Training and other educational services.* The principles for determining the allowable costs of training and other educational services provided by institutions of higher education (other than for-profit institutions) are in Part II of Appendix D to this part.

(c) *Other activities.* Appendix D to this part shall be used as a guide for determining the allowable costs of other activities conducted by institutions of higher education (other than for-profit institutions).

§ 74.173 Hospitals.

(a) *Research and development.* The principles for determining the allowable costs of research and development work performed by hospitals are in Appendix E to this part.

(b) *Other activities.* Appendix E to this part shall be used as a guide for determining the allowable costs of other activities conducted by hospitals.

§ 74.174 Other nonprofit organizations.

A nonprofit organization, other than an institution of higher education or a hospital, shall comply with the cost principles stated in OMB Circular A–122, as published in the **Federal Register** of July 8, 1980 at 45 FR 46022 and revised in the **Federal Register** on April 27, 1984 at 49 FR 18260, with corrections published on May 8, 1984 at 49 FR 19588.

(Approved by the Office of Management and Budget under control number 1860–0509)

(Authority: 20 U.S.C. 3474)

§ 74.175 Subgrants and cost-type contracts.

(a) The cost principles applicable to a subgrantee or cost-type contractor under an ED grant will not necessarily be the same as those applicable to the grantee. For example, where a State government awards a subgrant or cost-type contract to an institution of higher education, Appendix D to this part would apply to the costs incurred by the institution of higher education, even though OMB Circular A–87 would apply to the costs incurred by the State.

(b) The principles to be used in determining the allowable costs of work performed by for-profit organizations under cost-type contracts awarded to them under ED grants are in 48 CFR Chapter 34.

§ 74.176 Costs allowable with approval.

Each set of cost principles identifies certain costs that, in order to be allowable, must be approved by the awarding party. Other costs do not require approval. The following procedures govern approval of these costs.

---

[1] Advice and assistance regarding the use of small or minority businesses may be obtained from the following Federal organizations:

1. The Small Business Administration and its field offices.

2. The Office of Minority Business Enterprise, Department of Commerce.

3. The Office for Civil Rights, ED.

(a) When costs are treated as indirect costs, acceptance of the costs as part of the indirect cost rate shall constitute approval.

(b)(1) When the costs are treated as direct costs, they must be approved in advance by the awarding party.

(2) If the costs are specified in the budget, approval of the budget shall constitute approval of the costs.

(3) If the costs are not specified in the budget, or there is no approved budget, the recipient shall obtain specific prior approval in writing from the awarding party. For this purpose the prior approval procedures of § 74.102 shall be followed, except that for formula or mandatory grants, ED's written approval may be signed by any authorized ED official.

(c) The awarding party may waive or conditionally waive the requirement for its approval of the costs. Such a waiver shall apply only to the requirement for approval. If, upon audit or otherwise, it is determined that the costs do not meet other requirements or tests for allowability specified by the applicable cost principles, such as reasonableness and necessity, the costs may be disallowed.

(d) In the case of cost-type contracts, no approval shall be given which is inconsistent with the purpose or the terms of the Federal grant.

Appendix C—[Reserved]

* * * * *

2. Part 74 is amended by adding the authority citation "(Authority: 20 U.S.C. 3474; OMB Circular A-110)" after each section to the regulations.

Part V

Office of Management and Budget

Cumulative Report on Rescissions and Deferrals; Notice

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

March 1, 1988.

This report is submitted in fulfillment of the requirements of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93–344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year for which, as of the first day of the month, a special message has been transmitted to the Congress.

This report gives the status as of March 1, 1988 of 22 deferrals contained in the three special messages of FY 1988. There have been no rescissions proposed. These messages were transmitted to the Congress on October 1 and 29, 1987 and February 19, 1988.

Rescissions (Table A and Attachment A)

As of March 1, 1988, there were no rescission proposals pending before the Congress.

Deferrals (Table B and Attachment B)

As of March 1, 1988, $7,644.6 million in budget authority was being deferred from obligation. Attachment B shows the history and status of each deferral reported during FY 1988.

Information from Special Messages

The special messages containing information on the deferrals covered by this cumulative report are printed in the Federal Registers listed below:

Vol. 52, FR p. 37739, Thursday, October 8, 1987

Vol. 52, FR p. 42400, Wednesday, November 4, 1987

Vol. 53, FR p. 6734, Wednesday, March 2, 1988

James C. Miller III,

Director.

Department of the Interior

Minerals Management Service

Outer Continental Shelf (OCS) Mining Program; Request for Comments and Nominations for a Lease Sale in Norton Sound and Notice of Intent to Prepare an Environmental Impact Statement

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Outer Continental Shelf (OCS) Mining Program Request for Comments and Nominations for a Lease Sale in Norton Sound and Notice of Intent to Prepare an Environmental Impact Statement

REQUEST FOR COMMENTS AND NOMINATIONS

Purpose of the Request

The purpose of the Request is to gather information for a proposed OCS minerals lease sale in Norton Sound, tentatively scheduled for December 1988. This request covers all minerals other than oil, gas and sulphur. This information-gathering step is important to ensure that all interests and concerns are considered and evaluated in preparing an Environmental Impact Statement (EIS) and making leasing decisions.

Nominations will be used to determine which blocks will be selected for environmental analysis and potential leasing. Other responses to the Request will be considered in preparing the EIS and may be used in identifying alternatives to the proposed action and in assessing possible environmental effects and use conflicts which could occur from mining in the area selected for potential leasing. Comments may also be useful in developing terms and conditions designed to ensure environmentally acceptable mining activities. Comments regarding length of lease term, size of lease units, royalty rates, and rentals may be used in developing economic terms and conditions.

Description of the Area

The area of the Request is in Norton Sound in the vicinity of Nome, Alaska, as shown on the attached map. The area includes about 80 whole and partial blocks totaling approximately 350,000 acres. Nominations and comments should be confined to the Request area. A large-scale Request map showing boundaries is available from the Records Manager, Alaska OCS Region, Minerals Management Service (MMS), 949 East 36th Avenue, Anchorage, Alaska 99508-4302, telephone (907) 261-4621.

Background Information

Section 8(k) of the OCS Lands Act (43 U.S.C. 1337(k)), authorizes the Secretary of the Interior to grant leases on the OCS to qualified persons offering the highest cash bonuses for minerals other than oil, gas, and sulphur. The Mining and Minerals Policy Act of 1970 (30 U.S.C. 21a) establishes that it is the policy of the Federal Government to foster and

encourage private enterprise in (1) the development of economically sound and stable domestic mining, minerals, and metals and minerals reclamation industries; and (2) the orderly and economic development of domestic mineral resources, reserves, and reclamation of metals and minerals to help ensure satisfaction of industrial, security, and environmental needs. The proposed leasing action is consistent with the aforementioned laws and with the Secretary's announced program of January 19, 1982, for OCS mineral leasing activities on the Federal OCS.

U.S. Bureau of Mines Open-File Report 4-87, "An Economic Reconnaissance of Selected Heavy Mineral Placer Deposits in the U.S. Exclusive Economic Zone," notes several reported placers offshore Alaska. The gold placers near Nome are the best known and appear to have the highest potential for near-term development. Onshore placers at Nome have yielded over 5 million ounces of gold. Recently, a large bucket-line dredge has mined marine placers within Alaska's area of jurisdiction.

At least three beach deposits related to low sea level stands during intervals of Pleistocene glaciation have been identified off Nome in water depths of 35 to 42, 65 to 72, and 80 feet at approximately 1, 3, and 5 miles from shore, respectively. These relict beaches, and perhaps additional uncharted relict offshore features such as buried stream deposits, may contain economically attractive concentrations of OCS minerals in Federal waters.

Instructions on the Request

Respondents are requested to nominate areas by block numbers within the Request area that they would like to see included in a proposed Norton Sound lease sale. Although the identities of those submitting nominations become a matter of public record, individual nominations are proprietary information.

Respondents should rank the blocks which they nominate according to the priority of their interest (e.g., priority 1 [high], 2 [medium], or 3 [low]). Blanket nominations of the entire Request area are not useful in providing information pertinent to industry interests and for selecting specific blocks to be considered for leasing. Nominated blocks without priorities will be considered priority 3.

Respondents nominating are required to outline areas on the Request map along block lines. Respondents may also submit a list of whole or partial blocks nominated, by Official Protraction Diagram block designations, to ensure the correct interpretation of their nominations. The name, title, and telephone number of the person in the respondent's organization to contact for additional information should be included. Official Protraction Diagrams can be purchased for $2.00 each from the Records Manager at the address stated in the "Description of the Area."

VOL
53
ISS
48
MR
11
988
MI

Comments are requested on the following specific items:

1. In the Request area, are there any OCS minerals other than gold which might have economic value which should be evaluated for mining potential?

2. Standard OCS blocks shown on Official Protraction Diagrams total about 2,304 hectares. Lease units could be individual blocks, combinations of blocks, or portions of blocks. Respondents are asked to discuss the optimal size of lease units including the basis for determining their size. If respondents have suggestions regarding the boundaries of lease units, other than individual blocks, they should be shown on a copy of the Request map.

3. Suggested rental amounts, minimum bids, and royalty rates, including possible advance royalties or delayed royalties or credits.

4. Suggested primary term of lease (years).

5. Current and projected gold or other mineral resources market data and information that would be pertinent to evaluating the quantity and value of OCS minerals in the Request area.

6. The technology presently available or anticipated for mining OCS mineral resources in this area.

7. Particular geological, environmental, biological, archaeological, socioeconomic conditions, and other information that might bear upon the potential leasing of and mining in particular areas.

8. Possible conflicts between OCS mining activities that may result from the proposed sale and the Alaska Coastal Management Program, as supplemented by approved local coastal management plans (CMP's) such as that of the City of Nome. If possible, these comments should identify specific CMP policies and concerns, the nature of the foreseen issues, and possible steps that could be taken to avoid or mitigate any potential problems.

9. Possible areas outside of the Request area that should be considered in this or future sales. If commenting on this, please identify on the Request map.

10. The need for additional geological and geophysical data collection in the area.

Comments may be either in terms of broad areas or restricted to particular blocks. Those submitting block-related comments are requested to list block numbers or outline the subject area on the Request map.

Nominations and comments must be received no later than 30 days following the publication of this document in the Federal Register, in an envelope labeled "Nominations for Proposed Norton Sound Lease Sale," or "Comments on the Proposed Norton Sound Lease Sale," as appropriate. The Request map with nominations and/or comments must be submitted to the Regional Supervisor, Leasing and Environment, Alaska OCS Region, at the address stated above under "Description of the Area."

Existing Environmental Information

Although potential environmental effects from exploration, mining, and recovery of gold and other OCS mineral resources differ from oil and gas operations, substantial environmental data have been collected through numerous environmental studies for oil and gas leasing activities in the Norton Basin Planning Area since 1976.

Data from the Environmental Studies Program have provided information regarding Norton Sound. The emphasis was on geological mapping, environmental characterization of biologically sensitive habitats, physical oceanography, ocean circulation modeling, distribution and abundance of marine biota, and ecological effects of OCS activities. These studies will provide useful information for environmental analysis. A complete listing of available study reports and information for ordering copies can be obtained from the Alaska OCS Region, Environmental Studies Section, at the address stated under "Description of the Area" or by telephone at (907) 261-4620. The reports may also be ordered for a fee directly from the National Technical Information Service by calling (703) 487-4650. The mailing address is U.S. Department of Commerce, National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161.

Tentative Schedule

Final selection of the area for possible leasing, and lease terms and conditions, will be decided at a later date only after compliance with established Departmental procedures and applicable laws, including all requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and the OCS Lands Act, as amended (43 U.S.C. 1331 et seq.).

The following is a list of tentative milestones that will precede this sale proposed for December 1988.

Comments due on Request	April 1988
Scoping Comments Due	April 1988
Draft EIS Published	May 1988
Hearings on Draft EIS Held	June 1988
Final EIS Published	September 1988
Proposed Notice of Sale Published	September 1988
Proposed Notice Comment Period Closes	October 1988
Final Notice of Sale Published	November 1988
Sale	December 1988

NOTICE OF INTENT TO PREPARE AN ENVIRONMENTAL IMPACT STATEMENT (EIS)

Purpose of the Notice of the Intent

Pursuant to the regulations (40 CFR 1501.7) implementing the procedural provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.), as amended, MMS is announcing its intent to prepare an EIS regarding an OCS minerals lease sale proposal in Norton Sound in the vicinity of Nome, Alaska. The Notice of Intent serves to announce the scoping process that will be followed in this EIS. Throughout the scoping process, Federal, State, and local governmental units and other interested parties assist MMS in its determination of significant issues and alternatives to be analyzed in the EIS. The EIS analysis will focus on lease sale proposals, modified sale proposals, if any, and leasing alternatives and the potential environmental effects from alternative scenarios for the mining of gold, and other OCS mineral resources if appropriate.

Instructions on the Notice of Intent

Federal, State, or local governmental units and other interested parties are requested to send their written comments on (1) the scope of the EIS, (2) significant issues that should be addressed, and (3) alternatives that should be considered, to the Regional Supervisor, Leasing and Environment, Alaska OCS Region, at the address stated under "Description of the Area," above. Comments should be enclosed in an envelope labeled "Comments on the Notice of Intent to Prepare an EIS on the proposed Norton Sound Lease Sale." Comments are due no later than 30 days from the publication of this Notice. A scoping meeting will be held in Nome, Alaska, on March 31, 1988, at the Nome City Hall, City Council Chambers, at 7:30 p.m., for the purpose of obtaining additional comments and information regarding the scope of the EIS.

Technical Task Force

On February 5, 1988, Secretary of the Interior Donald P. Hodel and Alaska Governor Steve Cowper announced an agreement to form a Federal/State Technical Task Force to consider the economic feasibility, potential use conflicts, and environmental effects related to OCS mining for the recovery of gold and other OCS minerals on the Federal OCS. The goal of the Task Force will be to establish a close working relationship between State and Federal authorities that would permit the potential mining activities to be carried out under terms that meet the socioeconomic and environmental requirements of both the Federal Government and the State of Alaska.

Director, Minerals Management Service

Wm. D. Bettenberg

LIST OF PUBLIC LAWS

Last List March 9, 1988

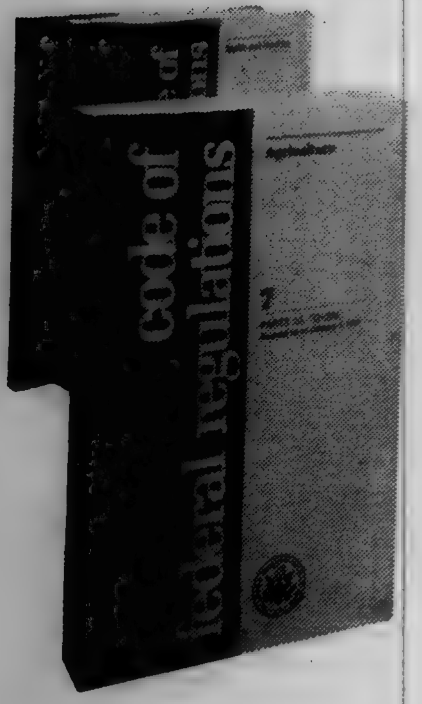
This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

S.J. Res. 251/Pub. L. 100-256

Designating March 4, 1988, as "Department of Commerce Day." (Mar. 8, 1988; 102 Stat. 24; 2 pages) Price: $1.00

S.J. Res. 262/Pub. L. 100-257

To designate the month of March 1988, as "Women's History Month." (Mar. 8, 1988; 102 Stat. 26; 1 page) Price: $1.00



Just Released

Code of Federal Regulations

Revised as of October 1, 1987

Quantity	Volume	Price	Amount
______	Title 45—Public Welfare (Part 1200-End) (Stock No. 869-001-00154-2)	$14.00	$______
______	Title 50—Wildlife and Fisheries (Parts 1-199) (Stock No. 869-001-00183-6)	16.00	______
		Total Order	**$**______

A cumulative checklist of CFR issuances appears every Monday in the Federal Register in the Reader Aids section. In addition, a checklist of current CFR volumes, comprising a complete CFR set, appears each month in the LSA (List of CFR Sections Affected).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 53, No. 49
Monday, March 14, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 595

Physicians Comparability Allowances

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management is amending the regulations for the Physicians Comparability Allowances (PCA) to comply with the revisions in the Federal Physicians Comparability Allowances Amendments of 1987 (Pub. L. 100-140). The law extends the PCA authority for three years, to September 30, 1990. Physicians Comparability Allowances are paid to physicians in certain situations where an agency is experiencing recruitment and retention problems. The revised regulations increase the maximum allowances and extend the criteria used to determine a physician's allowance category to include certain service as a physician in the Veterans Administration or as a medical officer in the Commissioned Corps of the Public Health Service. In addition, the revised regulations increase the time period for review of agency PCA program plans from 15 calendar days to 45 calendar days.

DATES: Interim rules effective March 14, 1988. Comments must be received on or before May 13, 1988.

ADDRESSES: Send or deliver written comments to: U.S. Office of Personnel Management, Personnel Systems and Oversight Group, Office of Pay Programs, Room 3353, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: JoAnn Perrini, (202) 632-7184.

SUPPLEMENTARY INFORMATION: Current regulations in 5 CFR Part 595 authorize the payment of Physicians Comparability Allowances (PCA) to eligible Federal physicians who enter into service agreements with their agencies. The allowances are paid only for certain categories of physicians for which the agency is experiencing recruitment and retention problems. The revised regulations increase the maximum allowance from $7,000 to $14,000 for a physician who has served as a Government physician for 24 months or less, and from $10,000 to $20,000 for one who has served as a Government physician for more than 24 months.

The revised regulations allow that for the purpose of determining the amount of the comparability allowance in relation to the length of service as a Government physician, certain other service will be creditable. Service as a physician in the Veterans Administration, under sections 4104 or 4114 of Title 38, or as a medical officer in the Commissioned Corps of the Public Health Service, under Title II of the Public Health Service Act (42 U.S.C Ch. 6A), would be deemed service as a Government physician. However, physicians currently employed under Title 38 and Title 42 are not eligible for the allowances provided in 5 U.S.C. 5948.

The revised regulations increase the time period for review of agency PCA program plans by the Office of Management and Budget from 15 calendar days to 45 calendar days.

Public Law 100-140 was not enacted until October 28, 1987, and agencies were not authorized to enter into PCA service agreements between October 1 and October 25, 1987. In addition, agencies may not apply the amended provisions of Pub. L. 100-140 any earlier than October 28, 1987.

Waiver of Notice of Proposed Rulemaking

Pursuant to sections 553(b)(3)(B) and (d)(3) of Title 5 of the United States Code, I find the good cause exists for waiving the general notice of proposed rulemaking and making this amendment effective immediately upon publication. The legislation requiring the revisions to the PCA regulations was enacted on October 28, 1987. It is critical that the agencies are permitted to immediately implement the revised regulations which are designed to improve the agencies' ability to recruit and retain physicians.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they are changes which will affect only employees of the Federal Government.

List of Subjects in 5 CFR Part 595

Government employees, Health Professions, Wages.

U.S. Office of Personnel Management.
Constance Horner,
Director.

Accordingly, OPM is amending 5 CFR Part 595 as follows:

PART 595—PHYSICIANS COMPARABILITY ALLOWANCES

1. The authority citation for Part 595 continues to read as follows:

Authority: 5 U.S.C. 5948.

2. Section 595.105 is amended by revising paragraph (b), redesignating paragraph (d) as paragraph (e) and paragraph (c) as paragraph (d), and adding a new paragraph (c), to read as follows:

§ 595.105 Determination of amount of comparability allowance.

* * * * *

(b) Under the subsection (a) of 5 U.S.C. 5948, the comparability allowance payable to any Government physician may not exceed $14,000 per annum for a physician who has served as a Government physician for 24 months or less, or $20,000 per annum for a physician who has served as a Government physician for more than 24 months. For the purpose of determining a physician's length of service for this requirement, prior service as a Government physician need not have been continuous, but any periods of leave without pay may not be counted as service.

(c) Subsection (a) of 5 U.S.C. 5948 allows that for the purpose of determining length of service as a Government physician, service as a physician in the Veterans Administration, under sections 4104 or 4114 of Title 38, or active service as a medical officer in the Commissioned Corps of the Public Health Service, under Title II of the Public Health Service Act (42 U.S.C. ch. 6A), would be deemed service as a Government physician. Physicians currently employed under title 38 in the Veterans Administration or under title 42 as Commissioned Corps officers of the Public Health Service are not eligible for the allowances provided in 5 U.S.C. 5948.

* * * * *

§ 595.107 [Amended]

3. Section 595.107, paragraph (c), is amended by revising the phrase "15 calendar days" to read as "45 calendar days."

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 946

Irish Potatoes Grown in Washington; Relaxation of Inspection Requirements for Shipments of Potatoes to District 5 and Spokane County in District 1 in Washington

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule the provisions of an interim final rule which relaxed inspection requirements for certain shipments of potatoes grown in Washington. This action will facilitate the movement of potatoes from growers to packing facilities and reduce inspection costs. This final rule also includes all of the other handling requirements currently in effect under the marketing order. The inclusion of these requirements will make them easier for interested persons to locate and use, because they will be published in the Code of Federal Regulations. The inclusion of these requirements does not result in a change in regulatory effect.

EFFECTIVE DATE: April 13, 1988.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone 202–447–2431.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Order No. 946 (7 CFR Part 946), as amended, regulating the handling of Irish potatoes grown in Washington. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

The information collection requirements contained in this final rule have been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507) and have been assigned OMB No. 0581–0070.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 60 handlers of Washington potatoes subject to regulation under the Washington potato marketing order and approximately 361 producers in Washington. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers of Washington potatoes may be classified as small entities.

The interim final rule was issued on October 27, 1987, and was published in the **Federal Register** on November 2, 1987 (52 FR 41946). That rule amended, effective November 2, 1987, the handling regulation for Washington potatoes set forth in § 946.336 (46 FR 39117, July 31, 1981; 47 FR 33245, August 2, 1982; 47 FR 38493, September 1, 1982; 48 FR 31851, July 12, 1983; 49 FR 32539, August 15, 1984; 52 FR 15490, April 29, 1987). That rule provided that interested persons could file written comments through December 2, 1987. No comments were received.

Section 946.54 of the order provides authority to modify, suspend, or terminate regulations in order to facilitate shipments of potatoes for grading or storing between the districts within the production area or to and within specified locations in the adjoining States of Idaho and Oregon. Section 946.55 authorizes regulations to prevent the transportation of such potatoes to points outside the production area. Prior to the issuance of the interim final rule, potatoes which were shipped for grading and storing purposes to District 5 for the period July 15 through August 31 each year and to Morrow and Umatilla Counties in Oregon throughout the year were exempted from inspection (§ 966.336 of the regulations). If they were subsequently reshipped for other than exempted purposes, the potatoes had to be inspected and meet the requirements of the regulations. The interim final rule expanded the inspection exemption by allowing uninspected potatoes to be shipped for grading or storing purposes to District 5 the entire year and by also allowing such shipments to Spokane County in District 1 the entire year.

Many growers outside of District 5 and Spokane County in District 1 prefer to deliver their potatoes to packing facilities in these areas because the facilities are closer to their farming operations. However, the handling requirements in § 946.336 required such potatoes to be inspected and certified as meeting minimum grade, size, maturity, and packing requirements before they were moved within the production area. From the 1978–79 through the 1981–82 seasons potatoes were allowed to be moved into District 5 and Spokane County in District 1 throughout the year for grading and storing without first having the potatoes inspected. Several years ago, when potatoes started to appear on the fresh market without the required inspection, this procedure was discontinued in order to improve compliance and prevent the marketing problems associated with such uninspected shipments.

However, the need to facilitate the movement of potatoes from growers to packing facilities without added cost persisted. In addition, handlers in District 5 and Spokane County in District 1 are near urban areas with sizable wholesale/retail markets, and many handlers repack bulk potatoes into consumer size containers. The regulation requires potatoes which are regraded, resorted, repacked, or in any other way further prepared for market to be reinspected. As a result, with the exception of those shipments which were exempted, potatoes shipped from other districts within the area of production had to be inspected twice, first within the district grown, and second after repacking.

To make it more convenient for producers to deliver their potatoes, and reduce inspection costs, the committee recommended that shipments of uninspected potatoes into District 5 throughout the year, and into Spokane County in District 1 for grading and storing purposes should again be allowed. The committee plans to monitor these shipments more closely than it did previously to prevent shipments of uninspected potatoes into the fresh market.

This action adopts the provisions of the interim rule with a modification for clarity. The impact of this action is expected to be positive and to benefit the Washington potato industry as a whole. By not having to obtain inspection twice on potatoes shipped to certain areas for grading, storing, or repacking, handlers' inspection costs will be lessened.

Also, under this action, the entire handling regulation (§ 946.336) will be published in the **Federal Register**. The purpose for taking this action is to consolidate the handling regulation, and the various amendments to it, into one document and have the entire regulation published in the Code of Federal Regulations. This will make the requirements easier to locate and use. In addition, this action deletes as unnecessary an earlier effective date in the introductory text and changes citations to the United States Standards for Grades of Potatoes and for Grades of Peeled Potatoes to reflect their current codification in the Code of Federal Regulations. A conforming change is made in subparagraph (d)(8) to reflect the changes made by this final rule concerning District 5. Pursuant to subparagraph (d)(8), potatoes which were shipped for grading and storing purposes to District 5 for the period of July 15 through August 31 each year were exempt from inspection. Since this final rule allows uninspected potatoes to be shipped for grading and storing purposes to District 5 the entire year, the exemption in subparagraph (d)(8) is unnecessary and therefore is deleted. Further, paragraph (j) *Forms* is deleted as unnecessary because the applicable provisions concerning OMB control numbers assigned pursuant to the Paperwork Reduction Act currently appear in 7 CFR 900.601.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of the information and recommendation submitted by the committee, and other available information, it is hereby found that the rule as hereinafter set forth will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 946

Marketing agreements and orders, Potatoes, Washington.

For reasons set forth in the preamble, the interim rule amending § 946.336 which was published at 52 FR 41946 on November 2, 1987, is adopted as a final rule as changed, and the entire text of § 946.336 is republished as follows:

PART 946—IRISH POTATOES GROWN IN WASHINGTON

1. The authority citation for 7 CFR Part 946 continues to read as follows:

Authority: Secs. 1–19, 48 Stat., 31, as amended; 7 U.S.C. 601–674.

2. Section 946.336 is revised to read as follows. This section will appear in the Code of Federal Regulations.

§ 946.336 Handling regulation.

No person shall handle any lot of potatoes unless such potatoes meet the requirements of paragraphs (a), (b), (c), and (g) of this section or unless such potatoes are handled in accordance with paragraphs (d) and (e) or (f) of this section, except that shipments of the non-white fleshed varieties of potatoes shall be exempt from both this handling regulation and the assessment requirements specified in § 946.41.

(a) *Minimum quality requirements*—(1) *Grade: All varieties*—U.S. No. 2 or better grade.

(2) *Size:* (i) *Round varieties*—1⅞ inches (47.6 mm) minimum diameter, except round red varieties may be Size "B" (1½ inches minimum diameter), if U.S. No. 1.

(ii) *Long varieties*—All long varieties must be 2⅛ inches (54.0 mm) minimum diameter or 5 ounces minimum weight during July 15 through August 31 each season, and 2 inches (50.8 mm) or 4 ounces during remainder of each season, except White Rose variety from District 5 must be 1⅞ inches in diameter through each season.

(iii) *Tolerances*—The tolerances for size contained in the United States Standards for Grades of Potatoes shall apply except that for long varieties of potatoes packaged in other than 50-pound cartons and which are packed to meet a minimum size of 5 ounces, a 3 percent tolerance for undersize shall apply.

(3) *Cleanness:* All varieties and grades—as required in the United States Standards for Grades of Potatoes. For example: U.S. No. 2—"not seriously damaged by dirt," and U.S. No. 1—"fairly clean."

(b) *Minimum maturity requirements*—(1) *Round and White Rose varieties:* Not more than "moderately skinned."

(2) *Other long varieties (including but not limited to Russet Burbank and Norgold):* Not more than "slightly skinned."

(c) *Pack.* Potatoes packed in 50-pound cartons shall be U.S. No. 1 grade or better, except that potatoes which fail to meet the U.S. No. 1 grade only because of internal defects may be shipped provided the lot contains not more than 10 percent damage by any internal defect or combination of internal defects but not more than 5 percent serious damage by any internal defect or combination of internal defects.

(d) *Special purpose shipments.* The minimum grade, size, cleanness, maturity, and pack requirements set forth in paragraphs (a), (b), and (c) of this section shall not be applicable to shipments of potatoes for any of the following purposes:

(1) Livestock feed;

(2) Charity;

(3) Seed;

(4) Prepeeling;

(5) Canning, freezing, and "other processing" as hereinafter defined;

(6) Grading or storing at any specified location in Morrow or Umatilla Counties in the State of Oregon, in District 5, or in Spokane County in District 1; or

(7) Export, except to Alaska or Hawaii.

Shipments of potatoes for the purpose specified in paragraphs (d) (1) through (7) of this section shall be exempt from inspection requirements specified in paragraph (g) of this section except shipments pursuant to paragraph (d)(6) of this section shall comply with inspection requirements of paragraph (e)(2) of this section. Shipments specified in paragraphs (d) (1), (2), (3), and (5) of this section shall be exempt from assessment requirements specified in § 946.41.

(e) *Safeguards.* (1) Handlers desiring to make shipments of potatoes for prepeeling shall:

(i) Notify the committee of intent to ship potatoes by applying on forms furnished by the committee for a certificate applicable to such special purpose shipments;

(ii) Prepare on forms furnished by the committee a special purpose shipment report on each such shipment, a copy of which must also accompany each shipment. The handler shall forward copies of each such special purpose shipment report to the committee office and to the receiver with instructions to the receiver to sign and return a copy to the committee office. Failure of the handler or receiver to report such shipments by promptly signing and returning the applicable special purpose shipment report to the committee office shall be cause for cancellation of such handler's certificate applicable to such special purpose shipments and/or the receiver's eligibility to receive further shipments pursuant to such certificate. Upon cancellation of such certificate, the handler may appeal to the committee for reconsideration; such appeal shall be in writing;

(iii) Before diverting any such special purpose shipment from the receiver of record as previously furnished to the committee by the handler such handler shall submit to the committee a revised special purpose shipment report.

(2) Handlers desiring to ship potatoes for grading or storing to any specified location in Morrow or Umatilla Counties in the State of Oregon, to District No. 5, or to Spokane County in District No. 1 shall:

(i) Notify the committee of intent to so ship potatoes by applying on forms furnished by the committee for a certificate applicable to such special purpose shipment. Upon receiving such application, the committee shall supply to the handler the appropriate certificate after it has determined that adequate facilities exist to accommodate such shipments and that such potatoes will be used only for authorized purposes;

(ii) If reshipment is for any purpose other than as specified in paragraph (d) of this section, each handler desiring to make reshipment of potatoes which have been graded or stored shall, prior to reshipment, cause each such shipment to be inspected by an authorized representative of the Federal-State Inspection Service. Such shipments must comply with the minimum grade, size, cleanness, maturity, and pack requirements specified in paragraphs (a), (b), and (c) of this section;

(iii) If reshipment is for any of the purposes specified in paragraph (d) of this section, each handler making reshipment of potatoes which have been graded or stored shall do so in accordance with the applicable safeguard requirements specified in paragraph (e) of this section.

(3) Each handler making shipments of potatoes for canning, freezing, or "other processing" pursuant to paragraph (d) of this section shall:

(i) First apply to the committee for and obtain a Certificate of Privilege to make shipments for processing;

(ii) Make shipments only to those firms whose names appear on the committee's list of canners, freezers, or other processors of potato products maintained by the committee, or to persons not on the list provided the handler furnishes the committee, prior to such shipment, evidence that the receiver may reasonably be expected to use the potatoes only for canning, freezing, or other processing;

(iii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iv) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment unless other arrangements are made;

(v) Bill each shipment directly to the applicable processor.

(4) Each receiver of potatoes for processing pursuant to paragraph (d) of this section shall:

(i) Complete and return an application form for consideration of approval as a canner, freezer, or other processor of potato products;

(ii) Certify to the committee and to the Secretary that potatoes received from the production area for processing will be used for such purpose and will not be placed in fresh market channels;

(iii) Report on shipments received as the committee may require and the Secretary approve.

(5) Each handler desiring to make shipments of potatoes for export shall:

(i) Notify the committee of intent to so ship potatoes by applying on forms furnished by the committee for a certificate applicable to such special purpose shipment. Such information shall include the quantity of potatoes to be shipped and the name and address of the exporter;

(ii) After the certificate is approved and the shipment is made, furnish the committee with a copy of the on-board bill of lading applicable to such shipment unless other arrangements are made;

(iii) Before diverting any such special purpose shipment from the receiver of record as previously furnished to the committee by the handler such handler shall submit to the committee a revised special purpose shipment report.

(f) *Minimum quantity exemption.* Each handler may ship up to, but not to exceed 20 hundredweight of potatoes per day without regard to the inspection and assessment requirements of this part, but this exception shall not apply to any shipment over 20 hundredweight of potatoes.

(g) *Inspection.* Except when relieved by paragraphs (d) or (f) of this section, no person may handle any potatoes unless a Federal-State Inspection Notesheet or certificate covering them has been issued by an authorized representative of the Federal-State Inspection Service and the document is valid at the time of shipment. Further, any bulk load shipments of potatoes not relieved in paragraphs (d) or (f) of this section must also be accompanied by a Shipping Clearance Report issued by the Federal-State Inspection Service and valid at the time of shipment.

(h) *Definitions.* The terms "U.S. No. 1," "U.S. No. 2," "not seriously damaged by dirt," "fairly clean," "slightly skinned," and "moderately skinned" shall have the same meaning as when used in the United States Standards for Grades of Potatoes (7 CFR 51.1540–51.1566), including the tolerances set forth in it. The term "prepeeling" means the commercial preparation in the prepeeling plant of clean, sound, fresh tubers by washing, peeling or otherwise removing the outer skin, trimming, sorting, and properly treating to prevent discoloration preparatory to sale in one or more of the styles of peeled potatoes described in § 52.2422 United States Standards for Grades of Peeled Potatoes (7 CFR 52.2421–52.2433). The term "other processing" has the same meaning as the term appearing in the Act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, dicing, or applying material to prevent oxidation does not constitute "other processing." Other terms used in this section have the same meaning as when used in the marketing agreement, as amended, and this part.

(i) *Applicability to imports.* Pursuant to section 8e of the Act and § 980.1 "Import regulations" (7 CFR 980.1), Irish potatoes of the red skinned round type imported during the months of July and

August each year shall meet the minimum grade, size, quality, and maturity requirements for round varieties specified in paragraphs (a) and (b) of this section.

Dated: March 8, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

---

7 CFR Part 948

Irish Potatoes Grown in Colorado—Area 2; Change in Handling Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule increases the minimum diameter for round variety potatoes from 2 inches to 2⅛ inches and for long varieties (except Russet Burbank) grading U.S. No. 2 from 1⅞ inches to 2 inches minimum diameter or four ounces minimum weight. This action also changes the starting date of maturity requirements from September 1 to August 25 beginning with the 1988–89 crop year. The size change will also apply to imported red skinned, round type potatoes. This action is intended to prevent potatoes of undesirable size and quality from being distributed in fresh market channels.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 447–5331.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Order No. 948 (7 CFR Part 948), as amended, regulating the handling of Irish potatoes grown in designated counties of Colorado Area No. 2. This order is authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "nonmajor" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 125 handlers of Colorado Area 2 potatoes subject to regulation under the marketing order, and approximately 290 potato producers in the San Luis Valley (Area 2) of Colorado. Also, there are about 25 potato importers subject to the requirements of the potato import regulation. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of Colorado potatoes and importers of potatoes may be classified as small entities.

The Colorado Agricultural Statistics Service estimated planted acreage for the 1987–88 crop in the San Luis Valley (Area 2) at 59,000 acres, an increase of 4,000 acres over the 55,000 acres harvested in 1986–87. Shipments during the 1986–87 season totaled 29,745 loads at about 480 hundredweight (cwt.) per load. Of the total, 97 percent or 13,814,866 cwt., entered the fresh market, and the remaining three percent (462,103 cwt.) was shipped to processors. Culls approximated 1.4 million cwt, which were utilized for starch.

The breakdown of fresh shipments by variety was 70.4 percent Centennial Russets (9,725,665 cwt.), 23.5 percent Russet Burbanks (3,246,494 cwt.), 5.9 percent reds (815,077 cwt.), and 0.2 percent other varieties (27,630 cwt.).

Two percent of the fresh movement was seed potatoes. The grade composition of the remaining fresh shipments was 60 percent U.S. No. 1, 22 percent U.S. Commercial, 17 percent U.S. No. 2, and one percent U.S. No. 1/Size B.

The handling requirements for fresh Colorado Area No. 2 potatoes are specified in § 948.386 (46 FR 52324, October 27, 1981) and, with the exception of the maturity requirements, are in effect all year long. The current minimum grade, size, and maturity requirements require that fresh potatoes be shipped under the following conditions. Round variety potatoes must grade at least U.S. No. 2 and be at least 2 inches in diameter. Russet Burbank potatoes must grade at least U.S. No. 2 and be at least 1⅞ inches in diameter. All other long varieties must grade at least U.S. Commercial and be at least 2 inches in diameter or at least 4 ounces in weight, or grade at least U.S. No. 2 and be at least 1⅞ inches in diameter. All varieties of potatoes may be Size B if graded at U.S. No. 1. Size B potatoes have a minimum diameter of 1⅛ inches and a maximum diameter of 2¼ inches and no minimum or maximum weight requirement. All varieties of potatoes being exported must be at least 1½ inches in diameter. Maturity requirements during the period September 1 through October 31, specify that all potatoes grading U.S. No. 2 cannot be more than "moderately skinned," and potatoes grading other than U.S. No. 2 cannot be more than "slightly skinned."

This final rule will increase the minimum diameter for round variety potatoes from 2 inches to 2⅛ inches and for long varieties (other than Russet Burbank) grading U.S. No. 2, from 1⅞ inches to 2 inches or a 4 ounce minimum weight. This action will also change the starting date of maturity requirements from September 1 to August 25 beginning with the 1988–89 crop year.

Changes will be made in the introductory text of § 948.386 in paragraphs (a)(1), (a)(3), (b), and (h) to help maintain the quality of Colorado Area 2 potatoes. This final rule is being issued pursuant to § 948.22 of the order.

Notice of this change was published in the February 3, 1988, issue of the **Federal Register** (53 FR 3039) affording interested persons 15 days in which to submit written comments. None were received.

The changes in the size requirements will eliminate the less desirable sizes of potatoes from the marketplace without shorting the market. Requiring handlers to ship larger sized potatoes, which are preferred in the marketplace, is expected to foster increased consumption and have a positive impact on the industry.

The change in the starting date of the maturity requirements recognizes the industry's switch to earlier maturing varieties and the need to ensure the maturity of early season shipments in the interest of the Colorado potato industry and potato consumers. The maturity requirements are based on the degree of skinning on a shipment of potatoes, and are effective during the period September 1 through October 31 each season. Maturity requirements relate to the amount of skin on the potato, which is a factor in the storability of potatoes. All varieties of potatoes that grade U.S. No. 2 cannot be more than "moderately skinned" which means that not more than 10 percent of the potatoes in a lot have more than one-half of the skin missing or "feathered." For all other grades, potatoes cannot be more than "slightly skinned" which means that not more than 10 percent of the potatoes in the lot have more than one-fourth of the skin missing or "feathered." These requirements prevent badly skinned potatoes from being distributed to fresh market outlets.

In recent years the producers in this area have switched to earlier maturing varieties, and season shipments now begin in late August rather than September. To reflect these changes in production and marketing practices, the starting date for maturity requirements will be changed to August 25 each season. The earlier starting date is in the interest of producers, handlers, and consumers and will have no measurable effect on the quantity of potatoes shipped from Colorado Area No. 2. The earlier starting date enables the Colorado Area No. 2 potato industry to better compete with other potato producing areas in the United States by ensuring the shipment of qualities acceptable to buyers early in its season. The shipment of unacceptable quality potatoes early in the season can have a negative impact on market demand and grower returns throughout the entire season.

While this regulation will increase the minimum diameter for round variety potatoes and all long varieties (except Russet Burbank) grading U.S. No. 2 and also establishes an earlier starting date for maturity requirements for the 1988–89 crop year, exemptions to the handling regulation will continue to be available. For example, each person may handle up to but not more than 1,000 pounds of potatoes without regard to the requirements of the handling regulation. This exception does not apply to any shipment which exceeds 1,000 pounds of potatoes. Furthermore, grade, size, maturity, and inspection requirements are not applicable to shipments of potatoes for seed, livestock feed, relief or charity, or canning, freezing, and "other processing."

Quality assurance is very important to the Colorado (Area 2) potato industry both within and outside of the State. Providing the public with acceptable quality produce which is appealing to the consumer on a consistent basis is necessary to maintain buyer confidence in the marketplace. To the extent that this action will increase the quality of potatoes in the marketplace, it will also be of benefit to both Colorado (Area 2) potato growers and handlers.

Section 8e of the Agricultural Marketing Agreement Act of 1937 requires that when certain domestically produced commodities, including Irish potatoes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements. Section 8e also provides that whenever two or more marketing orders regulating a commodity produced in different areas of the United States are concurrently in effect, the Secretary shall determine which of the areas produces the commodity in most direct competition with the imported commodity. Imports, then must meet the quality standards set for that particular area.

In the case of potatoes, the current import regulation (§ 980.1, 34 FR 8043) specifies that import requirements for long types be based on those in effect for potatoes grown in certain designated counties in Idaho, and Malheur County, Oregon (M.O. 945) during each month of the marketing year and that for round white types, they be based on those in effect for potatoes grown in the Southeastern States from June 5 to July 31, and on those in effect for potatoes grown in Colorado Area 3 for the remainder of the year.

The quality standards imposed upon potatoes grown in Colorado Area 2 are applied only to imports of red-skinned, round type potatoes and only during the months of September through June. During July and August, the import requirements are based upon those in effect for potatoes grown in Washington.

While the maturity requirements for Colorado Area 2 potatoes are being made effective at an earlier date, it has been determined that shipments from this area in late August are minimal, and that those from Washington continue to dominate throughout the month. Imports of red- skinned, round type potatoes during July and August are in most direct competition with the same type as produced in Washington State, the area covered by Order No. 946. Therefore, the import requirements for round red varieties will continue to be based upon those established for Colorado Area 2 only from September 1 through June 30. Accordingly, the language of the determinations made in § 980.1(a)(2) concerning direct competition does not have to be changed.

While no change is made in the import requirement pertaining to maturity, imports of round red-skinned potatoes will have to meet the increased minimum size requirement (from 2 to 2⅛ inches) during the September 1 to June 30 period. No change is required in the language of § 980.1 or § 948.386(h) *Applicability to imports*. However, a conforming change to § 948.386(h) is made to delete obsolete language. A change to the introductory paragraph of § 948.386 is made to delete language concerning a prior effective date.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

It is hereby found that increasing the minimum diameter for round and long variety (except Russet Burbank) potatoes and imported round, red potatoes, and establishing an earlier effective date for maturity requirements beginning with the 1988–89 season, will tend to effectuate the declared policy of the Act.

It is hereby further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that the harvesting and shipping of Colorado Area 2 potatoes has begun and it is desirable to make the rule changes effective for as much of the current season as possible. However, it is also found that delaying the effective date of this action until 10 days after publication in the **Federal Register** would provide the committee adequate time to notify the affected handlers of this action prior to its effective date.

List of Subjects in 7 CFR Part 948

Marketing agreements and orders, Potatoes, Colorado.

For the reasons set forth in the preamble, 7 CFR Part 948 is amended as follows:

PART 948—IRISH POTATOES GROWN IN COLORADO

1. The authority citation for 7 CFR Part 948 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 948.386 (46 FR 52324, October 27, 1981) is amended by revising the introductory text, paragraphs (a)(1), (a)(3), (b), and (h) to read as follows. This regulation will appear in the Code of Federal Regulations.

§ 948.386 Handling regulation.

On or after March 24, 1988, no person shall handle any lot of potatoes grown in Area No. 2 unless such potatoes meet the requirements of paragraphs (a), (b), and (c) of this section, or unless such potatoes are handled in accordance with paragraphs (d) and (e), or (f) of this section.

(a) *Minimum grade and size requirements.* (1) Round varieties, U.S. No. 2, or better grade, 2⅛ inches minimum diameter.

* * * * *

(3) *All other long varieties except Russet Burbank.* U.S. Commercial, or better grade, 2 inches minimum diameter or 4 ounces minimum weight, or U.S. No. 2 grade, 2 inches minimum diameter or 4 ounces minimum weight.

* * * * *

(b) *Maturity (skinning) requirements.* From August 25 through October 31 minimum maturity requirements shall be: * * *

* * * * *

(h) *Applicability to imports.* Pursuant to section 8e of the Act and § 980.1 *Import regulations* (7 CFR 980.1), Irish potatoes of the red skinned round type, except certified seed potatoes, imported into the United States during the period September 1 through June 30 each year shall meet the minimum grade, size, and quality requirements prescribed in paragraph (a), and during the period September 1 through October 31 shall meet the maturity requirements as specified in paragraph (b) of this section.

Dated: March 8, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

---

7 CFR Part 1240

Honey Research, Promotion and Consumer Information Order; Change of Refund Application Dates

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule will change the dates by which applications for assessment refunds from honey producers, producer-packers and importers must be filed with the National Honey Board hereinafter referred to as the Board. The change is designed to allow sufficient time to process applications for refunds of assessments paid under the program. The Honey Research, Promotion, and Consumer Information Order and Act require refund applications to be processed by June and December of each year. To meet this requirement, the application deadlines will be April 30 (previously May 31) and October 31 (previously November 30).

EFFECTIVE DATE: April 13, 1988.

FOR FURTHER INFORMATION CONTACT: Perry R. Letson, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone: 202–447–4140.

SUPPLEMENTARY INFORMATION: The rule is issued under the Honey Research, Promotion and Consumer Information Order (7 CFR Part 1240) (order). The order is effective under the Honey Research, Promotion, and Consumer Information Act (7 U.S.C. 4601 *et seq.*) (Act).

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. The order issued pursuant to this Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

The honey industry is made up of many small entities, and several larger entities, which are engaged in the production, importation, and marketing of honey. There are generally three categories of honey producers in the United States: The hobbyist; the part-time beekeeper; and commercial beekeepers. There are about 190,000 hobbyist beekeepers; about 10,000 part-time beekeepers; and about 1,600 commercial beekeepers. Because the Act and the order exempt persons who annually produce or import less than 6,000 pounds of honey, hobbyist beekeepers and a significant number of part-time beekeepers are not required to pay assessments and thus are not affected by this action.

Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The great majority of producers, producer-packers and importers of honey may be classified as small entities.

This rule changes the dates by which honey producers, producer-packers and importers must submit applications for assessment refunds and does not affect their eligibility for refunds. Accordingly, the Administrator of the AMS has determined that this rule will not have a significant economic impact on a substantial number of small entities.

The information collection requirements contained in Part 1240, including § 1240.117, have been previously approved by the Office of Management and Budget (OMB) and have been assigned OMB Control Number 0581–0153 under the provisions of the Paperwork Reduction Act of 1980 (5 U.S.C. 3501 *et seq.*). This rule will not increase the information collection requirements under the Paperwork Reduction Act. The Act and the order provide that honey producers, producer-packers, and honey importers importing 6,000 pounds of honey or more per year pay an assessment on honey entering channels of commerce in the United States. Honey handlers are required to act as collection agents for honey producers subject to the provisions of the order. The U.S. Customs Service collects the assessments on imported honey. Assessments are paid to the Board, which administers the promotion program.

The order provides that a refund of assessments may be obtained by submitting to the Board documentation of assessments paid and that any demand for a refund is to be made within the time and in the manner prescribed by the Board and approved by the Secretary. The Act and the order stipulate that refunds will be made in June and December.

Section 1240.117(b) of the regulations provides that any producers, producer-packers only for their own production, or importers requesting a refund must mail an application on a prescribed form to the Board within 90 days from the date the assessment becomes payable under the regulations. Pursuant to § 1240.117(d), refund applications may be received until May 31 for refunds payable in June and until November 30 for refunds payable in December. The

VOL. 53
ISS 49
MR 14
1988
UMI

May and November assessment reports are not due from collection agents until June 15 and December 15, respectively. The Board's refund processing time, therefore, may be limited to 15 days, a period which is insufficient in light of the processing steps required and the number of refund requests submitted.

This action changes the refund application deadlines from May 31 to April 30, and from November 30 to October 31. It will allow more time for the National Honey Board to verify refund applications by correlating them with monthly assessment reports received from collection agents, and to process the refund payments.

Notice of this change was published in the November 4, 1987, issue of the **Federal Register** (52 FR 42300) affording interested persons 30 days in which to submit written comments. None were received.

List of Subjects in 7 CFR Part 1240

Honey, Agricultural research, Reporting and record keeping requirements, Market development, Consumer information.

For the reasons set forth in the preamble, 7 CFR Part 1240 is amended as follows:

PART 1240—HONEY RESEARCH, PROMOTION AND CONSUMER INFORMATION ORDER

1. The authority citation for 7 CFR Part 1240 continues to read as follows:

Authority: Honey Research, Promotion, and Consumer Information Act, Secs. 1–13, 98 Stat. 3115; 7 U.S.C. 4601–4612.

2. Section 1240.117 is amended by revising paragraph (d) to read as follows:

Subpart: General Rules and Regulations

§ 1240.117 Refunds.

* * * * *

(d) *Payment of refund.* Refunds will be made in June and December only; applications for refunds payable in June must be received by April 30 and applications for refunds payable in December by October 31. For joint application the remittance shall be payable to all eligible producers, producer-packers or importers signing the refund application form.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1980

Guaranteed Loan Programs

AGENCY: Farmers Home Administration, USDA.

ACTION: Interim rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to provide that lenders participating in the guaranteed farm loan program must enter into an agreement with FmHA that if liquidation of a farm loan account becomes imminent, the lender will consider the borrower for an Interest Rate Buydown under Exhibit D of Subpart B of this part, and request a determination of eligibility by FmHA. The lender may not initiate any foreclosure action on the loan until 60 days after a determination has been made by FmHA with respect to the borrower's eligibility to participate in the program. This legislation requires these conditions be placed in every contract of guarantee on a farm loan entered into under the consolidated Farm and Rural Development Act after the date of enactment. President Reagan signed the Agricultural Credit Act of 1987 into law on January 6, 1988. The intended effect of this action is to immediately comply with this provision of the Agricultural Credit Act of 1987.

DATES: March 14, 1988.

Comments must be submitted on or before April 13, 1988.

ADDRESSES: Submit written comments, in duplicate, to the Office of the Chief, Directives Management Branch, Farmers Home Administration, USDA, Room 6348, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250. All written comments will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: Pandor Hadjy, Senior Loan Officer, Farmer Programs Loan Making Division, USDA, Room 5440–S, Washington, DC 20250, telephone (202) 475–4017.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291; and it has been determined to be non-major because there is no substantial change from practices under existing rules, and no annual effect on the econmy of $100 million or more; or a major increase in cost or prices for consumers, individual industry agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Discussion of Interim Rule

FmHA is implementing this interim rule immediately with a 30-day comment period. It is the policy of this Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption of 5 U.S.C. 553 with respect to such rules. However, it is found upon good cause that notice and other public procedure with respect to this interim rule are impracticable because of the requirement of section 613(b) of the Agricultural Credit Act of 1987, and for the same reason good cause is found for making this final rule effective upon publication.

This program is listed in the catalog of Federal Domestic Assistance under No. 10.404 Emergency Loans, No. 10.406 Farm Operating Loans, 10.407 Farm Ownership Loans, No. 10.416 Soil and Water Loans, 10.422 Business and Industrial Loans, and 10.410 Very Low Income and Low Income Housing Loans. For the reasons set forth in the Interim rule related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

The reporting and record keeping requirements contained in this regulation have been approved by the Office of Management and Budget under control numbers 0575–0024 and 0575–0079.

The 1987 Agricultural Credit Act signed into law by President Reagan on January 6, 1988, requires that the Agency take immediate action on certain provisions of the Act upon enactment of the law. Specifically, Title VI, section 613(b) requires that the Agency immediately stipulate in all contracts of guarantee entered into with guaranteed lenders that the lender of a guaranteed farm loan may not initiate foreclosure action on the loan until 60 days after a determination is made with respect to the eligibility of the borrower to participate in the Interest Rate Buydown Program.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Need for Governmental Action

The FmHA programs affected by this regulation change are Farm Ownership (FO) guaranteed loans, Operating (OL) guaranteed loans, and Soil and Water (SW) guaranteed loans. FmHA guaranteed loans are made and serviced by commercial sources such as Federal Land Banks, Production Credit Association, banks, insurance companies and savings and loan associations. FmHA may provide the lender with a guarantee not to exceed 90 percent of loss of principal and interest on a loan.

FmHA is implementing these changes immediately because of the requirement to immediately comply with Title VI, section 613(b) of the Agricultural Credit Act of 1987.

PART 1980—GENERAL

1. The authority citation for Part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—General

Appendix A—[Amended]

2. Appendix A—Form FmHA 449–34 is revised to read as follows:

LOAN NOTE GUARANTEE

	State
	County
	Date of Note
Borrower	FmHA Loan Identification Number
Lender	Lender's IRS ID Tax Number
Lender's Address	Principal Amount of Loan $

The guaranteed portion of the loan is $ ______________ which is ______________ (______________ %) percent of loan principal. The principal amount of loan is evidenced by ______________ note(s) (includes bonds as appropriate) described below. The guaranteed portion of each note is indicated below. This instrument is attached to note ______________ in the face amount of $ ______________ and is number ______________ of ______________.

LENDER'S IDENTIFYING NUMBER	*FACE AMOUNT*	*PERCENT OF TOTAL FACE AMOUNT*	*AMOUNT GUARANTEED*
	$	%	$
TOTAL	$ ______________	100%	$ ______________

In consideration of the making of the subject loan by the above named Lender, the United States of America, acting through the Farmers Home Administration of the United States Department of Agriculture (herein called "FmHA"), pursuant to the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et. seq.), the Emergency Livestock Credit Act of 1974 (7 U.S.C. note preceding 1961, P.L. 93-357 as amended), the Emergency Agricultural Credit Adjustment Act of 1978 (7 U.S.C. note preceding 1921, P.L. 95-334), or Title V of the Housing Act of 1949 (42 U.S.C. 1471 et. seq.) does hereby agree that in accordance with and subject to the conditions and requirements herein, it will pay to:

A. Any Holder 100 percent of any loss sustained by such Holder on the guaranteed portion and on interest due (including any loan subsidy) on such portion.

B. The Lender the lesser of 1. or 2. below:

1. Any loss sustained by such Lender on the guaranteed portion including:
   - a. Principal and interest indebtedness as evidenced by said note(s) or by assumption agreement(s), and
   - b. Any loan subsidy due and owing, and
   - c. Principal and interest indebtedness on secured protective advances for protection and preservation of collateral made with FmHA's authorization, including but not limited to, advances for taxes, annual assessments, any ground rents, and hazard or flood insurance premiums affecting the collateral, or

2. The guaranteed principal advanced to or assumed by the Borrower under said note(s) or assumption agreement(s) and any interest due (including any loan subsidy) thereon.

If FmHA conducts the liquidation of the loan, loss occasioned to a Lender by accruing interest (including any loan subsidy) after the date FmHA accepts responsibility for liquidation will not be covered by this Loan Note Guarantee. If Lender conducts the liquidation of the loan, accruing interest (including any loan subsidy) shall be covered by this Loan Note Guarantee to date of final settlement when the Lender conducts the liquidation expeditiously in accordance with the liquidation plan approved by FmHA.

Definition of Holder.

The Holder is the person or organization other than the Lender who holds all or part of the guaranteed portion of the loan with no servicing responsibilities. Holders are prohibited from obtaining any part(s) of the guaranteed portion of the loan with proceeds from any obligation, the interest on which is excludable from income, under Section 103 of the Internal Revenue Code of 1954, as amended (IRC). When the Lender assigns a part(s) of the guaranteed loan to an assignee, the assignee becomes a Holder only when Form FmHA 449-36, "Assignment Guarantee Agreement," is used.

Definition of Lender.

The Lender is the person or organization making and servicing the loan which is guaranteed under the provisions of the applicable Subpart 7 CFR of Part 1980. The Lender is also the party requesting a loan guarantee.

CONDITIONS OF GUARANTEE

1. Loan Servicing.

Lender will be responsible for servicing the entire loan, and Lender will remain mortgagee and/or secured party of record not withstanding the fact that another party may hold a portion of the loan. When multiple notes are used to evidence a loan, Lender will structure repayments as provided in the loan agreement. In the case of Farm Ownership, Soil and Water, or Operating Loans, the Lender agrees that if liquidation of the account becomes imminent, the Lender will consider the Borrower for an Interest Rate Buydown under Exhibit C of Subpart B of 7 CFR, Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the loan until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.

2. Priorities.

The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion.

3. Full Faith and Credit.

The Loan Note Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which Lender or any Holder has actual knowledge at the time it became such Lender or Holder or which Lender or any Holder participates in or condones. If the note to which this is attached or relates provides for payment of interest on interest, then this Loan Note Guarantee is void. In addition, the Loan Note Guarantee will be unenforceable by Lender to the extent any loss is occasioned by the violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing. Any losses occasioned will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by FmHA in its Conditional Commitment for Guarantee. Negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity or until a final loss is paid.

4. Rights and Liabilities.

The guarantee and right to require purchase will be directly enforceable by Holder notwithstanding any fraud or misrepresentation by Lender or any unenforceability of this Loan Note Guarantee by Lender. Nothing contained herein will constitute any waiver by FmHA of any rights it possesses against the Lender. Lender will be liable for and will promptly pay to FmHA any payment made by FmHA to Holder which if such Lender had held the guaranteed portion of the loan, FmHA would not be required to make.

5. Payments.

Lender will receive all payments of principal, or interest, and any loan subsidy on account of the entire loan and will promptly remit to Holder(s) its pro rata share thereof determined according to its respective interest in the loan, less only Lender's servicing fee.

6. Protective Advances.

Protective advances made by Lender pursuant to the regulations will be guaranteed against a percentage of loss to the same extent as provided in this Loan Note Guarantee notwithstanding the guaranteed portion of the loan that is held by another.

7. Repurchase by Lender.

The Lender has the option to repurchase the unpaid guaranteed portion of the loan from the Holder(s) within 30 days of written demand by the Holder(s) when: (a) the borrower is in default not less than 60 days on principal or interest due on the loan or (b) the Lender has failed to remit to the Holder(s) its pro rata share of any payment made by the borrower or any loan subsidy within 30 days of its receipt thereof. The repurchase by the Lender will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest (including any loan subsidy) less the Lender's servicing fee. The Loan Note Guarantee will not cover the note interest to the Holder on the guaranteed loan(s) accruing after 90 days from the date of the demand letter to the Lender requesting the repurchase. Holder(s) will concurrently send a copy of demand to FmHA. The Lender will accept an assignment without recourse from the Holder(s) upon repurchase. The Lender is encouraged to repurchase the loan to facilitate the accounting for funds, resolve the problem, and to permit the borrower to cure the default, where reasonable. The Lender will notify the Holder(s) and FmHA of its decision.

8. FmHA Purchase.

If Lender does not repurchase as provided by paragraph 7 hereof, FmHA will purchase from Holder the unpaid principal balance of the guaranteed portion together with accrued interest (including any loan subsidy) to date of repurchase less Lender's servicing fee, within thirty (30) days after written demand to FmHA from Holder. The Loan Note Guarantee will not cover the note interest to the Holder on the guaranteed loan(s) accruing after 90 days from the date of the original demand letter of the Holder to the Lender requesting the repurchase. Such demand will include a copy of the written demand made upon the Lender. The Holder(s) or its duly authorized agent will also include evidence of its right to require payment from FmHA. Such evidence will consist of either the original of the Loan Note Guarantee properly endorsed to FmHA or the original of the Assignment Guarantee Agreement properly assigned to FmHA without recourse including all rights, title, and interest in the loan. FmHA will be subrogated to all rights of Holder(s). The Holder(s) will include in its demand the amount due including unpaid principal, unpaid interest (including any loan subsidy) to date of demand and interest (including any loan subsidy) subsequently accruing from date of demand to proposed payment date. Unless otherwise agreed to by FmHA, such proposed payment will not be later than 30 days from the date of demand.

VOL
53
ISS
49
MR
14
1988
UMI

The FmHA will promptly notify the Lender of its receipt of the Holder(s)'s demand for payment. The Lender will promptly provide the FmHA with the information necessary for FmHA determination of the appropriate amount due the Holder(s). Any discrepancy between the amount claimed by the Holder(s) and the information submitted by the Lender must be resolved before payment will be approved. FmHA will notify both parties who must resolve the conflict before payment by FmHA will be approved. Such conflict will suspend the running of the 30 day payment requirement. Upon receipt of the appropriate information, FmHA will review the demand and submit it to the State Director for verification. After reviewing the demand the State Director will transmit the request to the FmHA Finance Office for issuance of the appropriate check. Upon issuance, the Finance Office will notify the office servicing the borrower and State Director and remit the check(s) to the Holder(s).

9. Lender's Obligations.

Lender consents to the purchase by FmHA and agrees to furnish on request by FmHA a current statement certified by an appropriate authorized officer of the Lender of the unpaid principal and interest then owed by Borrowers on the loan and the amount including any loan subsidy then owed to any Holder(s). Lender agrees that any purchase by FmHA does not change, alter or modify any of the Lender's obligations to FmHA arising from said loan or guarantee nor does it waive any of FmHA's rights against Lender, and that FmHA will have the right to set-off against Lender all rights inuring to FmHA as the Holder of this instrument against FmHA's obligation to Lender under the Loan Note Guarantee.

10. Repurchase by Lender for Servicing.

If, in the opinion of the Lender, repurchase of the guaranteed portion of the loan is necessary to adequately service the loan, the Holder will sell the portion of the loan to the Lender for an amount equal to the unpaid principal and interest (including any loan subsidy) on such portion less Lender's servicing fee. The Loan Note Guarantee will not cover the note interest to the Holder on the guaranteed loans accruing after 90 days from the date of the demand letter of the Lender or FmHA to the Holder(s) requesting the Holder(s) to tender their guaranteed portion(s).

a. The Lender will not repurchase from the Holder(s) for arbitrage purposes or other purposes to further its own financial gain.

b. Any repurchase will only be made after the Lender obtains FmHA written approval.

c. If the Lender does not repurchase the portion from the Holder(s), FmHA at its option may purchase such guaranteed portions for servicing purposes.

11. Custody of Unguaranteed Portion.

The Lender may retain, or sell the unguaranteed portion of the loan only through participation. Participation, as used in this instrument, means the sale of an interest in the loan wherein the Lender retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

12. When Guarantee Terminates.

This Loan Note Guarantee will terminate automatically (a) upon full payment of the guaranteed loan; or (b) upon full payment of any loss obligation hereunder; or (c) upon written notice from the Lender to FmHA that the guarantee will terminate 30 days after the date of notice, provided the Lender holds all of the guaranteed portion and the Loan Note Guarantee(s) are returned to be cancelled by FmHA.

13. Settlement.

The amount due under this instrument will be determined and paid as provided in the applicable Subpart of Part 1980 of Title 7 CFR in effect on the date of this instrument.

14. Loan Subsidy.

*In addition to the interest rate of the note attached hereto, FmHA will pay a loan subsidy of ______________ percent per year. Payments will be made annually.

15. Notices.

All notice and actions will be initiated through the FmHA ______________________________

LENDER'S AGREEMENT

Type of Loan: ______________

Applicable 7 CFR Part 1980 Subpart ______________

FmHA Loan Ident. No.

____ (Lender) of

____ has made a loan(s) to

____ (Borrower)

____ in the principal

amount of $ ______________ as evidenced by ______________ note(s)

(include Bond as appropriate) described as follows: ______________________________

____

____

____

____

The United States of America, acting through Farmers Home Administration (FmHA) has entered into a "Loan Note Guarantee" (Form FmHA 449-34) or has issued a "Conditional Commitment for Guarantee" (Form FmHA 449-14) to enter into a Loan Note Guarantee with the Lender applicable to such loan to participate in a

percentage of any loss on the loan not to exceed ______________ % of the amount of the principal advance and any interest (including any loan subsidy) thereon. The terms of the Loan Note Guarantee are controlling. In order to facilitate the marketability of the guaranteed portion of the loan and as a condition for obtaining a guarantee of the loan(s), the Lender enters into this agreement.

THE PARTIES AGREE:

I. The maximum loss covered under the Loan Note Guarantee will not exceed ______________ percent of the principal and accrued interest including any loan subsidy on the above indebtedness.

II. Full Faith and Credit. The Loan Note Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud of misrepresentation of which the Lender has actual knowledge at the time it became such Lender or which Lender participates in or condones. Any note which provides for the payment of interest on interest shall not be guaranteed. Any Loan Note Guarantee or Assignment Guarantee Agreement attached to or relating to a note which provides for payment of interest on interest is void.

The Loan Note Guarantee will be unenforceable by the Lender to the extent any loss is occasioned by violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing. Any losses will be unenforceable by the Lender to the extent that loan funds are used for purposes other than those specifically approved by FmHA in its Conditional Commitment for Guarantee. Negligent servicing is defined as the failure to perform those services which a reasonably prudent Lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity or until a final loss is paid.

III. Lender's Sale or Assignment of Guaranteed Loan.

A. The Lender may retain all of the guaranteed loan. The Lender is not permitted to sell or participate any amount of the guaranteed or unguaranteed portion(s) of the loan(s) to the applicant or Borrower or members of their immediate families, their officers, directors, stockholders, other owners, or any parent, subsidiary or affiliate. If the Lender desires to market all or part of the guaranteed portion of the loan at or subsequent to loan closing, such loan must not be in default as set forth in the terms of the notes. The Lender may proceed under the following options:

This report contains certain agreements to provide future reports and information which must be agreed to by the Lender in order to obtain the benefit of an FmHA loan guarantee. This statement is furnished pursuant to P.L. 96-511

UMI

1. Assignment. Assign all or part of the guaranteed portion of the loan to one or more Holders by using Form FmHA 449–36, "Assignment Guarantee Agreement." Holder(s), upon written notice to Lender and FmHA, may reassign the unpaid guaranteed portion of the loan sold thereunder. Upon such notification the assignee shall succeed to all rights and obligations of the Holder(s) thereunder. If this portion is selected, the Lender may not at a later date cause to be issued any additional notes.

2. Multi-Note System. When this option is selected by the Lender, upon disposition the Holder will receive one of the Borrower's executed notes and Form FmHA 449–34, "Loan Note Guarantee" attached to the Borrower's note. However, all rights under the security instruments (including personal and/or corporate guarantees) will remain with the Lender and in all cases inure to its and the Government's benefit notwithstanding any contrary provisions of state law.

a. At Loan Closing: Provide for no more than 10 notes, unless the Borrower and FmHA agree otherwise, for the guaranteed portion and one note for the unguaranteed portion. When this option is selected, FmHA will provide the Lender with a Form FmHA 449–34, for each of the notes.

b. After Loan Closing:

(1) Upon written approval by FmHA, the Lender may cause to be issued a series of new notes, not to exceed the total provided in 2.a. above, as replacement for previously issued guaranteed note(s) provided:

(a) The Borrower agrees and executes the new notes.
(b) The interest rate does not exceed the interest rate in effect when the loan was closed.
(c) The maturity of the loan is not changed.
(d) FmHA will not bear any expenses that may be incurred in reference to such re-issue of notes.
(e) There is adequate collateral securing the note(s).
(f) No intervening liens have arisen or have been perfected and the secured lien priority remains the same.

(2) FmHA will issue the appropriate Loan Note Guarantees to be attached to each of the notes then extant in exchange for the original Loan Note Guarantee which will be cancelled by FmHA.

3. Participations.

a. The Lender may obtain participation in its loan under its normal operating procedures. Participation means a sale of an interest in the loan wherein the Lender retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

b. The Lender is required to hold in its own portfolio or retain a minimum of 10% of Farmer Program loans and 5% for Business and Industry Program loans of the total guaranteed loan(s) amount. The amount required to be retained must be of the unguaranteed portion of the loan and cannot be participated to another. The Lender may sell the remaining amount of the unguaranteed portion of the loan, except for Farmer Program loans, only through participation. However, the Lender will always retain the responsibility for loan servicing and liquidation.

B. When a guaranteed portion of a loan is sold by the Lender to a Holder(s), the Holder(s) shall thereupon succeed to all rights of Lender under the Loan Note Guarantee to the extent of the portion of the loan purchased. Lender will remain bound to all the obligations under the Loan Note Guarantee, and this agreement, and the FmHA program regulations found in the applicable Subpart of Title 7 CFR Part 1980, and to future FmHA program regulations not inconsistent with the express provisions hereof.

C. The Holder(s) upon written notice to the Lender may resell the unpaid guaranteed portion of the loan sold under provision III A.

IV. The Lender agrees loan funds will be used for the purposes authorized in the applicable Subpart of Title 7 CFR Part 1980 and in accordance with the terms of Form FmHA 449–14.

V. The Lender certifies that none of its officers or directors, stockholders or other owners has a substantial financial interest in the borrower. The Lender certifies that neither the Borrower nor its officers or directors, stockholders, or other owners has a substantial financial interest in the Lender.

VI. The Lender certifies that it has no knowledge of any material adverse change, financial or otherwise, in the Borrower. Borrower's business, or any parent, subsidiaries, or affiliates since it requested a Loan Note Guarantee.

VII. Lender certifies that a loan agreement and/or loan instruments concurred in by FmHA has been or will be signed with the Borrower.

VIII. Lender certifies it has paid the required guarantee fee.

IX. Servicing.

A. The Lender will service the entire loan and will remain mortgagee and/or secured party of record, not withstanding the fact that another may hold a portion of the loan. The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguranteed portions of the loan. Lender may charge Holder a servicing fee. The unguaranteed portion of a loan will not be paid first nor given any preference or priority over the guaranteed portion of the loan.

B. Disposition of the guaranteed portion of a loan may be made prior to full disbursement, completion of construction and acquisitions only with the prior written approval of FmHA. Subsequent to full disbursement, completion of construction, and acquisition, the guaranteed portion of the loan may be disposed of as provided herein.

It is the Lender's responsibility to see that all construction is properly planned before any work proceeds; that any required permits, licenses or authorizations are obtained from the appropriate regulatory agencies; that the Borrower has obtained contracts through acceptable procurement procedures; that periodic inspections during construction are made and that FmHA's concurrence on the overall development schedule is obtained.

C. Lender's servicing responsibilities include, but are not limited to:

1. Obtaining compliance with the covenants and provisions in the note, loan agreement, security instruments, and any supplemental agreements and notifying in writing FmHA and the Borrower of any violations. None of the aforesaid instruments will be altered without FmHA's prior written concurrence. The Lender must service the loan in a reasonable and prudent manner.

2. Receiving all payments on principal and interest (including any loan subsidy) on the loan as they fall due and promptly remitting and accounting to any Holder(s) of their pro rata share thereof determined according to their respective interests in the loan, less only Lender's servicing fee. The loan may be reamortized or renewed only with agreement of the Lender and Holder(s) of the guaranteed portion of the loan and only with FmHA's written concurrence.

3. Inspecting the collateral as often as necessary to properly service the loan.

4. Assuring that adequate insurance is maintained. This includes hazard insurance obtained and maintained with a loss payable clause in favor of the Lender as the mortgagee or secured party.

5. Assuring that: taxes, assessment or ground rents against or affecting collateral are paid; the loan and collateral are protected in foreclosure, bankruptcy, receivership, insolvency, condemnation, or other litigation, insurance loss payments, condemnation awards, or similar proceeds are applied on debts in accordance with lien priorities on which the guarantee was based, or to rebuilding or otherwise acquiring needed replacement collateral with the written approval of FmHA; proceeds from the sale or other disposition of collateral are applied in accordance with the lien priorities on which the guarantee is based, except that proceeds from the disposition of collateral, such as machinery, equipment, furniture or fixtures, may be used to acquire property of similar nature in value up to $ ______________ without written concurrence of FmHA; the Borrower complies with all laws and ordinances applicable to the loan, the collateral and or operating of the farm, business or industry.

6. Assuring that if personal or corporate guarantees are part of the collateral, current financial statements from such loan guarantors will be obtained and copies provided to FmHA at such time and frequency as required by the loan agreement or Conditional Commitment for Guarantee. In the case of guarantees secured by collateral, assuring the security is properly maintained.

7. Obtaining the lien coverage and lien priorities specified by the Lender and agreed to by FmHA, properly recording or filing lien or notice instruments to obtain or maintain such lien priorities during the existence of the guarantee by FmHA.

8. Assuring that the Borrower obtains marketable title to the collateral.

9. Assuring that the Borrower (any party liable) is not released from liability for all or any part of the loan, except in accordance with FmHA regulations.

10. Providing FmHA Finance Office with loan status reports semiannually as of June 30 and December 31 on Form FmHA 1980–41, "Guaranteed Loan Status Report."

11. Obtaining from the Borrower periodic financial statements under the following schedule:

____

Lender is responsible for analyzing the financial statements, taking any servicing actions and providing copies of statements and record of actions to the FmHA office immediately responsible for the loan.

12. Monitoring the use of loan funds to assure they will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M.

X. Default.

A. The Lender will notify FmHA when a Borrower is thirty (30) days (90 days for guaranteed rural housing loan) past due on a payment or if the Borrower has not met its responsibilities of providing the required financial statements to the Lender or is otherwise in default. The Lender will notify FmHA of the status of a Borrower's default on Form FmHA 1980—44, "Guaranteed Loan Borrower Default Status." A meeting will be arranged by the Lender with the Borrower and FmHA to resolve the problem. Actions taken by the Lender with written concurrence of FmHA will include but are not limited to the following or any combination thereof:

1. Deferment of principal payments (subject to rights of any Holder(s)).
2. An additional temporary loan by the Lender to bring the account current.
3. Reamortization of or rescheduling the payments on the loan (subject to rights of any Holder(s)).
4. Transfer and assumption of the loan in accordance with the applicable Subpart of Title 7 CFR Part 1980.
5. Reorganization.
6. Liquidation.
7. Subsequent loan guarantees.
8. Changes in interest rates with FmHA's, Lender's, and the Holder'(s) approval; provided, such interest rate is adjusted proportionally between the guaranteed and unguaranteed portion of the loan and the type of rate remains the same.

B. The Lender will negotiate in good faith in an attempt to resolve any problem to permit the Borrower to cure a default, where reasonable. In the case of Farm Ownership, Soil and Water, or Operating Loans, the Lender agrees that if liquidation of the account becomes imminent, the Lender will consider the Borrower for an Interest Rate Buydown under Exhibit C of Subpart B of 7 CFR, Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the loan until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.

C. The Lender has the option to repurchase the unpaid guaranteed portion of the loan from the Holder(s) within 30 days of written demand by the Holder(s) when: (a) the Borrower is in default not less than 60 days in payment of principal or interest due on the loan or (b) the Lender has failed to remit to the Holder(s) its pro rata share of any payment made by the Borrower or any loan subsidy within 30 days of its receipt thereof. The repurchase by the Lender will be for an amount equal to the unpaid guaranteed portion of the principal and accured interest less the Lender's servicing fee. The loan note guarantee will not cover the note interest to the Holder on the guaranteed loans(s) accuring after 90 days from the date of the demand letter to the Lender requesting the repurchase. Holder(s) will concurrently send a copy of demand to FmHA. The Lender will accept an assignment without recourse from the Holder(s) upon repurchase. The Lender is encouraged to repurchase the loan to faciliate the accounting for funds, resolve the problem, and to permit the borrower to cure the default, where reasonable. The Lender will notify the Holder(s) and FmHA of its decision.

D. If Lender does not repurchase as provided by paragraph C, FmHA will purchase from Holder(s) the unpaid principal balance of the guaranteed portion herein together with accrued interest (including any loan subsidy) to date of repurchase, within 30 days after written demand to FmHA from the Holder(s). The loan note guarantee will not cover the note interest to the Holder on the guaranteed loan(s) accruing after 90 days from the date of original demand letter of the Holder(s) to the Lender requesting the repurchase. Such demand will include a copy of the written demand made upon the Lender.

The Holder(s) or its duly authorized agent will also include evidence of its right to require payment from FmHA. Such evidence will consist of either the originals of the Loan Note Guarantee and note properly endorsed to FmHA or the original of the Assignment Guarantee Agreement properly assigned to FmHA without recourse including all rights, title, and interest in the loan. FmHA will be subrogated to all rights of Holder(s). The Holder(s) will include in its demand the amount due including unpaid principal, unpaid interest (including any loan subsidy) to date of demand and interest subsequently accuring from date of demand to proposed payment date. Unless otherwise agreed to by FmHA, such proposed payment will not be later than 30 days from the date of the demand.

The FmHA office serving the Borrower will promptly notify the Lender of the Holder'(s) demand for payment. The Lender will promptly provide the FmHA office servicing the Borrower with the information necessary for FmHA's determination of the appropriate amount due the Holder(s). Any discrepancy between the amount claimed by the Holder(s) and the information submitted by the Lender must be resolved before payment will be approved. FmHA will notify both parties who must resolve the conflict before payment by FmHA will be approved. Such a conflict will suspend the running of the 30 day payment requirement. Upon receipt of the appropriate information, the FmHA office servicing the Borrower will review the demand and submit it to the State Director for verification. After reviewing the demand, the State Director will transmit the request to the FmHA Finance Office for issuance of the appropriate check. Upon issuance, the Finance Office will notify the office serving the Borrower and State Director and remit the check(s) to the Holder(s).

E. Lender consents to the purchase by FmHA and agrees to furnish on request by FmHA a current statement certified by an appropriate authorized officer of the Lender of the unpaid principal and interest then owed by the Borrower on the loan and the amount due the Holder(s). Lender agrees that any purchase by FmHA does not change, alter or modify any of the Lender's obligations to FmHA arising from said loan or guarantee, nor does such purchase waive any of FmHA's rights against Lender, and FmHA will have the right to set-off against Lender all rights inuring to FmHA from the Holder against FmHA's obligation to Lender under the Loan Note Guarantee. To the extent FmHA holds a portion of a loan, loan subsidy will not be paid the Lender.

F. Servicing fees assessed by the Lender to a Holder are collectible only from payment installments received by the Lender from the Borrower. When FmHA repurchases from a Holder, FmHA will pay the Holder only the amounts due the Holder. FmHA will not reimburse the Lender for servicing fees assessed to a Holder and not collected from payments received from the Borrower. No servicing fee shall be charged FmHA and no such fee is collectible from FmHA.

G. Lender may also repurchase the guaranteed portion of the loan consistent with paragraph 10 of the Loan Note Guarantee.

XI. Liquidation. If the Lender concludes that liquidation of a guaranteed loan account is necessary because of one or more defaults or third party actions that the Borrower cannot or will not cure or eliminate within a reasonable period of time, a meeting will be arranged by the Lender with FmHA. When FmHA concurs with the Lender's conclusion or at any time concludes independently that liquidation is necessary, it will notify the Lender and the matter will be handled as follows:

The Lender will liquidate the loan unless FmHA, at its option, decides to carry out liquidation.

When the decision to liquidate is made, the Lender may proceed to purchase from Holder(s) the guaranteed portion of the loan. The Holder(s) will be paid according to the provisions in the Loan Note Guarantee or the Assignment Guarantee Agreement.

If the Lender does not purchase the guaranteed portion of the loan, FmHA will be notified immediately in writing. FmHA will then purchase the guaranteed portion of the loan from the Holder(s). If FmHA holds any of the guaranteed portion, FmHA will be paid first its pro rata share of the proceeds from liquidation of the collateral.

A. Lender's proposed method of liquidation. Within 30 days after the decision to liquidate, the Lender will advise FmHA in writing of its proposed detailed method of liquidation called a liquidation plan and will provide FmHA with:

1. Such proof as FmHA requires to establish the Lender's ownership of the guaranteed loan promissory note(s) and related security instruments.

2. Information lists concerning the Borrower's assets including real and personal property, fixtures, claims, contracts, inventory (including perishables), accounts receivable, personal and corporate guarantees, and other existing and contingent assets, advice as to whether or not each item is serving as collateral for the guaranteed loan.

3. A proposed method of making the maximum collection possible on the indebtedness.

4. If the outstanding principal B&I loan balance including accrued interest is less than $200,000, the Lender will obtain an estimate of the market and potential liquidated value of the collateral. On B&I loan balances in excess of $200,000, and all other loans regardless of the outstanding principal balance, the Lender will obtain an independent appraisal report on all collateral securing the loan, which will reflect the current market value and potential liquidation value. The appraisal report is for the purpose of permitting the Lender and FmHA to determine the appropriate liquidation actions. Any independent appraiser's fee will be shared equally by FmHA and the Lender.

B. FmHA's response to Lender's liquidation plan. FmHA will inform the Lender in writing whether it concurs in the Lender's liquidation plan within 30 days after receipt of such notification from the Lender. If FmHA needs additional time to respond to the liquidation plan, it will advise the Lender of a definite time for such response. Should FmHA and the Lender not agree on the Lender's liquidation plan, negotiations will take place between FmHA and the Lender to resolve the disagreement. The Lender will ordinarily conduct the liquidation; however, should FmHA opt to conduct the liquidation, FmHA will proceed as follows:

1. The Lender will transfer to FmHA all rights and interests necessary to allow FmHA to liquidate the loan. In this event, the Lender will not be paid for any loss until after the collateral is liquidated and the final loss is determined by FmHA.

2. FmHA will attempt to obtain the maximum amount of proceeds from liquidation.

3. Options available to FmHA include any one or combination of the usual commercial methods of liquidation.

C. Acceleration. The Lender or FmHA, if it liquidates, will proceed as expeditiously as possible when acceleration of the indebtedness is necessary including giving any notices and taking any other legal actions required by the security instruments. A copy of the acceleration notice or other acceleration document will be sent to FmHA or the Lender, as the case may be.

D. Liquidation: Accounting and Reports. When the Lender conducts the liquidation, it will account for funds during the period of liquidation and will provide FmHA with periodic reports on the progress of liquidation, disposition of collateral, resulting costs and additional procedures necessary for successful completion of liquidation. The Lender will transmit to FmHA any payments received from the Borrower and/or pro rata share of liquidation or other proceeds, etc. when FmHA is the bolder of a portion of the guaranteed loan using Form FmHA 1980–43, "Lender's Guaranteed Loan Payment to FmHA." When FmHA liquidates, the Lender will be provided with similar reports on request.

E. Determination of Loss and Payment. In all liquidation cases, final settlement will be made with the Lender after the collateral is liquidated. FmHA will have the right to recover losses paid under the guarantee from any party liable.

1. Form FmHA 449–30, "Loan Note Guarantee Report of Loss," will be used for calculations of all estimated and final loss determinations. Estimated loss payments may be approved by FmHA after the Lender has submitted a liquidation plan approved by FmHA. Payment will be made in accordance with applicable FmHA regulations.

2. When the Lender is conducting the liquidation, and owns any of the guaranteed portion of the loan, it may request a tentative loss estimate by submitting to FmHA an estimate of the loss that will occur in connection with liquidation of the loan. FmHA will agree to pay an estimated loss settlement to the Lender provided the Lender applies such amount due to the outstanding principal balance owed on the guaranteed debt. Such estimate will be prepared and submitted by the Lender on Form FmHA 449–30, using the basic formula as provided on the report except that the appraisal value will be used in lieu of the amount received from the sale of collateral.

After the Report of Loss estimate has been approved by FmHA, and within 30 days thereafter, FmHA will send the original Report of Loss estimate to FmHA Finance Office for issuance of a Treasury check in payment of the estimated amount due the Lender.

After liquidation has been completed, a final loss report will be submitted on Form FmHA 449–30 by the Lender to FmHA.

3. After the Lender has completed liquidation, FmHA upon receipt of the final accounting and report of loss, may audit and will determine the actual loss. If FmHA has any questions regarding the amounts set forth in the final Report of Loss, it will investigate the matter. The Lender will make its records available to and otherwise assist FmHA in making the investigation. If FmHA finds any discrepancies, it will contact the Lender and arrange for the necessary corrections to be made as soon as possible. When FmHA finds the final Report of Loss to be proper in all respects, it will be tentatively approved in the space provided on the form for that purpose.

4. When the Lender has conducted liquidation and after the final Report of Loss has been tentatively approved:

a. If the loss is greater than the estimated loss payment, FmHA will send the original of the final Report of Loss to the Finance Office for issuance of a Treasury check in payment of the additional amount owed by FmHA to the Lender.

b. If the loss is less than the estimated loss, the Lender will reimburse FmHA for the overpayment plus interest at the note rate from date of payment.

5. If FmHA has conducted liquidation, it will provide an accounting and Report of Loss to the Lender and will pay the Lender in accordance with the Loan Note Guarantee.

6. In those instances where the Lender has made authorized protective advances, it may claim recovery for the guaranteed portion of any loss of monies advanced as protective advances and interest resulting from such protective advances as provided above, and such payment will be made by FmHA when the final Report of Loss is approved.

F. Maximum amount of interest loss payment. Notwithstanding any other provisions of this agreement, the amount payable by FmHA to the Lender cannot exceed the limits set forth in the Loan Note Guarantee. If FmHA conducts the liquidation, loss occasioned by accruing interest (including any loan subsidy) will be covered by the guarantee only to the date FmHA accepts this responsibility. Loss occasioned by accruing interest (including subsidy) will be covered to the extent of the guarantee to the date of final settlement when the liquidation is conducted by the Lender provided it proceeds expeditiously with the liquidation plan approved by FmHA. The balance of accrued interest (including any loan subsidy) payable to the Lender, if any, will be calculated on the final Report of Loss form.

G. Application of FmHA loss payment. The estimated loss payment shall be applied as of the date of such payment. The total amount of the loss payment remitted by FmHA will be applied by the Lender on the guaranteed portion of the loan debt. However, such application does not release the Borrower from liability. At time of final loss settlement the Lender will notify the Borrower that the loss payment has been so applied. In all cases a final Form FmHA 449–30 prepared and submitted by the Lender must be processed by FmHA in order to close out the files at the FmHA Finance Office.

H. Income from collateral. Any net rental or other income that has been received by the Lender from the collateral will be applied on the guaranteed loan debt.

I. Liquidation costs. Certain reasonable liquidation costs will be allowed during the liquidation process. These liquidation costs will be submitted as a part of the liquidation plan. Such costs will be deducted from gross proceeds from the disposition of collateral unless the costs have been previously determined by the Lender (with FmHA written concurrence) to be protective advances. If changed circumstances after submission of the liquidation plan require a revision of liquidation costs, the Lender will procure FmHA's written concurrence prior to proceeding with the proposed changes. No in-house expenses of the Lender will be allowed. In-house expenses include, but are not limited to, employees' salaries, staff lawyers, travel and overhead.

J. Foreclosure. The parties owning the guaranteed portion and unguaranteed portions of the loan will join to institute foreclosure action or, in lieu of foreclosure, to take a deed of conveyance to such parties. When the conveyance is received and liquidated, net proceeds will be applied to the guaranteed loan debt.

K. Payment. Such loss will be paid by FmHA within 60 days after the review of the accounting of the collateral.

XII. Protective Advances. Protective advances must constitute an indebtedness of the Borrower to the Lender and be secured by the security instrument(s). FmHA written authorization is required on all protective advances in excess of $500. Protective advances include, but are not limited to, advances made for taxes, annual assessments, ground rent, hazard or flood insurance premiums affecting the collateral, and other expenses necessary to preserve or protect the security. Attorney fees are not a protective advance.

XIII Additional Loans or Advances.

The Lender will not make additional expenditures or new loans without first obtaining the written approval of FmHA even though such expenditures or loans will not be guaranteed.

XIV. Future Recovery.

After a loan has been liquidated and a final loss has been paid by FmHA, any future funds which may be recovered by the Lender, will be pro-rated between FmHA and the Lender. FmHA will be paid such amount recovered in proportion to the percentage it guaranteed for the loan and the Lender will retain such amounts in proportion to the percentage of the unguaranteed portion of the loan.

XV. Transfer and Assumption Cases.

Refer to the applicable Subpart of Title 7 of CFR Part 1980.

If a loss should occur upon consummation of a complete transfer and assumption for less than the full amount of the debt and the transferor-debtor (including personal guarantees) is released from personal liability, the Lender, if it holds the guaranteed portion, may file an estimated Report of Loss on Form FmHA 449–30, "Loan Note Guarantee Report of Loss," to recover its pro rata share of the actual loss at that time. In completing Form FmHA 449–30, the amount of the debt assumed will be entered on line 24 as Net Collateral (Recovery). Approved protective advances and accrued interest thereon made during the arrangement of a transfer and assumption, if not assumed by the Transferee, will be entered on Form FmHA 449–30, line 13 and 14.

XVI. Other Requirements.

This agreement is subject to all the requirements of the applicable Subpart of Title 7 CFR Part 1980, and any future amendments of these regulations not inconsistent with this agreement. Interested parties may agree to abide by future FmHA regulations not inconsistent with this agreement.

XVII. Execution of Agreements.

If this agreement is executed prior to the execution of the Loan Note Guarantee, this agreement does not impose any obligation upon FmHA with respect to execution of such contract. FmHA in no way warrants that such a contract has been or will be executed.

XVIII. Notices.

All notices and actions will be initiated through FmHA for ______________________

Title ______________________________

Appendix D—[Amended]

4. Appendix D—Form FmHA 1980–27 is revised to read as follows:

APPENDIX D

USDA-FmHA
Form FmHA 1980-27
(Rev 2-88)

CONTRACT OF GUARANTEE
(Line of Credit)

Type of Loan ☐OL ☐EL or ☐EE	
Case No	
State	
County	

Lender	Lender's IRS Tax No	Date of Line of Credit Agreement
Lender's Address		Line of Credit Ceiling $
Borrower's Name and Address		

The guaranteed portion of this line of credit is ______________ % of the principal balance owed at any one time on advances made within an approved line of credit by the above-named Lender to the above-named Borrower.

In consideration of making advance(s) by the Lender within the line of credit ceiling pursuant to the Line of Credit Agreement, the United States of America acting through the Farmers Home Administration of the United States Department of Agriculture (herein called "FmHA"), pursuant to the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et. seq.), the Emergency Livestock Credit Act of 1974 (P.L. 93-357), as amended, or the Emergency Agricultural Credit Adjustment Act of 1978 (P.L. 95-334) agrees that in accordance with and subject to the conditions and requirements in this agreement, it will pay to the Lender who holds the line of agreement(s) (and note(s), if any exist) for said advance(s) (or assumption agreement) covered by this contract the lesser of 1 or 2 below

1 Any loss sustained by such Lender on the guaranteed portion including:

a. Principal and interest indebtedness as evidenced by said line of credit agreement(s) (and note(s), if any exist) or by assumption agreement(s), and

b Principal and interest indebtedness on secured protective advances for protection and preservation of collateral made with FmHA's authorization, including but not limited to, advances for taxes, annual assessments, any ground rents, and hazard or flood insurance premiums affecting the collateral, or

2 The guaranteed principal advances to or assumed by the Borrower under said line of credit agreement(s) (and note(s), if any exist) or assumption agreement(s) and any interest due thereon.

If an Operating Loan Line of Credit is involved, advances under that line of credit must be made within three years from the date of this Contract. Advances made after that date will not be covered by this Contract. If FmHA conducts the liquidation of the line of credit, loss occasioned to a Lender by accruing interest after the date FmHA accepts responsibility for liquidation will not be covered by this Contract of Guarantee. If Lender conducts the liquidation of the line of credit, accruing interest shall be covered by this Contract of Guarantee to date of final settlement when the Lender conducts the liquidation expeditiously in accordance with the liquidation plan approved by FmHA.

CONDITIONS OF GUARANTEE

1 Line of Credit Servicing

Lender will be responsible for servicing the entire line of credit, and Lender will remain mortgagee and/or secured party of record. The Lender agrees that, if liquidation of the account becomes imminent, the Lender will consider the Borrower of an Operating Loan Line of Credit for an Interest Rate Buydown under Exhibit C of Subpart B of 7 CFR, Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the line of credit until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.

2. Priorities

The entire line of credit will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the line of credit. The unguaranteed portion of the line of credit will not be paid first nor given any preference or priority over the guaranteed portion.

3 Full Faith and Credit

The Contract of Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which Lender has actual knowledge at the time it became such Lender or which Lender participates in or condones. If the line of credit agreement to which this Contract of Guarantee is attached provides for the payment of interest on interest, this Contract of Guarantee is void. In addition, the Contract of Guarantee will be unenforceable by the Lender to the extent any loss is occasioned by the violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing. Any losses occasioned will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by FmHA in its Conditional Commitment for Guarantee. Negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity or until a final loss is paid.

Position 2 FmHA 1980-27 (Rev. 2-88)

---

4 . Protective Advances

Protective advances made by Lender pursuant to the regulations will be guaranteed against a percentage of loss to the same extent as provided in this Contract of Guarantee.

5 Custody of Unguaranteed Portion

The Lender may retain or sell the unguaranteed portion of the line of credit only through participation. Participation, as used in this instrument, means the sale of an interest in the line of credit in which the Lender retains the line of credit agreement (and note, if one exists) collateral securing the line of credit, and all responsibility for servicing and liquidation of the line of credit.

6 When Guarantee Terminates

This Contract of Guarantee will terminate automatically (a) upon full payment of the guaranteed line of credit; or (b) upon full payment of any loss obligation under this Contract: or (c) upon written notice from the Lender to FmHA that the guarantee will terminate 30 days after the date of notice, provided the Contract is returned to FmHA to be cancelled.

7 . Settlement

The amount due under this instrument will be determined and paid as provided in the applicable Subpart of Part 1980 of Title 7 CFR in effect on the date of this instrument.

8 Notices

All notices and actions will be initiated through the FmHA County Supervisor for ______________________________(County)

LENDER'S AGREEMENT
(Line of Credit)

Applicable 7 CFR Part 1980. Subpart ____________________

____________________ (Lender) of ____________________

has established a line of credit to ____________________ (Borrower) for the fiscal period ending

____________________, 19___, for the purpose of ____________________

____

in the maximum sum of $____________ as evidenced by a "Line of Credit Agreement" dated ____________, 19___

The United States of America, acting through Farmers Home Administration (FmHA) has entered into a "Contract of Guarantee (Line of Credit)" (Form FmHA 1980-27) or has issued a "Conditional Commitment for Contract of Guarantee (Line of Credit)" (Form FmHA 1980-15) to enter into a Contract of Guarantee with the Lender applicable to such line of credit to participate in a percentage of any loss on the loan advances not to exceed ____________ % of the amount of the principal and any accrued interest. The terms of the Contract of Guarantee are controlling. As a condition for obtaining a guarantee of the line of credit advances the Lender enters into this agreement

THE PARTIES AGREE:

I. The maximum loss covered under the Contract of Guarantee will not exceed ________ percent of the principal and accrued interest owed on any Operating Loan, Emergency Livestock Loan or Economic Emergency Loan advances made within the line of credit ceiling and the terms and conditions of the Contract of Guarantee.

II Full Faith and Credit.

The Contract of Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which the Lender has actual knowledge at the time it became such Lender or which Lender participates in or condones. Any line of credit agreement which provides for the payment of interest on interest shall not be guaranteed. Any Contract of Guarantee attached to or relating to the line of credit agreement which provides for the payment of interest on interest is void. The Contract of Guarantee will be unenforceable by the Lender to the extent any loss is occasioned by violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing. Any losses will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by FmHA in its Conditional Commitment for Contract of Guarantee Line of Credit. Negligent servicing is defined as the failure to perform those services which a reasonably prudent Lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonably prudent Lender would act up to the time of loan maturity or until a final loss is paid.

III Lender's Sale of Guaranteed Line of Credit by Participation.

A. The Lender may obtain participation in its line of credit under its normal operating procedures. The Lender is required to hold in its own portfolio or retain a minimum of 10 percent of the total guaranteed line of credit amount. The amount required to be retained must be of the unguaranteed portion of the line of credit and cannot be participated to another Lender The Lender may obtain participation of only the unguaranteed portion of its line of credit in excess of the 10 percent minimum under its normal operations procedures. Participation means a sale of an interest in the line of credit in which the Lender retains the line of credit agreement (and note, if one exists), collateral securing the line of credit, and all responsibility for servicing and liquidation of the line of credit. Participation with a lender by any entity does not make that entity a lender.

B. The Lender may retain or sell any amount of the unguaranteed portion(s) of the line(s) of credit as provided in this section only through participation. However, the Lender cannot participate any amount of the line(s) of credit to the applicant or Borrower or members of their immediate families, their officers, directors, stockholders, or owners, or any parent, subsidiary or affiliate. If the Lender desires to sell all or part of the guaranteed portion of the line of credit through participation at or subsequent to execution of the line of credit agreement, such line of credit must not be in default as set forth in the terms of the line of credit agreement(s) (and note(s), if any exist). The Lender will retain the responsibility for servicing and liquidation of the line of credit. Participation with a lender by any entity does not make the entity a holder.

This form is used by lenders to meet certain conditions precedent to issuance of a Contract of Guarantee in Operating Loan Line of Credit, Emergency Livestock Loan, or Economic Emergency Loan cases. This report contains information that is required to provide future reports and information which must be agreed to by the lender in order to obtain the benefit of an FmHA loan guarantee. This statement is furnished pursuant to P.L. 96-511.

IV. The Lender agrees funds advanced under the line of credit will be used for the purposes authorized in either Subpart B, C or F of Title 7 CFR, Part 1980 as applicable in accordance with the terms of Form FmHA 1980-15.

V. The Lender certifies that none of its officers or directors, stockholders or other owners has a substantial financial interest in the Borrower. The Lender certifies that neither the Borrower nor its officers or directors, stockholders or other owners has a substantial financial interest in the Lender

VI. The Lender certifies that it has no knowledge of any material adverse change, financial or otherwise, in the Borrower, the Borrower's business or any parent, subsidiaries, or affiliates since it requested a Contract of Guarantee

VII. Lender certifies that the Line of Credit Agreement and/or loan instruments concurred in by FmHA has been or will be signed with the Borrower

VIII. If an Operating Loan line of credit is guaranteed under Subpart B of 7 CFR, Part 1980, Lender certifies it has paid the required guarantee fee

IX. Servicing.

A. The Lender will service the entire line of credit and will remain mortgagee and/or secured party of record. The entire line of credit will be secured by the same security with equal lien priority of the guaranteed and unguaranteed portions of the line of credit. The unguaranteed portion of a line of credit will not be paid first nor given any preference or priority over the guaranteed portion of the line of credit.

B. It is the Lender's responsibility to see that all construction is properly planned before any work proceeds; that any required permits, licenses or authorizations are obtained from the appropriate regulatory agencies; that the Borrower has obtained contracts through acceptable procurement procedures; that periodic inspections during construction are made and that FmHA's concurrence on the overall development schedule is obtained.

C. Lender's servicing responsibilities include, but are not limited to:

1. Obtaining compliance with the covenants and provisions in the line of credit agreement (and note, if one exists), security instruments, and any supplemental agreements. None of the aforesaid instruments will be altered without FmHA's prior written concurrence. The Lender must service the line of credit in a reasonable prudent manner
2. Receiving all payments on principal and interest on the line of credit advances as they fall due. The line of credit may be reamortized or removed only with FmHA's written concurrence.
3 Inspecting the collateral as often as necessary to properly service the line of credit.
4. Assuring that adequate insurance is maintained. This includes hazard insurance obtained and maintained with a loss payable clause in favor of the Lender as the mortgagee or secured party.
5. Assuring that: taxes, assessment or ground rents against or affecting collateral are paid; the line of credit and collateral are protected in foreclosure, bankruptcy, receivership, insolvency, condemnation, or other litigation; insurance loss payments; condemnation awards, or similar proceeds are applied on debts in accordance with lien priorities on which the guarantee was based, or to rebuilding or otherwise acquiring needed replacement collateral with the written approval of FmHA; proceeds from the sale or other disposition of collateral are applied in accordance with the lien priorities on which the guarantee is based, except that proceeds from the disposition of collateral such as machinery, equipment, furniture or fixtures, may be used to acquire property of similar nature in value up to $ ____________ without written concurrence of FmHA, the Borrower complies with all laws and ordinances applicable to the line of credit, the collateral and/or operation of the farm or ranch
6. Assuring that if personal or corporate guarantees are part of the collateral, current financial statements from such guarantors will be obtained which are not over 60 days old in the case of personal guarantees or over 90 days old in the case of corporate guarantees. In the case of guarantees secured by collateral, assuring the security is properly maintained.
7. Obtaining the lien coverage and line priorities specified by the Lender and agreed to by FmHA, properly recording or filing lien or notice instruments to obtain or maintain such lien priorities during the existence of the guarantee by FmHA.
8. Assuring that the Borrower obtains marketable title to the collateral.
9. Assuring that the Borrower (any party liable) is not released from liability for all or any part of the line of credit, except in accordance with FmHA regulations.
10. Providing FmHA Finance Office with loan status reports annually as of December 31 on Form FmHA 1980-41, "Guaranteed Loan Status Report".
11. Obtaining from the Borrower periodic financial statements under the following schedule ____________

____

Lender is responsible for analyzing the financial statements, taking any servicing actions needed, and providing copies of statements and record of actions to the County Supervisor.

2. Monitoring the use of loan funds to assure that they will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M.

VOL
53
ISS
49
MR
14
988
MI

X. Defaults.

A. The Lender will notify FmHA when a Borrower is thrity (30) days past due on a payment and is unlikely to bring its account current within sixty (60) days, or if the Borrower has not met its responsibilities of providing the required financial statements to the Lender or is otherwise in default. The Lender will notify FmHA of the status of a Borrower's default on Form FmHA 1980-44, "Guaranteed Loan Borrower Default Status". A meeting will be arranged by the Lender with the Borrower and FmHA to resolve the problem. Actions taken by the Lender with concurrence of FmHA may include but are not limited to any curative actions contained in either Subpart B, C or F as applicable, or liquidation.

B. The Lender will negotiate in good faith in an attempt to resolve any problem and to permit the Borrower to cure a default, where reasonable. The Lender agrees that if liquidation of the account becomes imminent, the Lender will consider the Borrower of an Operating Loan Line of Credit for an Interest Rate Buydown under Exhibit C of Subpart B of 7 CFR. Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the line of credit until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.

XI. Liquidation.

If the Lender concludes that liquidation of a guaranteed line of credit account is necessary because of one or more defaults or third party actions that the Borrower cannot or will not cure or eliminate within a reasonable period of time, a meeting will be arranged by the Lender with FmHA. When FmHA concurs with the Lender's conclusion or at any time concludes independently that liquidation is necessary, it will notify the Lender and the matter will be handled as follows:

The Lender will liquidate the loan unless FmHA, at its option, decides to carry out liquidation.

A. Lender's proposed method of liquidation. Within 30 days after the decision to liquidate is made, the Lender will advise FmHA of its proposed method of liquidation and will provide FmHA with:

1. Such proof as FmHA requires to establish the Lender's ownership of the guaranteed line of credit agreement(s) and related security instruments.
2. Information lists concerning the Borrower's assets including real and personal property, fixtures, claims, contracts, inventory (including perishables), accounts receivable, personal and corporate guarantees, and other existing and contingent assets, advice as to whether or not each item is serving as collateral for the guaranteed line of credits.
3. A proposed method making the maximum collection possible on the indebtedness.
4. Lender will obtain an independent appraisal report on all collateral securing the loan, which will reflect the current market value and potential liquidation value. The appraisal report is for the purpose of permitting the Lender and FmHA to determine the appropriate liquidation actions. Any independent appraiser's fee will be shared equally by FmHA and the Lender.

B. FmHA's response to Lender's liquidation proposal. FmHA will inform the Lender whether it concurs in the Lender's proposed method of liquidation within 30 days after receipt of such notification from the Lender. If FmHA needs additional time to respond to the liquidation plan, it will advise the Lender of a definite time for such response. Should FmHA and the Lender not agree on the Lender's liquidation proposal, negotiation will take place between FmHA and the Lender to resolve the disagreement. The Lender will ordinarily conduct the liquidation; however, should FmHA opt to conduct the liquidation, FmHA will proceed as follows:

1. The Lender will transfer to FmHA all its rights and interests necessary to allow FmHA to liquidate the loan. In this event, the Lender will not be paid for any loss until after the collateral is liquidated and the final loss is determined by FmHA.
2. FmHA will attempt to obtain the maximum amount of proceeds from liquidation.
3. Options available to FmHA include any one or combination of the usual commercial methods of liquidation.

C. Acceleration. The Lender or FmHA, if it liquidates, will proceed as expeditiously as possible when acceleration of the indebtedness is necessary including giving any notices and taking any other legal actions required by the security instruments. A copy of the acceleration notice or other acceleration document will be sent to FmHA or the Lender, as the case may be.

D. Liquidation. Accounting and Reports. When the Lender conducts the liquidation, it will account for funds during the period of liquidation and will provide FmHA with periodic reports on the progress of liquidation, disposition of collateral, resulting costs, and additional procedures necessary for successful completion of liquidation. When FmHA liquidates, the Lender will be provided with similar reports on request.

E. Determination of Loss and Payment. In all liquidation cases, a final settlement will be made with the Lender after the collateral is liquidated. FmHA will have the right to recover losses paid under the guarantee from any party liable.

1. Form FmHA 449-30, "Loan Note Guarantee Report of Loss," will be used for calculations of all estimated and final determinations. Estimated loss payments may be approved by FmHA after the Lender has submitted a liquidation plan approved by FmHA. Payment will be made in accordance with the applicable FmHA regulations.
2. When the Lender is conducting the liquidation, it may request a tentative loss estimate by submitting to FmHA an estimate of the loss that will occur in connection with liquidation of the line of credit. FmHA will agree to pay an estimated loss settlement to the Lender provided the Lender applies such amount due to the outstanding principal balance owed on the guaranteed debt. Such estimate will be prepared on Form FmHA 449-30, using the basic formula as provided in the report except that the appraisal value will be used in lieu of the amount received from the sale of collateral.

   After the Report of Loss Estimate has been approved by FmHA, and within 30 days thereafter, FmHA will send the original Report of Loss Estimate to FmHA Finance Office for issuance of a Treasury check in payment of the estimated amount due the Lender.

   After liquidation has been completed, a final loss report will be submitted on Form FmHA 449-30 by the Lender to FmHA.

3. After the Lender has completed liquidation FmHA, upon receipt of the final accounting and report of loss, may audit and will determine the actual loss. If FmHA has any questions regarding the amounts set forth in the Final Report of Loss, it will investigate the matter. The Lender will make its records available to and otherwise assist FmHA in making the investigation. If FmHA finds any discrepancies, it will contact the Lender and arrange for the necessary corrections to be made as soon as possible. When FmHA finds the Final Report of Loss to be proper in all respects, it will be tentatively approved in the space provided on the form for that purpose.
4. When the Lender has conducted liquidation and after the Final Report of Loss has been tentatively approved.
   a. If the loss is greater than the estimated loss payment, FmHA will send the original of the Final Report Loss to the Finance Office for issuance of a Treasury check in payment of the additional amount owed by FmHA to the Lender.
   b If the loss is less than the estimated loss, the Lender will reimburse FmHA for the overpayment plus interest at the note rate from date of payment.
5. If FmHA has conducted liquidation, it will provide an accounting and report of loss to the Lender and will pay the Lender in accordance with the Contract of Guarantee.
6. In those instances where the Lender has made authorized protective advances, it may claim recovery for the guaranteed portion of any loss of monies advanced as protective advances and interest resulting from such protective advances as provided above, and such payment will be made by FmHA when the final Report of Loss is approved.

F. Maximum amount of interest loss payment. Notwithstanding any other provisions of this agreement, the amount payable by FmHA to the Lender cannot exceed the limits set forth in the Contract of Guarantee. If FmHA conducts the liquidation, loss occasioned by accruing interest will be covered by the guarantee only to the date FmHA accepts this responsibility. Loss occasioned by accruing interest will be covered to the extent of the guarantee to the date of final settlement when the liquidation is conducted by the Lender provided it proceeds expeditiously with the liquidation plan approved by FmHA. The balance of accrued interest payable to the Lender, if any, will be calculated on the final Report of Loss form.

G. Application of FmHA loss payment. The estimated loss payment shall be applied as of the date of such payment. The amount of the loss payment remitted by FmHA will be applied by the Lender on the guaranteed loan debt. However, such application does not release the Borrower from liability. At time of final loss settlement the Lender will notify the Borrower that the loss payment has been so applied. In all cases a final Form FmHA 449-30 prepared and submitted by the Lender must be processed by FmHA in order to close out the files at the FmHA Finance Office.

H. Income from collateral. Any net rental or other income that has been received by the Lender from the collateral will be applied on the guaranteed loan debt.

I. Liquidation costs. Certain reasonable liquidation costs will be allowed during the liquidation process. These liquidation costs will be submitted as a part of the liqiuidation plan. Such costs will be deducted from gross proceeds from the disposition of collateral unless the costs have been previously determined by the Lender (with FmHA written concurrence) to be protective advances. If changed circumstances after submission of the liquidation plan require a revision of liquidation costs, the Lender will procure FmHA's written concurrence prior to proceeding with the proposed changes. No in-house expenses of the Lender will be allowed. In-house expenses include, but are not limited to, employees' salaries, staff lawyers, travel and overhead.

J. Payment. Such loss will be paid by FmHA within 60 days after the review of the account of the collateral.

XII. Protective advances.

Protective advances must constitute an indebtedness of the Borrower to the Lender and be secured by the security instrument(s). FmHA written authorization is required on all protective advances in excess of $500. Protective advances include but are not limited to, advances for taxes, annual assessments, ground rent, hazard or flood insurance premiums effecting the collateral, and other expenses necessary to preserve or protect the security. Attorney fees are not a protective advance.

XIII. Additional Loans or Advances.

The Lender will not make additional expenses or new lines of credit or loans without first obtaining the written approval of FmHA even though such expenditures or lines of credit or loans will not be guaranteed.

XIV. Future Recovery.

After a loan has been liquidated and a final loss has been paid by FmHA, any future funds which may be recovered by the Lender, will be pro-rated between FmHA and the Lender. FmHA will be paid such amount recovered in proportion to the percentage it guaranteed for the loan and the Lender will retain such amount in proportion to the percentage of the unguaranteed portion of the loan.

XV. Transfer and Assumption Cases.

Refer to Subpart B, C or F of Title 7 of CFR, Part 1980. If a loss will occur upon consummation of a complete transfer and assumption for less than the full amount of the debt and the transferor-debtor (including personal guarantees) is released from personal liability, the Lender may file an estimated Report of Loss on Form FmHA 449-30, "Loan Note Guarantee Report of Loss," to recover its pro rata share of the actual loss at that time. In completing Form FmHA 449-30, the amount of the debt assumed will be entered on line 24 as Net Collateral (Recovery). Approved protective advances and accrued interest thereon made during the arrangement of a transfer and assumption, if not assumed by the Transferee, will be entered on Form FmHA 449-30, lines 13 and 14.

XVI. Other Requirements.

This agreement is subject to all the requirements of either Subpart A, B, C or F of Title 7 CFR, Part 1980 as applicable, and any future amendments of these regulations, or other FmHA regulations, not inconsistent with this agreement.

XVII. Execution of Agreements.

If this agreement is executed prior to the execution of the Contract of Guarantee, this agreement does not impose any obligation upon FmHA with respect to execution of such contract. FmHA in no way warrants that such a contract has been or will be executed.

XVII. Notices.

All notices and actions will be initiated through the FmHA County Supervisor for ____________________ (County)

6. Section 1980.115 is revised by amending Administrative paragraph B.2 to read as follows:

§ 1980.115 County Committee Review.

* * * * *

Administrative

* * * * *

B. * * *

2. Set forth in the space provided on Form FmHA 449–14 (A.1., above) or Form FmHA 1980–15 (A.1., above) any special conditions of approval, including requirements for security, improved management practices, relating to highly erodible land and conversion of wetland found in Exhibit M of Subpart G of Part 1940 of this chapter, and type and frequency of financial reports required by FmHA but not required by the lender. The loan approval official will also include the following requirement as condition of approval in the Conditional Commitment:

"The lender agrees that, if liquidation of the account becomes imminent, the lender will consider the borrower for an Interest Rate Buydown under Exhibit D of Subpart B of 7 CFR Part 1980, and request a determination of the borrower's eligibility by FmHA. The lender may not initiate foreclosure action on the loan (or line of credit if Form FmHA 1980–15 is used) until 60 days after a determination has been made with respect to the eligibility of the borrower to participate in the Interest Rate Buydown Program."

An attachment to the form may be used, if necessary. Return Forms FmHA 449–14 or FmHA 1980–15 to the County Supervisor for execution and proper distribution.

* * * * *

7. Exhibit A of Subpart B is amended by revising paragraph IV B to read as follows:

Exhibit A—Approved Lender Programs—Farm Ownership and Operating Loans

* * * * *

IV. * * *

B. FmHA will monitor each ALP lender's guaranteed loan/line of credit files to assure that the lender is complying with requirements of § 1980.113 of this subpart. The FmHA County Supervisor will make a complete review of the first loan or line of credit developed by an ALP lender. FmHA will examine the lender file on each guaranteed OL at least quarterly and each guaranteed FO at least annually. The FmHA official who conducts these reviews will document the review in the FmHA County Office file. Any discrepancies noted and not resolved will be reported to the State Director. State Directors may establish additional reviews and reporting systems as necessary to insure the guarantee program complies with Subparts A and B of Part 1980 of this chapter.

Each Approved Lender who currently has an Approved Lender Agreement executed prior to January 6, 1988, will be required to execute a new Approved Lender Agreement (Attachment 1 or 2 to this Exhibit) so that the Lender recognizes that, if liquidation of the account becomes imminent, the Lender will consider the Borrower for an Interest Rate Buydown under this Exhibit and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the loan until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown.

Each Loan Note Guarantee issued will contain the statement "This Loan Note Guarantee is issued under the Lender's Agreement for Guaranteed Operating Loans (OL) and Guaranteed Farm Ownership Loans (FO) dated __________." The date will be the same date entered in Paragraph XVIII of the Approved Lender's Agreement, Attachment 1.

Each Contract of Guarantee issued will contain the statement "This Contract of Guarantee is issued under Lender's Agreement for Operating Line of Credit Guarantee dated __________." The date will be the same date entered in Paragraph XVIII of the Approved Lender's Agreement, Attachment 2.

The Lender's Agreement will be duplicated and a copy will be placed in the FmHA County Office file maintaned for each Loan Note Guarantee and Contract of Guarantee issued.

Exhibit A of Subpart B—[Amended]

8. Exhibit A of Subpart B, Attachment 1 is amended by revising paragraph VIII B to read as follows:

Attachment 1—Farmers Home Administration Approved Lender Program (ALP)

* * * * *

VIII. * * *

B. The Lender will negotiate in good faith in an attempt to resolve any problem to permit the Borrower to cure a default, where reasonable. The Lender agrees that, if liquidation of the account becomes imminent, the Lender will consider the borrower for an Interest Rate Buydown under Exhibit D of Subpart B of 7 CFR, Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the loan until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.

* * * * *

9. Exhibit A of Subpart B, Attachment 2 is amended by revising paragraph VIII B to read as follows:

Attachment 2—Farmers Home Administration Approved Lender Program (ALP)

* * * * *

VIII. * * *

B. The Lender will negotiate in good faith in an attempt to resolve any problem and to permit the borrower to cure a default, where reasonable. The Lender agrees that, if liquidation of the account becomes imminent, the Lender will consider the borrower for an Interest Rate Buydown under Exhibit D of Subpart B of 7 CFR Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the loan until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.

BILLING CODE 3410-07-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 564

[No. 88–147]

Settlement of Insurance

Date: March 7, 1988.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Bank Board" or "Board") as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC") is amending its regulations pertaining to the settlement of insurance by deleting the requirement that each co-owner of a joint account must personally execute a signature card for that account if that account is to be insured separately. The amendments also consolidate provisions of the regulations governing joint accounts, clarify the provisions affecting joint accounts established by intermediaries, and revise the Appendix and examples illustrating joint account insurance coverage.

EFFECTIVE DATE: March 14, 1988.

FOR FURTHER INFORMATION CONTACT: Deborah Dakin, Assistant Director for Insurance, Regulations and Legislation Division, Office of General Counsel, (202) 377–6445; or Michelle Kosse, Acting Chief, Legal Review Section, Insurance Division, Federal Savings and Loan Insurance Corporation, (202) 254–2292; Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: Section 564.9 of the Board's Settlement of Insurance Regulations ("Insurance Regulations") sets forth the requirements for separate insurance coverage of a joint account. Currently, each holder of a joint account not evidenced by a negotiable certificate of deposit must personally execute a signature card for it and must possess equal withdrawal rights, in order to obtain separate insurance coverage. On June 30, 1987, the Board proposed to delete the signature card requirement and to consolidate and clarify the treatment of joint accounts. *See* Board Resolution No. 87–738, 52 FR 26017 (July 10, 1987).

Nine comments were received in response to this proposal. Eight commenters supported the proposal to eliminate the signature card requirement. One commenter opposed the proposal. The commenters favoring the revision agreed that it should alleviate the difficulties the prior rule had caused some depositors and lighten the recordkeeping requirements of insured institutions. The commenter opposing the amendment argued that deleting the signature card requirement would encourage fraud and deceit on the part of depositors seeking separate joint account coverage of what are, in fact, individual funds.

Two commenters requested elimination of the requirement that joint account holders possess equal withdrawal rights, while two commenters favored retaining the equal withdrawal rights requirement. Commenters opposing the equal withdrawal rights requirement expressed the concern that the requirement of equal withdrawal rights would prejudice some holders of joint accounts established as tenancies in common, because tenants in common contributing unequal amounts would have unequal withdrawal rights and thus might not qualify for separate joint account insurance coverage. Those opposing the requirement, however, did not offer an alternative to minimize the heightened risk of fraudulently created "joint accounts" where only one named holder had the right to withdraw funds from the account of knowledge or the account's existence. One commenter urged the Board to clarify when state law will be relevant in insurance determinations on joint accounts. One commenter urged the Board to clarify the two-step process used in determining the insurance coverage of joint accounts.

After reviewing the comments received and taking into account the FSLIC's experiences in liquidating institutions in default, the Board has determined to adopt the proposal in substantially the form proposed, with certain modifications discussed below. The Board is also revising the Appendix to 12 CFR Part 564 and the illustrative examples contained therein to reflect today's amendment and to clarify the regulation's application in common fact situations. The Board believes that these revisions will assist both accountholders and institutions in determining the insurance coverage afforded joint accounts.

Under the regulation as adopted, all named holders of a joint account no longer must personally execute a signature card for that account if the account is to qualify for separate insurance coverage. As discussed in the proposal, the Board believes that the requirement's utility as a deterrent to fraud is outweighed by the hardship that may be caused by the loss or destruction of a single account record, the signature card, through no fault of the accountholder. The Board wishes to make several points in this regard, however. First, institutions should still make every effort to obtain the signatures of all named holders of a joint account for their own recordkeeping purposes. *See* 12 CFR 563.17–1(c)(8) (1987). Second, signature cards will continue to be important account records evidencing knowledge of the existence of a joint account and the capacity in which it is held. Finally, if available evidence indicates that an ostensible joint account is merely an attempt to increase insurance coverage fraudulently on individual funds, the FSLIC may pay claims for insurance on the basis of actual rather than ostensible ownership. *See* 12 CFR Part 564, Appendix (1987).

Under the revised regulation, accounts held jointly on the books and records of an insured institution where all named holders have equal withdrawal rights shall be treated as joint accounts for purposes of insurance coverage. The Board has determined to retain the equal withdrawal rights requirement for joint accounts. It serves a useful purpose in deterring the fraudulent use of joint accounts to increase FSLIC insurance coverage, without the potential for inadvertent hardship resulting from reliance on a single account record that has existed with the signature card requirement. The final regulation follows the proposed regulation in providing that the withdrawal rights to an account will be deemed equal for purposes of insurance coverage unless the books and records of the insured institution indicate that the accountholders affirmatively created the account with unequal withdrawal rights between them. In this regard, it should be noted that boilerplate language on a signature card indicating that only those signing the card may withdraw funds, standing alone, is not enough to overcome this regulatory presumption.

The existing withdrawal rights requirement has consistently been interpreted by the Board as the right of each holder of a joint account to withdraw funds from the account on the same basis as any other holder of the account. This characteristic distinguishes a joint account from other capacities in which accounts are held. As discussed in the proposal, the Board believes that the addition of the word "equal," codifying this longstanding Board interpretation, makes the regulation easier for accountholders and insured institutions to understand and apply. If none of the accountholders may withdraw funds from the account, each would still be considered to have equal withdrawal rights for purposes of determining insurance coverage. Thus, jointly owned negotiable certificates of deposit would be considered as joint accounts for insurance purposes even though no owner had withdrawal rights before maturity of the certificate.

Several commenters expressed the concern that this requirement might result in some tenancies in common failing to qualify for joint account insurance coverage. Tenants in common may hold a joint account to which they have contributed unequal amounts, and each may only have the right to withdraw the funds he or she contributed. The Board is amending the provisions of the Appendix discussing joint accounts to clarify the Board's interpretation of "equal" withdrawal rights in this context. The Board deems a joint account shown on the institution's records as a tenancy in common to meet the equal withdrawal rights requirement if the tenants in common possess withdrawal rights commensurate with their ownership interests. The institution's records must reflect both the account's status as a tenancy in common and the different levels of contributions of funds.

In the FSLIC's experience, an insured institution's records are often silent as to the treatment of funds in a joint account upon the death of a named accountholder. In such cases the FSLIC has found that most joint accountholders intend for the funds in the joint account to pass to the surviving accountholder or accountholders on the death of any named joint accountholder. Therefore, the Board is amending the regulation to incorporate this experience into a presumption that, unless otherwise stated in the records of the institution, a joint account will be treated as a joint tenancy with a right of survivorship for insurance purposes, as illustrated in example 9, which has been added to the Appendix following 12 CFR Part 564.

In response to a comment requesting an explanation of the relevance of state law in determining joint account coverage, the Board is also taking this opportunity to reiterate its longstanding position that insurance coverage depends on how the books and records of an insured institution show accounts as held. The National Housing Act mandates security for depositors investing funds in federally insured savings and loan institutions through uniform nationwide deposit insurance coverage. Evidencing this congressional intent, the statute provides for uniform joint account insurance coverage, regardless of state community property laws. *See* 12 U.S.C. 1724 (b) (1982). The FSLIC's experience has demonstrated the importance of uniform nationwide standards for joint accounts, as depositors hold joint accounts in institutions of different states with little, if any, knowledge of particular state laws that might be read to affect their insurance coverage. The Appendix to 12 CFR Part 564 is therefore hereby amended by deleting reference in the examples to joint ownership that is "valid under state law." The purpose in deleting such sections is to clarify that depositors may rely on the provisions set forth in the Insurance Regulations in determining the amount of their joint account insurance coverage and that state law not affect the amount of federal deposit insurance coverage available for joint accounts. The FSLIC will continue to look to the institution's books and records, including signature cards, savings instruments, and computer records, to determine whether an account is held jointly and is insured accordingly. Thus, the FSLIC will not consider state law as determinative of which accounts qualify for joint account insurance coverage upon the default of an insured institution. State law will continue to govern the relationship between the thrift institution and its accountholders on issues such as passage of funds upon the death of a named acccountholder. This regulation is not intended to affect such relationships.

Finally, the Board is taking this opportunity to set forth the circumstances under which accounts held through intermediaries may qualify for separate joint account coverage. Questions have arisen about the interaction of the joint account regulation and other regulations such as the agency account regulation (12 CFR 564.3(b)) and the trust account regulation (12 CFR 564.10). Additional questions have arisen as to the aggregation and the recordkeeping requirements applicable to such accounts as well as the treatment of funds commingled for investment purposes by an accountholding intermediary.

In response to these questions, the Board is clarifying in the Appendix on joint account coverage that accounts held jointly by individuals but established at an insured institution through an agent, nominee, guardian, custodian, conservator, or loan servicer are insured as joint accounts under the same conditions as if the accounts had been established directly by those holding the funds jointly if all applicable recordkeeping requirements are met. This requires, first, that the records of the insured institution disclose the relationship pursuant to which the funds are on deposit (*e.g.*, as agent or nominee for others). The accountholding intermediary is then required to provide records showing that the funds were in fact held jointly. Such accounts are aggregated for insurance purposes with other joint accounts held by or for the same individuals, in the same manner as accounts held directly at an insured institution. Examples 10 and 11 are being added to the Appendix to illustrate these requirements for insurance coverage for joint accounts established by intermediaries.

Finally, the Board is amending the Appendix on joint account coverage to include a statement regarding its longstanding position that separate joint account insurance coverage is not available to accounts held in trust for two or more beneficaries. Trust accounts complying with the requirements of the Insurance Regulations are already afforded insurance coverage separate from the individual accounts of their settlors, trustees, and beneficiaries. Similarly, joint account coverage separate from individual account coverage is also already available. Nothing in the statute or regulations contemplates compounding these two distinct types of separate insurance coverage to proliferate insurance coverage further.

Pursuant to 12 CFR 508.14, the Board finds that a 30-day delay of the effective date of the amendments is unnecessary as they relieve restrictions on accountholders and insured institutions. Therefore, in order to facilitate implementation of today's amendments and to decrease confusion on the part of accountholders, the Board has decided that this rule will be effective immediately upon publication in the **Federal Register.** In this regard, it is the Board's intention that today's amendments may be applied to all requests for reconsideration of initial insurance determinations that have been timely filed with the Director of the FSLIC pursuant to 12 CFR 564.1(d).

Final Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 604, the Board is providing the following regulatory flexibility analysis:

1. *Need for and objectives of the rule.* These elements have been incorporated elsewhere in the **SUPPLEMENTARY INFORMATION** regarding this rule.

2. *Issues raised by comments and agency assessment and response.* The comments have been summarized and addressed in the **SUPPLEMENTARY INFORMATION** section of this rule.

3. *Significant alternatives minimizing small-entity impact and agency response.* The rule will not have a negative impact on small institutions.

List of Subjects in 12 CFR Part 564

Bank deposit insurance, Reporting and recordkeeping requirements, Savings and loan associations.

Accordingly, the Board hereby amends Part 564, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 564—SETTLEMENT OF INSURANCE

1. The authority citation for Part 564 continues to read as follows:

Authority: Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–405, 407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1728, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 564.2 [Amended]

2. Amend § 564.2 by removing paragraph (b)(3) and by reserving the paragraph designation for future use.

3. Revise § 564.9 to read as follows:

§ 564.9 Joint accounts.

(a) *Separate insurance coverage.* Funds held in an account in the names of two or more persons, each possessing equal withdrawal rights, shall be insured as a joint account, unless the account records of the insured institution disclose that the named

OL.
53
ISS
49
MR
14
988
MI

persons are holding funds in a different capacity (for example, as agents, nominees, custodians, or trustees). Such joint account insurance coverage shall be separate from the insurance of funds invested in individual accounts of the named persons.

(b) *Determination of withdrawal rights.* The withdrawal rights of each named holder of a joint account shall be deemed equal unless the records of the insured institution state otherwise.

(c) *Failure to qualify.* An account that does not qualify as a joint account because of a lack of equal withdrawal rights shall be deemed to be held by each of the named persons as an individual account, and the interests of each person in the account shall be added ot any other individual accounts of such person and insured up to $100,000 in the aggregate.

(d) *Determination of interests.* The interests of each named holder of a qualifying joint account shall be deemed equal unless the insured institution's records state otherwise in the case of a tenancy in common. For purposes of insurance coverage, a joint account will be deemed to be held as a joint tenancy with rights of survivorship unless the records of the insured institution state otherwise.

(e) *Determination of coverage on joint accounts.* (1) All qualifying joint accounts held by the same combination of persons shall be added together and insured up to $100,000 in the aggregate.

(2) The interests of each person in all qualifying joint accounts held by different combinations of persons shall then be added together and insured up to $100,000 in the aggregate.

(f) *Accounts held by intermediaries.* An account held by an agent, nominee, guardian, custodian, conservator, or loan servicer, disclosed as such in accordance with § 564.2(b), where records maintained in good faith and in the ordinary course of business demonstrate that two or more persons hold the funds in the account jointly, shall be insured as a joint account of those persons in accordance with paragraph (e) of this section.

4. Revise Section F of the Appendix to Part 504 to read as follows:

Appendix—Examples of Insurance Coverage Afforded Accounts in Institutions Insured by the Federal Savings and Loan Insurance Corporation

* * * * * *

F. Joint Accounts

Funds held in an account in the names of two or more persons, each possessing equal withdrawal rights, are insured up to $100,000. This insurance is separate from that afforded individual accounts held by any of the joint accountholders. Any person, including a minor, may be a holder of a joint account for purposes of insurance coverage, provided that he or she may withdraw funds from the account on the same basis as the other holders.

An account held in the names of two or more persons is insured as a joint account unless, pursuant to § 564.2(b), the account records of the insured institution disclose that the named persons are acting pursuant to a different relationship, such as agents for a principal, custodians for a ward, or trustees for a beneficiary.

An account held jointly that does not qualify as a joint account for insurance purposes because the holders do not possess equal withdrawal rights is insured as if held by the named persons as individuals. In that case, the actual ownership interest in the account of each person is added to any other accounts individually held by such person and insured up to $100,000 in the aggregate. Absent affirmative evidence in the institution's records showing the accountholders' actions establishing unequal withdrawal rights, the equal withdrawal rights requirement will be deemed satisfied for purposes of insurance coverage.

For insurance purposes, the holders of any joint account are deemed to have equal interests in the account, unless the institution's records show the form of joint ownership as a tenancy in common. With a tenancy in common, equal interests are presumed unless otherwise specifically stated on the records of the institution. A tenancy in common will meet the equal withdrawal rights requirement and qualify for joint account insurance coverage, if the tenants in common possess withdrawal rights commensurate with their ownership interests. For purposes of insurance coverage, a joint account is presumed to be held as a joint tenancy with a right of survivorship unless otherwise stated on the records of the institution.

All funds invested in joint accounts held by the same combination of individuals, regardless of the form of joint account (*e.g.*, joint tenancy with right of survivorship, community property, or tenancy in common), are first added together and insured up to the $100,000 maximum. The accompanying examples refer to this as "step one" of § 564.9(e). Where an individual has an interest in more than one joint account and different joint accountholders are involved, his interests in all such joint accounts are then added together and insured up to $100,000 in the aggregate. The accompanying examples refer to this as "step two" of § 564.9(e).

State law is not determinative of the amount of joint account insurance coverage. Rather, to determine which accounts are held jointly for purposes of insurance coverage, the FSLIC looks to the books and records of an insured institution.

Accounts held jointly by individuals but established at an insured institution through an agent, nominee, guardian, custodian, conservator, or loan servicer are insured as joint accounts under the same conditions as if the accounts had been established directly by those holding the funds jointly if the recordkeeping requirements set forth in § 564.2(b) are met. An account held in trust for two or more beneficiaries, however, is not eligible for joint account insurance coverage, since such trust accounts are considered to be held for beneficiaries as individuals, not jointly, for purposes of determining insurance coverage.

Example 1

Question: A and B maintain a joint account and, in addition, each holds an individual account. Is each account separately insured?

Answer: If both A and B possess equal withdrawal rights with respect to the joint account, each of these accounts is separately insured up to the $100,000 limit. (§ 564.9(a) and (b)).

Example 2

Question: H and W, husband and wife, reside in a community property state. Each holds an individual account and, in addition, they hold a qualifying joint account. The funds in all three accounts consist of community property. Is each account separately insured?

Answer: Yes. An account in the individual name of a spouse will be insured up to $100,000 whether the funds consist of community property or separate property of the spouse. Qualifying joint accounts containing community property are also insured up to $100,000. For purposes of insurance coverage such accounts are considered to be held in separately insurable capacities, regardless of the underlying state law. (§§ 564.3(a) and 564.9(a)).

Example 3

Question: Three accounts of $100,000 each are held by a husband and his wife under the following names:

1. John Doe and Mary Doe, husband and wife, as joint tenants with right of survivorship.
2. Mary and John Doe (community property).
3. Mrs. John Doe or John Q. Doe.

The first two accounts carry John's social security number for taxpayer identification purposes. The third account carries Mary's social security number.

Are the accounts separately insured?

Answer: No. All three accounts are considered to be joint accounts held by the same combination of individuals, regardless of the form of joint ownership. Reversal of names or use of different styles does not change the result, as long as the accountholders are in fact the same in both cases. Additionally, the use of different taxpayer identification numbers on the accounts does not affect the insurance coverage. For insurance purposes, the three account balances would be aggregated and insured up to $100,000. (§ 564.9(e)).

Example 4

Question: The following accounts are held by A, B, and C, each of whom has equal withdrawal rights in the accounts in which he has an interest.

1. A—$100,000
2. B—$100,000

3. C—$100,000
4. A and B, as joint tenants w/r/o survivorship-$90,000
5. A and C—$90,000
6. B and C, joint tenants—$90,000
7. A, B, and C—$90,000

What is the insurance coverage?

Answer: Accounts numbered 1, 2, and 3 are each separately insured up to $100,000 as individual accounts held by A, B, and C, respectively. (§ 564.3(a)). The joint accounts are analyzed pursuant to a two-step process. With regard to accounts numbered 4, 5, 6, and 7, each is held by a different combination of individuals. Under step one of § 564.9(e), each is separately insured. The analysis does not stop here, however. Under step two of § 564.9(e), the respective interests of A, B, and C in each of the accounts are added together for purposes of determining insurance coverage. (§ 564.9(e)). The interests of the holders of each joint account are deemed equal for insurance purposes. (§ 564.9(d)). Thus, A has an interest of $45,000 in account No. 4, $45,000 in account No. 5, and $30,000 in account No. 7, for a total joint account interest of $120,000, of which $100,000 is insured and $20,000 is uninsured. The interests of B and C are similarly calculated and insured. (§ 564.9(e)).

Example 5

Question: H, W, and C hold accounts as follows:

1. H—$100,000
2. W—$100,000
3. H and C, joint tenants—$90,000
4. W and C, joint tenants—$90,000

H and W are husband and wife. C, their minor child, cannot make a withdrawal from account No. 3 without A's written consent. In account No. 4, the signature of both B and C are required for withdrawal. A has provided all of the funds for account No. 3. What is the insurance coverage?

Answer: If any of the holders of a joint account does not have equal withdrawal rights, the account is not insured as a joint account. Instead, the account is insured as if it consisted of commingled individual accounts of each of the accountholders in accordance with his or her actual contribution of the funds. (§ 564.9(c)). Account No. 3 is not insured as a joint account because C does not possess the right to withdraw the funds in accordance with his purported interest in the account. (§ 564.9(a)). However, account No. 4 does qualify as a joint account for insurance purposes since each accountholder possesses the right to withdraw funds on the same basis. Since H contributed all of the funds in account No. 3, the funds in this account would be treated for insurance purposes as individual funds of H. (§ 564.9(c)). Thus, the $90,000 in this account is added to the $100,000 in account No. 1, H's individual account, and insured up to $100,000 in the aggregate, leaving $90,000 uninsured. Account No. 4, the remaining joint account, is insured to $100,000 as a qualifying joint account, separate from the individual accounts of the accountholders.

Example 6

Question: A, B, and C hold the following three joint accounts:

1. A and B—$100,000
2. A and B—100,000
3. A, B, and C—75,000

What is the insurance coverage?

Answer: Since accounts numbered one and two are owned by the same combination of individuals, step one of § 564.9(e) requires that those two accounts be added together and insured up to $100,000 in the aggregate, leaving $100,000 uninsured. Proration of the insurance coverage, as required by § 564.1(c), results in $50,000 of insurance coverage for the funds invested in each of accounts 1 and 2. Under step one of § 564.9(e), the $75,000 balance of account number 3 is fully insured because it is held by a different combination of individuals and its balance is less than $100,000.

All three accounts are next analyzed under step two of § 564.9(e), which provides that the interests of a single person with interests in multiple joint accounts can only be insured up to $100,000 in the aggregate. For insurance purposes, A has a one-half interest in the insured balances ($50,000 each) of accounts numbered 1 and 2, as well as a one-third interest in the insured balance ($75,000) of account number 3. Thus, A has a $25,000 interest in each of the three accounts. A's $75,000 total interest in multiple joint accounts is within the step two insurance limitation, resulting in no further uninsured funds. B's and C's interests are similarly analyzed.

Example 7

Question: The following accounts are held by A, B, and C.

Each holder possesses equal withdrawal rights.

1. A—$100,000
2. B—$100,000
3. A, B, and C, as joint tenants—$100,000
4. A, B, and C, as tenants in common—$200,000
5. A and B, as joint tenants w/r/o survivorship—$100,000

What is the insurance coverage?

Answer. Accounts numbered 1 and 2 are each separately insured for $100,000 as individual accounts held by A and B, respectively (§ 564.3(a)). With respect to the joint accounts, accounts numbered 3 and 4 are held by the same combination of individuals and are added together and insured up to $100,000 in the aggregate pursuant to step one of § 564.9(e). The different types of joint ownership are irrelevant for purpose of insurance coverage. Because these two accounts totaled $300,000, $200,000 would be uninsured. A, B, and C each has a one-third interest in the insured balance ($100,000) of accounts 3 and 4 because the institution's records do not show different ownership interests for the tenancy in common.

A and B also maintain another joint account, account number 5. Under the step two insurance limitation of § 564.9(e), A's $50,000 interest in account number 5 is added to his $33,334 insured interest in accounts 3 and 4. A's $83,334 total of interests in multiple joint accounts is within step two insurance limitation, resulting in no further uninsured funds. B's interests in accounts 3, 4 and 5 are identical to A's and are insured in a like manner.

Example 8

Question: A, B, and C hold a joint account as tenants in common to which A and B have each contributed $25,000 and C has contributed $50,000. They have executed a signature card that indicates that A and B each may withdraw a quarter of the account and C may withdraw half of the funds. In addition, A, B, and C each hold individual accounts. Is each account separately insured?

Answer: Since each of the accountholders has withdrawal rights commensurate with his interest in the joint account held as a tenancy in common and this is indicated in the institution's records, the joint funds are separately insured up to $100,000. The joint account is separately insured from funds in the individual accounts of A, B, and C. (§§ 564.9(a) and 564.3(a)).

Example 9

Question: A, B, and C deposit $60,000 in an account as joint tenants with right of survivorship. In addition, A and C deposit $50,000 in an account as tenants in common. B dies. What is the insurance coverage of these accounts?

Answer: Before B's death, the two accounts are considered joint accounts held by a different combination of individuals and entitled to separate insurance coverage. Upon B's death, however, the two accounts are held and owned by the same combination of individuals, A and C. Although the books and records of the institution indicate that the first account is held by A, B, and C, the FSLIC may, in its discretion, look to actual ownership as of B's death rather than ostensible ownership in determining insurance coverage. Therefore, the two accounts are aggregated for insurance purposes and insured up to $100,000. The different types of joint ownership are irrelevant for insurance purposes. Since there is $110,000 in the aggregated accounts, $100,000 is insured and $10,000 is uninsured. (§ 564.9(e)).

Example 10

Question: B and C each maintain individual accounts with an insured institution in the amount of $100,000. In addition, they each contribute $50,000 of their individual funds to an account titled, "A, as agent for others." The institution's records indicate that these funds are not jointly held, but rather are commingled individual funds of B and C, as well as others. What is the insurance coverage of these accounts?

Answer: Funds held by an individual and deposited in the name of an agent are added to any individual accounts of the principal and insured up to $100,000 in the aggregate. (§ 564.3(b)). Because the funds deposited by A were commingled individual funds of B and C and were not held jointly, separate joint account insurance coverage is not afforded this account. The funds of B and C held through A are aggregated with their individual accounts at the institution, resulting in each having uninsured funds of $50,000. (§ 564.9(f)).

Example 11

Question: B and C each have on deposit $100,000 in an insured institution in individual accounts. In addition, A deposits $100,000 as agent for B and C in the same institution. The account records of the institution indicate that these funds are deposited by A acting as agent for B and C. Also, A's business records, maintained in good faith and in the ordinary course of business, indicate that B and C jointly hold the funds deposited by A. What is the insurance coverage of these accounts?

Answer: The funds deposited by B and C in their individual accounts are each insured up to $100,000. (§ 564.3(a)). The funds deposited by A as agent for B and C are insured separately as a joint account from the funds held individually by B and C. The account records of the institution indicate that A deposited the funds as an agent, and A's business records indicate that the funds are jointly held by B and C. Therefore, the FSLIC deems the funds to be jointly held by B and C for insurance purposes and insures such funds as a joint account separately from the individual accounts of B and C up to $100,000. (§ 564.9(f)).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87-AGL-25]

Alteration of VOR Federal Airways; Bloomington, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the name of the Bloomington, IN, very high frequency omni-directional radio range and tactical air navigational aid (VORTAC) to Hoosier, IN. This change is to eliminate the confusion that currently exist between Bloomington, IN, VORTAC and Bloomington, IL, VORTAC. This action improves flight planning and increases safety.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations changes the descriptions of V-221 and V-305 located in the vicinity of Bloomington, IN, by changing the name Bloomington to Hoosier. This name change does not require changes to controlled airspace. Because this action only involves a name change, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor technical amendment in which the public would not be particularly interested. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V-221 [Amended]

Wherever the word "Bloomington" appears substitute the word "Hoosier."

V-305 [Amended]

Wherever the world "Bloomington" appears substitute the word "Hoosier."

Issued in Washington, DC, on February 29, 1988.

Daniel J. Peterson,

Manager, Airspace—Rules and Aeronautical Information Division.

[FR Doc. 88-5456 Filed 3-11-88; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 87-ACE-10]

Alteration of VOR Federal Airway V-138; Omaha, NE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the description of Federal Airway V-138, located in the vicinity of Omaha, NE, by extending V-138 from Lincoln, NE, to Omaha. This action eliminates a break in the airway structure between Lincoln and Omaha. This extension simplifies flight planning, reduces controller workload and saves fuel.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

History

On November 4, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the description of VOR Federal Airway V-138, located in the vicinity of Omaha, NE, by extending it from Lincoln, NE, VORTAC to Omaha VORTAC (52 FR 42309). This extension has been made possible through negotiations with Offutt Air Force Base RAPCON and Minneapolis, MN, ARTCC. This action simplifies flight planning by eliminating a break in the airway structure between Lincoln and Omaha and reduces controller workload and saves fuel by eliminating a circuitous routing between these points. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations changes the description of Federal Airway V-138, located in the vicinity of Omaha, NE, by extending V-138 from Lincoln, NE, to Omaha. This action eliminates a break in the airway structure between Lincoln and Omaha. This extension simplifies flight planning, reduces controller workload and saves fuel.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V-138 [Amended]

By removing the words "Lincoln. From" and substituting the word "Lincoln:"

Issued in Washington, DC, on February 29, 1988.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Parts 71 and 73

[Airspace Docket No. 85-ASO-20]

Alteration of Restricted Areas R-2903; Stevens Lake, FL and R-2904 Starke, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action alters Restricted Areas R-2903B Stevens Lake, FL, and R-2904 Starke, FL. R-2903B is segmented into four separate areas, the time of designation is reduced from continuous use, and the vertical limits of the area are increased. The proposed expansion of the lateral limits of R-2903A and R-2903B is withdrawn. In addition, R-2904 is segmented into two separate areas, and the vertical limits are also increased.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Branch (ATO-240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9253.

SUPPLEMENTARY INFORMATION:

History

On April 28, 1986, the FAA proposed to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to alter the lateral and vertical limits of Restricted Area R-2903B Stevens Lake, FL, and the vertical limits of R-2904 Starke, FL (51 FR 15780). The original comment period closed on June 10, 1986. On June 27; 1986, the FAA reopened the comment period to provide an additional 30 days for interested parties to comment on the proposal (51 FR 23430). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. Twenty-five objections to the proposal were received.

Most commenters objected to the proposed southwestward expansion of Restricted Areas R-2903A and R-2903B toward the Keystone Airpark, Keystone Heights, FL. The commenters stated that the proposed expansion would severely impact the operation of Keystone Airpark by limiting access to the airport from business and general aviation users and hampering the future growth of the facility. The commenters stated that the adverse effects on the Keystone Airpark would result in substantial economic impact on the community due to the loss of revenue and employment generated by the airport. After a thorough analysis of these comments, the FAA has determined that the proposed lateral expansion of R-2903A and R-2903B would, in effect, close Runway 04/22 and Runway 10/28 operations at Keystone Airpark. In addition, the proposed lateral expansion would prevent use of the airport as an established landmark along a VFR flyway during those periods of restricted area activation. In consideration of these impacts, the Department of the Army has withdrawn that portion of the proposal. Therefore, the southwest boundary of R-2903A and R-2903B will remain aligned with the existing R-2903B boundary. The FAA concludes that this amendment enables the continued operation of Keystone Airpark and mitigates the expressed economic concerns.

One commenter questioned the need for the vertical expansion of R-2904B to Flight Level (FL) 320 in light of the request to expand R-2903B to the same altitude. The commenter stated that activation of R-2904B in conjunction with R-2903A or R-2903B would require large deviations by pilots to avoid the areas. The Department of the Army stated that the proposed vertical expansions are necessary in order to support Army training requirements for units to maintain proficiency in high angle artillery fire operations. Actual utilization of R-2903B and R-2904B would be limited to a maximum of 24 days per year and only during specific times as advertised by a Notice to Airmen at least 24 hours in advance. Sections 71.151 and 73.29 of Parts 71 and 73 of the Federal Aviation Regulations were republished in Handbook 7400.6C dated January 2, 1987.

The Rule

These amendments to Parts 71 and 73 of the Federal Aviation Regulations alter Restricted Area R-2903B Stevens Lake, FL, by reducing the published time of designation for the area, segmenting the area into four separate restricted areas and raising the upper limit of R-2903B from FL 230 to FL 320. In addition, Restricted Area R-2904 Starke, FL, is segmented into two separate restricted areas and the upper limit of the area is raised from 1,800 feet above mean sea

BEST COPY AVAILABLE

OL 53 ISS 49 MR 14 988 MI

level to 32,000 feet MSL. The Continental Control Area is amended to incorporate R-2903A and R-2904B. These actions enhance efficient airspace utilization by designating more accurate times of use and by segmenting the areas to enable the release of restricted airspace when not required for hazardous military training activities.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 73

[Airspace Docket No. 88-AAL-1]

Alteration of Restricted Areas R-2203A/B/C; Eagle River, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the times of use for Restricted Areas R-2203A/B/C located near Eagle River, AK, indicating more accurately when the areas are being utilized. This action will reduce the time the restricted areas are in effect.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Andrew B. Oltmanns, Airspace Branch (ATO-240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-9250.

The Rule

This amendment to Part 73 of the Federal Aviation Regulations changes the times of use for Restricted Areas R-2203A/B/C located near Eagle River, AK. Because this would amend the time of designation to reflect actual times of use and would reduce the time the restricted areas are in effect, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor technical amendment in which the public would not be particularly interested. Section 73.22 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is amended, as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 73.22 [Amended]

2. Section 73.22 is amended as follows:

R-2203A Eagle River, AK

Remove the present Time of designation and substitute the following: Time of designation. 0500–2400 Monday–Friday; other times by NOTAM at least 24 hours in advance.

R-2203B Eagle River, AK

Remove the present Time of designation and substitute the following: Time of designation. 0500–2400 Monday–Friday; other times by NOTAM at least 24 hours in advance.

R-2203C Eagle River, AK

Remove the present Time of designation and substitute the following: Time of designation. 0500–2400 Monday–Friday; other times by NOTAM at least 24 hours in advance.

Issued in Washington, DC, on February 29, 1988.

Daniel J. Peterson,

Manager, Airspace—Rules and Aeronautical Information Division.

14 CFR Part 73

[Airspace Docket No. 88-AEA-1]

Change of Controlling Agency to Restricted Area R-5201; Fort Drum, NY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action changes the controlling agency for Restricted Area R-5201 Fort Drum, NY, from Watertown Flight Service Station (FSS) to Boston Air Route Traffic Control Center (ARTCC). This action is required due to the closure of Watertown FSS.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9253.

SUPPLEMENTARY INFORMATION:

The Rule

This amendment to Part 73 of the Federal Aviation Regulations assigns Boston ARTCC as the controlling agency for Restricted Area R-5201. Because this action only involves changing the controlling agency, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor technical amendment in which the public would not be particularly interested. Section 73.52 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is amended, as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 73.52 [Amended]

2. Section 73.52 is amended as follows:

R-5201 Fort Drum, NY [Amended]

By removing the present Controlling agency and substituting the following:

Controlling agency. FAA, Boston ARTCC.

Issued in Washington, DC, on March 2, 1988.

Shelomo Wugalter,

Manager, Airspace-Rules and Aeronautical Information Division.

[Docket No. RM87–16–000]

Abandonment of Sales and Purchases of Natural Gas Under Expired, Terminated, or Modified Contracts; Correction

Issued March 7, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; correction notice.

SUMMARY: On February 5, 1988, the Commission issued a final rule regarding abandonment of sales and purchases of natural gas under expired, terminated, or modified contracts. (53 FR 4121, Feb. 12, 1988.) This notice makes technical corrections to §§ 157.30 and 157.301 to accurately cross reference paragraphs (c) and (d).

Order Granting in Part and Denying in Part Applications for Rehearing and Making Technical Correction

Issued March 9, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order granting in part and denying in part rehearing and making technical correction.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is granting in part and denying in part rehearing of its final rule (Order No. 486, 52 FR 47897 (Dec. 17, 1987)) that adopted and supplemented the regulations of the Council on Environmental Quality (CEQ) implementing the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370a (1982). The Commission is also correcting a technical error in the final rule.

EFFECTIVE DATE: March 14, 1988.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lane, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–8530.

SUPPLEMENTARY INFORMATION:

Regulations Implementing the National Environmental Policy Act of 1969; Order No. 486–A

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is granting in part and denying in part rehearing of its final rule [1] that adopted and supplemented the regulations of the Council on Environmental Quality (CEQ) implementing the National Environmental Policy Act of 1969 (NEPA).[2] The Commission is also correcting a technical error in the final rule.

II. Background and Discussion

The Commission has received three timely requests [3] for rehearing of its final rule issued in this proceeding. The final rule stated that the Commission would comply with the CEQ's regulations implementing NEPA and supplemented the CEQ's regulations to address the particular actions of the Commission that require environmental review. The rule established three categories of Commission actions for environmental review purposes: (1) Actions that do not require an environmental assessment (EA) or an environmental impact statement (EIS) since they have no significant impact on the human environment (categorical exclusions); (2) actions that require an EA to determine their environmental effects; and (3) actions that have a significant environmental impact and therefore require an EIS. In addition, the rule established procedures for preparing environmental documents.

1. Environmental Review of Nonjurisdictional Facilities

All three petitioners for rehearing raise issues regarding the Commission's examination of the environmental effects of nonjurisdictional facilities in its evaluation of proposed jurisdictional projects. Both INGAA and the AGA request that the Commission grant rehearing to define and limit the Commission's environmental review of nonjurisdictional facilities. In contrast, the IPAA argues that the final rule should have specifically stated in the regulations that both jurisdictional and nonjurisdictional facilities would be considered in evaluating the environmental impact of major pipeline construction projects.

The Commission believes that the final rule adequately addressed the question of the Commission's environmental responsibilities as they relate to nonjurisdictional facilities. The final rule codified Commission precedent, case law and CEQ provisions to the extent they require the Commission to consider the environmental impact of nonjurisdictional facilities when these are an integral part of an entire project that includes jurisdictional facilities subject to Commission approval.[4] As the final rule pointed out, however, the Commission does not intend to use the environmental review process to exercise jurisdiction over nonjurisdictional facilities. Moreover, the general regulations promulgated in the final rule cannot address the specific circumstances under which the environmental impact of nonjurisdictional facilities may be taken into account. The extent to which the Commission will examine the environmental effects of nonjurisdictional facilities will vary with each proposed project. Therefore, the Commission believes that these issues are more appropriately addressed on a case-by-case basis.

---

[1] Order No. 486, 52 FR 47897 (Dec. 17, 1987), III FERC Stats. & Regs. ¶ 30783 (1988).

[2] 42 U.S.C. 4321–4370a (1982). The CEQ regulations implementing NEPA are codified at 40 CFR Parts 1500–1508 (1987).

[3] American Gas Association (AGA), Independent Petroleum Association of America (IPAA), and Interstate Natural Gas Association of America (INGAA).

[4] *See* Henry v. FPC, 513 F.2d 395 (D.C. Cir. 1975). 40 CFR 1508.7 (1987).

2. Reliance on Other Environmental Reviews

AGA states that the Commission should not duplicate the efforts of state agencies in its own environmental reviews. The Commission agrees that duplication of efforts should be avoided. In fact, the CEQ regulations adopted by the Commission direct Federal agencies to "cooperate with State and local agencies to the fullest extent possible to reduce duplication between NEPA and State and local requirements." [5]

The CEQ regulations also encourage Federal agencies to incorporate the environmental reviews of other Federal agencies in their environmental analyses.[6] This eliminates repetitive discussion of issues already examined and allows the agency to focus on the issues ripe for decision. However, while the Commission will consider the comments and studies of state agencies and will incorporate the environmental analyses of other Federal agencies where possible, the Commission remains ultimately responsible for the environmental review mandated by NEPA for actions under its jurisdiction.[7]

3. Natural Gas Import/Export Sites.

Under delegation authority from the Department of Energy,[8] the Commission has the authority to approve the point of entry of imported gas and the point of exit of exported gas. The IPAA points out that the Commission in the final rule did not address the issue of the type of environmental review that should be done for the approval of natural gas import sites. IPAA suggests that these approvals should require an EA.

The Commission notes that if imported or exported gas is to be transported through existing sites and no new construction is required, then the approval of the import/export site will have no significant environmental impact. Therefore, the Commission is categorically excluding this type of action from requiring an EA or an EIS. However, the Commission agrees that if the site requires the construction of additional facilities, an EA is necessary. Therefore, the Commission is amending the regulations to include approval of these actions in the category of actions requiring an EA. Additionally, the Commission notes that because liquified natural gas import/export facilities are major industrial facilities, the siting of these facilities will probably have a significant environmental effect. It is therefore including the review for approval of these sites in the category of actions requiring an EIS.

4. Technical Correction

The Commission is also making a technical correction to the final rule. Although, in the final rule electric rate filings submitted by the Federal power marketing agencies were properly categorically excluded, the Commission incorrectly referenced the legal authority under which these rate filings are submitted. These filings are not submitted under the Federal Power Act as indicated in the final rule, but rather are submitted under the Pacific Northwest Electric Power Planning and Conservation Act,[9] the Department of Energy Organization Act,[10] and DOE Delegation Order No. 0204–108.[11] The final rule has been revised to correct this error.

III. Paperwork Reduction Act Statement and Effective Date

This order will not be submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act,[12] and OMB's regulations [13] since the order does not change the information collection requirements in Order No. 486 and does not impose any additional information collection requirements that require OMB's approval. Therefore, the changes to the Commission's regulations contained in this order are effective March 14, 1988.

List of Subjects in 18 CFR Part 380

Environment, National Environmental Policy Act, Natural gas, Pipelines, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Part 380 of Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PART 380—REGULATIONS IMPLEMENTING THE NATIONAL ENVIRONMENTAL POLICY ACT

1. The authority citation for Part 380 is revised to read as follows:

Authority: National Environmental Policy Act of 1969, 42 U.S.C. 4321–4370a (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142.

2. In § 380.4, paragraph (a)(15) is revised and a new paragraph (a)(31) is added to read as follows:

§ 380.4 Projects or actions categorically excluded.

(a) * * *

(15) Electric rate filings submitted by public utilities under sections 205 and 206 of the Federal Power Act, the establishment of just and reasonable rates, and confirmation, approval, and disapproval of rate filings submitted by Federal power marketing agencies under the Pacific Northwest Electric Power Planning and Conservation Act, the Department of Energy Organization Act, and DOE Delegation Order No. 0204–108.

* * * * *

(31) Approval of natural gas import/export sites under DOE Delegation Order Nos. 0204–26 and 0204–112, if the site does not involve the construction of any facilities.

* * * * *

3. In § 380.5, paragraph (b)(1) is revised to read as follows:

§ 380.5 Actions that require an environmental assessment.

* * * * *

(b) * * *

(1) Except as identified in §§ 380.4, 380.6 and 2.55 of this chapter, authorization for the site of new gas import/export facilities under DOE Delegation Order Nos. 0204–26 and 0204–112 and authorization under section 7 of the Natural Gas Act for the construction, replacement, or abandonment of compression, processing, or interconnecting facilities, onshore and offshore pipelines, metering facilities, LNG peak-shaving facilities, or other facilities necessary for the sale, exchange, storage, or transportation of natural gas;

* * * * *

4. In § 380.6, paragraph (a)(1) is revised to read as follows:

§ 380.6 Actions that require an environmental impact statement.

(a) * * *

(1) Authorization under section 3 or 7 of the Natural Gas Act and DOE Delegation Order Nos. 0204–26 and 0204–112 for the siting, construction, and operation of jurisdictional liquefied natural gas import/export facilities used wholly or in part to liquefy, store, or

BILLING CODE 6717-01-M

PEACE CORPS

22 CFR Part 303

Inspection and Copying of Records; Rules for Compliance with the Freedom of Information Act

AGENCY: Peace Corps.

ACTION: Final rule.

SUMMARY: This rule implements certain provisions of the Freedom of Information Reform Act of 1986 which requires Federal Agencies to establish a uniform schedule of FOIA fees.

EFFECTIVE DATE: April 13, 1988.

ADDRESS: Paperwork and Records Management Branch, Peace Corps, 806 Connecticut Avenue NW., Room P–314, Washington, DC 20526.

FOR FURTHER INFORMATION CONTACT: John von Reyn, Chief, Paperwork and Records Management Branch, Office of Administrative Services, (202) 254–6020.

SUPPLEMENTARY INFORMATION: A proposed rule was published on November 16, 1987. Peace Corps received comments from an association of journalists.

Executive Order 12291

The Peace Corps has determined that this rule is not a major rule because it is not likely to result in an annual effect on the economy of $100 million or more.

Paperwork Reduction Act

This rule imposes no obligatory information requirements on the public.

Regulatory Flexibility Act of 1980

The Director certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Section by Section Analysis of Comments

Section 303.10(b)(8).

The commentator urged Peace Corps not to use the definition of "representative of the news media," as contained in the Office of Management and Budget's Uniform Freedom of Information Act Fee Schedule and Guidelines." Peace Corps has left the definition as it is set forth in the OMB guidance. The Agency believes it is required by the Freedom of Information Reform Act of 1986 to conform its regulations to OMB's guidelines. Further, the Agency does not foresee difficulty, as is suggested by the comment, in applying the definition in an equitable manner.

Section 303.10(f)(2)(i).

The commentator urged Peace Corps to adopt an appeal procedure with regard to denial of fee waivers. The Agency has incorporated a new appeal procedure as § 303.10(f)(2)(iii).

Section 303.10(f)(2)(ii).

The commentator urged Peace Corps not to use the fee waiver guidance developed by the Department of Justice to determine whether granting a fee waiver would be in the public interest. Peace Corps has incorporated the Department of Justice's guidance. The Agency has an obligation to inform the public as to the criteria that will be used to determine the public interest. It believes that the criteria developed by the Justice Department provides a fair method of determination which can easily be applied by requesters and the Agency.

Section 303.10(g)(4).

The commentator urged the Peace Corps not to require advance payment of fees because this would delay release of information. The Peace Corps has retained the advance payment requirement if estimated fees exceed $250.00. This requirement will not affect many requesters. However, where requests may involve substantial amounts of search time or extensive copying, the advance payment provision is not, in the Peace Corps' opinion, unreasonable.

List of Subjects in 22 CFR Part 303

Administrative practice and procedure, Freedom of information, Records.

For reasons set out in the preamble, 22 CFR Part 303 is amended to read as follows:

PART 303—INSPECTION AND COPYING OF RECORDS; RULES FOR COMPLIANCE WITH THE FREEDOM OF INFORMATION ACT

1. The authority citation for Part 303 is revised to read as follows:

Authority: 5 U.S.C. 552; Pub. L. 87–293 as amended (22 U.S.C. 2501 et seq.); Pub. L. 97–113, sec. 601; Pub. L. 99–570; E.O. 12137, May 16, 1979.

2. Section 303.10 is revised to read as follows:

§ 303.10 Schedule of fees.

(a) *General.* It is the policy of the Peace Corps to encourage the widest possible distribution of information concerning programs under its jurisdiction. To the extent practicable, this policy will be applied under this part so as to permit requests for inspection or copies of records to be met without substantial cost to the person making the request. Search and reproduction charges will be made in accordance with paragraph (c) of this section. On a case-by-case basis, the Peace Corps will conduct a thorough review of all fee waiver requests and will grant waivers of reductions in fees only in those cases in which the requester establishes that the disclosure of the information will primarily benefit the general public. The Agency shall charge fees that recoup the full direct costs incurred. The most efficient and least costly methods to comply with requests for documents made under the FOIA shall be used. When documents that would be responsive to a request are maintained for distribution by agencies operating statutory-based fee schedule programs, the Agency shall inform requesters of the steps necessary to obtain records from those sources.

(b) *Definitions.* The Agency adopts the following definitions contained in OMB's "Uniform Freedom of Information Act Fee Schedule and Guidelines," that relate to this section:

(1) The term "direct costs" means those expenditures which an agency actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to an FOIA request.

(2) The term "search" includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents.

(3) The term "duplication" refers to the process of making a copy of a document necessary to respond to an FOIA request. Such copies can take the form of paper copy, microform, audio-visual materials, or machine readable documentation (e.g., magnetic tape or disk), among others.

(4) The term "review" refers to the process of examining documents located in response to a request that is for a commercial use to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure, e.g., doing all that is necessary to excise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(5) The term " 'commercial use' request" refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade or profit interests of the requester or the person on whose behalf the request is made.

(6) The term "educational institution" refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research.

(7) The term "non-commercial scientific institution" refers to an institution that is not operated on a "commercial" basis as that term is referenced in paragraph (b)(5) of this section and which is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(8) The term "representative of the news media" refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who made their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive. Moreover, as traditional methods of news delivery evolve (e.g., electronic dissemination of newspapers through telecommunications services), such alternative media would be included in this category. In the case of freelance journalists, they will be regarded as working for a news organization if they can demonstrate a solid basis for expecting publication through that organization, even though not actually employed by it. A publication contract would be the clearest proof, but the Agency will also look to the past publication record of a requester in making a determination.

(c) *Fees to be charged*—(1) *Manual searches for records.* Whenever feasible, the Agency will charge at the salary rate(s) (i.e. basic pay plus 16 percent) of the employee(s) making the search. However, where a homogeneous class of personnel is used exclusively (e.g., all administrative/clerical, or all professional/executive), the Agency may establish an average rate for the range of grades typically involved.

(2) *Computer searches for records.* The Agency will charge at the actual direct cost of providing the service. This will include the cost of operating the central processing unit (CPU) for that portion of operating time that is directly attributable to searching for records responsive to an FOIA request and operator/programmer salary apportionable to the search. When the Agency can establish a reasonable Agency-wide average rate for CPU operating costs and operator/programmer salaries involved in FOIA searches, it may do so and charge accordingly.

(3) *Review of records.* Only requesters who are seeking documents for commercial use will be charged for time spent reviewing records to determine whether they are exempt from mandatory disclosure. Charges shall be assessed only for the initial review; i.e., the review undertaken the first time the Agency analyzes the applicability of a specific exemption to a particular record or portion of a record. The Agency will not charge for review at the administrative appeal level of an exemption already applied. However, if records or portions of records withheld in full under an exemption which is subsequently determined not to apply are reviewed again to determine the applicability of other exemptions not previously considered, the cost for such a subsequent review is properly assessable. Where a single class of reviewers is typically involved in the review process, the Agency may establish a reasonable Agency-wide average and charge accordingly.

(4) *Duplication of records.* The charge for paper copy reproduction of documents as of the date of publication is three cents per page. This charge represents the average Agency-wide direct cost of making such copies, taking into account the salary of the operators as well as the cost of the reproduction machinery. The rate shall be adjusted annually. Current rates may be requested from the Director, Office of Administrative Services. For copies prepared by computer, such as tapes or printouts, the Agency will charge the actual cost, including operator time, of production of the tape or printout. For other methods of reproduction or duplication, the Agency will charge the actual direct costs of producing the document or documents.

(5) *Other charges.* (i) The Agency shall recover the full cost of certifying that records are true copies. The Agency will charge the salary rate(s) (i.e. basic pay plus 16 percent) of the employee(s) certifying the records. (ii) The Agency shall recover the full cost of sending records by special methods such as express mail, etc. The Agency shall not furnish the records until payment for such service has been received by the Agency. The Agency is not required to comply with requests for special mailing services.

(6) *Restrictions on assessing fees.* (i) With the exception of requesters seeking documents for a commercial use, the Agency will provide the first 100 pages of duplication and the first two hours of search time without charge. The Agency will not charge fees to any requester, including commercial use requesters, if the cost of collecting the fee would be equal to or greater than the fee itself. Except for commercial use requesters, the Agency will not begin to assess fees until after the free search and reproduction services have been provided.

(ii) The elements to be considered in determining the "cost of collecting a fee," are the administrative costs to the Agency of receiving and recording a requester's remittance, and processing the fee for deposit in the Treasury Department's special account. The per-transaction cost to the Treasury to handle such remittance will not be considered in the Agency's determination.

(iii) For purposes of these restrictions on assessment of fees, the word "pages" refers to paper copies of a standard agency size which will normally be "8½ x 11" or "11 by 14."

(iv) The term "search time" in this context means manual search. To apply this term to searches made by computer, the Agency will determine the hourly cost of operating the central processing unit and the operator's hourly salary plus 16 percent. When the cost of the search (including the operator time and the cost of operating the computer to process a request) equals the equivalent dollar amount of two hours of the salary of the person performing the search, i.e., the operator, the Agency will begin assessing charges for computer search.

(d) *Payment of Cost.* (1) A request for documents must state that the requester will pay any or all reasonably necessary costs, or costs up to an amount specified in such request. If the head of the unit or the Director of Administrative Services determines that the anticipated cost for search and duplication of the records requested will be in excess of $25, or in excess of the limit specified in the request, the Director of Administrative Services shall advise the requester promptly after receipt of the initial request. Such notification shall specify

VOL 53
ISS 49
MR 14
1988
UMI

the anticipated cost of search and reproduction of the records requested. The requester may thereafter amend his or her request to specify fewer documents or agree to accept the estimate of anticipated costs, in which case the request shall be deemed received by the Agency upon the receipt date of the requester's response. A requester may, prior to making a request, ask for an estimate of cost from the Director of Administrative Services who shall promptly respond to such request.

(2) *Method of Payment.* Payment shall be sent or delivered to the Collections Officer, Accounting Division. Such payment must be by check or money order payable to Peace Corps—FOIA. A receipt for fees shall be provided upon request.

(e) *Fees to be Charged—Categories of requesters.* There are four categories of FOIA requesters: Commercial use requesters; educational and non-commercial scientific institutions; representatives of the news media; and all other requesters. The Act prescribes specific levels of fees for each of these categories:

(1) *Commercial use requesters.* The Agency will assess charges which recover the full direct costs of searching for, reviewing for release, and duplicating the records sought for commercial use. Commercial use requesters are not entitled to two hours of free search time nor 100 free pages of reproduction of documents.

(2) *Educational and non-commercial scientific institution requesters.* The Agency will provide documents to requesters in this category for the cost of reproduction alone, excluding charges for the first 100 pages. To be eligible for inclusion in this category, requesters must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research.

(3) *Requesters who are representatives of the news media.* The Agency will provide documents to requesters in this category for the cost of reproduction alone excluding charges for the first 100 pages. To be eligible for inclusion in this category, a requester must meet the definition described in paragraph (b)(8) of this section, and his or her request must not be made for a commercial use. In reference to this class of requester, a request for records supporting the news dissemination function of the requester shall not be considered to be a request that is for a commercial use.

(4) *All other requesters.* Requesters who do not fit into any of the categories above will be charged fees which recover the full direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search time will be furnished without charge. Requests from individuals for records about themselves filed in the Agency's systems of records will continue to be treated under the fee provisions published in the Agency's Privacy Act regulations (22 CFR Part 308).

(f) *Waiving or Reducing Fees*—(1) *General.* The Agency will furnish documents without charge or at reduced charges if disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester. A requester may, in his or her original request, or subsequently, ask for a fee waiver or that documents be furnished at a reduced charge. A request for documents shall not be deemed to have been received until a determination of the question of fee waiver or reduction has been made, provided however, that such determination shall be made within five working days from the receipt of a fee waiver request. A request for waiver or reduction of fees shall specify the amount of reduction requested and the reasons which cause the requester to feel that the criteria for waiver or reduction of fees have been met.

(2) *Procedures.* (i) Upon receipt of a fee waiver or fee reduction request the Director of Administrative Services will promptly determine whether such request should be granted in whole or in part. The request shall be reviewed in accordance with the following Statutory Freedom of Information Act fee waiver criteria:

(A) Whether disclosure of the information "is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Government"; and

(B) That disclosure of the information "is not primarily in the commercial interest of the requester."

(ii) There are six general factors which are considered in determining whether the statutory criteria for fee waiver have been met:

(A) The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government";

(B) The informative value of the information to be disclosed: Whether the disclosure is "likely to contribute" to an understanding of government operations or activities;

(C) The contribution to an understanding of the subject by the general public likely to result from disclosure: Whether disclosure of the requested information will contribute to "public understanding"; and

(D) The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities;

(E) The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure; and, if so

(F) The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."

(iii) The decision to refuse to waive or reduce fees as requested under paragraph (f)(1) of this section may be appealed to the Director of the Peace Corps or such official as he or she may designate. Appeals should contain as much information and documentation as possible to support the request for a waiver or reduction of fees. The requester will be notified within ten working days from the date of which the Agency received the appeal.

(g) *Administrative Actions to Improve Assessment and Collection of Fees.* The Agency shall ensure that procedures for assessing and collecting fees are applied consistently and uniformly.

(1) *Charging interest.* The Agency will begin assessing interest charges on an unpaid bill starting on the 31st day following the day on which the billing was sent. The fact that the fee has been received by the Agency, even if not processed, will suffice to stay the accrual of interest. Interest will be at the rate prescribed in section 3717 of Title 31, United States Code, will accrue from the date of the billing.

(2) *Charges for unsuccessful search.* The Agency will assess charges for time spent searching, even if the Agency fails to locate the records or if records located are determined to be exempt from disclosure.

(3) *Aggregating requests.* A requester may not file multiple requests at the same time, each seeking portions of a document or documents, solely in order to avoid payment of fees. When the Agency reasonably believes that a requester or, on rare occasions, a group of requesters acting in concert, is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, the Agency may aggregate any such requests and charge accordingly. The Agencies will not aggregate multiple requests on unrelated subjects from one requester:

(4) *Advance payments.* (i) Advance payment, i.e., payment before work is commenced or continued on a request are not required unless:

(A) The Agency estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250. Then, the Agency shall notify the requester of the likely cost and obtain satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or require an advance payment of an amount up to the full estimated charges in the case of requesters with no history of payment; or

(B) Where a requester has previously failed to pay a fee charged in a timely fashion (i.e. within 30 days of the date of the billing), the Agency may require the requester to pay the full amount owed plus any applicable interest as provided above, or to demonstrate that he has, in fact, paid the fee, and to make an advance payment of the full amount of the estimated fee before the Agency begins to process a new request or a pending request from that requester.

(ii) When the Agency acts under paragraph (g)(4)(i) of this section, the administrative time limits prescribed in subsection (a)(6) of the FOIA (i.e., 10 working days from receipt of initial requests and 20 working days from receipt of appeals from initial denial, plus permissible extensions of these time limits) will begin only after the Agency has received fee payments described above.

(5) Effect of the Debt Collection Act of 1982 (Pub. L. 97–365). The Agency will follow those debt collection procedures published in 22 CFR Part 309 where appropriate, to encourage repayment.

Dated: February 29, 1988.

Loret Miller Ruppe,

Director.

[FR Doc. 88–5443 Filed 3–11–88; 8:45 am]

BILLING CODE 6051-01-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 202, 203, 206, 207, 210, and 241

Oil and Gas Product Valuation Regulations

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Announcement of training sessions.

SUMMARY: The Minerals Management Service (MMS) published a Notice in the **Federal Register** on February 11, 1988 (53 FR 4011), providing notification that it will conduct seven training seminars at different geographic locations on the new oil and gas product valuation regulations that were published in the **Federal Register** on January 15, 1988 (53 FR 1184 and 53 FR 1230, respectively). The seminars will also include a discussion of Pub. L. 100–234, "Notice to Lessees Numbered 5 Gas Royalty Act of 1987," which was signed by the President of the United States on January 6, 1988. The MMS hereby gives notice that it will conduct two additional seminars at the locations and on the dates identified below.

DATES: See Supplementary Information.

ADDRESSES: See Supplementary Information.

FOR FURTHER INFORMATION CONTACT: John L. Price, Chief, Oil and Gas Valuation Branch, Royalty Valuation and Standards Division (303) 231–3392, FTS 326–3392, or Dennis C. Whitcomb, Chief, Rules and Procedures Branch (303) 231–3432, FTS 326–3432.

SUPPLEMENTARY INFORMATION: The new oil and gas valuation regulations that were published in the **Federal Register** on January 15, 1988, amended and clarified existing regulations governing the valuation of oil and gas for royalty computation purposes. The regulations govern the methods by which value is determined when computing oil or gas royalties and net profit shares under Federal (onshore and Outer Continental Shelf) and Indian (Tribal and allotted) oil and gas leases (except leases on the Osage Indian Reservation, Osage County, Oklahoma). Public Law 100–234, "Notice to Lessees Numbered 5 Gas Royalty Act of 1987" (the Act) applies to the valuation of natural gas produced from onshore Federal and Indian oil and gas leases during the period January 1, 1982, through July 31, 1986, which was, prior to the Act, required to be valued under Section I.A.2, II.A.2, and VI of "Notice to Lessees and Operators of Federal and Indian Onshore Oil and Gas Leases Number 5" (NTL–5).

The training seminars will include discussions on the following topics:

- Impact of Public Law 100–234 on gas valuation.
- Impact of the new regulations on oil and gas valuation.
- Impact of the new regulations on oil and gas transportation and processing allowances.
- Information collection requirements and reporting forms (MMS–4109, "Gas Processing Allowance Summary Report"; MMS–4110, "Oil Transportation Allowance Report"; and MMS–4295, "Gas Transportation Allowance Report") required to support oil and gas transportation and processing allowance deductions from royalties due. On the second day of each seminar, the forms will be reviewed in a "how to complete," step-by-step process.

Location and Dates

See the prior **Federal Register** Notice published on February 11, 1988 (53 FR 4011), for the location and the dates of the seven initially scheduled training seminars. The two additional seminars will be held from 9:00 a.m. to 4:30 p.m. each day on the dates and at the locations shown below:

Dates	Locations
April 5–6, 1988	Marathon Oil Company, 5555 San Felipe, Houston, Texas 77253.
April 7–8, 1988	Union Texas Petroleum Corp., Auditorium, Room 1638, 1330 Post Oak Boulevard, Houston, Texas 77252.

Reservations

The training seminars are open to the public. Persons interested in attending one of these seminars should make a reservation by telephone on or before March 28, 1988, to Ms. Julie White (303) 231–3155, FTS 326–3155.

Telephone reservations should be confirmed in writing to Ms. Julie White, Minerals Management Service, Royalty Valuation and Standards Division, P.O. Box 25165, MS 653, Denver, Colorado 80225.

Persons requesting reservations should specify the seminar location that they are interested in attending and the number of attendees. Due to space limitations, the number of attendees may be limited at each seminar location. (Likewise, if insufficient interest is shown in attending any of the individual training sessions, such sessions may be canceled and alternate arrangements will be made for those who expressed

BILLING CODE 4310-MR-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 60 and 61

[FRL–3340–1]

Standards of Performance for New Stationary Sources; National Emissions Standards for Hazardous Air Pollutants; North Carolina; Delegation of Additional Authority

AGENCY: Environmental Protection Agency (EPA).

ACTION: Delegation of authority.

SUMMARY: On December 15, 1987, the North Carolina Division of Environmental Management requested delegation of authority for the implementation and enforcement of certain standards in 40 CFR Part 60 (Standards of Performance for New Stationary Sources) and 40 CFR Part 61 (National Emission Standards for Hazardous Pollutants) that had been promulgated or revised as of June 15, 1987. On January 27, 1988, these standards were delegated to North Carolina.

DATE: The effective date of the delegations is January 27, 1988.

ADDRESSES: Copies of the requests for delegation of authority and EPA's letters of delegation of authority may be examined during normal business hours at the Agency's regional office, 345 Courtland Street NE., Atlanta, Georgia 30365. All reports required pursuant to the newly delegated standards (listed below) should be submitted to Mr. N. Ogden Gerald, Chief, Air Quality Section, Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, P.O. Box 27687, Raleigh, North Carolina 27611-7687.

FOR FURTHER INFORMATION CONTACT: Gregg M. Worley of the EPA Region IV Air Programs Branch, at the above address and telephone number (404) 347–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: Sections 111(c)(1) and 112(d)(1) of the Clean Air Act authorize EPA to delegate to the states the authority to implement and enforce the standards set out in 40 CFR Part 60, Standards of Performance for New Stationary Sources (NSPS) and 40 CFR Part 61, National Emission Standards for Hazardous Air Pollutants (NESHAP).

On December 15, 1987, the North Carolina Division of Environmental Management (NCDEM) requested delegation of authority of NSPS for Subpart Kb (Standards of Performance for Storage Vessels (Including Petroleum Liquid Storage Vessels) for Petroleum Liquids for which Construction, Reconstruction, or Modification Commenced after July 23, 1984). NCDEM also requested redelegation of authority of NSPS for Subpart Ka (Standards of Performance for Storage Vessels for Petroleum Liquids for which Construction, Reconstruction, or Modification Commenced after May 18, 1978, and prior to July 23, 1984), Subpart HH (Lime Manufacturing Plants), and NESHAP Subpart E (Mercury).

After thorough review of the request, the Regional Administrator determined that such a delegation was appropriate for these source categories with all the conditions set forth in the delegation letter of November 24, 1976.

I certify, pursuant to 5 U.S.C. 605(b), that these delegations will not have a significant impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the requirement of section 3 of Executive Order 12291.

Authority: Sections 111 and 112 of the Clean Air Act, as amended (42 U.S.C. 7411 and 7412)

Date: March 3, 1988.

Joe R. Franzmathes,

Acting Regional Administrator.

[FR Doc. 88–5468 Filed 3–11–88; 8:45 am]

BILLING CODE 6560-50-M

---

40 CFR Part 81

[Region II Docket No. 68; FRL–3340–3]

Designation of Areas for Air Quality Planning Purposes; Revisions to Section 107 Attainment Status Designation for the State of New Jersey; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: EPA is correcting an error in the Clean Air Act Section 107(d) attainment status designations for sulfur dioxide (SO_2) in New Jersey which appeared in the preamble of a **Federal Register** rulemaking notice on December 31, 1987 (52 FR 49408). This correction will insert a phase into the text of the document which describes the extent of the SO_2 nonattainment area in Warren County, New Jersey.

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Programs Branch, Environmental Protection Agency, Room 1005, 26 Federal Plaza, New York, New York 10278, (212) 264–2517.

SUPPLEMENTARY INFORMATION:

On December 31, 1987, EPA announced final action on a request from the State of New Jersey to revise its air quality designations with respect to sulfur dioxide (SO_2) of a part of Warren County (52 FR 49408). Such designations are required by section 107(d) of the Clean Air Act and may be revised from time to time at the request of a State. This notice is being submitted to correct a typographical error in the preamble of the December 31, 1987 rulemaking notice.

A phase in the preamble of the December 31, 1987 notice which describes the extent of the SO^2 nonattainment area in Warren County was inadvertently omitted. The extent of the area in question is the same as originally proposed on October 29, 1986 (51 FR 39550).

The following correction is made in FRL–3307–9, "Designation of Areas for Air Quality Planning Purposes; Revision to Section 107 Attainment Status Designations for the State of New Jersey", published in the **Federal Register** on December 31, 1987 (52 FR 49408). The second full paragraph under the Section III, the "Conclusion" section on page 49410 is revised to read as follows:

The areas being redesignated from "better than national standards" to "does not meet national standards" for sulfur dioxide are the Town of Belvidere, the entire Townships of Harmony, White, and Oxford, and that portion of Liberty Township south of the Universal Transverse Mercator Grid System (UTM) coordinate N4522 and west of UTM coordinate E505, and that portion of Mansfield Township west of UTM coordinate E505. Warren County is located in the northwestern part of New Jersey in the Northeast Pennsylvania-Upper Delaware Valley Interstate Air Quality Control Region.

Authority: 42 U.S.C. 7401–7642.

Dated: March 3, 1988.

William J. Muszynski

Acting Regional Administrator, Environmental Protection Agency.

[FR Doc. 88–5469 Filed 3–11–88; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 228

[FRL–3340–6]

Ocean Dumping; Designation of Sites

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA today designates three existing dredged material disposal sites ("the Calcasieu River and Pass sites") located in the Gulf of Mexico off the mouth of the Calcasieu River and adjacent to the Calcasieu Bar Channel for the continued disposal of dredged material removed from the Calcasieu River and Pass Project. This action is necessary to provide acceptable ocean dumping sites for the current and future disposal of this material. This Final site designation is for an indefinite period of time but is subject to continued monitoring in order to insure that unacceptable adverse impacts do not occur.

DATE: This designation shall become effective April 13, 1988.

ADDRESSES: The file supporting this designation is available for public inspection at the following locations:

EPA, Region VI (E–FF), 1445 Ross Avenue, 10th Floor, Dallas, Texas 75202.
Corps of Engineers, New Orleans District, Foot of Prytania Street, Room 298, New Orleans, Louisiana 70160.

FOR FURTHER INFORMATION CONTACT: Norm Thomas 214/655–2260.

SUPPLEMENTARY INFORMATION:

A. Background

Section 102(c) of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, 33 U.S.C. 1401 *et seq.* ("the Act"), gives the Administrator of EPA the authority to designate sites where ocean dumping may be permitted. On December 23, 1986, the Administrator delegated the authority to designate ocean dumping sites to the Regional Administrator of the Region in which the site is located. This site designation is being made pursuant to that authority.

The EPA Ocean Dumping Regulations (40 CFR Ch. I, Subchapter H, § 228.4) state that ocean dumping sites will be designated by publication in Part 228. A list of "Approved Interim and Final Ocean Dumping Sites" was published on January 11, 1977 (42 FR 2461 *et seq.*). That list established seven sites for the disposal of dredged material from the Calcasieu Bar and Entrance Channel. Because some of the seven sites either shared a common boundary or overlapped another site, they were subsequently combined to form three sites of similar total area. In January 1980, the interim status of the Calcasieu sites was extended indefinitely.

B. EIS Development

Section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, ("NEPA") requires that Federal agencies prepare an Environmental Impact Statement (EIS) on proposals for major Federal actions significantly affecting the quality of the human environment. While NEPA does not apply to EPA activities of this type, EPA has voluntarily committed to prepare EISs in connection with ocean dumping site designations such as this (39 FR 16186, May 7, 1974).

EPA has prepared a Draft and Final Environmental Impact Statement entitled "Environmental Impact Statement (EIS) for the Calcasieu River and Pass Ocean Dredged Material Disposal Site Designation." On September 7, 1984, a notice of availability of the Draft EIS for public review and comment was published in the **Federal Register** (49 FR 35413). The public comment period of this Draft EIS closed on October 22, 1984. The Agency received nine comment letters on the Draft EIS and responded to them in the Final EIS. Editorial or factual corrections required by the comments were incorporated in the text and noted in the Agency's response. Comments which could not be appropriately treated as text changes were addressed point by point in the Final EIS. On December 4, 1987, a notice of availability of the Final EIS for public review and comment was published in the **Federal Register**. The public comment period on the Final EIS closed on January 4, 1988. Two letters were received on the Final EIS. One letter identified an editorial correction and the other letter provided "no comments". The EIS is available for review at the addresses given above.

The action discussed in the EIS is designation for continuing use of ocean disposal sites for dredged material. The purpose of the designation is to provide environmentally acceptable locations for ocean disposal. The appropriateness of ocean disposal is determined on a case-by-case basis. Prior to each use the Corps will comply with 40 CFR Part 227 by providing EPA a letter containing all the necessary information.

The EIS discussed the need for the action and examined ocean disposal sites and alternatives to the proposed action. Land based disposal alternatives were examined in a previously published EIS and the analysis was updated in EPA's Final EIS based on information from the Corps of Engineers. Inland disposal sites are currently used for the inland reaches of the Calcasieu River and Pass project. In 1983, approximately 590,000 cubic yards of dredged material were pumped into inland shallow water disposal areas creating 80 acres of marsh. In 1985, 650,000 cubic yards were pumped into two additional inland shallow water areas to create 125 acres of marsh. These inland sites, however, cannot accommodate the dredged material from the bar and entrance channels. Use of these inland sites for material which has traditionally been dumped at sea would quickly decrease the lifetime of the sites. Additionally, the only available inland sites are miles upstream from the bar channel making the use of these sites economically impractical.

Three ocean disposal alternatives—a shallow water area (including the proposed sites), a mid-shelf area and a deepwater area—were evaluated. Use of the mid-shelf and deepwater sites would involve increased transportation costs without any corresponding environmental benefits. In addition, the removal of sediments from the nearshore environment would make them unavailable for movement and deposition by longshore currents. Lastly, mounding of dredged material in the deeper waters could occur due to slow erosion and transport. Because of these reasons, the mid-shelf area and the deepwater area were eliminated from further consideration.

The EIS evaluates the suitability of ocean disposal areas for final designation and is based on a disposal site environmental study. The study and final designation process are being conducted in accordance with the Act, the Ocean Dumping Regulations, and other applicable Federal environmental legislation.

In accordance with the requirements of the Endangered Species Act, EPA has completed its biological assessment and determined that no adverse effects to endangered/threatened species will result from site designation. The National Marine Fisheries Service has concurred with this determination.

Although a consistency determination from the State of Louisiana, Department of Natural Resources has not been received, EPA will continue coordination with this agency regarding their coastal zone program.

This final rulemaking notice serves the same purpose as the Record of Decision required under regulations promulgated by the Council on Environmental Quality for agencies subject to NEPA.

C. Site Designation

On December 28, 1987, EPA proposed designation of these sites for the continuing disposal of dredged materials from the Calcasieu River and Pass Project. The public comment period on this proposed action closed on February 11, 1988. No comments were received on the proposed rule.

Site 1 is located on the east side of the Calcasieu River Entrance Channel while sites 2 and 3 are located on the west side of the channel. Site 1 and the upper portion of site 2 are only used during jetty maintenance. The remainder of site 2 and site 3 receive dredged material from the channel.

Site 1 is located approximately 0.5 nautical miles (nmi) from shore and extends out approximately 3 nmi. Water depths within the site range from 2 to 8 meters. The boundry coordinates are as follows: 29d 45′ 39″N, 93d 19′ 36″W; 29d 42′ 42″N, 93d 19′ 06″W; 29d 42′ 36″N, 93d 19′ 48″W; 29d 44′ 42″N, 93d 20′ 12″W; 29d 44′ 42″N, 93d 20′ 24″W; 29d 45′ 27″N, 93d 20′ 33″W.

Site 2 is located approximately 0.5 nmi from shore and extends out approximately 6 nmi. Water depths within the site range from 2 to 11 meters. The boundary coordinates are as follows: 29d 44′ 31″N, 93d 20′ 43″W; 29d 39′ 45″N, 93d 19′ 56″W; 29d 39′ 34″N, 93d 20′ 46″W; 29d 44′ 25″N, 93d 21′ 33″W.

Site 3 is located approximately 8 nmi from shore and extends out approximately 17.5 nmi. Water depths within the site range from 11 to 14 meters. The boundary coordinates are as follows: 29d 37′ 50″N, 93d 19′ 37″W; 29d 37′ 25″N, 93d 19′ 33″W; 29d 33′ 55″N, 93d 16′ 23″W; 29d 33′ 49″N, 93d 16′ 25″W; 29d 30′ 59″N, 93d 13′ 51″W; 29d 29′ 10″N, 93d 13′ 49″W; 29d 29′ 05″N, 93d 14′ 23″W; 29d 30′ 49″N, 93d 14′ 25″W; 29d 37′ 26″N, 93d 20′ 24″W; 29d 37′ 44″N, 93d 20′ 27″W.

D. Regulatory Requirements

Five general criteria are used in the selection and approval of ocean disposal sites for continuing use. Sites are selected so as to minimize interference with other marine activities, to keep any temporary perturbations from the dumping from causing impacts outside the disposal site, and to permit effective monitoring to detect any adverse impacts at an early stage. Where feasible, locations off the Continental Shelf are chosen. If at any time disposal operations at a site cause unacceptable adverse impacts, further use of the site may be terminated or limitations placed on the use of the site to reduce the impacts to acceptable levels. The general criteria are given in § 228.5 of the EPA Ocean Dumping Regulations; Section 228.6 lists eleven specific factors used in evaluating a proposed disposal site to assure that the general criteria are met.

EPA has determined, based on information presented in the Final EIS, that the three existing sites are acceptable under the five general criteria. The Continental Shelf location is not feasible and no environmental benefit would be obtained by selecting such a site. Historical use of the existing three sites has not resulted in substantial adverse effects to living resources of the ocean or to other uses of the marine environment.

The characteristics of the proposed sites are reviewed below in terms of the eleven factors.

1. *Geographical position, depth of water, bottom topography and distance from coast. (40 CFR 228.6(a)(1).)*

Geographical positions, average water depths, and distance from the coast for each existing site are given above. Bottom topography within each existing site is essentially flat with little relief. Each site varies in size, in distance from shore and depth.

2. *Location in relation to breeding, spawning, nursery, feeding, or passage areas of living resources in adult or juvenile phases. (40 CFR 228.6(a)(2).)*

The northwestern Gulf of Mexico is a breeding, spawning, nursery and feeding area for shrimp, menhaden and other bottomfish. Seasonal migration between the estuaries and the Gulf is most intensive in the spring and fall. The Calcasieu disposal sites represent a small area of the total range of the fisheries resource.

3. *Location in relation to beaches and other amenity areas. (40 CFR 228.6(a)(3).)*

Beaches are located between Calcasieu Pass and Holly Beach (4.5 nmi west). Activities in the vicinity of the sites include fishing and boating. There will be some interferences with recreational activities during and in the immediate vicinity of the dredged material disposal operation. This interference will be restricted to the area of the sites being utilized for disposal. Previous dredging and disposal operations have not significantly affected these activities.

4. *Types and quantities of wastes proposed to be disposed of, and proposed methods of release, including methods of packing the wastes, if any. (40 CFR 228.6(a)(4).)*

Dredged material released at approved dredged material disposal sites must conform to the EPA criteria in the Ocean Dumping regulations (40 CFR Part 227). The dredged material to be disposed of consists of varying amounts of sand, silt and clay. Surficial sediments within the existing disposal sites consist of silt and clay sands and silty clays. Higher percentages of fines are present in the nearshore areas off Calcasieu; whereas sediments in areas further offshore (depths greater than 10m) consist primarily of sand.

The annual volume of material dredged from the Calcasieu Channel averages about 14 million cubic yards. Material discharged at sites 1, 2, and 3 is accomplished by agitation dredging, bottom dumping and side casting. Agitation dredging involves filling a hopper dredge to capacity and allowing it to overflow. With bottom dumping sediments transported to the site are discharged through subsurface doors in the bottom of the hopper dredge. Side casting is accomplished by pumping dredged material through a boom-supported pipeline extending laterally from the dredge.

5. *Feasibility of surveillance and monitoring. (40 CFR 228.6(a)(5).)*

Surveillance and monitoring at the existing sites appears feasible considering transportation costs to and from the sites as well as costs associated with acquiring samples from the shallow water-depths. Based on historic data, an intense monitoring program is not warranted. However, in order to provide adequate warning of environmental harm, EPA in coordination with the Corps of Engineers will develop a monitoring plan.

6. *Dispersal, horizontal transport and vertical mixing characteristics of the area, including prevailing current direction and velocity, if any. (40 CFR 228.6(a)(6).)*

Current patterns in the vicinity of the existing sites are predominately influenced by winds, particularly in late autumn through early spring. The water column is generally well mixed in the winter with stratification occurring in late spring and summer.

Surface current speeds average 0.8 to 1.0 knots and flow primarily to the west. Bottom currents are generally less than 0.8 knots and also flow predominantly to the west.

The agitation method utilized involves the release of fine sediments into surface waters which are swept away by riverine and littoral currents. The sediments settle out slowly as they are carried off. The distance over which the sediments are transported depends upon the existing current velocity at the time of dredging and the settling rate of sediments. Although no studies have been conducted to determine the extent to which the material is transported, it is felt that most agitated material settles within site 2.

In the absence of strong currents, the bulk of the dredged material released by bottom dumping or side casting settles to the bottom almost immediately after dumping and only a small portion is lost from the main surge. This small portion dispenses as individual particles. Bottom currents slowly resuspend the disposed dredged material. This resuspension will result in the disappearance of the mound through dispersal and horizontal transport.

7. *Existence and effects of current and previous discharges and dumping in the area (including cumulative effects). (40 CFR 228.6(a)(7).)*

Over 30 years of dredged material disposal at the sites have caused no major adverse impacts. No major changes in the benthic community of the existing sites and areas outside the sites have occurred based on 1980 and 1981 field surveys. The accumulation of contaminants in the sediments of the Calcasieu sites were also investigated during the surveys. Trace metal concentrations in the Calcasieu sediments were generally comparable to values reported for sediments in an area located five miles to the west. Relatively low levels of chlorinated hydrocarbons were observed in surficial sediments during the surveys.

8. *Interference with shipping, fishing, recreation, mineral extraction, desalination, fish and shellfish culture, areas of special scientific importance and other legitimate uses of the ocean. (40 CFR 228.6(a)(8).)*

All the sites extend into the navigational safety fairway; however, any temporary interferences with shipping can be mitigated through close coordination between the dredging operators and the shipping interests.

Recreational and commercial fishing and recreational boating occurs throughout the year in the area of the existing sites. Although there will be some interference with fishing and boating activities during the disposal operations, it should be of short duration.

There is active oil and gas development in the area of the existing sites. However, past use of the disposal sites has not interfered with the oil and gas exploratory or production operations. Other types of mineral extraction do not occur within the sites.

No desalination facilities occur within the sites. The nearest aquaculture activities take place in Calcasieu Lake where oyster seed beds are located. Disposal activities pose no threat to this activity. Naturally occuring fish and shellfish within the site, particularly bottom dwelling types, will be affected by the dredged material disposal. Some of these may be trapped and destroyed. Dispersion and transport of the dredged material outside the site should not significantly affect the fish and shellfish. The material dispersed from the site will settle in very thin layers and be mixed with the naturally occurring sediments of the region.

The sites do not contain or overlap any areas of special scientific interest. Periodically, scientific studies are carried out in the offshore region and the bays of the area. Use of the sites should not interfere with these studies. It is not expected that use of the sites for disposal of dredged material will interfere with any other legitimate use of the ocean.

9. *The existing water quality and ecology of the site as determined by available data or by trend assessment or baseline surveys. (40 CFR 228.6(a)(9).)*

The water quality and ecology of the existing disposal sites are generally reflective of that of the nearshore region off the Louisiana coast affected by discharges from the Atchafalaya River. There are variations in the water quality depending on the mixture of fresh water runoff occurring at the time. Data developed during the 1980 and 1981 surveys were generally comparable to historic data for the area.

10. *Potentiality for the development of recruitment of nuisance species in the disposal site. (40 CFR 228.6(a)(10).)*

Past disposal of dredged material at the existing sites has not resulted in the development of recruitment or nuisance species. Considering the similarity of the dredged material with the existing sediments, it is not expected that continued disposal of dredged material will result in the development of such species.

11. *Existence at or in close proximity to the site of any significant natural or cultural features of historical importance. (40 CFR 228.6(a)(11).)*

Based on coordination with the Louisiana State Historic Preservation Office, there are no known features of historical importance that occur within the existing sites.

E. Action

Based on the completed EIS process and available data, EPA concludes that the three Calcasieu sites may appropriately be designated for continuing use for the ocean disposal of dredged material. The existing sites are compatible with the general criteria and specific factors used for site evaluation. The designation of the three Calcasieu sites as EPA Approved Ocean Dumping Sites is being published as final rulemaking.

While the Corps does not administratively issue itself a permit, the requirements that must be met before dredged material derived from Federal projects can be discharged into ocean waters are the same as where a permit would be required. EPA has the authority to approve or to disapprove or to propose conditions upon dredged material permits for ocean dumping.

F. Regulatory Assessments

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. EPA has determined that this action will not have a significant impact on small entities since the site designation will only have the effect of providing a disposal option for dredged material. Consequently, this rule does not necessitate preparation of a Regulatory Flexibility Analysis.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action will not result in an annual effect on the economy of $100 million or more or cause any of the other effects which would result in its being classified by the Executive Order as a "major" rule. Consequently, this rule does not necessitate preparation of a Regulatory Impact Analysis.

This Final Rule does not contain any information collection requirements subject to the Office of Management and Budget review under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 40 CFR Part 228

Water pollution control.

Dated: March 2, 1988.

Robert E. Layton Jr.,

Regional Administrator of Region VI.

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is amended as set forth below.

PART 228—[AMENDED]

1. The authority citation for Part 228 continues to read as follows:

Authority: 33 U.S.C. 1412 and 1418.

2. Section 228.12 is amended by removing from paragraph (a)(3) under "Dredged Material Sites" the entries for Calcasieu River and Pass, LA and by adding paragraphs (b)(48), (49), and (50)

for three ocean dumping sites to read as follows:

§ 228.12 Delegation of management authority for ocean dumping sites.

* * * * *

(b) * * *

(48) Calcasieu Dredged Material Site 1—Region VI.

Location: 29d 45′ 39″ N, 93d 19′ 36″ W; 29d 42′ 42″ N, 93d 19′ 06″ W; 29d 42′ 36″ N, 93d 19″ 48″ W; 29d 44′ 42″ N, 93d 20′ 12″ W; 29d 44′ 42″ N, 93d 20′ 24″ W; 29d 45′ 27″ N, 93d 20′ 33″ W.
Size: 1.76 square nautical miles
Depth: Ranges from 2–8 meters.
Primary Use: Dredged material.
Period of Use: Continuing use.
Restriction: Disposal shall be limited to dredged material from the vicinity of the Calcasieu River and Pass Project.

(49) Calcasieu Dredged Material Site 2—Region VI.

Location: 29d 44′ 31″ N, 93d 20′ 43″ W; 29d 39′ 45″ N, 93d 19′ 56″ W; 29d 39′ 34″ N, 93d 20′ 46″ W; 29d 44′ 25″ N, 93d 21′ 33″ W.
Size: 3.53 square nautical miles.
Depth: Ranges from 2–11 meters.
Primary Use: Dredged material.
Period of Use: Continuing use.
Restriction: Disposal shall be limited to dredged material from the vicinity of the Calcasieu River and Pass Project.

(50) Calcasieu Dredged Material Site 3—Region VI.

Location: 29d 37′ 50″ N, 93d 19′ 37″ W; 29d 37′ 25″ N, 93d 19′ 33″ W; 29d 33′ 55″ N, 93d 16″ 23″ W; 29d 33′ 49″ N, 93d 16″ 25″ W; 29d 30′ 59″ N, 93d 13′ 51″ W; 29d 29′ 10″ N, 93d 13′ 49″ W; 29d 29′ 05″ N, 93d 14′ 23″ W; 29d 30′ 49″ N, 93d 14′ 25″ W; 29d 37′ 26″ N, 93d 20′ 24″ W; 29d 37′ 44″ N, 93d 20′ 27″ W.
Size: 5.88 square nautical miles.
Depth: Ranges from 11–14 meters.
Primary Use: Dredged material.
Period of Use: Continuing use.
Restriction: Disposal shall be limited to dredged material from the vicinity of the Calcasieu River and Pass Project.

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 20

Employee Responsibilities and Conduct

AGENCY: United States Department of the Interior.

ACTION: Notice of availability of Appendix C.

SUMMARY: This notice announces the availability of Appendix C to 43 CFR Part 20. This Appendix list positions within the Department of the Interior for which Confidential Statements of Employment and Financial Interestes (DI–212) are required to be filed. This Appendix has been updated as of December 1, 1987 and has been printed as an agency document. This Appendix will not be published in the **Federal Register** but will be available to the public upon request.

EFFECTIVE DATE: December 1, 1987.

ADDRESS: Copies of Appendix C may be obtained from the Deputy Ethics Counselor for each bureau or office within the Department of the Interior. You may address your requests to the Deputy Ethics Counselor, (insert the name of the specific bureau or office), 18th & C Streets NW., Washington DC 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Gabriele J. Paone or Mr. Mason Tsai, Departmental Ethics and Audit Coordination Staff, U.S. Department of the Interior, Washington, DC 20240, (202) 343–5916 or 343–3932.

SUPPLEMENTARY INFORMATION: The Department of the Interior has received approval from the Office of Government Ethics, Office of Personnel Management, to publish Appendix C to 43 CFR Part 20 as an agency document. The availability of this document is hereby announced in the **Federal Register**. The initial notice of this annual process was provided with the publication of 43 CFR Part 20 as proposed rule on October 6, 1980 (45 FR 66370). This arrangement meets administrative requirements which affect only Department of the Interior employees and at the same time defrays the cost of publishing the Appendix C listing in the **Federal Register**.

Appendix C lists Department of the Interior positions, in addition to GS (or GM)–15's for which a Confidential Statement of Employment and Financial Interests (Form DI–212) is required to be filed by Executive Order 11222 (as amended). Positions identified in Appendix C are effective for the February 1, 1988 filing deadline. Appendix C has been approved by the Office of Personnel Management.

List of Subjects in 43 CFR Part 20

Conflicts of interest, Government employees.

Authorities: Appendix C to Part 20 of Title 43 of the Code of Federal Regulations is published under Executive Order 11222 (as amended). 30 FR 6469, 3 CFR, 1964–65 Comp., as amended (18 U.S.C. 201 Note); 5 CFR 735.104; and 5 U.S.C. 301.

Appendix C was compiled by Bureau and Office Ethics Counselors and consolidated by Deborah Williams of the Departmental Ethics and Audit Coordination Staff.

Date: March 7, 1988.

Joseph W. Gorrell,

Principal Deputy Assistant Secretary, Policy, Budget and Administration.

[FR Doc. 88–5365 Filed 3–11–88; 8:45 am]

BILLING CODE 4310-RK-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 308

[Docket No. R–116]

War Risk Insurance

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: The Maritime Administration (MARAD) is amending the war risk insurance regulation (46 CFR Part 308) to allow certain vessels registered in the commonwealth of the Bahamas (Bahamas) to become eligible to apply for war risk insurance. MARAD administers these regulations as a standby emergency program, which now allows only vessels registered under the laws of the United States, as well as certain vessels that are owned or controlled by U.S. citizens and registered under the laws of Panama, Honduras, and Liberia, to apply for available war risk insurance interim binders. These interim binders insure vessels against liabilities resulting from war or warlike actions when commercial war risk insurance is unavailable on reasonable terms and conditions. The final rule will make certain vessels registered in the Bahamas eligible for war risk insurance and subject to the same considerations now applicable to vessels registered under the laws of Panama, Honduras or Liberia. This final rule will also make editorial amendments, including those that reflect MARAD organizational changes.

EFFECTIVE DATE: April 13, 1988.

FOR FURTHER INFORMATION CONTACT: Edmond J. Fitzgerald, Director, Office of Trade Analysis and Insurance, Maritime Administration, Washington, DC 20590 or telephone (202) 366–2400.

SUPPLEMENTARY INFORMATION: The authority of the Secretary of Transportation (Secretary) to provide insurance and reinsurance under Title XII, Merchant Marine Act, 1936, as amended, 46 U.S.C. 1281–1293 (Act), was reinstated by Pub. L. No. 99–59, which was enacted on July 3, 1985, and which will expire on June 30, 1990. The

implementing war risk insurance regulations were reissued on December 9, 1985 (50 FR 50165) to provide the terms and conditions under which war risk insurance interim binders are issued for U.S.-flag vessels and certain foreign-flag vessels owned or controlled by U.S. citizens.

As authorized by section 1203, of the Act, as amended (46 U.S.C. 1283), the Secretary of Transportation may provide war risk insurance adequate for the needs of the waterborne commerce of the United States, if such insurance cannot be obtained on reasonable terms and conditions from companies authorized to do an insurance business in a state of the United States. The U.S. government's war risk insurance program is a standby emergency program. It becomes effective simultaneously with the automatic termination of commercial ocean marine war risk insurance policies. (Those commercial policies are automatically terminated upon the outbreak of war, whether declared or not, between any of the five great powers (United States, United Kingdom, France, People's Republic of China, or the Union of Soviet Socialist Republics) or upon the hostile detonation of a weapon of war employing atomic or nuclear fission). Thus, the program allows the continued flow of essential U.S. trade by protecting the shipowner from loss due to risks of war.

A war risk insurance interim binder is a contract under which the U.S. government agrees to provide the applicant with war risk insurance coverage in the interim period, after termination of commercial insurance coverage, for a fee and upon the conditions set forth in 46 App. U.S.C. 1282. An agent of MARAD issues the interim binders.

In 1976, Pub. L. No. 94–523 amended the prior war risk authority (46 App. U.S.C. 1283) by requiring that the Secretary shall determine whether to grant war risk insurance or reinsurance to foreign-flag vessels based upon consideration of "the characteristics, the employment, and the general management of the vessel by the owner or charterer" (46 U.S.C. 1203). That authority was reinstated in 1979 and 1985, and has been implemented by regulations published in the **Federal Register** on April 3, 1980 (45 FR 22041) and December 9, 1985 (50 FR 50165).

Included in these implementing regulations are special provisions restricting foreign-flag vessels eligibility for war risk insurance interim binders. MARAD's regulations provide for a case-by-case review of foreign-flag vessels applying for war risk insurance binders to assure the continued delivery of important U.S. cargoes when commercial war risk insurance is unavailable, and to make it possible for the U.S. government to obtain the use of certain foreign-flag vessels under a Voluntary Contract of Commitment (VCC). A VCC between the U.S. government (MARAD) and a vessel's U.S. citizen applicant makes that vessel available to the U.S. during any period in which vessels may be requisitioned under section 902 of the Act (46 App. U.S.C. 1242), i.e., whenever the President proclaims that there is a national emergency or that security or the national defense make it advisable.

Vessels now eligible to apply under MARAD regulations are those that are documented under the laws of the United States (except sport fishing vessels), as well as vessels not more than 20 years old that are registered under the laws of Panama, Honduras, and Liberia. Under this final rule, vessels registered under the laws of the Bahamas are now eligible for war risk insurance. Owners of vessels registered in these four countries must be U.S. citizens, or U.S. citizen-owned corporations, or the vessels must be under the operational control of U.S. citizens. These vessels cannot be subject to requisition for title or use by any national government, other than the U.S. government. Further, the foreign country in which the vessel is registered may not have a statutory restraint preventing the U.S. government from requisitioning a U.S. citizen-owned or controlled vessel registered in that foreign country.

Eligible foreign-flag vessels that qualify for war risk insurance interim binders are those that are: (1) Substantially engaged in the foreign commerce of the U.S. (considered to be so if they carry thirty (30) percent of net cargo tonnage on a semiannual basis in the U.S. foreign commerce); (2) product tankers up to 90,000 deadweight tons; (3) dry cargo vessels; (4) heavy lift vessels; (5) refrigerated vessels; (6) and other classes of vessels in short supply in the U.S.-flag fleet, with special capabilities.

If a vessel meets any of these criteria, the owner must affirm that it will: (1) Make the vessel available during a U.S. national emergency or to serve the U.S. economy or cooperate with U.S. military authorities under section 902 of the Act (46 App. U.S.C. 1242); (2) maintain it in its eligible category; and (3) report its location to the U.S. Coast Guard.

Vessels owned or controlled by U.S. citizens and registered under the laws of a foreign government are subject to the laws of the country of registry. Such laws may prevent U.S. citizens or U.S. operators of a foreign-flag vessel from making that vessel available to the U.S. government during periods of U.S. national emergency. MARAD's regulations require that applicants for war risk insurance on a foreign-flag vessel submit, with their application, a certified copy of the evidence of any official action or approval required by the government of the country of registry as a prerequisite to the execution of a VCC with the U.S. government (46 CFR 308.3(d)(4)).

In 1983, the Bahamian government enacted amendments to the Bahamian Merchant Shipping Act, 1976, (MSA). These amendments allow certain U.S. citizen-owned or controlled Bahamian-flag vessels to comply with the foregoing MARAD criteria, approved by the U.S. Navy, and to become eligible for war risk insurance. Section 286 of the MSA provides that the Bahamian registrar may grant written permission to the vessel's owner to transfer operating control of that vessel to another country's government during a state of emergency or time of war in the country where the owner resides or is a citizen. Thus, the Bahamian government would allow a U.S. citizen-owner or controlled vessel registered in the Bahamas to be made available to serve the U.S. national economy or U.S. national defense in times of U.S. national emergency under applicable U.S. laws.

This change in Bahamian law has removed the basis for objection by the U.S. Department of the Navy, Office of the Chief of Naval Operations (Navy), which previously objected to approving U.S. citizen-owned or operated vessels registered in the Bahamas as transport vessels to complement U.S. strategic sealift capability. Primarily, the Navy objected to certain provisions in the prior Bahamian law, e.g., the requirement that all equity owners and mortgagees consent to the requisitioning of the vessel, and the provision that the country requesting title or use of the vessel declare that a state of emergency exists before the Bahamian government would allow the vessel's operational control to be transferred to another country's government where the owner resides or is a citizen. Thus, the Bahamian government will now allow a U.S. citizen-owned or controlled vessel registered in the Bahamas to be made available to serve the U.S. national economy or U.S. national defense in times of U.S. national emergency under applicable U.S. laws.

Moreover, Bahamian law now requires that vessels registered under its MSA must comply with numerous safety standards. For example, foreign-owned vessels are eligible for registration in the Bahamas, if they are less than 12 years old at the time of first registry, and if they are oceangoing vessels of 1,600 or more net registered tons engaged in "foreign-going trade." Foreign-going trade is defined as not trading exclusively within the Bahamian Islands or between the Bahamas and the East Coast of Florida. Under the MSA, a foreign owner can hold direct title to a Bahamian-flag vessel and such vessel is considered "foreignowned" unless its ownership is entirely in the hands of citizens of the Bahamas.

The MSA provides that six international classification societies can survey Bahamian-registered vessels, including The American Bureau of Shipping. In addition, the Bahamian Maritime Division of the Ministry of Transport, located in Nassau, London, and New York makes its inspection service available to shipowners. Four of the approved classification societies are members of the International Association of Classification Societies (IACS), based in London.

The willingness of The Bahamian government to include members of the IACS to survey Bahamian-flag vessels shows a desire to impose strict safety inspection standards on vessels under its registry. Further, all Bahamian-registered vessels must be inspected before the vessel is put into service, on an annual basis, whenever an accident occurs which affects the safety of the ship, or whenever either important repairs are made or registration renewals are requested. The Bahamian MSA adjures to worldwide shipping concerns and has modeled its regulations after United Kingdom shipping legislation. The Bahamian government has also joined the International Maritime Organization (IMO) and has been a party to conventions sponsored by the IMO.

As a result of the changes in Bahamian law, the U.S. Navy now regards U.S. citizen-owned or controlled vessels registered in the Bahamas as providing available cargo capacity to be relied upon to contribute to the cargo sealift capability support complementing U.S. strategic defense requirements. Accordingly, the Navy has requested that MARAD provide war risk insurance for certain Bahamian vessels, as appropriate.

An additional reason for allowing Bahamian-flag vessels to qualify for war risk insurance is that U.S. citizens are presently registering their vessels under the Bahamian flag. MARAD statistics which were compiled for publication in the document entitled *Foreign Flag Merchant Ships Owned by U.S. Parent Companies*, published effective January 1, 1987, indicate that there are 26 U.S. citizens-owned vessels registered in the Bahamas. Seventeen of these 26 vessels will be eligible to apply for an interim binder. Approximately 58 percent of these 17 vessels were formerly registered under the Liberian or Panamanian flags.

In view of the foregoing events, on October 6, 1987, MARAD issued a notice of proposed rulemaking (52 FR 38486) that would amend the existing regulations to allow certain vessels registered in the Bahamas to become eligible to apply for war risk insurance.

Comments on the Proposed Rule

All three comments that were received (Chevron, Federation of American Controlled Shipping (FACS) and Republic of Vanuatu) supported expansion of war risk coverage to U.S.-controlled Bahamian-registered vessels. FACS generally supported MARAD's proposal as "appropriate and meritorious." However, it suggested that the proposed regulation "Does not go far enough. * * *" It argued that war risk insurance should be extended to all Effective U. S.-Controlled (EUSC) ships, *i.e.* ships registered under Panamanian, Honduran, Liberian and Bahamian flags not subject to requisitioning by the country of registry in certain emergencies, not just those in the presently eligible categories (e.g. product tankers up to 90,000 dwt.), since it believes that, as with U.S.-flag fleet vessels, all vessels of any value to the national security or defense should be covered. FACS also criticized the existing regulations' vessel classifications, i.e. that the distinctions made between vessels for eligibility lack an underlying rationale, e.g., a 150,000 dwt. gearless bulker is eligible for war risk insurance but a 150,000 dwt. product or crude tanker is not.

The FACS comment also states that the war risk regulations need to be updated as far as militarily useful vessels are concerned. It claims that the current criteria in 46 CFR 308.2(b) (1)–(6)—special regulatory eligibility restrictions for foreign flag vessels—needs to be broadened.

In this connection, it cites a 1987 COMMAD (The Commission on Merchant Marine and Defense) report and a 1987 study prepared for MARAD by Stanley Associates to support its contention that the definition of militarily useful vessels has changed over the years, has been "relaxed", and that all tankers under the 100,000 dwt. should be designated regulatorily as militarily useful.

The FACS comment would also support use of additional vessels as tankers in war: to "replace Jones Act tankers in the Alaskan trade, to maintain the flow of oil imported from abroad and to serve as floating storage to assure U.S. refineries have adequate oil supplies." The FACS comments would also include passenger vessels as eligible vessels in the regulations.

FACS recommends that the final regulation should include language defining eligible vessels that is in accord with section 1203(a) of the 1976 amendment to the Merchant Marine Act, 1936:

> The Secretary may provide the insurance and reinsurance authorized by section 1202 with respect to the following persons, property, or interest: (a) American vessels, including vessels under construction, foreign flag vessels owned by citizens of the United States or engaged in transportation in the waterborne commerce of the United States or in such other transportation by water as may be deemed by the Secretary to be in the interest of the national defense or the national economy of the United States, when so engaged * * *" In determining whether to grant such insurance or reinsurance to foreign flag vessels, the Secretary shall further consider the characteristics, the employment and the general management of the vessel by owner or charterer.

One comment, from the Republic of Vanuatu, stated that country's desire to be added to the list of countries whose registry of U.S. controlled vessels would be approved for war risk coverage. It, too, supported the proposed rule.

Responses

First, MARAD notes the Republic of Vanuatu's request to become one of the foreign countries that could register U.S. controlled vessels. However, no determination about Vanuatu's status can be made in this rulemaking as any such decision would be outside its scope.

In regard to the eligibility of vessels under the language of section 1203, the 1976 amendment language resulted from a Congressional investigation of MARAD practices in issuing war risk insurance binders on all Panamanian, Honduran, and Liberian registered vessels regardless of their value in national defense efforts. As a consequence of the Congressional investigation and hearing on this matter, a compromise was reached that would make war risk insurance binders available to a limited number of vessels registered in Panama, Honduras, and Liberia. This compromise resulted in an amendment to the statute, as mentioned before, and the subsequent issuance of implementing regulations (43 FR 54092, Nov. 20, 1978). These regulations have established the present eligibility criteria which permit the compromised allotment of about one-fourth of the previously registered and eligible vessels to be considered by the Secretary as eligible recipients of war risk insurance binders.

MARAD's present belief is that it is unnecessary to broaden these regulatory criteria to include more vessel types (e.g. passenger vessels or tankers) or provide for more circumstances under which more vessel types will qualify. This belief is based, in part, on the findings of the 1970's Congressional investigation as to which vessels are most optimally to be used for national defense and to be eligible for war risk coverage. Moreover, these determinations of eligibility are made after the shipowner's application, for insurance, primarily on the basis of advice from U.S. military authorities on their expected needs in the event of national emergency. Further, section 1203 of the statute and 46 CFR Part 308, in its entirety, allow the Secretary flexibility in issuing war risk insurance and policies and in determining which vessels are militarily useful and, therefore, should be eligible for interim war risk insurance coverage. Therefore, the suggested FACS amendments are not needed to provide legal authority to issue coverage for vessels of various types. Accordingly, MARAD is amending regulations at 46 CFR Part 308 to provide that certain vessels registered in the Bahamas be eligible to apply for war risk insurance interim binders. Such vessels, MARAD believes, could serve the national economy and defense needs of the United States.

E.O. 12291 Statutory and DOT Requirements

The Maritime Administration has determined that this final rule is not major, as defined in E.O. 12291, and is not significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). Bahamian law now allows entities registering their vessels in the Bahamas to qualify for U.S. government issued war risk insurance binders, subject to enabling amendments to MARAD regulations. Available data indicates that, if all eligible U.S. citizen-owned or controlled vessels registered in the Bahamas applied for war risk insurance binder coverage, a total of 17 vessels under the control of three companies would be involved. More than half of these 17 vessels were previously eligible for an interim binder while registered under either the Liberian or Panamanian flags. Accordingly, the economic impact has been found to be minimal. Since the rule affects principally the owners and operators of large commercial ships, the Maritime Administrator certifies that it will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*).

This rule would amend the regulations at 46 CFR Part 308, which contain information collection requirements in §§ 308.3 and 308.6. The information collection for vessels that are registered in the Bahamas will be identical to that which has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). In March 1986 (under OMB Control No. 2133–0011), these new forms were approved for use and are now entitled: War Risk Insurance Application (Form MA–528); War Risk Insurance Binder, Form MA–942; Vessel data, Form MA–828; and Underwriting Agency Agreement, Form MA–355.

List of Subjects in 46 CFR Part 308

Maritime carriers, War risk insurance.

Accordingly, 46 CFR Part 308 is amended as follows:

PART 308—[AMENDED]

1. The authority citation for Part 308 is revised to read as follows:

Authority: Sections 204, 1203, 1209, Merchant Marine Act of 1936, as amended (46 App. U.S.C. 1114, 1282, 1283, 1289; 49 U.S.C. 1.66).

§ 308.2 [Amended]

2. Section 308.2(a) is amended by inserting between the word "Honduran," and the word "or," the word "Bahamian."

§§ 308.3, 308.6, 308.304, 308.404 and 308.410 [Amended]

3. Sections 308.3 (c) and (g), 308.6(d), 308.304, 308.404, and 308.410 are amended by replacing the title of Director, Office of Marine Insurance with the title of Director, Office of Trade Analysis and Insurance.

§ 308.5 [Amended]

4. Section 308.5 is amended by deleting the phrase "and General Order 75, as revised" and deleting the phrase "(General Order)."

§ 308.205 [Amended]

5. Section 308.205 is amended by replacing the title of Office of Marine Insurance with the title of Office of Trade Analysis and Insurance.

§ 308.404 [Amended]

6. Section 308.404 is amended by replacing the title, Chief, Division of Insurance with the title, Director, Office of Trade Analysis and Insurance.

(Catalog of Federal Domestic Assistance Program No. 20.803 (War Risk Insurance))

By Order of the Maritime Administrator.

Date: March 8, 1988.

BILLING CODE 4910-81-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87–116; RM–5541]

Radio Broadcasting Services; Trussville, AL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots FM Channel 290A to Trussville, Alabama, as that community's first local broadcast service, in response to a petition for rule making filed on behalf of Trussville Broadcasting, Inc. With this action, the proceeding is terminated.

DATES: Effective April 18, 1988; The window period for filing applications on Channel 290A at Trussville, Alabama, will open on April 19, 1988, and close on May 19, 1988.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Allocations Branch, Mass Media Bureau, (202) 634–6530, concerning the allotment. Questions related to the application process should be addressed to Audio Services Division, FM Branch, Mass Media Bureau, (202) 632–0394.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87–116, adopted January 27, 1988, and released March 3, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Services, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket Nos. 70–27; Notice 29, and 83–07; Notice 4]

Federal Motor Vehicle Safety Standards; Burnish Procedures for Heavy Duty Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: Before a vehicle is tested for compliance with most of the requirements of this agency's braking standards, the vehicle's brakes are broken-in by a series of brake applications. This break-in is called a burnish, and is intended to simulate the break-in that vehicle's brakes would get when they are initially used on the public roads. With respect to heavy vehicles (those with a gross vehicle weight rating greater than 10,000 pounds), the burnish procedure now requires that the brakes be heated to not more than a specified maximum temperature by means of a series of brake applications.

The agency initiated rulemaking regarding this temperature limit because the limit is more favorable to drum brake designs than to disc brake designs. This situation arises because the limit was based on drum brake systems whose normal safe operating temperatures are significantly lower than those of disc brake systems. As a result, disc brake systems may not be adequately broken-in under the current burnish procedure.

To address this problem, this rule establishes a new burnish procedure for vehicles with a gross vehicle weight rating greater than 10,000 pounds. Under this new procedure, the vehicle will make 500 brake applications to slow the vehicle from 40 to 20 miles per hour (mph), without regard to the resulting temperature. This procedure will break-in brakes in a manner that is more realistic and representative of the break-in the vehicle brakes actually get when in service on the roads, without favoring any particular braking system design.

Since this new burnish procedure may affect the design and certification of new and existing braking systems, the agency believes it is appropriate to allow a transition period for implementing this new burnish procedure. Therefore, this rule allows manufacturers to base the certification of their heavy vehicle brakes on either the new or the old burnish procedures until September 1, 1993. In testing a vehicle for compliance, the agency will use the same procedures on which the manufacturer's certification of compliance was premised. All vehicles manufactured on or after September 1, 1993 will be burnished under the new burnish procedures set forth in this rule.

DATES: This rule is effective September 12, 1988.

Any petitions for reconsideration of this rule must be received by NHTSA not later than April 13, 1988.

ADDRESS: Any petitions for reconsideration must be submitted to: Administrator, NHTSA, 400 Seventh Street SW., Washington, DC 20590. It is requested, but not required, that 10 copies be submitted.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Carter, Crash Avoidance Division, NHTSA, 400 Seventh Street, SW., Washington DC 20590 (202–366–5274).

SUPPLEMENTARY INFORMATION:

Background and Notice of Proposed Rulemaking

NHTSA has established two standards applicable to the braking systems on vehicles with a gross vehicle weight rating (GVWR) greater than 10,000 pounds. These two standards are Standard No. 105, *Hydraulic Brake Systems* (49 CFR 571.105) and Standard No. 121, *Air Brake Systems* (49 CFR 571.121). Standards No. 105 and 121 both specify road tests to measure the brake systems' compliance with the performance requirements. Both standards specify also that the brake systems on these heavy vehicles shall be "burnished" before undergoing road testing to determine if the brake systems satisfy the performance requirements of the applicable standard. The burnish is a series of brake applications that serve to "break-in" the brakes on a new vehicle.

Before the initiation of this rulemaking, the burnish procedure was as follows. The burnish consisted of a series of 500 brake applications at specified speeds. During the burnish procedure, the maximum temperature of the hottest brake on the vehicle was not permitted to exceed 550 °F. The first 175 brake applications (hereinafter referred to as "snubs") were made so as to slow the vehicle from 40 miles per hour (mph) to 20 mph. Subsequent snubs were conducted at initial speeds that increase in increments of 5 mph until the final series of snubs brake the vehicle from 60 mph to 20 mph. However, if the maximum allowable brake temperature were reached at some speed less than 60 mph, the speed was not increased for the following snubs. The snub speed could even be reduced if such a reduction were needed to maintain the brake temperature below the specified maximum level.

Standard No. 121 also specifies a dynamometer test. The burnish for brake systems to be tested on the dynamometer specifies a series of 400 brake applications from 40 mph, at a specified rate of deceleration. For these brake applications, Standard No. 121 specifies that the initial brake temperature shall be within a stated range. The initial brake temperature is defined in section S4 of Standard No. 121 as "the average temperature of the service brakes on the hottest axle of the vehicle 0.2 miles before any brake application."

The maximum brake temperatures during the road test burnish, which apply to both disc and drum brake systems, were based on SAE Recommended Practice J880, "Brake System Rating Test Code—Commercial Vehicles." This recommended practice was established in 1963, based solely on test data for drum brakes. One problem that became apparent with respect to the maximum burnish temperatures specified in the standards was that the specified maximum temperature may not have been appropriate for disc brake systems. Disc brake systems are generally designed to operate at appreciably higher temperatures than are drum brake systems. It has been difficult to avoid exceeding the specified 550 °F maximum temperature during the burnish of vehicles with disc brake systems, even at the lowest of the burnish speeds set forth in the standards, i.e., 40 mph.

In response to this situation, International Harvester (IH) filed a petition for rulemaking with NHTSA. In its petition, IH asked the agency to amend the burnish procedures to take account of the differing characteristics of disc and drum brake systems. International Harvester has subsequently changed its corporate name to Navistar. However, all of the material in the public docket for this rulemaking action identify the company as International Harvester. To avoid potential confusion, this preamble refers to the company as International Harvester.

Notice of Proposed Rulemaking

After granting this petition, the agency published a notice of proposed rulemaking (NPRM) at 48 FR 29560; June 27, 1983. The NPRM proposed to amend the sections of Standards No. 105 and 121 applicable to burnish before road testing as follows. If the temperature of the hottest brake exceeded 550 °F at a snub condition of 40 to 20 mph, the remaining snubs would be run from 40 to 20 mph without regard to the brake temperature. NHTSA anticipated that this proposed change would not create any compliance problems for existing drum brake systems, which do not typically exceed the specified temperature during burnish, while resolving the burnish problems that could occur for disc brake systems.

No change was proposed for the dynamometer burnish temperature in Standard No. 121 because the temperature problems which had arisen during the road test burnish had not occurred with respect to the dynamometer burnish. Accordingly, NHTSA saw no reason to propose changing that burnish procedure.

The NPRM also proposed some more minor revisions to the standards. One proposed change was intended to clarify the procedure for loading tractors and trailers during burnish testing. Another proposed change would have specified brake adjustments at equal intervals during the burnish. This change was proposed to ensure uniformity and repeatability of test results. The final proposed change involved automatic slack adjusters and automatic brake adjusters. Under the NPRM, both standards would have been amended to specify that brake systems equipped with such devices could not deactivate the devices during the testing for compliance with Standards No. 105 and 121.

The agency received seven comments on the NPRM. Motion Control Industries (Motion Control) suggested in its comments that NHTSA delete entirely the temperature restrictions during the burnish. In support of this position, Motion Control asserted that the existing burnish procedures do not sufficiently condition rear drum brakes on vehicles equipped with disc brakes on the front axle. This assertion was based on the fact that the temperature of the front disc brakes will exceed 550 °F during the 40 to 20 mph snubs, and so the vehicle would not run any snubs at speeds in excess of 40 mph. The failure to condition the rear drum brakes at the higher snub speeds meant, according to Motion Control, that those drum brakes would not perform as well as they are designed to do during the compliance testing. Motion Control contended that if the friction materials in the brake systems are designed to stop vehicles from 60 mph while in service and are subjected to 60 mph stops during testing, it is desirable for the friction materials to experience whatever temperatures result from 60 mph stops during the burnish.

In a related vein, Ford Motor Company (Ford) stated that the amendment set forth in the NPRM would relieve the problems encountered by vehicles with disc brakes on all axles, but would not achieve its purpose for vehicles equipped with a combination of disc and drum brakes. According to Ford's comment, "the procedure which would burnish the brakes most effectively on a vehicle equipped with a combination of disc and drum brake systems would be one which maintained the drum brake temperatures within the window of 450–550 °F, while allowing the disc brake temperatures to find their own level, unrestricted." This suggestion was similar to Motion Control's, in that no temperature restrictions would apply to disc brake systems. If the Ford suggestion were adopted, vehicles with disc brake systems on all axles would not be subject to any temperature limitations during the burnish procedure. However, the Ford suggestion would have retained the temperature limitations for drum brake systems.

After publication of the NPRM, NHTSA had conducted some testing to determine what burnish procedures would expose heavy duty vehicle brakes to sufficiently high temperatures to simulate a break-in of the brakes under normal driving conditions without favoring any particular design. That testing indicated that heavy duty vehicle brakes should be burnished by 500 snubs slowing the vehicle from 40 to 20 mph, without regard to the brake temperatures generated during the burnish. Such a burnish procedure exposes all types of brake systems to the temperatures they are likely to experience in city driving, without penalizing or favoring any particular type of brake design. Such a procedure would also be consistent with the burnish procedures specified by the Society of Automotive Engineers (SAE) for heavy duty vehicle brake performance testing; see SAE Recommended Practice J786a. (The burnish procedure in SAE Recommended Practice J880a, allowing snubs from 60 to 20 mph, is for a brake *energy absorption* test, not a brake *performance* test).

Supplementary Notice of Proposed Rulemaking

The agency wanted to give the public an opportunity to comment on the approaches suggested by Ford and Motion Control and the agency research, before proceeding to establish a final rule. Accordingly, NHTSA published a supplementary notice of proposed rulemaking (SNPRM) at 50 FR 21313; May 23, 1985. The SNPRM proposed four alternative methods for amending the burnish procedures. These were the Ford approach, the Motion Control approach, the approach suggested by the agency research, and the approach originally proposed in the NPRM with some minor changes.

Further, the SNPRM asked for additional comments on the minor amendments proposed in the NPRM. First, the NPRM had erroneously proposed the following conditions for burnishing the brakes of a truck tractor. As proposed, the truck tractor would be loaded to its gross vehicle weight rating and a trailer attached to the tractor would be loaded to its gross axle weight rating. However, the NPRM would have required that the control trailer be *unbraked*. Such loading would overtax the tractor's brakes during the burnish, since those brakes would be stopping far more weight than they were designed to stop. To correct this error, the SNPRM proposed to require that the combination of the tractor and the unbraked trailer be loaded only to the gross vehicle weight rating of the tractor.

Second, the NPRM had proposed that brake adjustments be made at specified intervals during the burnish procedure. Past interpretations and preambles had repeatedly stated that brake adjustments were permitted during burnish. To establish uniformity for both manufacturer and agency testing as to when such adjustments would be made, the NPRM proposed that the brakes be manually adjusted at specified intervals. In the case of the road test burnishes, the adjustments would be made manually after 125, 250, and 375 snubs, in accordance with the manufacturer's recommendations. For the dynamometer test burnishes specified in Standard No. 121, the brakes would be adjusted manually after 100, 200, and 300 snubs.

General Motors (GM) objected to the proposed brake adjustment procedures in its comments on the NPRM. While acknowledging that manual adjustment might provide the most accurate adjustment, GM did not believe that manual adjustments would always be necessary. GM stated that, in most instances, use of the automatic brake adjustment feature in accordance with the manufacturer's recommendations would provide adequate adjustment.

NHTSA was persuaded by this comment. Accordingly, the SNPRM proposed that brakes shall be adjusted in accordance with the manufacturer's recommendations. If a vehicle manufacturer recommended manual adjustment for its brakes, the brakes would be so adjusted. Alternatively, if the manufacturer recommended that the brakes be inspected and adjusted only if necessary, that recommendation would be followed. If the inspection showed that no adjustment to the brakes were necessary, none would be performed.

Third, several commenters to the NPRM objected to the proposed requirement to prohibit deactivation of automatic brake adjusters during testing for heavy vehicle's brake performance. These commenters argued that there was no valid reason to treat these heavy duty vehicles any differently than vehicles with GVWR's of 10,000 pounds or less. Since the lighter vehicles are allowed to deactivate automatic brake adjusters during testing, heavier vehicles should be offered the same option, according to these commenters.

NHTSA agreed with the implicit point of these comments that the reasons for and against permitting deactivation of automatic brake adjusters apply equally to all vehicles equipped with such devices, regardless of vehicle weight, size, or type. Since this rulemaking addresses only the question or heavy duty vehicles and the agency did not think it appropriate to address the deactivation of automatic brake adjusters in a piecemeal fashion, the SNPRM announced that the issue would be addressed in a separate rulemaking. Hence, this rulemaking no longer addresses the issue of deactivation of automatic brake adjusters.

In response to the SNPRM, 16 comments were submitted by 13 different commenters. All these comments were considered in connection with this final rule, and the most significant are discussed below.

Final Rule

Burnish Procedures

The SNPRM asked for comments on four alternative burnish procedures. In the SNPRM, the agency explained that

its desired goal was to establish burnish procedures which represent driving conditions that would be encountered in normal use and which are fair for both types of brake systems (i.e., disc and drum brakes) while favoring neither. 50 FR 21315. Each of the four alternative procedures set forth in the SNPRM were evaluated to see how well they achieved this goal.

The approach suggested by Motion Control in its comments on the NPRM was to eliminate the maximum temperature requirements during burnish, and simply run the snubs as specified in Table IV of Standards No. 105 and 121. None of the commenters to the SNPRM supported this approach. Lucas Industries Inc. (Lucas) stated that this approach would cause drum brakes to exceed 550 °F in some circumstances during the burnish. Such temperatures would, according to Lucas, degrade the brakes' performance in subsequent tests. Chrysler agreed with Lucas, stating that an overly severe burnish can create excessive brake temperatures that substantially degrade or destroy the friction characteristics of the brake lining material. Accordingly, Chrysler urged that this approach not be adopted. The Bendix Division of Allied Automotive (Bendix) comment was substantially similar to Chrysler's on this alternative. Ford, IH, and General Motors commented that this alternative should not be adopted because it would not be representative of normal conditioning.

Motion Control itself stated that its suggested alternative would not be representative of normal brake conditioning and should not be adopted. However, Motion Control commented that the alternative would be acceptable if modified to require four 40–20 mph snubs followed by one 60–20 mph snub, repeated one hundred times for a total of 500 snubs. In support of this position, Motion Control tested a vehicle with front disc brakes and rear drum brakes according to this proposed modification. The testing showed that the front disc brakes would experience temperatures of 820 °F during such burnish, while the rear drum brakes would be heated to 560 °F at the end of this testing.

The agency agrees with the commenters that stated that the Motion Control approach as set forth in the SNPRM could potentially damage drum brakes. Accordingly, such an approach would not satisfy the goal of establishing burnish procedures that are fair for both disc and drum brakes, nor would it be representative of the conditions encountered in normal driving. Therefore, this approach was not adopted in this final rule.

The Ford approach received some support in the comments. As noted above, the Ford approach set forth in the SNPRM would retain the 550 °F temperature limitation for drum brakes during the burnish, but would eliminate temperature restrictions for disc brakes. Lucas supported this alternative, contending that it would burnish drum brakes on disc-drum combination vehicles under the same conditions as drum brakes would be burnished on vehicles using only drum brakes. Motion Control also stated that this alternative was the best for vehicles that used disc and drum brakes. Abex Corporation (Abex) stated that they supported the Ford approach, if the agency were going to amend the burnish procedures. Flxible Corporation (Flxible) stated that brake temperatures in excess of 500 °F cooks the lining resin in drum brakes and reduces their performance. Because of this, Flxible stated that any alternative that retained such a limit for drum brake burnish was acceptable, including the Ford approach.

On the other hand, Chrysler, IH, Bendix, GM, and the Motor Vehicle Manufacturers Association (MVMA) opposed the Ford approach. These commenters believed that no temperature limits during the burnish of vehicles using only disc brake systems would potentially damage the disc brakes. Additionally, these commenters did not believe that this burnish procedure would be representative of normal driving. Ford itself agreed that some temperature limits should be added for disc bakes during the burnish, and suggested that its approach be adopted with an upper limit of 800 °F for disc brakes. Both Bendix and MVMA commented that they would support the Ford approach, if a temperature limitation for disc brakes were added.

The approach suggested in the NPRM also received some support in the comments. Under this approach, vehicles would be burnished according to the schedule specified in Table IV, with a temperature limitation of 550 °F for the hottest brake. However, if this temperature limitation were exceeded during the 40 to 20 mph snubs, all the remaining snubs would be run from 40 to 20 mph without regard to temperature. Chrysler stated that there was no need to change the burnish procedures, but if they were to be changed, the approach suggested in the NPRM was the best of the four alternatives listed in the SNPRM. IH commented that the NPRM's approach was the only acceptable alternative offered in the SNPRM. This belief was based on that approach giving the higher temperatures necessary to properly condition truck brakes and preserving the data history from compliance testing for the past 12 years.

However, Lucas opposed this approach, because rear drum brakes on a disc/drum vehicle would not be sufficiently conditioned when the front disc brakes reached a temperature of 550 °F. Motion Control raised the same objection, and also stated that this approach would not be representative of normal conditioning, since it would not allow 60–20 mph snubs on disc/drum vehicles. Bendix opposed this approach, arguing that it would not adequately condition the front disc brakes on a vehicle using only disc brakes.

This final rule does not adopt either the Ford approach (limiting drum brake temperatures to 550 °F) or the NPRM approach (limiting the hottest brake temperature to 550 °F), because the agency has concluded that the brake temperatures that would be generated under either of these approaches would not be representative of the brake temperatures generated during normal driving conditions in the case of drum brake systems.

NHTSA has conducted a series of brake temperature tests for both hydraulically braked vehicles (DOT HS 806 860) and air braked vehicles (DOT HS 806 738) with gross vehicle weight ratings in excess of 10,000 pounds. These vehicles were driven in downtown traffic through Columbus, Ohio, and on the highways around that city. During this testing, the maximum temperatures measured for drum brakes were 410 °F for one hydraulically braked vehicle and 350 °F for the other hydraulically braked vehicle. The maximum temperature measured for drum brakes on air braked vehicles was 418 °F. It should be noted that these maxima were measured for the rear axle of the tractor, and that the maximum temperatures measured for the other axles were significantly lower. Additionally, all of these maxima were recorded during the urban driving part of the testing. The brake temperatures measured on the highways were generally about 100 °F less than the brake temperatures measured on the streets and roads of Columbus. These findings indicate that a burnish procedure that allows drum brakes to be heated to 550 °F cannot be said to be representative of normal driving conditions.

Moreover, the findings in the NHTSA testing confirmed past research about brake temperatures. The University of

BEST COPY AVAILABLE

Michigan Transportation Research Institute prepared a 1982 report entitled "Retarders for Heavy Vehicles: Phase II Field Evaluations." This report measured the average brake temperature for the drive axle of the tractor on five axle tractor-semitrailer combinations. This axle experienced the highest brake temperatures in the aforementioned NHTSA testing in Columbus, Ohio. These brake temperatures were measured after the vehicles had made a descent of the fairly long grades on US 40 and US 48 in the western part of Maryland. Under these demanding conditions, the average brake temperature on the tractor drive axles was less than 350 °F.

Another 1982 report was prepared by Systems Technology Incorporated, entitled "The Development and Evaluation of a Prototype Grade Severity Rating System" (Report No. FHWA/RD–81/185). This report also measured brake temperatures for five axle tractor-semitrailer combinations descending a grade. In this case, the grade was "the Grapevine" south of Brakersfield, California on US 5. This is a well-known grade that features an average grade of 5.35 percent for 5.1 miles and presents heavy vehicle brakes with extremely demanding conditions. The brake temperatures of 25 vehicles were measured at the bottom of this grade. Even including the one vehicle that was a "runaway" because its brakes overheated, the average brake temperature for these vehicles was about 400 °F.

Given these consistent research findings about the temperatures to which drum brakes are subjected during normal driving, the agency concludes that a burnish that subjects drum brakes to significantly higher temperatures cannot be said to be representative of normal driving conditions. By allowing the drum brakes to be heated to temperatures well in excess of those encountered during normal driving, the burnish procedures would ideally condition the drum brakes. However, the agency is more interested in the braking capability of vehicles when the brakes are in the condition they are most likely to be when used on the roads than in the maximum braking capability of a braking system if the brakes are ideally conditioned. Since neither the Ford approach nor the approach set forth in the NPRM would be representative of normal brake conditioning, neither approach has been adopted in this rule.

In the comments, only Ford submitted data to support its contention that drum brakes would experience temperatures near 550 °F under normal driving conditions. Ford tested a fully loaded vehicle through the traffic of downtown Detroit, Michigan. This vehicle was hydraulically braked with a disc system on the front axle and drum brakes on the rear. Ford stated that the maximum temperature measured for the drum brakes was 495 °F. Ford also submitted data measuring the brake temperatures for air braked vehicles driving through the mountainous part of Arizona. The maximum temperature measured for the drum brakes over this road was 507 °F. However, Ford did not provide measurements of the initial brake temperatures or average brake temperatures or any other information that would allow the agency to further analyze the Arizona test data.

After considering the data submitted by Ford, NHTSA concludes that those data support the agency's conclusion that burnish procedures that allow drum brakes to be heated to 550 °F do *not* represent conditions that will normally be encountered by vehicles in use. The Detroit testing showed what the prior research and the agency research had shown; i.e., drum brakes do not experience temperatures of 550 °F under normal driving. With respect to the temperatures measured in the Arizona mountains, NHTSA does not doubt that it is possible to find grades long enough and severe enough to heat drum brakes to 500 °F. However, the point of the burnish procedure is not to simulate every conceivable condition that the vehicle might experience while in use. Instead, the burnish procedure is intended to simulate a normal break-in for the vehicle's brakes. While such conditioning would improve the performance of the vehicle's brakes, the agency has no evidence that most, or even a significant number of, new vehicles are broken in by driving through rugged mountainous terrain. Accordingly, a burnish procedure that is intended to be representative of normal driving conditions should not be based on these abnormally high temperatures.

The approach suggested by the NHTSA research, i.e., making 500 snubs from 40–20 mph, is the final approach about which the SNPRM sought comments. After considering the intended function of the burnish procedures and all the comments received during this rulemaking action, NHTSA has selected this approach as the burnish procedure to be used for vehicles with a GVWR greater than 10,000 pounds. By making a series of braking applications from speeds encountered by every vehicle, this procedure will be most representative of normal driving conditions. Further, this procedure allows the brakes to reach whatever temperatures they are designed to reach when driven in typical stop-and-go driving. Thus, any braking system design will be conditioned fairly under this approach.

Among the commenters to the SNPRM, only Rockwell International (Rockwell) completely endorsed this approach. Rockwell cited three factors that favored this approach. These were:

1. It would give a constant rate of energy input to the brakes throughout the burnish, thus reducing variability associated with the original burnish procedure;

2. The schedule of energy input to the brakes would be in the center of most vehicle application duty cycles, as desired, thus producing a typical, real world vehicle brake burnish and a correspondingly realistic brake performance test; and

3. It would give all brakes the same burnish schedule, regardless of brake design or type, and should give an adequate burnish to each type of brake. Thus, all brakes would be on an equal footing before starting the performance testing.

Renault USA Inc. (Renault) stated that it was "not sure" if this approach would give a sufficient burnish to brakes, especially when considering all of the vehicles to which this burnish procedure would apply. However, Renault asserted that the available data not exhaustive, and recommended that the final rule give manfacturers the option of burnishing their brakes either under this approach or the approach set forth in the NPRM.

Bendix stated that its air braked disc system reach the 550 °F temperature limitations under the current procedures, so all 500 snubs are run from 40 to 20 mph for these vehicles. Flexible made a similar comment for its air braked drum brake systems on buses. These comments suggest that, at least for these manufacturers' braking systems, the new burnish procedures would not change the burnish from that which is specified under the current procedures.

NHTSA believes that another advantage of this approach is that it would not favor or disfavor any type of brake design. Whenever the burnish procedures include a maximum temperature limitation, brakes that are designed to operate nearest that temperature get a more extensive burnish than do brakes that are designed to operate at either a higher or lower temperature. For example, this rulemaking proceeding was initiated because the 550 °F temperature limitation results in an unrealistic burnish for vehicles with disc brakes or both disc and drum brakes. That is because disc brakes are designed to operate safely at significantly higher temperature than are drum brakes. Thus, it is necessary to amend this temperature limitation to account for the higher temperatures generated by disc brakes.

Additionally, Eaton Corporation (Eaton) noted in its comments that the air brake industry is in the process of converting from asbestos based brake linings to non-asbestos brake linings on drum brake systems. These non-asbestos linings will generate different normal and safe maximum temperatures during brake applications than the asbestos-based linings currently offered. If a temperature limitation for the burnish procedure were specified in this rule, that limitation might need to be adjusted for various new brake linings and new brake system, to account for changing characteristics.

Such repetitive rulemaking should be avoided. It continually diverts agency time and resources from more productive use. More importantly, it denies the public the early introduction of new technology, not because of any safety-related issues, but because it takes significant periods of time to amend the Federal motor vehicle safety standards.

For example, it is possible that a new design for braking systems would not be adequately or representatively conditioned by burnish at some specified maximum temperature, as a result of which the braking system would not satisfy the performance requirements of Standard Nos. 105 or 121. However, such braking system would fully comply with those requirements if it were burnished in a manner that represented the break-in it would get during normal driving. Until the burnish procedures were amended, this braking system could not be installed on these heavy vehicles. Its introduction would be delayed solely because the temperature-restricted burnish procedures did not allow for the development of newer designs. NHTSA wants to avoid imposing such unnecessary impediments to the introduction of innovative systems.

A burnish procedure that requires 500 snubs from 40–20 mph avoids this pitfall. Under such a procedure, any new design will be burnished to whatever temperatures it is designed to experience during normal city driving. No additional rulemaking is required to ensure that the new design receives as effective and representative a burnish as do existing designs. Such a burnish procedure allows manufacturers to test and introduce innovative technologies without unnecessary and unintended delays.

However, the vast majority of commenters to the SNPRM objected to this approach. NHTSA stated in the SNPRM that preliminary examination of the results of 500 snubs from 40 to 20 mph indicated that such a burnish would expose all types of brake designs to the temperatures they would encounter in normal service without favoring any type of brake design. A number of commenters at least indirectly questioned this statement.

Lucas commented that this burnish procedure would not adequately burnish drum brakes on some vehicles with low gross axle weight ratings. However, Lucas did not submit any data to substantiate this claim. Motion Control stated that when it burnished a vehicle with disc/drum brakes under this approach, the rear drum brake temperature was only 400 °F. Motion Control asserted that this did not approach the necessary 500–550 °F for adequate burnish of these brakes. GM likewise stated that a vehicle with disc/drum brakes would not experience sufficiently high temperatures to adequately burnish either the front dics brakes or the rear drum brakes. GM also commented that this procedure would not adequately burnish certain all drum brake systems. Ford stated that its testing showed that burnish under this approach does not expose the brake linings of vehicles with disc/drum brakes to temperatures they would encounter in normal service.

NHTSA is not persuaded by these comments. Contrary to the implicit assertions of these comments, the purpose of the burnish procedure is not to guarantee that the vehicle's brakes will be exposed to a certain temperature. The agency concedes that this new burnish procedure may not expose current designs of drum brakes to temperatures of 500 °F. The fact that drum brakes will not be exposed to temperatures as high as they were under the old burnish procedure does not, however, show that this burnish procedure is not an adequate burnish. As noted above, the burnish procedure is only intended to simulate the break-in of the brakes under normal driving conditions. The burnish is not intended to ensure that brakes will be ideally conditioned as a result of being exposed to unusually high temperatures they will rarely encounter while in service on the roads. The agency's testing indicated that a burnish consisting of 500 snubs from 40 to 20 mph will in fact expose the vehicle brakes to the temperatures those brakes would experience during stop and go urban driving. This finding leads the agency to conclude that such a burnish procedure would fairly represent the condition of brakes on vehicles that are in use on the nation's roads.

Only Ford submitted data to substantiate its assertion that this burnish procedure would not expose the brakes on vehicles with front disc brake systems and rear drum brake systems to the temperatures such brakes would experience in normal driving. These data were obtained from the aforementioned driving around the Detroit area. However, the agency does not agree with Ford's comment that its Detroit test shows that brakes would not be exposed to normal driving temperatures, and therefore would not be properly conditioned, during this burnish procedure. For the single vehicle that was used in the Detroit test, the rear drum brakes experienced average temperature while driving around Detroit that were slightly less than the average temperatures measured during the burnish procedure. This fact supports the agency's conclusion that the burnish procedures set forth in this rule will expose the vehicle brakes to temperatures that are representative of the temperatures those brakes will experience in normal driving.

The front disc brakes on this vehicle did experience somewhat higher temperatures in the test than during the burnish procedure. However, disc brakes are often not as sensitive to burnish temperature as drum brakes. This is because the burnish temperature for disc brakes appears to have little effect on the torque output of the brakes after burnish, provided that the burnish temperature reaches at least 500 °F. In Appendices B, C, and F to NHTSA's research on hydraulically braked vehicles (DOT HS 806 860–864), disc brakes on three different vehicles reached temperatures of 500, 600, and 700 °F during burnish, but all showed comparable performance improvements after the burnish. Hence, even if the front disc brakes did not experience quite as high an average temperature during burnish as they did during urban driving, they did experience sufficiently high temperatures during burnish to simulate the "break-in" process.

Other commenters asserted a position which was somewhat contradictory to the above comments. Chrysler and Bendix were opposed to this burnish procedure, because it did not specify any maximum temperature to which the brakes could be exposed during burnish. These commenters stated that the burnish procedure had to specify some reasonable maximum temperature requirement to avoid damaging the brakes. The agency would like to note that any brakes that are designed so that they will be damaged while making 40 to 20 mph snubs probably should not be installed on new vehicles regardless of any applicable regulatory provisions. Regardless of the brake type, this burnish procedure will ensure that all brakes are exposed to whatever temperatures they will be exposed during normal break-in when operated on the public roads.

Ford, IH, and MVMA all stated in their comments that NHTSA's testing of a limited sample of vehicles over a single route does not adequately duplicate the range of brake lining temperatures experienced by the large variety of vehicles with GVWR's over 10,000 pounds operating over all possible driving cycles. The agency disagrees with the suggestion that the sample of vehicles for the Columbus, Ohio tests was not representative. This sample included vehicles with widely varying GWR's and with all current combinations of brake systems. None of these commenters pointed to a particular vehicle weight class or braking system that was not included in this sample, and the agency believes that its sample was broad enough to adequately represent these vehicles.

NHTSA agrees that there are driving cycles such as frequent driving on grades that would generate higher brake temperatures than city driving. However, the agency was not seeking to establish a burnish procedure to simulate the most demanding conditions these vehicles would face in the real world or a burnish procedure that ideally conditions all brake designs. Instead, the agency wants to establish a burnish procedure that simulates normal "break-in" for vehicle brakes. Stop and go city driving generates significantly higher brake temperatures than highway driving, primarily because of more frequent brake applications. This type of driving was chosen as the one the burnish should simulate, becuse it is a demanding type of driving for all braking systems, and it is likely to be generally and frequently experienced by the braking systems on heavy vehicles. NHTSA concluded that a burnish procedure based on city driving would expose vehicle brakes to temperatures they will encounter in the real world and represent the break-in for those brakes in the real world. A more demanding driving cycle would not be representative of normal break-in for the vast majority of vehicles on the road. A less demanding driving cycle would not expose the vehicle brakes to the conditions those brakes will encounter when in service. Therefore, the urban driving cycle was selected as the one the burnish should represent.

Abex commented that this burnish procedure would pose an additional problem. According to this commenter, without brake temperature data, it will be difficult to ensure any consistency of burnish conditioning from one test to another. First, nothing about the new burnish procedure prevents manufacturers from recording brake temperature data if they wish to do so. Second, this procedure will yield a constant rate of energy input to the brakes throughout the test, because all of the braking applications will be from 40 to 20 mph. That will ensure greater consistency of burnish conditioning from one test to another than the old burnish procedure. This is because the old burnish procedure was based on brake temperature. As noted in the comments of GM, IH, MVMA, and others, the brake termperature fluctuates greatly during the burnish, rising as much as 300 °F during a brake application. This sharp temperature rises make it very difficult to ensure consistent conditioning from one burnish to another, if maximum temperature is the controlling factor.

Abex also commented that Standard No. 105 includes 60 mph stopping distance requirements. Since the brakes will be tested for performance from 60 mph, Abex urged that the brakes should also be burnished from this speed. Motion Control made a similar comment. These comments are not persuasive. In both the perburnish and postburnish tests, Standard No. 105 specifies that vehicles with a GVWR greater than 10,000 pounds must stop from 60 mph in 388 feet. NHTSA notes that the service brake stopping distance requirements of Standard No. 105, to which both these commenters referred, are not currently in effect for vehicles with a GVWR greater than 10,000 pounds. Even if the service brake stopping distance requirements were in effect for these vehicles, the braking performance is *not* required to improve after burnish. Since Standard No. 105 only requires that the brakes on these vehicles retain the effectiveness they had before burnish, there is no reason to subject the vehicles to repeated 60 mph snubs during the burnish. Given the current requirements of the standard, the result of permitting 60 mph snubs would appear to be to raise the brake temperatures to unrealistically high levels.

Ford, GM, MVMA, and IH all commented to the effect that this new burnish procedure would lower the brake temperatures experienced by drum brakes during the burnish. According to these commenters, the lower temperatures would affect the static and dynamic performance of the brakes on the vehicles, which, in turn, would require a redesign of the brake systems on certain vehicles.

Since this new burnish procedure more effectively simulates normal break-in of these vehicles' brakes while in service on the roads, the braking performance measured for those vehicles in the performance tests for Standards No. 105 and 121 should now more accurately reflect the vehicles' braking performance while in service. The agency has no reason to believe that any vehicles currently being produced will not comply with Standards No. 105 or 121 after being burnished in accordance with these new procedures. Moreover, none of these commenters submitted data that supports their assertions.

MVMA simply stated that certain vehicles' braking systems would have to be redesigned as a result of this new burnish procedure. Without some data and examples of specific vehicles, NHTSA was unable to analyze this comment further. GM stated that its analysis of Standard No. 121 compliance data for some of its air brake transit buses with drum brake systems would be insufficiently burnished under this new procedure. As a result, GM stated that the buses' postburnish stopping distance would be increased to a level unacceptable to GM. It should first be noted that the stopping distance requirements of Standard No. 121 applicable to air braked buses have been suspended. Hence, there are *no* stopping distance requirements currently in effect for air braked buses. Even if there were stopping distance requirements in effect for air braked buses, GM did not asset that its transit buses would not comply with those requirements of Standard No. 121. Presumably GM meant to say that the performance of its buses would exceed the minimum performance requirements by a margin that was too small to be acceptable to GM. If a more representative burnish procedure results in GM's products not meeting GM's own product standards for the amount by which the product's performance should exceed the requirements of Standard No. 121, any redesign of the buses' braking system would be a result of the GM product standards, not Standard No. 121. To the extent that this new burnish

procedure more accurately represents the break-in those buses' brakes actually receive while in service, it would also give GM a more accurate representation of how well those will perform while in service. If vehicle manufacturers are not getting an accurate representation of how their vehicle braking systems perform when used by the public from the current burnish procedure, that is yet another reason to adopt the new burnish procedure.

Ford submitted data purporting to show that one of its vehicles with hydraulic disc and drum brakes would no longer comply with the requirements of section § 7.9 of Standard No. 105, if it were burnished according to this new procedure. That section of Standard No. 105 requires the vehicle to stop from 60 mph in a specified distance even if the vehicle experiences a partial service brake failure. With respect to vehicles with a GVWR greater than 10,000 pounds. Table II of Standard No. 105 specifies that such vehicles must stop in 613 feet from 60 mph with a partial service brake failure. Ford submitted data showing that the longest stopping distance for its vehicle was 737.5 feet and the average stopping distance was 626.3 feet.

However, Ford did not note that § 7.9 requires only that the vehicle stop in 613 feet in one of four required stops with a partial service brake failure. Since Ford's longest stopping distance for this condition was 737.5 feet and the average stopping distance for the four stops was 626.3 feet, the average of the other three stopping distances was 589.23 feet. This average is well within the required 613 feet maximum distance. Therefore, NHTSA does not believe that Ford's data support its asserted compliance problems.

To the extent that Ford's data were intended to show a reduction in the after burnish performance capabilities of the truck to a level unacceptable to Ford, the agency responds in the same way as it did to GM's comment on this point. That is, the data show that the vehicle complies with Standard No. 105. If the amount by which the vehicle exceeds that minimum performance requirement is unacceptable to Ford, any redesign of the braking system is a result of Ford's product standards, not Standard No. 105. Further, if the new burnish procedure gives Ford a more accurate representation of how well its baking system performs when in service on the public roads, that fact supports the agency's decision to implement the new burnish procedures.

IH commented that the changed burnish procedure would cause it to have compliance problems with section § 5.6.1 of Standard No. 121. That section requires that the static retardation force produced by the parking brake alone shall be such that the quotient of the static retardation force-GVWR is not less than 0.14. According to IH, under the current burnish procedure, this requirement means that it can use parking brakes on just one axle of a truck tractor unless the GVWR of the tractor is greater than 56,000 pounds. For tractors with a GVWR over 56,000 pounds, International Harvester must use parking brakes on two axles. However, International Harvester stated that under the new burnish procedure, it would have to install parking brakes on two axles of tractors with a GVWR over 46,000 pounds. According to the commenter, this will add costs and system complexity to tractors with GVWR's between 46,000 and 56,000 pounds.

International Harvester did not provide enough information for the agency to fully evaluate this comment. Most notably, the comment does not indicate whether the entire Standard No. 121 test sequence was run prior to the parking brake force measurements. Agency compliance testing of the parking brakes is conducted only after conducting service brake testing. If the 60 mph loaded vehicle service brake tests, which help condition the brakes, were not run to the parking brake force measurements, the parking brake force measurements are probably lower than they would have been had the complete Standard No. 121 compliance testing been conducted.

Assuming that International Harvester did conduct the full Standard No. 121 testing for this vehicle, the agency has no reason to believe that parking brakes should not be required on two axles of tractors with a GVWR of more than 46,000 pounds. If the International Harvester data are correct, the parking brakes on one axle of such tractors cannot provide a retarding force of 0.14 even when properly adjusted, if the brake linings are conditioned as they most likely would be when in service. A retarding force of 0.14 is roughly the equivalent of a 14 percent grade. If NHTSA accepts the commenter's conclusion that the new burnish procedure results in a 17 percent reduction in parking brake force, and the new burnish procedure more accurately represents the normal condition of brake linings in use on the roads, the parking brakes of some tractors with a GVWR of 55,000 pounds now being used on the public roads are only capable of holding on an 11.7 percent grade. If true, this comment raises concerns as to how well the parking brakes perform for vehicles currently in service. It also lends support to the agency's decision to implement burnish procedures that are more representative of the conditioning brakes get while in service.

Eaton, IH, and MVMA commented that a change to the burnish procedures should be be adopted, because any change would make obsolete 12 years of accumulated test data. These comments do not directly challenge the agency's conclusion that the new burnish procedures will be far more representative of the break-in that most brakes get while in service on the highways. Neither does this reasoning challenge the agency's conclusion that this new burnish procedure will not favor any new or future brake system designs. Instead, these comments urge the agency to retain a temperature-restricted burnish procedure because that is what the agency has used in the past. NHTSA does not agree that it should continue to require a burnish procedure that favors older brake designs and is not representative of real-world conditioning of brakes, simply because it has done so in the past. Indeed, it appears to be a far more responsible course of action to acknowledge the problems of the old burnish procedure and try to correct those problems in a new burnish procedure at a time when there are *no* service brake stopping distance requirements in effect for hydraulically braked heavy trucks subject to Standard No. 105, and when there are *no* service or emergency brake stopping distance requirements in effect for air braked vehicles subject to Standard No. 121.

Notwithstanding the agency's disagreement with the direct point of these comments, NHTSA believes that the implicit point of these comments is convincing. The agency reads these comments to imply that NHTSA ought to allow the manufacturers sufficient time to develop a new data bank using the new burnish procedures before mandating that vehicles be certified as complying with braking standards that incorporate these new burnish procedures. NHTSA believes that this is a legitimate concern that must be addressed in this rulemaking. The same point was indirectly raised in the International Harvester and MVMA comments that these new burnish procedures will require retesting of some vehicles's braking capabilities to ensure continuing compliance with the applicable standard.

The agency agrees that it must fully consider the economic impacts of a new burnish procedure, and should minimize those impacts when that is possible. This is particularly true in this rulemaking. This new burnish procedure is not intended to impose additional performance requirements for heavy vehicles in response to a demonstrated safety problem. Rather, the new burnish procedure is intended to ensure that vehicles are tested for compliance with the existing performance requirements when the brakes are conditioned to the same extent that brakes are typically conditioned when used by the public on our nation's roads, and to eliminate the current disfavoring of new brake designs from the burnish procedures. Given these purposes, the agency can and should minimize the economic impacts associated with the transition to a new burnish procedure.

Accordingly, this rule includes a transition period until September 1, 1993. During this period, heavy vehicles may be burnished under the old or new burnish procedures, at the manufacturer's option, before compliance testing. For this transition period, the old burnish procedures have been modified in accordance with the approach taken in the NPRM for this rulemaking. That is, vehicles will be subjected to 500 snubs for the burnish according to the schedule set forth in Table IV. However, if the temperature of the hottest brake exceeds 550 °F, the snubs shall be adjusted to a lower speed as necessary to maintain a hottest brake temperature of 550 °F. If the hottest brake temperature exceeds 550 °F at the lowest snub condition set forth in Table IV (40 to 20 mph), the remainder of the snubs shall be run from 40 to 20 mph without regard to brake temperature. This change has been made to accommodate disc brake systems, which are designed to operate safely at temperatures in excess of 550 °F. Since this problem was the issue this rulemaking was initiated to address, it is appropriate for the agency to address this problem now instead of waiting for the end of the transition period.

The agency believes that this transition period will effectively minimize any adverse economic impacts associated with the change to a new burnish procedure. It will allow manufacturers to specifically identify any vehicle whose braking system would not comply with the performance requirements of Standard Nos. 105 and 121 using the new burnish procedures. If only a few isolated vehicles are affected, the transition period will give the manufacturers sufficient time to make appropriate design changes to those vehicles. If, on the other hand, the new burnish procedures will necessitate major design changes to almost all vehicles now in production, or result in some other adverse economic consequences of which the agency is now unaware, the transition period would allow the agency time to make appropriate regulatory changes to avert such unintended economic impacts. Further, this transition period would enable the manufacturers to gather a data bank of testing under the new burnish procedures before those procedures are mandated, as urged in the Eaton, IH, and MVMA comments.

Tractor-Trailer Loading During Burnish

As noted above, the SNPRM proposed that the unbraked trailer used to test the braking performance of truck tractors would be loaded so that the combined weight of the tractor-trailer combination is equal to the GVWR of the tractor. Abex supported this proposal.

However, Ford, IH, Bendix, and MVMA opposed this proposal in their comments. They explained that their objection was based on the fact that the proposed change appears to *require* the use of a trailer during the testing of a truck tractor's brakes. These commenters stated that most tractor manufacturers use load racks, instead of trailers, during such testing. These load racks simulate the weight that a trailer would place on the tractor. The commenters stated that a new requirement that tractor manufacturers use actual trailers during testing was unnecessary. Since the commenters believed that the agency's intent was to prevent overloading of trailers *if* trailers were used for testing, they suggested that the language of the rule be amended to more accurately reflect such intent.

NHTSA believes that these comments reflect a misunderstanding of the compliance test procedures set forth in the Federal motor vehicle safety standards. The use of the word "shall" in the compliance test procedures means that the agency, *and no other party*, is required to use an unbraked flatbed semitrailer during its compliance testing for truck tractors. When specifying its compliance testing procedures in any of the safety standards, the agency is required by the National Traffic and Motor Vehicle Safety Act ("the Safety Act"; U.S.C. *1381 et seq.*) to specify those procedures in "objective terms." 15 U.S.C. 1392(a). One aspect of the requirement that a compliance test procedure be stated in objective terms is that the procedures must, to the maximum extent possible, eliminate potential sources of variability in test results.

In this particular case, the agency has no reason to believe that load racks do not provide an accurate simulation of the loading imposed on a truck tractor by a trailer during the burnish procedures, because it is the total load that affects the burnish and not the load distribution (provided that each axle is loaded sufficiently to protect against wheel lock and the vehicle is not equipped with a load proportioning valve). However, the agency also has no data to support its belief that load racks would yield burnish results identical to those that are obtained with an unloaded trailer. Hence, a provision that the agency could use load racks in its compliance testing *might* introduce variability into these standards. The only way to learn whether the use of load racks during the burnish procedures *would* introduce variability into the standards would be for the agency to spend a substantial amount of its research time and dollars investigating this subject. NHTSA believes that such an expenditure of its research efforts for a project that would have no obvious safety benefits would be unjustified. Therefore, the agency has chosen to draft this final rule so that it does not introduce any potential source of variability, by simply specifying that an unbraked flatbed semitrailer will be used by NHTSA in its compliance testing.

This decision need *not* increase testing costs for the manufacturers. It is worth noting that manufacturers are not even required to conduct testing before certifying that their vehicles comply with these standards, provided that they exercise "due care" in making such certifications, as provided in section 108(a)(1)(C) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1397(a)(1)(C)). If manufacturers choose to conduct testing in accordance with the compliance test procedures, they are free to simulate any or all parts of the test procedures. If the agency tests reveal a noncompliance, the agency's consideration of the appropriateness of a civil penalty will necessarily include the issue of whether such simulations are reasonable enough to satisfy the "due care" standard.

In this particular case, let us assume that a truck tractor manufacturer has chosen to conduct testing prior to certifying compliance and has employed a load rack during the burnish procedure. Let us also assume that the manufacturer's testing showed that the tractor complied with the standard and the manufacturer so certified. If NHTSA should subsequently conduct compliance testing for the tractor, the agency would burnish the tractor using a trailer. Finally, let us assume that the

testing showed that the individual tractor being tested did *not* comply with the braking standards.

In these circumstances, NHTSA would follow its longstanding and well known enforcement policy of notifying the manufacturer of the agency's test results and asking the manufacturer for further information. In response, the manufacturer would provide the results of its compliance testing to the agency, together with its reasons for concluding that a load rack is a reasonable simulation for a trailer during burnish. To support an argument that its own tests actually demonstrate compliance or to show that it exercised due care in its substitution of a load rack for a trailer during burnish, the manufacturer would also submit the bases for its conclusion that a load rack is a reasonable simulation of a trailer for the purposes of the burnish.

At this point, the agency would carefully analyze the manufacturer's response. If the agency concludes that the difference in test results can be explained to the agency's satisfaction, that the agency's results do not indicate an unreasonable risk to safety, and that the manufacturer's tests were reasonably conducted and were in general conformity with the standard, the agency would consider whether its own test results would support a determination of noncompliance. These enforcement practices have long been a matter of public record.

Of course, a manufacturer that can show that it exercised due care in making its certification would still be subject to the statutory obligation to recall and remedy its vehicles that do not conform to the requirements of Standard Nos. 105 or 121, assuming that the agency or the manufacturer makes a determination that the vehicles did not comply with the applicable standard. However, this same obligation would apply even if the manufacturer had conducted full compliance testing, and used a flatbed semitrailer to burnish its tractors.

Thus, the agency does not believe that the amendment requiring NHTSA to burnish tractors using flatbed semitrailers necessarily puts manufacturers at risk of a civil penalty solely because they chose to use load racks during tractor burnish, *unless* the manufacturer had no reason to believe that a load rack was an adequate simulation of a trailer. If this were the case, the manufacturers' comments that they should be allowed to continue using load racks during burnish would have no merit. However, NHTSA does not understand the commenters to be making such an assertion, and has no reason to question the representativeness of load racks during the burnish procedures. Therefore, this rule adopts the tractor loading requirements during burnish that were proposed in the SNPRM.

In this same vein, the agency would like to point out that this final rule does not adopt a proposed change to section S6 of Standard No. 121. That proposed change would have allowed final stage manufacturers to "demonstrate compliance" with Standard No. 121, if the final stage manufacturer adhered to the instructions provided with the vehicle by the incomplete vehicle manufacturer and any intermediate stage manufacturer of the vehicle. The proposed language erroneously conveys the impression that the statutory and regulatory requirements for notification and remedy of noncomplying vehicles would not be applicable if a final stage manufacturer could show that it had adhered to the instructions provided with the incomplete vehicle by the incomplete vehicle manufacturer and any intermediate stage manufacturers.

What the proposed language was intended to do was to make clear that a final stage manufacturer can demonstrate compliance with the statutory requirement that it exercise due care in making certifications of compliance with Standard No. 121, if the final stage manufacturer can show that it adhered to the instructions provided with the incomplete vehicle by the incomplete vehicle manufacturer and any intermediate stage manufacturers. However, such a provision is redundant. 49 CFR 567.5 and 49 CFR 568.6 already permit the final stage manufacturer that has adhered to the instructions provided with the incomplete vehicle to so state, and rely on its adherence to the instructions provided with the incomplete vehicle as the basis for its certification of the vehicle. Since these regulatory requirements make clear that any final stage manufacturers satisfy their "due care" responsibilities for certification when they adhere to the instructions furnished with the incomplete vehicle, it is unnecessary to add a similar requirement to Standard No. 121. Therefore, this proposed change is not incorporated in this final rule.

Brake Adjustments During Burnish

The SNPRM proposed that the brakes shall be adjusted in accordance with the manufacturer's recommendations at specified intervals during the burnish procedure. As explained in the SNPRM, if a manufacturer recommends that brakes be inspected first and adjusted only if necessary, that recommendation would be followed. If the inspection were to show that no adjustment was necessary, none would be performed.

This change was proposed because past interpretations and preambles have repeatedly stated that brake adjustments are permitted during burnish. Since these adjustments are permitted, it is necessary that the compliance test procedures specify how often and when the adjustments will be made. Otherwise, the standards would incorporate a potential source of variability, and would give rise to the problems described above in the *Tractor-Trailer Loading During Burnish* section.

Ford commented that it had no objections to the brake adjustment provisions proposed in the SNPRM. MVMA commented that it agreed with the proposed brake adjustment provisions.

However, Lucas disagreed with the proposal. It commented that brake adjustments should only be required during burnish if such adjustments are necessary to obtain the specified rate of deceleration during the burnish. The agency did not propose or intend to *require* brake adjustments unless the manufacturer recommends them at that time. If the vehicle manufacturer recommends that the brakes be inspected and adjusted only if certain conditions exist, the brakes will *not* be adjusted unless those conditions exist. Therefore, it Lucas desires that its brakes not be adjusted unless certain conditions exist, it should recommend that the brakes be inspected and adjusted only if those conditions exist. Such a recommendation would accomplish Lucas's goal without making any change to the proposed requirement. Hence, no change to the proposed language has been made in response to this comment.

Abex also objected to this proposed requirement in its comments. Abex stated that regulating adjustments during burnish was, in its opinion, "unwarranted." The comment went on to state that, "We are not aware of any problems that have been encountered with the current procedure which does not control either the number of adjustments that can be made or the specific points during burnish where they can be made." As explained above and in the SNPRM, the reason for proposing this requirement was to establish uniformity and specificity for the agency's compliance test procedures. The need for uniformity and specificity are sufficiently compelling in the agency's judgment to warrant these provisions.

Abex continued by stating that many dynamometers have automatic controls, which means the manufacturers can conduct the burnish procedures "essentially unattended." The commenter stated that this feature allows manufacturers to frequently conduct the dynamometer burnish through the night or during weekends. According to Abex, if the agency requires manufacturers to make adjustments at specified times and intervals, the requirement will slow up the burnish, increase labor costs, or both.

As discussed above in the section on tractor-trailer loading during burnish, NHTSA is *not* requiring the manufacturers to follow these procedures for any testing they choose to conduct. These are the procedures the agency will follow during its compliance testing. As long as the manufacturer exercises due care in connection with the testing it conducts, it would satisfy its statutory obligations in connection with certifications. Abex apparently has reason to believe that brake adjustments are not necessary during dynamometer burnish, since it does not make such adjustments at present. Assuming that Abex's reasons are sufficient to establish that it exercised due care before certifying that its brakes complied with this requirement, *or* if Abex recommends no brake adjustments during burnish, Abex will not have to change its current testing practices under this new regulatory provision. If, on the other hand, Abex has an insufficient reasons for concluding that no brake adjustment is necessary during dynamometer testing, Abex should change its practice irrespective of any changes to the compliance test procedures. Therefore, the agency has concluded that the establishment of timing and frequency requirements for brake adjustment during burnish in the agency's compliance tests need not increase the costs or time required for any testing manufacturers choose to conduct. These requirements adopted as proposed.

Regulatory Impacts

A. Costs and Benefits to Manufacturers and Consumers

NHTSA has analyzed this rule and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. The main impact of this rule will be to provide burnish procedures that are more representative of the actual "break-in" that vehicles' brakes typically receive while in use on the nation's roads, without favoring any particular braking system design. As noted above, there are no stopping distance requirements currently in effect for service brakes on hydraulically braked vehicles, and no stopping distance requirements in effect for either service brakes or emergency brakes on air braked vehicles. Hence, these new burnish procedures will not affect certifications of compliance by manufacturers of those brake systems.

It is possible that the new burnish procedures could affect certifications of compliance with applicable stopping distance requirements for parking brake systems. The extent to which the changed burnish procedures will affect those certifications is uncertain. No commenter submitted evidence that any complying parking brake systems will no longer comply as a result of the change in burnish procedures. To address this possibility, however, this rule provides for a five year transition period to the new burnish procedures. During this transition period, manufacturers may continue to certify vehicles using the old burnish procedures. At the same time, the manufacturers can gain experience with the effects of the new burnish procedure's effect on the performance of their braking systems. The transition period will allow time for the manufacturers to make appropriate changes to their braking systems in an orderly fashion, and at minimal cost. Because the agency anticipates that this rule will have only minimal economic impacts, it has not prepared a full regulatory evaluation.

B. Small Business Impacts

The agency has also considered the impacts of this rule as required by the Regulatory Flexibility Act. I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. Few of the truck tractor manufacturers affected by this burnish procedure are small entities. Many of the trailer manufacturers may qualify as small entities. However, this rule will not significantly increase the production or certification costs for those manufacturers that do qualify as small entities. There are currently no stopping distance requirements applicable to trailers. Thus, these new burnish procedures will not make it more difficult for small manufacturers of trailers to certify compliance with service brake stopping distance requirements. Standard 121 specifies parking brake requirements for air braked trailers, but trailer manufacturers, except possibly the largest trailer manufacturer who also makes brakes, usually depend on their brake manufacturer to provide the information necessary for certification to the parking brake requirements. Accordingly, any increased certification burden for parking brake systems that might be associated with this new burnish procedure would be borne by brake manufacturers (which generally do not qualify as small entities) and the large trailer manufacturers. Small organizations and governmental jurisdictions will be affected as purchasers of these vehicles. However, the cost impacts of this rule will be minimal, as described above. Accordingly, a regulatory flexibility analysis has not been performed.

C. Environmental Impacts

NHTSA has considered the environmental implications of this rule, in accordance with the National Environmental Policy Act, and determined that it will not significantly affect the human environment. Accordingly an environmental impact statement has not been prepared.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

In consideration of the foregoing, 49 CFR 571.105, *Hydraulic Brake Systems*, and 49 CFR 571.121, *Air Brake Systems*, are amended as follows:

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.105 Standard No. 105; Hydraulic brake systems.

1. S7.4.2 of § 571.105 is amended by revising S7.4.2.1 and S7.4.2.2 to read as follows:

* * * * *

S7.4.2 *Vehicles with GVWR greater than 10,000 pounds.*

S7.4.2.1 *Burnish.* Vehicles manufactured before September 1, 1993 may be burnished according to the procedures set forth in S7.4.2.1(a) or S7.4.2.1(b) of this section, at the manufacturers option. Vehicles manufactured on or after September 1, 1993 shall be burnished according to the procedures set forth in S7.4.2.1(b) of this section.

(a) Burnish the brakes by making 500 snubs at 10 fsps in the sequence specified in Table IV and within the speed ranges indicated. Except where an adjustment is specified, after each brake application accelerate to the next speed specified and maintain that speed until making the next brake application at a point 1 mile from the initial point of the previous brake application. If a vehicle cannot attain any speed specified in 1 mile, continue to accelerate until the specified speed is reached or until the vehicle has traveled 1.5 miles from the initial point of the previous brake application, whichever occurs first. If during any of the brake applications specified in Table IV the hottest brake reaches 550 °F ± 50 °F, make the remainder of the 500 brake applications from that snub condition, except that a higher or lower snub condition shall be followed (up to the 60 mph initial speed) as necessary to maintain a hottest brake temperature of 500 °F ± 50 °F. However, if at a snub condition of 40 to 20 mph, the temperature of the hottest brake exceeds 500 °F, make the remainder of the 500 brake applications from that snub condition, without regard to brake temperature. The brakes shall be adjusted three times during the burnish procedure, in accordance with the manufacturer's recommendations, after 125, 250, and 375 snubs.

TABLE IV

Series	Snubs	Snub conditions (highest speed indicated, miles per hour)
1	175	40-20
2	25	45-20
3	25	50-20
4	25	55-20
5	250	60-20

(b) Burnish the brakes by making 500 snubs between 40 mph and 20 mph at a deceleration rate of 10 fsps. Except where an adjustment is specified, after each brake application accelerate to 40 mph and maintain that speed until making the next brake application at a point 1 mile from the initial point of the previous brake application. If the vehicle cannot attain a speed of 40 mph in 1 mile, continue to accelerate until the vehicle reaches 40 mph or until the vehicle has traveled 1.5 miles from the initial point of the previous brake application, whichever occurs first. The brakes shall be adjusted three times during the burnish procedure, in accordance with the manufacturer's recommendations, after 125, 250, and 375 snubs.

S7.4.2.2 *Brake adjustment—post burnish.* After burnishing, adjust the brakes in accordance with the manufacturer's recommendations.

* * * * *

2. S7.6 of § 571.105 is revised to read as follows:

S7.6 *First reburnish.* Repeat S7.4, except make 35 burnish stops or snubs. In the case of vehicles burnished in accordance with S7.4.2.1(a) of this section, reburnish the vehicle by making 35 snubs from 60 to 20 mph, but if the hottest brake temperature reaches 500 °F ± 50 °F, make the remainder of the brake applications from the highest snub condition listed in Table IV that will maintain the hottest brake temperature at 500 °F ± 50 °F. If at a snub condition of 40 to 20 mph, the temperature of the hottest brake exceeds 550 °F, make the remainder of the 35 brake applications from that snub condition without regard to brake temparture.

§ 571.121 Standard No. 121; Air brake systems.

3. S6 of § 571.121 is revised to read as follows:

S6 *Conditions.* The requirements of S5 shall be met by a vehicle when it is tested according to the conditions set forth below, without replacing any brake system part or making any adjustments to the brake system except as specified. Except as otherwise specified, where a range of conditions is specified, the vehicle must be capable of meeting the requirements at all points within the range.

4. S6.1 of § 571.121 is amended by revising S6.1.1 and S6.1.8.1 to read as follows:

S6.1 *Road test conditions.*

S6.1.1. Except as otherwise specified, the vehicle is loaded to its gross vehicle weight rating, distributed proportionally to its gross axle weight ratings. During the burnish procedure specified in S6.1.8, truck tractors shall be loaded to their GVWR, by coupling them to an unbraked flatbed semitrailer, which semitrailer shall be loaded so that the weight of the tractor-trailer combination equals the GVWR of the truck tractor. The load on the unbraked flatbed semitrailer shall be located so that the truck tractor's wheels do not lock during burnish.

* * * * *

S6.1.8 * * *

S6.1.8.1 Vehicles manufactured before September 1, 1993 may be burnished according to the procedures set forth in S6.1.8.1(a) or S6.1.8.1(b) of this section, at the manufacturers option. Vehicles manufactured on or after September 1, 1993 shall be burnished according to the procedures set forth in S6.1.8.1(b) of this section.

(a) With the transmission in the highest gear appropriate for the series given in Table IV, make 500 brake applications at a decleration rate of 10 fsps, or at the vehicles maximum deceleration rate if less than 10 fsps, in the sequence specified. Except where an adjustment is specified, after each brake application accelerate to the next speed specified and maintain that speed until making the next brake application at a point 1 mile from the initial point of the previous brake application. If a vehicle cannot attain any speed specified in 1 mile, continue to accelerate until the specified speed is reached or until the vehicle has traveled 1.5 miles from the initial point of the previous brake application, whichever occurs first. If during any of the brake applications specified in Table IV the hottest brake reaches 550° F, make the remainder of the 500 brake applications from that snub condition, except that a higher or lower snub condition shall be used as necessary to maintain an after-stop temperature of 500° F ± 50° F. However, if at a snub condition of 40 to 20 mph, the temperature of the hottest brake exceeds 550° F, make the remainder of the 500 brake applications from that snub condition, without regard to brake temperature. The brakes shall be adjusted three times during the burnish procedure, after 125, 250, and 375 snubs and after completing this burnish, with each adjustment made in accordance with the manufacturer's recommendations. Any automatic pressure limiting valve is in use to limit pressure as designed, except that any automatic front axle pressure limiting valve is bypassed if the temperature of the hottest brake on a rear axle exceeds the temperature of the hottest brake on a front axle by more than 125° F. A bypassed valve is reconnected if the temperature of the hottest brake on a front axle exceeds the temperature of the hottest brake on a rear axle by 100° F or more.

Series	Snubs	Snub conditions (highest speed indicated, miles per hour)
1	175	40–20
2	25	45–20
3	25	50–20
4	25	55–20
5	250	60–20

(b) With the transmission in the highest gear appropriate for a speed of 40 mph, make 500 snubs between 40 mph and 20 mph at a deceleration rate of 10 fsps, or at the vehicle's maximum deceleration rate if less than 10 fsps. Except where an adjustment is specified, after each brake application accelerate to 40 mph and maintain that speed until making the next brake application at a point 1 mile from the initial point of the previous brake application. If the vehicle cannot attain a speed of 40 mph in 1 mile, continue to accelerate until the vehicle reaches 40 mph or until the vehicle has traveled 1.5 miles from the initial point of the previous brake application, whichever occurs first. Any automatic pressure limiting valve is in use to limit pressure as designed. The brakes shall be adjusted three times during the burnish procedure, in accordance with the manufacturer's recommendations, after 125, 250, and 375 snubs, and shall be adjusted after burnish in accordance with the manufacturer's recommendations.

* * * * *

5. S6.2.6 of § 571.121 is revised to read as follows:

S6.2 *Dynamometer test conditions.*

* * * * *

S6.2.6. Brakes are burnished before testing as follows: Place the brake assembly on an inertia dynamometer and adjust the brake as recommended by the brake manufacturer. Make 200 stops from 40 m.p.h. at a deceleration of 10 f.s.p.s., with an initial brake temperature on each stop of not less than 315° F and not more than 385° F. Make 200 additional stops from 40 m.p.h. at a deceleration of 10 f.s.p.s. with an initial brake temperature on each stop of not less than 450° F and not more than 550° F. The brakes shall be adjusted three times during the burnish procedure, after 100, 200, and 300 stops, and at the conclusion of the burnishing, in accordance with the manufacturer's recommendations.

BILLING CODE 4910–59–M

---

49 CFR Part 571

[Docket No. 88–01, Notice 01]

Federal Motor Vehicle Safety Standards; Fuel System Integrity

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Technical amendment; final rule.

SUMMARY: This notice makes a technical amendment to Figure 2 of Standard No. 301 to correct the ground clearance dimension specified in the figure for the moving contoured barrier used in testing the fuel system integrity of school buses. Currently, Figure 2 specifies the ground clearance to the lower edge of the contoured impact surface as 12.25 inches (311 mm.). The text of the standard refers to the same dimension as 5.25 ± 0.5 inches. This amendment corrects Figure 2 to reflect the agency's intent that the ground clearance to the lower edge of the contoured impact surface is 5.25 inches (133 mm.).

FOR FURTHER INFORMATION CONTACT: Mr. Guy Hunter, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590. Telephone (202) 366–4915.

EFFECTIVE DATE: April 13, 1988.

SUPPLEMENTARY INFORMATION: The Blue Bird Body Company (Blue Bird), a school bus manufacturer, has brought to the agency's attention that corrective action should be taken to remedy a discrepancy in the moving contoured barrier specifications in Standard No. 301. Blue Bird informed the agency that there appeared to be a conflict in the standard about the correct ground clearance of the contoured impact surface used in the school bus impact test of the standard. Paragraph S7.5.1 of the standard refers to the dimension between the ground to the lower edge of the impact surface as 5.25 ± 0.5 inches, while Figure 2 of the standard shows the ground clearance to be 12.25.

This amendment corrects Figure 2 to reflect the agency's intent that the ground clearance to the lower edge of the contoured impact surface is 5.25 inches (133 mm.). NHTSA adopted the use of the contoured barrier in a final rule issued on October 15, 1975 (40 FR 48352). In the April 16, 1975 proposal to the rule (40 FR 17036), NHTSA stated that:

> The contoured barrier would incorporate the moving barrier specifications of SAE Recommended Practice J972a (March 1973). However, the impact surface of the barrier would be at a height 30 inches above the ground level, rather than 37 inches as specified in the SAE provision. Studies have shown that a 30-inch test height is more representative of actual collisions. This would be a typical engine height of vehicles that might impact a school bus.

Thus, in S7.5.1 of the standard, the agency adopted the ground clearance as 5.25 inches ± 0.5 inches to ensure that the top of the barrier would be 30 inches from the ground. In Figure 2, the agency apparently inadvertently incorporated the barrier dimensions directly from the SAE Recommended Practice J972a, without making the necessary 7 inch adjustment in the ground clearance dimension.

The agency has therefore concluded that a technical correction to Figure 2 is required to reflect NHTSA's true intent. The agency is amending the table marked "Dimensions" in the figure by changing the "12.25" inch and "311" mm. dimensions for letter "D" (referring to the distance between the ground to the lower edge of the impact surface) to "5.25" inches, and "133" mm., respectively.

Because the amendment is corrective in nature and imposes no additional burden upon any person, it is hereby found that notice and comment thereon are not necessary, and that for good cause shown that an effective date earlier than 180 days after issuance of the rule is in the public interest. The amendment is effective upon 30 days after publication in the **Federal Register**.

NHTSA has considered this amendment and has determined that it is not major within the meaning of Executive Order 12291 "Federal Regulation" or significant under Department of Transportation regulatory policies and procedures, and that neither a regulatory impact analysis nor a regulatory evaluation is required. The amendment imposes no additional requirements nor alters the cost impacts of requirements already adopted.

NHTSA has analyzed this rule for purposes of the National Environmental Policy Act. The rule will have no effect on the human environment since it clarifies an existing requirement.

The agency has also considered the impact of this amendment under the Regulatory Flexibility Act. I certify that the amendment will not have a significant economic impact on a substantial number of small entities.

Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles, those businesses affected by the amendment, generally are not small businesses within the meaning of the Regulatory Flexibility Act. Any manufacturer who is a small business within the meaning of the Act will not be significantly affected since this corrective amendment only clarifies a previously adopted requirement and imposes no additional requirements. Finally, small organizations and governmental jurisdictions will not be affected by this amendment since prices will not be impacted.

In consideration of the foregoing, Part 571 is amended to read as follows:

PART 571—[AMENDED]

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1407; delegation of authority at 49 CFR 1.50.

§ 571.301 [AMENDED]

2. In § 571.301, Figure 2 is revised as follows:

Issued on March 8, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1030

[Docket No. AO-361-A25]

Milk in the Chicago Regional Marketing Area; Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision recommends that provisions of the Chicago order authorizing the market administrator to require reserve supply plants to ship milk to bottling plants, when called upon to do so, be eliminated. Such provisions would be replaced with minimal supply plant shipping requirements of three percent for the months of August and January, and five percent for each month of September through December. If these requirements are met, the supply plants generally would be pool plants during February through July without making any shipments. Handlers would be permitted to form units of their own plants, or to form units with other handlers, in order to meet the shipping requirements by shipping milk from the plant or plants best situated to make the shipments. However, units would have to ship twice the percentage of milk required to be shipped from individual plants. Both the market administrator and the Director of the Dairy Division would have limited authority to temporarily change the shipping requirements, if necessary.

Other changes would reduce the touch-base requirements, eliminate percentage limits on diversions, eliminate storage requirements for supply plants, and add two location adjustment zones for adjusting Class I and uniform prices to reflect distance from Chicago.

The recommended actions are based on a record developed at a public hearing held in Madison, Wisconsin, on June 2-4, 1987, to consider industry proposals to amend the marketing order. The hearing was requested by a group of 11 dairy farmer cooperatives and by four proprietary handlers.

DATE: Comments are due on or before April 4, 1988.

ADDRESS: Comments (four copies) should be filed with the Hearing Clerk, Room 1079, South Building, United States Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-4829.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

Much of the economic impact of certain recommendations incorporated in this decision will fall on smaller milk manufacturing operations or supply plants that would have to ship a small portion of their supplies to the market for fluid use. However, other provisions recommended would mitigate the effects by allowing handlers to combine their operations into units so that the required shipments could be made in an efficient manner from plants better situated. Also, the shipping requirements adopted are smaller than proposed by proponents of the amendments. Additionally, other actions would lessen, in minor ways, the burden of regulation for all pool handlers. As a result, the actions taken here are not expected to have a significant economic impact on a substantial number of small entities.

Prior Documents in This Proceeding

Notice of Hearing: Issued May 15, 1987; published May 19, 1987 (52 FR 18894).

Extension of Time for Filing Briefs: Issued July 31, 1987; published August 6, 1987 (52 FR 29196).

Emergency Partial Decision: Issued October 8, 1987; published October 15, 1987 (52 FR 38235).

Order Amending Order: Issued October 20, 1987; published October 23, 1987 (52 FR 39611).

Preliminary Statement

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and the order regulating the handling of milk in the Chicago Regional marketing area. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Interested parties may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, DC, 20250, by the 21st day after publication of this decision in the **Federal Register**. Four copies of the exceptions should be filed. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendments set forth below are based on the record of a public hearing held at Madison, Wisconsin, on June 2-4, pursuant to a notice of hearing issued May 15, 1987 (52 FR 18894).

The material issues on the record of hearing relate to:

1. Marketwide service payments.
2. Performance standards for pool plants.
3. Definition of supply plant and reserve supply plant.
4. Definition of producer milk.
5. Location adjustments.
6. Omission of a recommended decision and the opportunity to file written exceptions thereto with respect to material issue number 1.

This decision considers issues 2 through 5. A prior decision dealt with issues 1 and 6.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

2. *Performance standards for pool plants.* The order should be amended to require that supply plants must ship 3 percent of their receipts of milk in August and January, and 5 percent in each month of September through December, subject to temporary revision by the Director of the Dairy Division. Also, the market administrator should have limited authority to increase or decrease the shipping requirements for up to three months, and to require minimal shipments in other months. Handlers could form shipping "units" to make shipments at twice the level required for individual plants, once a monthly minimum shipping requirement from each plant has been satisfied. However, each plant in a unit would have to ship at least 47,000 pounds of milk, or 3 percent of its receipts of milk from producers, whichever is less, to a distributing plant(s) in each of five months during the six-month period of August through January.

a. *Minimum shipping requirements for supply plants.* The order currently defines two types of milk-supplying plants. One is a supply plant, from which must be shipped each month to distributing plants a percentage of milk receipts at least equal to the marketwide Class I utilization percentage for the same month the previous year. In December 1986 only five out of 107 supply-type plants fit into this category. The other 102 plants were reserve supply plants. Such plants are required to ship only one 47,000-pound load of milk each year, unless included in a call for shipments issued by the market administrator.

The current performance provisions for supply plants and reserve supply plants were adopted in 1984 in order to provide a mechanism to assure adequate shipments for the market's fluid (Class I) needs, while at the same time not requiring unneeded (and therefore inefficient and costly) shipments. Under this system about 40 percent of the market's supply-type plants have been associated with the market without shipping any more than a fraction of their milk supplies during the last two years. At the same time, some handlers complain that they are unable to get all the milk they want for fluid milk uses, while cooperatives maintain that the present system for pooling supply plants results in inequities.

Four proprietary handlers; namely, Dean Foods Company, Cedarburg Dairy, Inc., Certified grocers Midwest, Inc., and Hawthorn-Mellody, Inc. (Dean et al.), proposed monthly shipping percentages for all supply plants during the months of August through January. The required minimum shipment during August and January would be five percent of Grade A milk received at the plants from producers, and during September through December it would be 10 percent. Qualifying shipments would not include those made to distributing plants fully regulated under other Federal orders.

In addition, the proposal would provide the Director of the Dairy Division the authority to increase or decrease the shipping percentages by up to the full shipping percentage applicable that month. Also, the proposal would eliminate the reserve supply plant and call provisions.

Central Milk Producers Cooperative (CMPC), a federation of 11 dairy-farmer cooperatives, also offered a proposal to establish shipping requirements for all supply plants during the August-January period. CMPC's proposal, however, is basically a modification of Dean et al.'s proposal for supply plant shipping requirements. As such, CMPC proposed that two or more cooperatives may form a unit of their plants for the purpose of meeting the shipping percentages of the order and that these plants must be located within the State of Wisconsin or within the portion of the State of Illinois which lies in the marketing area. CMPC further proposed that the shipping percentages for units of cooperatives be double that for single plants in all months. However, the Director of Dairy Division should only be given the authority to increase or decrease shipping percentages up to the maximum percentage for a single plant during a certain month. For example, during the month of August, the director would be able to increase the shipping percentage for a single plant or a unit a maximum of 5 percentage points, making the effective shipping obligation 10 percent for single plants and 15 percent for units; the maximum decrease allowable would yield effective shipping percentages for single plants and units of zero percent and 5 percent, respectively.

Under CMPC's proposal, the director's authority would be effective during the months of August through January. For the remaining months of February through July, the call provision, already in the order, would apply. However, CMPC's proposal would eliminate the reserve supply plant provision, leaving each supply plant subject to a call. Any plant that fails to meet a call would lose its eligibility to pool for one year.

CMPC would include as qualifying shipments those made to other order plants for Class I use. If a plant does not earn the "free-ride" for the months of February through July or if a plant is new on the market, then CMPC proposed that it should ship a minimum of 5 percent during those months.

At the hearing, Kraft, Inc. (Kraft); the Trade Association of Proprietary Plants (TAPP); Wisconsin Cheesemakers Association (WCMA); and two farmer organizations, namely, National Farmers Organization (NFO) and Farmers Union Milk Marketing Cooperative (FUMMC) opposed proposals to restore minimum shipping requirements. However, should the shipping requirements be adopted, then Kraft, NFO, and FUMMC would support the unit pooling concept.

Dean et al. collectively operate six distributing plants, three supply plants, and three reserve supply plants regulated under the Chicago Regional order. In support of the proposal for reinsertion of specific supply plant shipping percentages for certain months of the year, the spokesman for Dean et al. claimed that presently only more money moves milk for fluid uses when supplies become tight. The Chicago order, he said, has not been effective in moving milk to bottlers since the "call" and reserve supply plant provisions, which virtually eliminated shipping requirements, became effective. His belief is that without the CMPC over-order pricing program, the bottlers could not have received enough milk without going out into the open market for it, causing disruptive action.

Proponent introduced exhibits into the record to show the increase in over-order charges administered by CMPC starting in the fall of 1984. He attributed the 79 cents per hundredweight increase between August and December 1984 to a combination of short supplies and high demand for manufacturing milk. He further pointed out that similar circumstances in the fall of 1986 contributed to over-order charges ranging from $1.20 to $2.50 per hundredweight. Although they did not relish the idea of high over-order premiums, Dean et al. were glad to be assured of a steady supply of milk. However, the spokesman added that there were times when even the high over-order charges could not guarantee a full supply of milk. As a result, he said, plant schedules were disrupted and in extreme cases bottling lines were temporarily shut down. He claimed that

milk could not be pried loose from cheese plants; therefore, CMPC had to go to other markets such as Upper Midwest, Southern Michigan, and Eastern Ohio-Western Pennsylvania, for milk supplies. His belief is that such circumstances should not arise in a market that has an average Class I utilization of 20 percent.

It is Dean, et al.'s belief that the manufacturers should share the milk with the fluid handlers who under the order share the Class I differential with them. Because manufacturers will not voluntarily ship milk even when high over-order charges are paid, he said, then the order, for equity's sake, should stipulate that for any supply plant to share in the market's pooled funds, such plant must perform. He contends that although in 1984 it may have been thought that efficiency would be served if shipping standards were eliminated, it is apparent now (1987) that equity among handlers has suffered and the market cannot function in an orderly fashion. The spokesman added that the shipping requirements of 5 percent in August and January and 10 percent in September through December, which amounts to 17 percent of the monthly Class I needs, is a step in the right direction toward equity.

Proponent claimed that the "call" provision cannot be effectively used in the Chicago Regional market because most distributing plants use significant amounts of milk in Class II and Class III uses and thus do not qualify to petition the market administrator to implement a call for shipments from reserve supply plants to distributing plants for Class I use. He added that other markets have shipping requirements which simply state that supply plants must ship a specified percentage of their supplies to distributing plants. Such provisions do not specify how the distributing plants must use the milk but simply require supply plants to perform in order to participate in the pool.

Although proponent did not espouse the idea of allowing "units" to meet the requirements of the order, Dean et al. implied it would not object to units if they were legitimate ones. He further explained that each plant in a unit would have to be operated by the owner. He firmly stated that he did not want a return to the days of "sham" leasing whereby a plant became part of a unit by virtue of a lessee paying one dollar to the lessor who in turn would pay the lessee a qualifying fee in order for the plant to be part of the lessee's unit. Under such a scheme, the lessor's plant would not have to ship any milk, but would have the benefit of the uniform price to help pay producers a competitive price for their milk.

A spokesman for Hawthorn-Mellody, Inc., testified in support of the positions taken by the Dean et al. witness at the hearing.

CMPC is composed of the following 11 dairy cooperatives: Alto-Golden Guernsey Cooperative, Associated Milk Producers Incorporated-Morning Glory Farms Region, Independent Milk Producers Cooperative, Lake-to-Lake Division of Land O'Lakes Dairy Cooperative, Manitowoc Milk Producers Cooperative, Mid-West Dairymen's Company, Milwaukee Cooperative Milk Producers, Outagamie Milk Producers Cooperative, Southern Milk Sales, Wisconsin Dairies Cooperative, and Woodstock Progressive Milk Producers Association. CMPC members account, in the aggregate, for approximately 80 percent of the milk delivered monthly to Order 30 pool plants. CMPC member plants (29 reserve supply plants and two supply plants) receive approximately 46 percent of Order 30 producerr milk and ship approximately 38 percent of such receipts to Order 30 distributing plants.

CMPC's spokesman claimed that shipping standards are needed because the CMPC membership alone cannot supply all the needs of the fluid plants and still operate their own plants in a stable and economic manner. Although CMPC originally stated that they would make sure that the fluid needs of the market were satisfied when the call and reserve supply plant provisions were first made part of the order, CMPC now, after a few years' experience, states that they cannot guarantee a full supply by themselves. The spokesman pointed out that the CMPC program of over-order charges, in general, assures that fluid orders are filled with CMPC and other handler milk. However, when milk supplies are tight, such as was the case in the fall of 1986 and early 1987, no matter what the over-order charges are, the requested milk cannot be obtained from pool plants outside of CMPC. Furthermore, he stated that when such circumstances occurred in the past, CMPC was forced to look outside the order to get the necessary milk supplies. The spokesman concluded that if a handler is willing to draw from the pool the proceeds generated by Class I, then such handler should also be willing to assist in supplying the needs of the Class I handlers.

CMPC proposed adoption of unit pooling because the market as well as CMPC would not benefit if each plant were forced to ship. In fact, CMPC's spokesman stated that they would not be interested in shipping standards if unit pooling for cooperatives is not permitted.

CMPC's spokesman claimed that the formation of units would prevent uneconomic movements of milk from distant supply plants and would promote the supply of close-in milk. However CMPC would only permit plants of cooperatives to form such units. CMPC's spokesman did point out that one handler with two or more plants should be permitted to form a unit of such plants for shipping purposes.

CMPC supported giving the director discretionary authority to increase or decrease the shipping standards, stating that it lends flexibility to the shipping requirements which in turn leads to a stability of supply for Class I handlers. The spokesman cited how useful such a provision was in the past under the Chicago Regional order, being utilized 39 months (37 decreases and two increases) from 1968 to September 1984. And, for similar reasons, CMPC wishes to keep the call provision in place for the months when the shipping requirements and director's authority would not apply. Furthermore, the spokesman pointed out that all supply plants or units of such would be subject to a call since the reserve supply plant provisions would be eliminated.

Kraft, a proprietary handler, operates five reserve supply plants regulated under Order 30. Kraft's witness revealed that during the fall-winter period of 1986, Kraft pooled approximately 45 million pounds of milk per month and shipped between 8 and 10 percent of this to Order 30 distributing plants.

Kraft's witness put forth several arguments against monthly minimum shipping requirements for supply plants. One was that marketing conditions have not changed to a degree necessary to warrant a change in the pool plant requirements since 1984, when a prior hearing was held to consider shipping requirements. To bolster his argument, he referred to an exhibit which could be used to compare statistics for the first four months of 1985 with corresponding months of 1987 to show that Class I producer milk increased to a lesser extent than the total amount of milk in the pool increased (i.e., increases of 2.3 percent and 3.7 percent, respectively).

Kraft's witness also claimed that since a call has not been invoked since its inception, one can assume that the Class I needs of the market have been satisfied. Furthermore, he said the real issue does not concern the fluid needs of the market, but rather it concerns the Class II needs of the distributing plants.

Kraft's witness also pointed out that the disruptive situation which proponents fear would come about if fluid handlers should have to go out into the marketplace and bid up the price of milk, is anything but disruptive to the producers themselves who would be the beneficiaries of the increased competion. Rather, it is Kraft's belief that mandatory shipping requirements could have a negative impact on producers' returns because the increase in the amount of milk searching for a fluid recipient would most likely weaken the over-order pricing system.

However, Kraft's witness stated that should the Secretary adopt shipping standards, then these must include unit pooling provisions which would be extended to both proprietaries and cooperatives. Kraft suggested that such provision should be modeled after that of the Southern Michigan order. The witness said that the Southern Michigan unit provision allows for two or more proprietary handlers to join into a marketing agreement, which is certified by the market administrator, for the purpose of meeting pool plant shipping requirements. Kraft believes that because these agreements have the market administrator's approval there should be no concern about so-called "sham" lease arrangements.

Kraft's witness further stipulated that a unit's shipping requirement should be the same as an individual plant's shipping requirement. He also suggested that plants in a unit should be located within the marketing area or in the State of Wisconsin.

In addition, the witness suggested that qualifying shipments include those made to other order distributing plants. Kraft believes that such inclusion maintains the efficiency of the order, as demonstrated by an incident whereby Associated Milk Producers Incorporated (AMPI), asked Kraft to ship milk to distributing plants regulated under the Central Illinois order because of Kraft's closer location to those plants, in order to free-up AMPI milk for a Chicago customer.

A spokesman for WCMA voiced the association's opposition to mandatory monthly shipping requirements saying that the present order's call and reserve supply plant provisions are sufficient for assuring that the fluid needs of the market are satisfied. He pointed out that since the call provision was made part of the Chicago order, only on two occasions did the market administrator have reason to investigate whether conditions warranted its use. He added that, in both cases, the initial investigation was all that was needed to cause some plants to make milk available to distributing plants.

He further stated that proponents are only interested in fulfilling their Class I needs at favorable prices. However, he said, there are several reasons why manufacturers should not have to ship for Class II uses, one being that it is not the Federal order's responsibility to make milk available for Class II uses. This opinion, he said, is backed by a 1985 decision in which the Secretary turned down a similar request for shipping requirements. That decision stated that the Department would not force shipments for Class II uses. Furthermore, the spokesman said that Class II adds virtually nothing to the blend price.

The spokesman noted that the levels of proposed shipping percentage are not sufficient to bring about enough milk to cover the market's Class I needs. He expressed WCMA's views that if those who presently ship greater amounts of milk than that which would be required of them, adjust such shipments down to the required levels, then the market's Class I needs would be short. Nonetheless, WCMA's major concern involves unnecessary and uneconomic shipments that could ensue because of the shipping requirements.

TAPP held a view similar to that of WCMA, stating that the present order's call and reserve supply plant provisions assure the availability of adequate supplies of milk for fluid uses. TAPP's representative further stated that the real problem is that fluid handlers may not have enough milk available, at a favorable price, to fill their Class II needs. TAPP's witness claimed that unfavorable prices, or high over-order charges, are the result of heavy out-of-state shipments to the Southeast due to the "whole-herd-buyout" program. However, it is TAPP's belief that shortly after the supply-reduction program ends, then the excessive out-of-state shipments will also end, and the Chicago market will once again have abundant supplies of milk.

TAPP's witness presented the group's belief that it is not the responsibility of the Federal order to assure a full supply of milk for Class II uses. In addition, he stated TAPP's view that shipping requirements would depress handling charges which, he claimed, would be better set by the cooperatives outside of the Federal order program, following the dictates of supply and demand, and other competitive factors. It is adequate over-order charges, he said, that insure sufficient milk supplies and solve equity problems that exist between supply plants that ship to distributing plants and those that do not ship.

Both NFO and FUMMC opposed the reinstitution of shipping requirements in Order 30 because, their spokesmen claimed, to do so would have a negative impact on producer returns. FUMMC's representative added that comparative marketing facts for March-April 1983 and 1987 show that in 1987 there was more producer milk available, but less of it used in Class I. Thus, the FUMMC representative stated that if the market changes reveal anything, they show that the market needs the call and reserve supply plant provisions more today than it did back in 1983. However, both agree that should the Department put in shipping requirements, then, for reasons of efficient milk movement, handlers should be able to form units to meet such requirements.

The issue of shipping standards for supply plants involves two key questions: (1) Are fluid milk plants receiving adequate supplies of milk for Class I use? and (2) Would shipping requirements improve equity among market participants?

The question of adequate supplies of milk for Class I use has different answers, depending on who answers the question. The proponents of shipping standards (Dean, et al.) did not claim that in the last three years they were unable at any time to supply the packaged fluid milk products that their customers wanted. On the other hand, representatives for two handlers, Hawthorn-Mellody and Dean Foods both testified that they experienced some problems with specific plant operations because they were unable to get all the milk they wanted when they wanted it. Accordingly, bottling schedules sometimes had to be changed, and, in some cases, specific plant operations or even the entire plant was shut down for a few hours. However, both handler spokesman knew of no cases in the fall of 1986 when consumers were unable to obtain Class I or Class II products when and where they wanted them. These handlers maintain, nevertheless, that supplies were not adequate for their needs and that the order is not serving fully the purpose of assuring adequate Class I milk for bottling plants.

Another point of testimony was that in rather isolated instances in the fall of 1986 milk was obtained from sources outside the usual Chicago milkshed. Two examples noted were milk obtained from a plant in Pennsylvania and from plants in the Wisconsin portion of the Upper Midwest order. Milk also was obtained from other non-

Order 30 sources. The total non-Order 30 milk obtained by CMPC for its customers during August 1986 through January 1987 was about 4.3 million pounds. However, it must be noted that, according to one CMPC witness, this represented a very unusual situation and involved the largest amount of milk so obtained since 1968.

Opponents of the proposals to increase shipping requirements for supply plants maintained that the order does not need to be changed, pointing to the fact that the market administrator had not issued any calls for milk shipments since the call provisions were adopted in 1984.

The evidence leads to the conclusion that in the August 1986 through January 1987 period, the market's Class I milk needs were met, but just barely; and, that if more milk is needed from supply plants, it would represent only a small increase.

The question of equity is more difficult to quantify. Nevertheless, the fact is that since 1984 many reserve supply plants have maintained pool status and thus the benefit of the blend price, but have shipped very little milk to distributing plants. This is not surprising because the order has not required any more than this. Moreover, the location adjustment provisions have not facilitated movements of milk from more distant supply plants.

The decision to adopt the call provisions pointed out that it is difficult to achieve a balance between efficiency and equity. Based on the record of that proceeding, widespread support was indicated for the efficiencies of allowing milk supplies to be held in reserve, and thus pooled with shipments to be required only if the market administrator found it necessary to issue a call. Now, CMPC has concluded that such provisions lead to inequities in the marketplace. We find that the record supports this conclusion.

One of the exhibits introduced at the hearing shows that in September 1986 through January 1987 there were 102 plants that qualified as reserve supply plants. Fifty-six of those plants, which pooled milk equal to 41 percent of all milk pooled by reserve supply plants, shipped to distributing plants an average of only 1.1 percent of their producer milk receipts during the same months in which bulk milk was being imported from other order plants. At the same time, CMPC member cooperatives that operated supply plants shipped 38 percent of their milk supplies to distributing plants, and even then could not supply all the milk requested by their customers.

It is recognized that CMPC's definition of "distributing plants" includes some cottage cheese operations. However, it was estimated that about 85 percent of the CMPC shipments were Class I milk. Thus it is clear that CMPC members have shipped to bottling plants about one-third of their supply plant milk while more than 50 percent of reserve supply plants shipped an average of slightly more than one percent. In fact, 40 of those plants averaged shipments of only 0.2 percent of their receipts.

The proponent cooperatives now take the view, based on experience, that the reserve supply plant and call provisions have resulted in an inequitable situation for CMPC members. This occurs because the cooperatives cannot provide the level of supplies needed by the fluid market and at the same time operate their own facilities in a stable, economic manner. On the other hand, some manufacturing plant operators have been able to keep virtually all of their milk, as demonstrated by the low level of shipments for the group of 40 plants. Clearly, there is a lack of equity in performance between CMPC members and many other supply plant operators. Accordingly, equity among the market's supplying handlers will be improved if increased shipments are required. The next question, then, is how much should shipping requirements be increased?

Both proponents of shipping requirements proposed 5 percent in August and January, and 10 percent in September-December. Based on an exhibit prepared by the market administrator, adoption of this proposal would have brought forth additional shipments of milk averaging about 35 million pounds per month during the August-January periods beginning in August 1985 and ending in January 1987. This estimate assumes that other handlers would have maintained their same level of shipments. There is no way to evaluate the correctness of such an assumption based on information contained in the record. On the other hand, since the evidence indicates adequate supplies for Class I use during those periods, there is no justification for requiring supply plants to ship an additional 35 million pounds per month. Instead, the order should specify shipping requirements at 3 percent of receipts for August and January, and 5 percent for September through December.

It is not possible, given the data contained in the record, to estimate how much additional milk will be shipped as a result of adopting the lower requirements. All that can be said is that the lower requirements would be expected to bring forth less milk than the proposed requirements. This will improve somewhat the equity among supply plant operators, yet minimize any shipments above the level needed to assure adequate supplies for Class I use. Moreover, if the supply plant operators in CMPC were to cut back on their shipments to bottling plants, it is possible that there would not be adequate supplies for Class I use, absent a mechanism to require additional shipments.

Both Dean et al. and CMPC proposed eliminating the call provision in the fall months, and Dean et al. proposed eliminating the call provision entirely. Both proponents argued that the call provision would not function as they had expected it would when adopted. In its place, both proponents advocating providing the Director of the Dairy Division the authority to increase or decrease shipments in the fall months as a corollary provision to requiring all supply plants to ship more milk. The Director could increase or decrease the shipping requirments as necessary to either obtain additional supplies for Class I use or to prevent unneeded and therefore uneconomic shipments. A similar provision was in the order prior to adoption of the reserve supply plant and call provisions.

The proposal should be adopted in order to provide continued flexibility in attempting to balance shipments with Class I needs. However, the authority to temporarily increase or decrease shipping requirements should reside with both the market administrator and the Director. Thus, the market administrator could revise the shipping percentages by up to two percentage points for a maximum of three months. This provision will allow fine-tuning the shipping requirements on a timely basis. If a greater adjustment appeared to be necessary, the Director could, either on his own initiative or at the request of industry, temporarily increase or decrease the shipping requirements by up to 5 percentage points from those specified in the order for a long as the entire August-January performance period. In another discussion, it is concluded that handlers should be allowed to form units so that the shipping requirements might be met in the most economic fashion. Any increase or decrease specified under authority of either the market administrator or the Director of the Dairy Division would be applicable also to units in the same manner and in the same amount as for individual supply plants. Moreover, the authorities to increase or decrease shipping requirements should remain in effect throughout the year. Thus, even in months when there is no shipping requirement, if an analysis of market conditions convinced either the market administrator or the Director of the Dairy Division that shipments were needed, requirements could be imposed up to the limits authorized. This dual authority to make temporary adjustments should help the market operate in an orderly fashion.

Any supply plant that meets the shipping standards specified (or as otherwise temporarily revised) in each month of August through January should have automatic pool plant status in each of the following months of February through July, unless shipping requirements are imposed by either the market administrator or the Director of the Dairy Division. Any supply plant that fails to meet the August-January performance standards would be required to ship each month of February through July at least 3 percent of its receipts, unless otherwise increased by either the market administrator or the Director. The same requirement would apply to a new plant or a plant that had closed and later was reopened. The provisions just described will essentially replace the call provisions adopted in 1984, and will remove the need for defining a "reserve supply plant."

Opponents of shipping requirements argued that the call provision had functioned properly as demonstrated by the fact that no call has been implemented. They were also concerned that the imposition of shipping requirements would reduce producer returns, lower the level of over-order charges, and cause milk to move inefficiently and unnecessarily.

The lower level of shipments adopted in conjunction with the provisions for forming shipping units will tend to minimize the impact of providing greater equity through increased performance standards. The critical need, however, is to achieve better equity. Thus, manufacturing plant operators who use the pool monies contributed by bottling plant operators to help attract and maintain Grade A milk supplies will be required, in turn, to make available to bottling plants a small portion of those supplies.

CMPC's proposal to leave the call provisions in place during February through July, and to make all supply plants subject to a call for shipments should not be adopted. Rather, the provisions for temporary revisions by the market administrator and the Director of the Dairy Division should function to serve essentially the same purpose without the added complexity of order language necessary to leave the call provisions in the order, but applicable to only half of the year.

Similarly, if a plant that qualified for automatic pool status during February through July should fail to meet any shipping requirement imposed during that period by either party having authority to do so, such plant would then lose its "free ride" status for the remainder of the six-month period. Again, this differs from CMPC's proposal to deny pool status for one year to any supply plant that failed to make shipments required under a call. However, since all supply plants will be pooled on the basis of performance, and not merely a promise to perform if a call is issued, such a provision would be inconsistent with the other provisions adopted in this decision. If a pool supply plant failed to meet a temporarily imposed shipping requirement in only one month, but had shipped throughout the fall months, producers regularly associated with the market would be denied pool status for their milk for one year. Such a provision would not be acceptable.

Currently, supply plant and reserve supply plant shipments (other than agreed Class II or Class III) to distributing plants regulated under other Federal orders are considered to be qualifying shipments up to an amount equal to shipments to pool distributing plants during the month. Dean et al. proposed that this provision not apply under new shipping standards, while CMPC and others urged its continuance.

We conclude that this provision should continue, but with one modification, as follows: If a temporary revision is imposed (by either the market administrator or the Director of the Dairy Division), the additional shipments required under the temporary revision should go only to pool distributing plants. Put another way, if a determination is made that additional supplies are needed for Class I use at Order 30 distributing plants, then the additional shipments resulting from increased shipping requirements should be addressed to those needs.

Also, it should be noted that determination of the need for temporarily revising shipping standards will be based only on the Class I needs of the market. To reiterate what has been said in previous decisions, given the level of difference between Class II and Class III prices, the order will not force milk to be delivered to the market for a Class II use. However, it also should be pointed out that none of the proposals submitted for this hearing involved any exploration of how much milk must be received at a distributing plant in order to be able to package and distribute 100 pounds of fluid milk products. Although it was intimated throughout testimony that the 10 percent long provided in the order to cover such things as shrinkage, and cream separation is inadequate, this record cannot evaluate that number.

In any event, and contrary to the contention of opponents of adopting revised shipping percentages, it can be presumed that supplemental milk supplies needed by distributing plants in the low production months are for Class I use rather than Class II use. The volume of Class II use in the Chicago Regional market tends to vary seasonally in the same direction and essentially the same magnitude as the seasonal variation in the producer receipts. For example, during August 1986 through January 1987 the volume of Class II use was 6.9 percent lower than in the prior six-month period of February through July 1986, compared to a decline of 8.7 percent for receipts. By comparison, class I use was up 9.6 percent. Similarly, for the six-month period August 1985 through January 1986 compared to the prior February through July 1985 period, Class II use was down 3.1 percent and producer receipts were down 3.6 percent, while Class I use was up 6.2 percent.

b. *Formation of supply plant units.* Handlers should be allowed to make required supply plant shipments from any plant or plants that they operate, and which are located in the State of Wisconsin or in the portion of the State of Illinois that is included in the Chicago Regional order market area. Also, handlers should be allowed to jointly form shipping units. Such a provision will complement the shipping requirements being adopted so that the required shipments may be made in an efficient manner. However, each supply plant in a unit should be required to ship to distributing plants at least 3 percent of its receipts of milk from producers or 47,000 pounds of milk, whichever is less, in each of five months during the period of August through January. The shipping requirement for units should be double the requirement for individual plants; i.e., 6 percent in August and January, and 10 percent in September through December.

CMPC stated that units were an essential component of shipping requirements for supply plants. In fact, CMPC (a proponent of shipping requirements for supply plants) also stated that shipping requirements should not be adopted unless a unit provision also is adopted. Others, including several who opposed shipping

requirements, said that if shipping requirements nevertheless were adopted, then provisions for units should also be adopted. CMPC urged that only cooperatives be allowed to jointly form units. The spokesman did indicate that a proprietary handler with a multi-plant operation should be allowed to form a unit of its own plants.

CMPC's basis for allowing only two or more cooperatives to jointly form a unit is the reblending privilege granted cooperatives by the Agricultural Marketing Agreement Act of 1937. CMPC also believes that the abuses of selling pool qualification will return if multi-handler units are allowed. This later concern was often expressed at the hearing by others as well, including, Dean et al., who would support units only if they are legitimate units.

The basic reason for requiring shipments by supply plants, as stated earlier, is to achieve an improvement in equity by pool handlers through increased responsibility for supplying milk to meet the market's Class I needs. Equity is achieved at the handler level; it is not primarily a matter of equity among plants. Thus, beyond establishing basic criteria for plants to be pool plants, there is no clear cut need to require that a handler make the required shipments from each supply plant that the handler operates. The Class I needs of the market would appear to be as well served if the required amount of milk is shipped without regard to which particular plant or plants make the shipments.

Nevertheless, it is feasible to require each plant in a unit to ship at least 3 percent of its receipts of milk from producers or 47,000 pounds of milk, whichever is less, in each of five months during the period of August through January. This will demonstrate that the plant actually can make shipments. However, in order to allow smaller operations maximum flexibility, the monthly standard is not expressed as one load. Also, to avoid requiring a small plant to ship a disproportionately large percentage of its supplies in meeting the 47,000 pound requirement, a 3 percent of receipts alternative shipping requirement is provided.

The order will require, as CMPC proposed, that the shipping requirement for any unit, whether operated by a cooperative or proprietary organization(s), be double that required for the operator of an individual supply plant. Temporary revisions to increase shipping requirements would apply to units at the same rate specified for individual supply plants, not at twice the rate. The double-shipping requirement for units is one way to discourage abuse of the unit pooling privilege through leased plants or other arrangements that tend to accommodate the selling of pool qualification standards. Since the shipping requirements adopted are at low levels (3–5 percent), a unit would still be required to give up a relatively small portion of its milk supply in return for the privilege of pool participation.

It is necessary, as proposed, to specify that all plants included in a unit must be located in the State of Wisconsin or in that portion of the State of Illinois that is within the marketing area of the Chicago Regional order. Absent this restriction, plants in distant areas could become pool supply plants under the Chicago order by shipping just one load per month. Such is not the intent of the unit pooling provision. The geographic restriction is appropriate.

A major concern expressed at the hearing centered around the practice of handlers leasing plants to be included in a unit. Strong sentiments were expressed that any leased plants included in a unit must be controlled and operated by the handler. Various lease criteria were suggested as necessary to prevent a "sham" lease, such as where the pooling handlers pay one dollar per year and then receive a fee from the plant operator for pooling the milk. It was suggested for example, that the pooling handler must be held responsible for paying producers who deliver milk to the leased plant. Another suggestion was that the pooling handler must control the leased operation in order for it to be considered a bona-fide lease. Finally, there was a question about whether the operation of the leased plant should be accounted for in the books and records of the pool handler. The response was affirmative.

Because of the concern about sham leases and selling pool qualification, measures to prevent or at least minimize such practices should be adopted. Accordingly, it will be necessary to demonstrate that a leased plant meets the following conditions in order to be a pool plant in a unit:

1. The unit operator is responsible for paying producers who ship to the leased plant.

2. The unit operator controls and manages (either directly or indirectly) the leased plant;

3. The books and records of the unit operator reflect the on-going activities of the leased plant by including at least employee payroll records and the gross value of all producer milk pooled by the handler that operates the leased plant.

These requirements should serve to prevent, or at least inhibit the pooling of sham leases, especially when coupled with the doubled shipping requirements for units, and should satisfy the market administrator that the handlers involved have established a bona fide lease. These measures are adopted in direct response to industry concerns over past abuses of a unit pooling provision.

Any handler, or any two or more handlers should be allowed to form a unit of plants. The unit could include, for example, supply plants of two cooperatives, a cooperative and a proprietary handler, or two proprietary handlers. An agreement certified to the market administrator by all parties to the agreement will notify the market administrator as to which plants will be in a unit and which handler is responsible under the agreement for meeting the performance requirements. The market administrator should receive such certification and list of plants to be included in each unit by July 15 for the following August-July period. Changes in unit makeup may be made after advance notice in writing to the market administrator. If a unit does not meet its shipping requirement, the handler responsible under the order for the unit shall inform the market administrator which plant or plants shall be depooled. If the handler fails to do so, the market administrator shall determine which plant(s) will lose pool status by first eliminating the last plant on the list, then the next, and so on until deliveries are adequate to qualify the remaining plants in the unit. Inclusion of this provision will remove any uncertainty as to how the order will apply in the event a unit fails to meet the performance requirements. Each plant included in a unit during the months of February through July must have been qualified as a pool plant, either individually or as a member of a unit, during the previous August through January.

The order also should recognize that a handler in a unit may sell the business or close down because of failure of the business. In such an event, language is provided in the order to allow the unit to reorganize to reflect the changed status of unit participants. Failure to include such a provision would leave the order unclear as to the status of a unit if such a change occurs.

Under a unit pooling provision, all supply plant handlers have an opportunity to fulfill their responsibilities to the fluid sector. At the same time, the order will allow flexibility so that efficiencies and economies may be realized in meeting those responsibilities.

If these provisions were not adopted, then it would be expected that milk would often move in an inefficient and costly manner, which would be contrary to the intent of the Act to foster stable and orderly marketing conditions.

3. *Definition of supply plant and reserve supply plant.* The definition of a supply plant should no longer include a minimum storage capacity. Also, this order should no longer define a reserve supply plant.

CMPC proposed eliminating the storage capacity requirement for supply plants under the Chicago Regional order. In support of its proposal, the spokesman claimed that constant improvments in dairy technology have made it difficult for handlers to know the precise sizes of milk trucks and tankers that go in and out of their milk plants. He state that without such knowledge, a handler's plant might not qualify as a supply plant simply because its storage capacity did not equal or exceed the largest shipment in or out.

Currently, a supply plant (other than a reload) regulated under Order 30 must maintain storage capacity sufficient to hold the largest single quantity of milk, either received at or shipped from the plant as a single load. Such provision was found to be necessary to demonstrate that the supply function (i.e., assembling milk from farms at a location near such farms for efficient shipment to distant distributing plants) is performed with respect to milk received at or shipped from the plant. (Official Notice is taken of the Assistant Secretary's decision of August 6, 1971 (36 FR 14745).) The issue at that time concerned the pooling of milk that never was intended for Class I purposes. It was decided that if a supply plant at least had storage capacity equal to the largest shipment of milk in or out of the plant, then it would be able to hold reserve milk and thus give the appearance of Class I readiness.

Proponent pointed out that the order's reserve supply plant definition does not set specific requirements in regard to storage capacity. This double standard in storage capacity, he asserted, should not continue. The fact that the lack of storage capacity at ten reserve supply plants has not caused the market administrator any problem speaks in favor of its demise, he added.

At the hearing, only WCMA spoke out against the proposal. WCMA's witness questioned whether the order's supply plant definition should be so liberal.

Thirteen years after the storage capacity requirement became effective, reserve supply plant provisions were installed and most of the then supply plants chose to be regulated as reserve supply plants. Reserve supply plants were not required to maintain storage capacity because at the time of that hearing, the industry did not make a case for such a requirement.

Presently, there are 102 reserve supply plants and only five supply plants regulated under Order 30. However, as a result of this proceeding there will no longer be reserve supply plants; instead, the 107 plants will all be supply plants if they choose to meet the supply plant standards of the order which would include, if not changed herein, the minimum storage capacity requirement. However, as stated previously, the reload plants do not have to maintain storage capacity. Out of all 107 plants, 97 have some storage capacity, yet only 75 have storage capacity in excess of 55,000 pounds.

As stated, the 102 reserve supply plants have been exempt from any storage capacity requirement since September 1, 1984. Although these plants would now be supply plants, they should continue to be exempt from the storage capacity requirement, as should all supply plants. Otherwise, a plant which for three years has not had to consider such matters, could lose its spool status if a tank load in or out of the plant turned out to be larger than the supply plant's storage capacity. The supply plant would not be a pool plant because its storage capacity was inadequate. However, as proponent pointed out, this inadequacy may be due to technological improvements in the size of tank trucks. Plants should not be depooled simply because they cannot keep pace with such improvements. Accordingly, the supply plant storage capacity requirement should be removed. Furthermore, in establishing a plant's association with the fluid market, the pool supply plant shipping requirement will have to be met. Such performance should be enough to demonstrate that a plant is fulfilling its supply function.

To accommodate the removal of storage requirements, conforming changes must be made in the definition of a "plant" under the Chicago order. Since the supply plant definition will no longer make any distinction between a supply plant with storage capacity and one without it, (i.e. reloads) then the plant definition should likewise make no distinction between such plants. Accordingly, the plant definition has been revised to broadly include milk plants that may qualify as pool plants. However, a reference to unloading milk into a tank truck in a plant is included to make it clear that producer milk so handled will be considered as physically received at a supply plant.

In light of other changes made herein concerning pool plant requirements, there is no longer a need to define reserve supply plants. Accordingly, such definition and any references to such throughout the order should be removed.

4. *Definition of producer milk*—(a) *Producer delivery requirement.* The producer delivery requirement (i.e., the "touch-base" requirement) of Order 30 should be relaxed. In this regard, only during the six months of August through January should one day's milk production of an individual producer be physically received at a pool plant to qualify such producer's milk for diversion to nonpool plants. However, throughout the year, the milk of a dairy farmer who was not a producer during the previous month would not be eligible for diversion unless one day's production is received at the pool plant reporting the milk during the month. The order now provides that the touch-base requirement apply for each month and requires a dairy farmer who was not a producer during the previous month to touch-base before any of such producer's milk can be eligible for diversion.

CMPC proposed replacing the monthly touch-base requirement with a requirement whereby the milk of a dairy farmer who was not a producer during the previous month would not be eligible for diversion unless one day's production is received at the pool plant reporting the milk during the succeeding two calendar months. There was no opposition to this proposal at the hearing or in post-hearing briefs.

Proponent's witness claimed that requiring one day's milk production of each producer to be delivered to a pool plant each month causes under pumping and hauling of milk. This, he said, is done solely to insure that the milk of these producers is eligible to be shipped directly to nonpool manufacturing outlets and remain pooled.

The purpose of requiring individual producers to touch-base is to insure that they are genuinely associated with the fluid market. Thus, it is known that the producers with milk pooled on this market are capable of delivering approved Grade A milk to pool plants. It is desirable that this practice be carried out without interfering with efficient marketing while maintaining the integrity of the order. It is unnecessary to require the milk of each producer to touch-base each month to achieve this goal.

Accordingly, the order should require that at least one day's production of a producer be physically received at a pool plant during each of the months of August through January in order for any of that producer's milk to be eligible to be diverted to nonpool plants and

remain pool milk. One day's production during each of the milk-short months is sufficient to demonstrate an association between producers and the market.

Nonetheless, throughout the year, at least one day's production of a dairy farmer who was not a producer during the previous month should be physically delivered to a pool plant during the month in order for any of that milk to be eligible for diversion. Although this means that initial deliveries would be made during the flush as well as the milk-short months, an association of the milk of new producers with the Chicago market must be established, even if such shipments interfere with efficient marketing. However, the change made herein to the initial touch-base requirement should provide handlers a greater flexibility in making these deliveries.

(b) *Limitation on diversions to nonpool plants.* there should not be a limit on the amount of a handler's producer milk that may be delivered to nonpool plants and still be pool milk. Currently, the percentage limitation is equal to the market's combined Class II and III utilization percentage in the same month of the preceding year.

CMPC proposed eliminating the diversion limit. This proposal also was unopposed. Proponent said that the limit on the amount of milk that a pool plant can divert, like the touch-base requirement, causes unnecessary and uneconomic shipments of milk simply for pooling purposes. CMPC believes that handlers should not be subject to such costly obstacles when they are carrying out a basic precept of the order program in Chicago, that being to pool all the Grade A milk of producers. CMPC also believes that the elimination of both the touch-base requirement and the diversion limit provision, in conjunction with the implementation of unit pooling (i.e., per CMPC's proposal No. 6, issue No. 2 herein), should enable handlers to serve the market from the closest plants, thereby reducing hauling and associated costs.

In the Chicago market, the amount of milk that has been allowed to be delivered directly to nonpool manufacturing plants and still remain pool milk has been the reciprocal of the market's Class I use during that month of the previous year. This has been complementary to the order's supply plant shipping requirement. However, as adopted herein, pool supply plants will be required to deliver only 3 or 5 percent of their producer milk supplies, and this may be decreased to zero or increased to 10 percent. With such low shipping requirements, it is not reasonable to keep a diversion limitation that on the average in 1986 would have limited diversions to nonpool plants to 60 percent of a handler's milk supply. This limit couple with the new shipping requirements would most likely result in unnecessary and costly movements of milk. In addition, the accompanying unnecessary pumping of milk would result in reduced milk quality.

Proponent did not suggest a limit that corresponds with the new shipping requirements. Rather, CMPC proposed the complete removal of diversion limits. Given the "smallness" of the shipping requirements adopted herein, and the fact that this requirement may be decreased all the way to zero if conditions warrant such, we concur with proponent that the diversion limit should be removed. Such a change promotes the efficient handling of milk and better milk quality.

It should be noted that the removal of the diversion limits should not cause milk to be "loaded" into the Chicago market. Virtualy all of the Grade A milk supply in the Order 30 procurement area is pooled under Federal orders. Accordingly, Grade A producers in the area are presently sharing in the proceeds of the fluid market that generally affords them the most favorable returns. Therefore, there is little likelihood of reserve supplies of other markets being shifted to the Chicago market pool.

In light of the foregoing, corresponding provisions which deal with over-diverted milk should also be removed from the order.

5. *Location adjustments.* The plant location adjustments for handlers and for producers should be computed by the market administrator based on a revised location adjustment schedule which extends out to the 18th zone. Zone extension involves adjusting the present Zone 16 adjustment and adding two new Zones 17 and 18. The rate of adjustment from Zone 16 to Zone 18 would be minus 2.3 cents per hundredweight per 15 miles, the rate presently used in all adjustments for Zone 5 to Zone 15. Therefore, the revised Zone 16 location adjustment would be minus 37.3 cents per hundredweight and the new Zone 17 and Zone 18 adjustments would be minus 39.6 cents and minus 41.9 cents, respectively. The new Zone 18 would be the outermost zone and would include all plants located 281 miles or more from the city hall in Chicago. No adjustment should result in a price less than the Class III price for the month.

As modified at the hearing, Dean et al. proposed expanding the minus location adjustment schedule for locations beyond 250 miles from the Chicago city hall at a rate of 2.3 cents per 15 miles. However, the Minnesota-Wisconsin (M–W) price would be the lower bound of any such adjustment. This change would apply to plant location adjustments for both handlers and producers. As originally published in the Notice of Hearing (52 FR 18894), Dean et al. proposed eliminating the "snubber" that prevents the Class I price from being reduced below the Class III price.

In support of its modified proposal, Dean et al.'s spokesman claimed that such change is needed in order to more nearly reflect the value of milk 250 miles beyond the city hall of Chicago. He stated that it is unrealistic to draw a line and assume a constant cost of hauling beyond such point.

Proponent utilized an exhibit already in the record to show that the average hauling cost to Chicago from plants in the present Zone 16 was $1.27 per hundredweight. This, he stated, far exceeds the order's 36-cent adjustment for that zone. Although the Dean et al. proposal would not fully cover the hauling cost, proponent believed that it would be a step in the right direction to aid in the transportation of milk from the distant locations.

Dean et al.'s spokesman also stated that the present order's treatment of zone pricing beyond 250 miles from the city hall in Chicago is inequitable. He pointed out that because the order draws a line beyond which all milk is subject to the same adjustment, a significant amount of producer milk is being priced differently than most of the producer milk on the market. Proponent holds that greater equity could be achieved if the order would price each handler's milk on an identical basis, which can only come about if the price is adjusted beyond Zone 15 at the constant rate of minus 2.3 cents per 15 miles.

CMPC supported the Dean et al. modified proposal for zone extension in spite of the fact that CMPC members operate five plants located in the present Zone 16 that would be affected by such a change. CMPC's spokesman stated that the order must recognize that it costs money to move milk. Establishing Zone 16 as an endless zone for the Chicago Regional order, he said, has caused an overvaluation of milk in that zone. He added that such a change in the order should cause present Zone 16 plant operators to re-evaluate their economic situations. He speculated that those plant handlers who would be able to receive more money for their producers from another order's pooled funds would choose to become regulated under that other order. However, he did

BEST COPY AVAILABLE

not foresee milk being depooled as a result of zone extension.

Kraft, which operates two plants in present Zone 16, did not favor the proposed changes. Moreover, Kraft believes that the ruling of the Administrative Law Judge which allowed a revision or substitution of Dean et al.'s location adjustment proposal (proposal No. 10 in the Notice of Hearing) should be reversed. At the hearing and in its post-hearing brief, Kraft argued that proponent's modification of the original proposal went beyond the scope of the hearing. Because, in general, Dean et al.'s original proposal would not have affected Zone 16 producers due to the fact that the Zone 1 blend price usually exceeds the Class III price by more than 36 cents, Kraft holds the view that many producers and handlers would be affected by the modified proposal (lost monies estimated to exceed one million dollars annually) did not attend the hearing and those that did attend were unable to adequately prepare their cases.

Notwithstanding the legality of the modification, Kraft believes that there should be no further adjustment to the Class I and producer prices at locations more than 250 miles beyond the Chicago city hall because within Zone 16 milk at various locations is of relatively uniform value. In fact, Kraft's spokesman revealed that identical premiums are paid at both of Kraft's plants even though the proposal would place one plant in Zone 18 whle the other would remain in Zone 16. Therefore, it is Kraft's view that the order should not create distinctions in the price of Class I and producer milk where no differences can be justified by the marketplace.

A brief filed on behalf of both NFO and FUMMC also contended that the modification of proposal No. 10 was not within the scope of the Notice of Hearing. In the brief, it was pointed out that the present "snubber" only comes into play when the M–W price increases substantially, causing the difference between the Class III price and the Zone 1 blend price to be less than 36 cents; an infrequent occurrence. Consequently, very few persons in the industry would likely have considered the published proposal to have been of great and immediate concern. However, the modified proposal No. 10, it was asserted, would have a distinct and immediate impact on the 28 pool plants located in present Zone 16 and on certain Order 68 handlers as well. The brief added that several experienced witnesses who did attend the hearing were not able at that time to adequately prepare testimony on the modified proposal; most notable, the witnesses for Kraft and TAPP.

Nevertheless, should the Secretary decide this issue on its merits, both producer groups believe that the proposal should be denied because of the hardship such would cause on their membership and on the Zone 16 plants, many of whom would be at the Class III price most of the time. Furthermore, they questioned the purpose behind a provision which could cause handlers to become regulated under another order and added that such would lead to market disorder.

In this particular situation, Dean et al.'s proposal as published was to remove the Class III snubber as the lower limit of the adjusted Class I price. Dean et al. modified its proposal by retailing the Class III snubber, and instead, eliminating the Zone 16 snubber on adjustments. In the first case, the minus zone adjustments on Class I milk, which extend out to a minus 36 cents in Zone 16, could have applied even if at some point the Class I price would have had a lesser value than the Class III price. In the second case, the minus zone adjustments on Class I and producer milk would continue on beyond the present Zone 16 snubber at a rate of minus 2.3 cents per 15 miles, but not to drop below the Class III price. As described, the original and modified proposals both involve amending the same order provision by removing one of the "snubbers".

Although Dean et al. did modify its proposal at the hearing, doing so is not unusual. Provided a provision is open for discussion, there is no reason why an interested party cannot modify a proposal by altering the particular order provision in some manner. Also, most interested parties were at the hearing to discuss the other major issues of the hearing regardless if they did or did not believe that a change in the location adjustment provision would have serious implications for them. In fact, the representative of over 80 percent of the market's producers, CMPC, was at the hearing and gave testimony on the modified proposal. FUMMC, who represents another 14 percent of producers, also was there and had three days to prepare some kind of response to the modification. Handlers were well represented by TAPP and WCMA. Kraft, one of the objectors, not only was at the hearing but presumably had some idea that proponent was going to modify its proposal because prior to the start of the hearing it was privy to two key exhibits which clearly showed the effects of zone expansion. Finally, all interested parties, whether or not they attended the hearing, could have filed post-hearing briefs. We note that the briefs received concerning the zone extension proposal came only from some of those present at the hearing.

For all the foregoing reasons, we concur with the ruling of the presiding Administrative Law Judge.

Both WCMA and TAPP in their briefs opposed the modified zone extension proposal on the basis that such would send producers and plants into disarrary, not knowing which market, if any, to be pooled under from month to month. They contended that stablitiy in the marketplace is a higher priority item than equity. Furthermore, they stressed that the modified proposal, if adopted, would significantly cost the present Zone 16 producers while it would benefit the rest a mere penny a hundredweight.

Presently, the Class I price at plants located in what is known as Zone 16 is the Zone 1 Class I price with the $1.40 differential reduced by 36 cents. Producers who deliver milk to the Zone 16 plants receive the Zone 1 blend price less 36 cents. Zone 16 encompasses all plants located more than 250 miles from the city hall in Chicago.

The flat pricing in present Zone 16 fails to reflect the true value of milk as it is received at plants further and further from the market's center. It also introduces an element of inequity in that up to Zone 16 the value of milk declines and from thereon it takes on a false, steady value. Consequently, it is concluded that the minus location adjustment schedule should be expanded. However, this can only be done out to the 18th zone due to Class I price alignment with Order 68, the Upper Midwest marketing area.

Although Dean et al. proposed a continous expansion of the location adjustment schedule, which to include the present 28 plants in Zone 16 would have to go out 23 zones (minus 53.4 cents), expansion should only go as far as that zone which would restore an alignment which existed earlier. The zone limit which most nearly accomplishes this is Zone 18. Where Class I price is concerned, handlers will not be in much different position than they were in prior to the mandated changes which took effect May 1, 1986. (Official Notice is taken of the Deputy Assistant Secretary's decision of April 10, 1986 (51 FR 12830).)

Prior to the mandated differential increases, the alignment of Order 30's Class I price with Order 68's Class I price was satisfactory. The mandated increases brought these prices even

more in line. The changes adopted herein will increase the spread between the Class I prices not quite to the point where pre-mandated differences are restored. This can be done due to the mandated six-cents greater increase in the Chicago Regional differential relative to the increase in the Class I differential of the Upper Midwest order. Changing the Zone 16 location adjustment and adding two new zones accomplishes this. To go beyond that point could disrupt orderly marketing between handlers regulated under Order 30 and handlers regulated under Order 68. Since pool supply plants and pool distributing plants under each order are located in close proximity to each other in this area of Wisconsin, it is necessary that Class I prices be kept in alignment to assure an orderly and competitive market situation.

Especially of interest is the alignment of Class I prices at three distributing plants located in present Zone 16; namely, Alto-Golden Guernsey Dairy Cooperative (AGG), Kwik Trip Dairy (KT), and Seeger's Dairy, Inc. (Seeger's). Presently, AGG is located in Order 30's Zone 16 and Order 68's Zone 4, as is Seeger's. Also at this time, KT is located in Order 30's Zone 16 and Order 68's Zone 3. As shown on Table 1, before the mandated changes the Class I price at AGG and Seeger's under Order 30 was 6 cents less than that location's price under Order 68, while KT's price under Order 30 was 12 cents less. Presently there is no difference between the Order 30 and Order 68 Class I prices at AGG and Seeger's (i.e., the Zone 16-Zone 4 location). There is a 6 cent less Class I price at KT (i.e., the Zone 16-Zone 3 location). The changes adopted herein, which would place AGG and KT in Order 30's Zone 17 and Seeger's into Zone 18, would once again spread the difference between the Class I prices at these locations; however, the spread would not be greater than that which existed previously. Accordingly, the Class I price at AGG under Order 30 would be 3.6 cents less and that at Seeger's and KT would be 5.9 cents and 9.6 cents less respectively.

TABLE 1. CLASS I PRICE UNDER ORDER 30 RELATIVE TO UNDER ORDER 68 AT THREE ZONE 16 DISTRIBUTING PLANTS

Plant	Before May 1, 1986 (¢/cwt)	Presently (¢/cwt)	Change adopted herein (¢/cwt)
AGG	−6	0	−3.6
KT	−12	−6	−9.6
Seeger's	−6	0	−5.9

The changes adopted would reduce the blend price received by producers who ship milk to the 28 plants located in present Zone 16 relative to the blend price they would receive if such changes were not made. However, because the blend price is readily changed by placing producers on and off the market, an analysis of the blend price does not necessarily reveal future events. Navertheless, utilizing September through December 1986 data, it is found that the Zone 1 blend price would have increased in two of the four months, and would have stayed the same in the other two months as a result of the proposed zone extension, irrespective of any pricing impacts that result from other changes made during the course of this proceeding. Because the handler adjustment for present Zone 16 handlers on Class I milk would have been greater, pool funds would have been reduced. Simultaneously, the adjustment on all producer milk also would have been greater, adding money to the Zone 1 blend price computation. Collectively the addition would have outweighed the subtraction, thus increasing the Zone 1 blend price. However, such increase in two of the four months would have only been a penny. The bottom line is that money would have been taken from the Zone 16 producers, to be spread out rather thinly to all Order 30 producers.

Expansion of the location adjustment schedule out to Zone 18 would affect all 28 plants which are in the current Zone 16. As Table 2 shows, four plants will be in the new Zone 16, 11 will be in Zone 17, and the remaining 13 plants will be in Zone 18. It must be noted that the increase in the minus adjustments in Zone 16 and beyond will not necessarily decrease the blend price by that full extent due to the possibility that the Zone 1 blend price during a month may increase slightly due to these changes. However, one can assume that as the adjustment gets larger, producers get less.

TABLE 2. ADDITIONS OF THE LOCATION ADJUSTMENT SCHEDULE

Zone	Distance in miles from city hall in Chicago	No. of plants within zone	Present loc. adj. (¢/cwt.)	New loc. adj. (¢/cwt.)	Difference (¢/cwt.)
16	251–265	4	−36	−37.3	−1.3
17	266–280	11	−36	−39.6	−3.6
18	Beyond 280	13	−36	−41.9	−5.9

The value of milk at any location in a marketing area is determined by its location in relation to the market's center. Usually as the milk is received at locations further from the center, its value decreases. However, in the Chicago marketing area milk's value decreases to a point (Zones 2 through 15), then it continues at a lower but steady value (Zone 16). This has two implications, one being that the milk in present Zone 16 is overvalued. The second, that inequitable pricing of milk is taking place due to the fact that from Zone 2 to Zone 5 and then from Zone 5 to Zone 15 the price of milk is reduced at rates of 3.0 and 2.3 cents per 15 miles and beyond such point the reduction is one cent for unlimited miles. The question posed by proponents is why should some producers get more than the location value for their milk.

Excluding producer milk received at plants in Zone 1 (i.e., within 40 miles of the Chicago city hall), about 87 percent of the market's milk is priced at a decreasing rate of 3.0 or 2.3 cents per hundredweight per 15 miles. The remaining 13 percent is priced at the steady Zone 16 rate of minus 36 cents without regard to a plant's location, be it 251 miles or 351 miles from the city hall in Chicago. Proponents are correct in saying that the price of milk in present Zone 16 should be reduced at the same rate used from Zone 5 to Zone 15. However, as pointed out, reflecting the proper location value of milk to producers cannot be achieved at the expense of Class I price alignment. The limit of a 41.9-cent location adjustment is necessary to maintain proper alignment of Chicago Regional order Class I prices with Class I prices at nearby plant locations under the Upper

Midwest order. If no limit were provided and the 2.3-cent rate per 15-mile zone were extended, it would reduce the Class I price differential at Conrath, for example, from 98.1 cents (as adopted herein) to 88.9 cents. Such price would then be 21.1 cents lower than the Upper Midwest order Class I price at Hayward which is only 50 miles north of Conrath. This could provide a substantial incentive for the distributing plant located at Hayward that is now regulated under the Upper Midwest order to purchase supplies of milk from nearby Chicago Regional order supply plants. (Official notice is taken of the List of Handlers, Plants and Cooperative Associations, December 1986, for the Upper Midwest marketing area, published by the market administrator). Such practice could result in the buying handler realizing an undue competitive advantage in competition with other Upper Midwest order distributing plants. Thus, what is adopted herein should improve the economic reality of adjusting producer's prices for plant location while not disrupting an inter-order Class I price alignment situation that existed prior to May 1, 1986, when mandated differential increases became effective.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the Chicago Regional order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended regulating the handling of milk in the Chicago Regional marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out.

List of Subjects in 7 CFR Part 1030

Milk marketing orders, Milk, Dairy products.

PART 1030—[AMENDED]

1. The authority citation for 7 CFR Part 1030 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 1030.4 is revised to read as follows:

§ 1030.4 Plant.

"Plant" means a building together with its facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment that has facilities adequate for cleaning tank trucks, is approved by an appropriate health authority, at which milk is received from dairy farmers or other plants, and at which milk is processed and-or shipped to another plant.

3. Section 1030.6 is revised to read as follows:

§ 1030.6 Supply plant.

"Supply plant" means a plant at which Grade A milk is physically unloaded into the plant or a tank truck in the plant and is either processed and-or shipped during the month to another milk processing plant, except that any plant located on the premises of a pool distributing plant pursuant to § 1030.7(a) shall not be considered a supply plant unless it is located in a building that is entirely separate from the distributing plant.

4. Section 1030.7 is revised to read as follows:

§ 1030.7 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant or unit described in paragraph (a)(4) of this section from which during the month the disposition of fluid milk products specified in paragraph (a)(2) of this section is not less than 10 percent of the receipts specified in paragraph (a)(1) of this section and from which the disposition of fluid milk products specified in paragraph (a)(3) of this section as a percent of the receipts specified in paragraph (a)(1) of this section is not less than 45 percent in each of the months of September, October, November, and December, 35 percent in each of the months of January, February, March, and August, and 30 percent in all other months.

(1) The total Grade A fluid milk products, except filled milk, received during the month at such plant, including producer milk diverted to nonpool plants and to pool supply plants pursuant to § 1030.13, but excluding producer milk diverted to other pool distributing plants, receipts of fluid milk products in exempt milk, packaged fluid milk products and bulk fluid milk products by agreement for Class II and Class III uses from other pool distributing plants, and receipts from other order plants and unregulated supply plants which are assigned pursuant to § 1030.44(a)(8)(i)(*a*) and (ii) and the corresponding step of § 1030.44(b).

(2) Packaged fluid milk products, except filled milk, disposed of as either route disposition in the marketing area or moved to other plants from which it is disposed of as route disposition in the marketing area. Such disposition is to be exclusive of receipts of packaged fluid milk products from other pool distributing plants.

(3) Packaged fluid milk products, except filled milk, disposed of as either route dispositon or moved to other plants. Such disposition is to be exclusive of receipts of packaged fluid milk products from other pool distribution plants.

(4) A unit consisting of at least one distributing plant and one or more additional plants of a handler at which milk is processed and packaged or manufactured shall be considered as one plant for the purpose of meeting the requirements of this paragraph if all such plants are located within the State of Wisconsin or that portion of the marketing area within the State of Illinois, and if, prior to the first day of the month, the handler operating such plants has filed a written request for such plants to be considered a unit with the market administrator.

(b) A supply plant or unit of supply plants discribed in paragraph (b)(6) of this section from which the quantity of fluid milk products (except filled milk) and condensed skim milk shipped and received and physically unloaded into plants described in paragraph (b)(2) of this section as a percent of the Grade A milk received at the plant(s) from dairy farmers (except dariy farmers described in § 1030.12(b)) and handlers described in § 1030.9(c), including producer milk diverted pursuant to § 1030.13, but excluding packaged fluid milk products that are disposed of from such plant(s) as route disposition, is not less than 3 percent for the months of January through August, and 5 percent for the months of September through December for individuals plants and 6 percent and 10 percent, respectively, for any unit of plants, subject to the following conditions:

(1) A plant that was a pool plant pursuant to this paragraph during each of the months of August through January shall be a pool plant for each of the following months of February through July.

(2) Qualifying shipments pursuant to this paragraph may be made to the following plants, except as provided in paragraph (b)(2)(v) of this section:

(i) Pool plants described in paragraph (a) of this section;

(ii) Plants of producer-handlers;

(iii) Partially regulated distributing plants, except that credit for such shipments shall be limited to the amount of such milk which receives a Class I classification at the transferee plant;

(iv) Distributing plants fully regulated under other Federal orders, except that credit for shipments to such plants shall be limited to the quantity shipped to pool distributing plants during the month and credits for shipments to other order plants shall not include any such shipments made on the basis of agreed-upon Class II or Class III utilization; and

(v) Whenever the authority provided in paragraph (b)(5) of this section is applied to increase the shipping requirements specified in this section, only shipments described in paragraph (b)(2)(i) of this section shall count as qualifying shipments for the purpose of meeting the increased requirements.

(3) The operator of a supply plant may include as qualifying shipments deliveries to pool distributing plants directly from farms of producers pursuant to § 1030.13(d).

(4) The quantity of condensed skim milk and fluid milk products moved (including milk diverted) from supply plants to each pool plant described in paragraph (a) or (c) of this section shall count towards meeting the shipping requirements of this paragraph shall be a net quantity assignable at each such pool plant pro-rata to supply plants in accordance with total receipts from such plants. The net quantity shall be computed by subtracting from the quantity of fluid milk products and condensed skim milk received from supply plants the following:

(i) The quantity of condensed skim milk not disposed of in a fluid milk product and the quantity of fluid milk products in the form of bulk milk and skim milk moved from the pool distributing plant to pool supply plants plus any such bulk shipments to nonpool plants as Class II or Class III milk other than:

(A) Transfers or diversions classified pursuant to § 1030.40(b)(3); and

(B) Transfers or diversion on New Year's Day, Memorial Day, July 4, Labor Day, Thanksgiving, Christmas, and on any Saturday if no milk is received at the pool distributing plant from a supply plant, in an amount not in excess of 120 percent of the average daily receipts of producer milk pursuant to § 1030.13(a) at the plant during the prior month, less the quantity of producer milk diverted pursuant to § 1030.13(d) on such day. If no producer milk was received in the distributing plant during the prior month, the average daily receipts during the current month shall be used for this purpose; and

(ii) If milk is diverted from the pool distributing plant on the date of the receipts from the supply plant, the quantity so diverted, except any diversion of milk (not to exceed 3 days' production of any individual producer) made because of any emergency situation such as a breakdown of trucking equipment or hazardous road conditions if such emergency is reported to the market administrator.

(5) The shipping requirements of this paragraph may be increased or decreased if found necessary to obtain needed shipments or to prevent uneconomic shipments as follows, subject in either case to the conditions specified in paragraph (b)(5)(iii) of this section.

(i) The market administrator may, for a period of up to three months, increase or decrease the shipping requirements by up to two percentage points;

(ii) The Director of the Dairy Division may increase or decrease the shipping requirements by up to five percentage points;

(iii) The maximum revision under this paragraph shall be five percentage points. Before making a finding that a change is necessary for the purposes set forth in this section, the market administrator or the Director of the Dairy Division shall investigate the need for revision, either on such person's own initiative or at the request of interested persons. If such investigation shows that a revision might be appropriate, a notice shall be issued stating that revision is being considered and inviting data, views, and arguments. If a plant that would not otherwise qualify as a pool plant during the month does qualify as a pool plant because of a reduction in shipping requirements pursuant to this paragraph, such plant shall be a nonpool plant for such month if the operator of the plant files a written request for nonpool status with the market administrator on or before the first day of the following month. If an increase is required in any month of February through July, the increase shall also apply to any supply plant that has pool status for the month pursuant to paragraph (b)(1) of this section.

(6) Two or more plants shall be considered a unit for the purpose of meeting the requirements of this paragraph if the following conditions are met:

(i) The plants are located within the State of Wisconsin or within that portion of the State of Illinois within the marketing area;

(ii) The plants included in the unit are owned or fully leased and operated by the handler establishing the unit and such plants were pool plants during the month prior to being included in a unit. Two or more handlers may establish a unit of designated plants by certifying to the market administrator a marketing agreement specifying the plants to be considered as a unit, and specifying which handler will be responsible for qualification of the unit. With regard to any leased plants included in a unit, the handler that leases a plant(s) and is a party to a marketing agreement with respect to plants included in a unit, shall satisfy the market administrator that such handler:

(A) Is responsible pursuant to § 1030.73 for payments to producers whose milk is delivered to the leased plant or diverted therefrom by the handler;

(B) Controls and operates the leased plant; and

(C) Maintains in its books and records the accounts of the leased plant(s), including, but not limited to, employee payroll records, and the gross value of the payrolls for all producer milk pooled by the handler opeating the leased plant.

(iii) The handler or handlers establishing the unit submits a written request to the market administrator on or before July 15 requesting that such plants qualify as a unit for the period of August July of the following year. In the months of February through July, a unit shall not include any plant that was not a pool plant each month of the preceding period of August through January. Each plant that qualifies as a pool plant within a unit shall continue each month as a plant in the unit through the following July unless the plant subsequently fails to qualify for pooling or the handler or handlers establishing the unit submits a writtten request to the market administrator that the plant be deleted from the unit or that the unit be discontinued. Any plant that has been so deleted from a unit, or that has failed to qualify in any month, will not be part of the unit for the remaining months through July. The handler or handlers that establish a unit may add a plant operated by such handler or handlers to a unit, if such plant has been a pool plant each prior month of the current unit-operating period (August through July) and would otherwise be eligible to be in a unit, upon submission of a written request to the market administrator. Such plant will remain in the unit through the following July. Written requests to the market administrator to either delete a plant from the unit or to add a plant to the unit shall be submitted to the market administrator on or before the 15th day of the month preceding the month that such change will be effective. In the event of an ownership change or business failure of a handler that is a participant in a unit, the unit may be reorganized to reflect such changes by submitting a writtten request to file a new marketing agreement with the market administrator.

(iv) If a unit fails to qualify under the requirements of this paragraph, the handler responsible for qualifying the unit shall notify the market administrator which plant or plants will be deleted from the unit so that the remaining plants may be pooled as a unit. If the handler fails to do so, the market administrator shall exclude one or more plants, beginning at the bottom of the list of plants in the unit and continuing up the list as necessary until the deliveries are sufficient to qualify the remaining plants in the unit; and

(v) Each plant in a unit shall ship to a plant or plants pursuant to paragraph (a) or (c) of this section not less than 3 percent of the plant's receipts of milk from producers or 47,000 pounds, whichever is less, of condensed skim milk or fluid milk products in each of five months during the period of August through January, subject to the provisions of paragraph (b)(4) of this section.

(c) Any plant that qualifies as a pool plant in each of the immediately preceding three months pursuant to paragraph (a) of this section or the shipping percentages in paragraph (b) of this section that is unable to meet such performance standards for the current month because of unavoidable circumstances determined by the market administrator to be beyond the control of the handler operating the plant, such as a natural disaster (ice storm, wind storm, flood), fire, breakdown of equipment, or work stoppage, shall be considered to have met the minimum performance standards during the period of such unavoidable circumstances, but such relief shall not be granted for more than two consecutive months.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant or exempt distributing plant;

(2) A plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act, unless it is qualified as a pool plant pursuant to paragraph (a), (b) or (c) of this section and a greater volume of fluid milk products, except filled milk, is disposed of from such plant in this marketing area as route disposition and to pool plants qualified on the basis of route disposition in this marketing area than is so disposed of in the marketing area regulated pursuant to such other order; and

(3) That portion of a plant that is physically separated from the Grade A portion of such plant, and is not approved by any regulatory agency for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

5. Section 1030.13 is amended by removing in paragraph (a) the words ", in the case of a reload facility,", by removing paragraphs (d)(3) and (d)(6), redesignating (d)(4), (d)(5), and (d)(7) as (d)(3), (d)(4), and (d)(5), and revising paragraphs (d)(1) and (d)(2) to read as follows:

§ 1030.13 Producer milk.

* * * * *

(d) * * *

(1) During each of the months of August through January, milk from a dairy farmer shall not be eligible for diversion unless at least one day's production is received and physically unloaded at the pool plant where such milk is reported as producer milk;

(2) Milk from a dairy farmer who was not a producer during the previous month shall not be eligible for diversion unless at least one day's production is received and physically unloaded during the month at the pool plant where such milk is reported as producer milk;

* * * * *

6. Section 1030.30 is amended by removing in the indroductory text of paragraph (a) the words "and/or reserve supply plants", and revising paragraph (a)(3) to read as follows:

§ 1030.30 Reports of receipts and utilization.

* * * * *

(a) * * *

(3) Receipts of fluid milk products and bulk fluid cream products from pool plants of other handlers (or other pool plants, as applicable, including a separate statement of the net receipts from each supply plant, computed pursuant to § 1030.7(b)(4);

* * * * *

7. In § 1030.52, in the table of location adjustments of paragraph (a), Zone 16 and footnote 3 are revised and Zones 17 and 18 are added at the end of the table to read as follows:

§ 1030.52 Plant location adjustments for handlers.

* * * * *

(a) * * *

Zone	Distance in miles from city hall in Chicago	Location adjustment rate (cents per hundred-weight)
* * *	*	*
16	251–265	−37.3
17	266–280	−39.6
18	[3]	−41.9
* * *	*	*

[3] Beyond 280.

* * * * *

Signed at Washington, DC, on March 8, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

BILLING CODE 3410-02-M

Rural Electrification Administration

7 CFR Part 1772

REA Bulletin 345-186, REA Design Specifications for Digital Lightwave Transmission Systems, REA Form 397h

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Rural Electrification Administration (REA) proposes to amend 7 CFR 1772.97, Incorporation by Reference of Telephone Standards and Specifications by issuing a new Bulletin 345-186, REA Design Specifications for Digital Lighwave Transmission Systems, REA Form 397h. The new specification applies to the design of lightwave transmission systems which employ optical fibers as the transmission medium. This includes opto-electronic terminal equipment, such as transmitters and receivers, and electronic terminal equipment, such as digital multiplexers. The specification may be used in purchasing a complete, installed system, a major component of a system or for incremental additions of equipment to already existing systems. This action permits REA telephone borrowers to utilize lightwave technology in bringing modern, cost-effective telecommunications to rural America. All REA telephone borrowers lightwave equipment, their consulting firms and manufacturers of lightwave transmission equipment would be impacted by the action.

DATE: Public comments must be received by REA no later than May 13, 1988.

ADDRESS: Submit written comments to M. Wilson Magruder, Director, Telecommunications Staff Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

FOR FURTHER INFORMATION CONTACT: T. Lamar Moore, Chief, Transmission Branch, Telecommunications Staff Division, Rural Electrification Administration, Washington, DC 20250-1500, telephone (202) 382-8665. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from the above office.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 *et seq*), REA proposes to amend 7 CFR 1772.97, Incorporation by Reference of Telephone Standards and Specifications, by issuing a new Bulletin 345-186, REA Design Specifications for Digital Lightwave Transmission Systems, REA Form 397h, REA will request approval for Incorporation by Reference from the Director of the Federal Register. This proposed action has been reviewed in accordance with Executive Order 12291, Federal Regulation. This action will not (1) have an annual effect of the economy of $100 million or more; (2) result in a major increase in costs of prices for consumers, individual industries, Federal, State of local government agencies, or geographic regions; (3) result in significant adverse effects on competition, employment, investment of productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets and, therefore, has been determined to be "not major." This action does not fall within the scope of the Regulatory Flexibility Act. REA has concluded that promulgation of this rule would not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 (42 U.S.C. 432 *et seq.* (1976) and, therefore, does not require an environmental impact statement or an evironmental assessment. This regulation contains no information or record keeping requirement which requires approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 *et seq.*). This program is listed in the Catalog of Federal Domestic Assistance under No. 10.851, Rural Telephone Loans and Loan Guarantees and 10.852, Rural Telephone Bank Loans. For the reasons to set in the Final Rule related Notice to 7 CFR Part 3015, Subpart V (50 FR 47034, November 14, 1985), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Copies of the document are available upon request from the address indicated above. Interested persons are invited to submit comments on this action. Written comments must be sent to the address stated above. All written submissions made pursuant to this action will be available for public inspection during regular business hours at the above address.

Background

REA has issued a series of publications entitled "bulletins" which serve to implement the policy, procedures, and requirements for administering its loans and loan guarantee programs and the security instruments which provide for and secure REA financing. In the bulletin series REA issues standards and specifications for the construction of telephone facilities financed with REA loan funds. REA is proposing to issue a new Bulletin 345-186, REA Design Specifications for Digital Lightwave Transmission Systems, REA Form 397h.

There is a steadily increasing demand for digital lightwave tranmission by REA telephone borrowers to expand and upgrade telecommunications service in rural America. This borrower demand has resulted in the need to provide a uniform and systematic means of specifying lightwave transmission needs and equipment purchases. Form 397h (Bulletin 345-186) is being proposed as the means to accomplish this purpose. REA borrower would use the REA Form 397h with REA Special Equipment Contracts, Forms 397 and 398, to purchase lightwave transmission systems for their individual telecommunications system needs. Form 397h provides a uniform generic specification format with the flexibility to specify the particular needs of a borrower.

List of Subjects in 7 CFR Part 1772

Loan programs—communications, Telecommunications, Telephone.

In view of the above, REA is proposing to amend 7 CFR Part 1772 by issuing a new Bulletin 345-186.

PART 1772—[AMENDED]

1. The authority citation for Part 1772 is revised to read as follows, and all authorities following the sections are removed:

Authority: 7 U.S.C. 901 *et seq.*, 7 U.S.C. 1921 *et seq.*

2. The table in § 1772.97 would be amended by adding the entry 345-186 to read as follows:

§ 1772.97 Incorporation by Reference of Telephone Standards and Specifications.

* * * * *

345-186 . . . Form 397h . . . . REA Design Specifications for Digital Lightwave Transmission Systems.

* * * * *

Dated: March 8, 1988.

Harold V. Hunter,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–ASW–61]

Airworthiness Directives; Messerschmitt-Bolkow-Blohm (MBB) Model BK–117A–1, BK–117A–3, and BK–117A–4 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require a change to the flight manual procedures on Messerschmitt-Bolkow-Blohm (MBB) Model BK–117A–1, BK–117A–3, and BK–117A–4 helicopters. The proposed AD is needed to provide new procedures to the flightcrew for an emergency engine shutdown and/or a landing upon indication of an impending engine rotor burst which could be hazardous.

DATE: Comments must be received on or before April 13, 1988.

ADDRESSES: Comments on the proposal may be mailed in duplicate to Federal Aviation Administration, Southwest Region, Office of the Regional Counsel, Attention: Rules Docket, Fort Worth, Texas 76193–0007, or delivered in duplicate to Office of the Regional Counsel, FAA, 4400 Blue Mound Rd., Room 158, Bldg. 3B, Fort Worth, TX 76193–0007. Comments must be marked with Docket No. 87–ASW–61. Comments may be inspected at the above location between 8 a.m. and 4:30 p.m. weekdays, except Federal holidays.

The applicable flight manual changes may be obtained from MBB Helicopter Corporation, 900 Airport Road, Post Office Box 2349, West Chester, Pennsylvania 19380, or may be examined in the Office of the Regional Counsel, Southwest Region.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Mathias, FAA, Southwest Region, Aircraft Certification Division, Fort Worth, Texas 76193–0111, telephone (817) 624–5123.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Office of Regional Counsel, Southwest Region, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 87–ASW–61." The postcard will be date/time stamped and returned to the commenter.

The FAA has received reports that failure of certain bearings in the engines installed in MBB BK–117A–1, BK–117A–3 and BK–117A–4 helicopters may result in a sequential pattern of turbine wheel aft movement and contact with engine afterbody components resulting in a hazardous turbine wheel burst. It has been established that this event will be preceded by simultaneous illumination of the engine metal chip detector light and fluctuation or loss of engine power turbine speed (N_2) indication. MBB has issued a flight manual revision which instructs the flightcrew to immediately shut down the engine and land the helicopter when these events are observed, thus enabling the flightcrew to avoid this hazardous rotor burst condition.

Since this condition is likely to exist or develop on other helicopters of the same type design, the proposed AD would require these safety related flight manual revisions to be properly adopted in the applicable flight manual on MBB Model BK–117A–1, BK–117A–3, and BK–117A–4 helicopters.

The FAA has determined that this proposed regulation only involves 92 aircraft at an approximate cost to each aircraft of $32. The total economic impact to any one operator would not exceed $960. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised) Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Messerschmitt-Bolkow-Blohm (MBB): Applies to model BK–117A–1, BK–117A–3, and BK–117A–4 helicopters, all serial numbers, certificated in all categories, equipped with Lycoming Model LTS–101 series engines.

Compliance required within the next 50 hours' time in service after the effective date of this AD, unless already accomplished.

To provide the flight crew with emergency engine shut down instructions to be followed in event of an impending engine turbine burst, insert the following updates (or the forthcoming permanent equivalent revisions) into the applicable Flight Manual.

(a) For the Model BK–117A–1 and BK–117A–3 helicopters insert into the applicable Rotorcraft Flight Manual MBB Temporary Revision 5, dated July 27, 1987.

(b) For the Model BK–117A–4 helicopter, insert into the applicable Rotorcraft Flight Manual: MBB Temporary Revision 1, dated July 27, 1987.

(c) Upon request, an alternate means of compliance which provides an equivalent level of safety with the requirements of this AD may be used when approved by the manager, FAA, Southwest Region, Aircraft Certification Division, ASW–100, Fort Worth, Texas 76193–0100.

Issued in Fort Worth, Texas, on March 3, 1988.

Don P. Watson,

Acting Director, Southwest Region.

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 379

[Docket No. 71283–7283]

Export Control Policy Forum on Technical Data Export Controls

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Report on Technical Data Public Forum.

SUMMARY: On February 11, 1988, the Department of Commerce hosted a public forum on Technical Data Export Controls. The purpose of the forum was to obtain industry's comments regarding Part 379 ("Technical Data") of the Export Administration Regulations (EAR), concerning the export of technical data controlled by the Department of Commerce. Over 300 representatives from the private sector and government attended. Twenty-eight participants presented statements before a panel of Commerce officials, and several written comments were submitted.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Cutshaw, Office of the Deputy Assistant Secretary for Export Administration, Room 3888, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20230; (Telephone: (202) 377–5711).

SUPPLEMENTARY INFORMATION: The Department of Commerce is currently reviewing its regulations governing exports of technical data. The comments obtained as a result of the public forum provide a wide range of perspectives on revising EAR Part 379. They will help us clarify the regulatory provisions, further U.S. export control objectives, and better serve the needs of the business community.

Comment papers and the forum transcript are available for public inspection and copying in the Bureau of Export Administration Freedom of Information Office, Room 4886, Herbert C. Hoover Building, 14th Street and Pennsylvania Avenue, NW. For information on how to obtain copies, contact Margaret Cornejo at 377–2593.

The Bureau of Export Administration has analyzed the comments received in response to the public forum. The following summarizes the predominant issues addressed:

A. The MITAC Proposal

The forum began with a presentation of the proposal by the Militarily Critical Technologies List Implementation Technical Advisory Committee (MITAC) to revise the technical data controls. This proposal was mentioned in the January 7, 1988 **Federal Register** notice (53 FR 418) of the Technical Data Forum. Copies of the proposal were made available prior to the forum, and comments were invited.

The MITAC proposal attempts to establish a framework of standards for applying control measures to national security controlled technical data in three ways. First the proposal recommends a new definition of technical data to exclude data that is not necessary to achieving critical performance thresholds. Second, the proposal recommends that controls be imposed only on technical data identified as militarily critical. Third, the MITAC proposal establishes three data classes to distinguish between levels of national security risk and controllability of the technical data.

Several participants agreed with the MITAC's proposal to improve the definition of controlled technical data. Other comments applauded the intent of the proposal to decontrol technical data that are not related to national security controlled items, or that are not strategic. While many speakers expressed concern that the proposed definitions for supercritical and critical technology categories would rely on subjective judgments and would be difficult to implement, there was general acknowledgment that applied policy standards for determining military criticality and for establishing licensing requirements are needed.

A number of speakers commenting on the MITAC proposal urged that it not be adopted unless accompanied by a "comprehensive operations license." Such a license would authorize exports and reexports of technology and related goods, including items from the militarily critical technologies list, from a domestic concern to and among affiliated enterprises that have long-term contractual relations with the exporter.

B. Other Issues Addressed by the Participants

Some of the presenters were of the opinion that, while clarification of several aspects of the regulations would be desirable, major revisions to Part 379 were unnecessary. Comments expressed concern about cross-references in the regulations that were often inconsistent. One of the most repeated concerns was the need to clarify the definition of, and requirements for the export of, operation and sales technical data. Several speakers proposed adjustments to General License GTDR, particularly in clarifying when written assurance is required, and in providing guidance on how such assurances should be prepared. Some participants stressed the importance of making Export Administration and International Traffic in Arms technical data regulations as consistent as possible in form and substance. Others recommended the creation of a technical data control list or integration of technical data into the current Commodity Control List.

Many of the presenters felt that only multilateral controls can be effective, and that unilateral controls should be avoided. A few participants supported the elimination of reexport requirements and controls on foreign direct products of U.S. origin data. We were urged by several speakers to explore the reduction of validated license requirements for West-West exports.

Two participants discussed the "commingling rule" contained in Supplement 1 to Part 379 ("Technical Data Interpretations"), which states that U.S.-origin technical data do not lose their U.S.-origin when commingled abroad with other technical data of any other origin. These participants felt that this interpretation was overreaching and largely unenforceable, but acknowledged the difficulty of defining what degree of U.S. data involvement would warrant U.S. control of commingled data.

Many comments centered on export controls for software. There was significant support for the decontrol of low-level software. The speakers advocated the inclusion of more software under General License GTDA, GLV, GCOM, or other general licenses. Some of the areas specifically addressed were the eligibility of mass marketed software for personal computers under General License GTDA, the eligibility of 1355A system software for General License GTDR, and the refinement of characteristics for software controlled under Supplement 3 to Part 379 ("Computer Software").

C. Technical Data Information Service

Several forum participants expressed concern regarding the difficulty of obtaining quick answers to questions about technical data export controls. This is due to the fact that a large percentage of the questions received must be referred for technical or policy review. Therefore, in response to suggestions made at the forum, and in conjunction with the Commerce Department's efforts to provide better service to the exporting community, we are considering methods to improve the provision of technical data information to the exporting community and to enhance our responsiveness to inquiries.

D. Continuation of Technical Data Review

The Department of Commerce is continuing its review of the technical data export controls contained in Part 379 of the EAR, and will consider the comments made by the forum participants as well as other written comments submitted. We will keep the public informed of the progress of this review through periodic notices in the **Federal Register.** The Department of Commerce appreciates the enthusiastic participation received thus far and invites industry's continuing input.

Dated: March 9, 1988.

Vincent F. DeCain,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 918

Public Comment Period and Opportunity for Public Hearing on Proposed Amendment to the Louisiana Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for a public comment period and for requesting a public hearing on the substantive adequacy of a proposed amendment submitted by the State of Louisiana as a modification to its permanent regulatory program (hereinafter referred to as the Louisiana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of revised regulations that would partially replace those now implementing the Louisiana program.

This notice sets forth the times and locations that the Louisiana program and the proposed amendment will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and information pertinent to the public hearing.

DATES: Written comments from the public not received by 4:00 p.m., c.s.t. on April 13, 1988, will not necessarily be considered in the decision process.

If requested, a public hearing on the proposed amendment will be held at 10:00 a.m on April 8, 1988, at the location shown below under "ADDRESSES".

ADDRESSES: Written comments and requests for a hearing should be mailed or hand-delivered to: Mr. James Moncrief, Director, Tulsa Field office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135; Telephone: (918) 581-6430.

Copies of the Louisiana program, the proposed modifications to the program, and the administrative record of the Louisiana program are available for public review and copying at the OSMRE offices and the State regulatory authority office listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive, free of charge, one copy of the proposed amendment by contacting the OSMRE Tulsa Field Office.

Office of Surface Mining Reclamation and Enforcement, Tulsa Field Office, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135; Telephone: (918) 581-6430

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street NW., Room 5131, Washington, DC 20240; Telephone: (202) 343-5492

Department of Natural Resources, Office of Conservation, 625 N. 4th Street, Baton Rouge, Louisiana 70804; Telephone: (504) 342-5515

If a public hearing is held, its location will be: State Land and Natural Resources Building, Office of Conservation, Public Hearing Auditorium, 625 N. 4th Street, Baton Rouge, Louisiana 70804.

FOR FURTHER INFORMATION CONTACT: Mr. James Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135, Telephone: (918) 581-6430.

SUPPLEMENTARY INFORMATION:

I. Public Hearing

Any person interested in making an oral or written presentation at the hearing should contact Mr. James Moncrief at the OSMRE Tulsa Field office by 4:00 p.m. on March 29, 1988. If no one expresses an interest in participating in the hearing by this date, a hearing will not be held. If only one person has so contacted Mr. Moncrief, a public meeting, rather than a hearing may be held; the results of the meeting will be included in the Louisiana Administrative Record.

II. Background

The Secretary of the Interior conditionally approved the Louisiana program effective October 10, 1980. Information pertinent to the general background, revisions, modifications and amendments to the permanent program submissions, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Louisiana program can be found in the October 10, 1980 **Federal Register** (45 FR 67340). Subsequent actions concerning the approval and program amendments are identified at 30 CFR 918.10, 918.16, and 918.20.

III. Submission of Amendment

In accordance with the provisions of 30 CFR 732.17 (d) through (f), on July 9, 1985 [Administrative Record No. LA-265], OSMRE notified Louisiana of the changes necessary to ensure that the approved regulatory program was no less effective than SMCRA and its implementing regulations, as revised since October 10, 1980, when the program was originally approved. To comply with this letter, the Louisiana Department of Natural Resources completed a partial rewrite of the Louisiana Surface Mining Regulations governing its permanent regulatory program.

By letter of January 25, 1988, Louisiana submitted these regulations to OSMRE as a program amendment [Administrative Record No. LA-263]. The proposed regulations, in Subchapter A, General, parts 100, 101, 105, and 107; Subchapter F, Areas Unsuitable for Mining, Parts 160, 161, 162, and 164; Subchapter G, Surface Coal Mining and Reclamation Operations Permits and Coal Exploration and Development Procedures Systems, Parts 170, 171, 176, 178, 179, 180, 185, 186, 187, 188, and 195; Subchapter J, Bond and Insurance Requirements For Surface Coal Mining and Reclamation Operations, Parts 200, 205, 206, 207, and 208; Subchapter K, Permanent Program Performance Standards, Parts 210, 215, 216, 223, 226, 227, 228, 242, 243, 244, 245, and 246 would replace the currently approved regulations.

In accordance with the provision of 30 CFR 732.17, OSMRE is now seeking comment on whether the proposed regulations satisfy the criteria for approval of State program amendments set forth at 30 CFR 732.15 and 732.17. If the amendments are found to be as stringent as SMCRA and no less effective than the Federal regulations, they will be approved and the

amendment will become part of the Louisiana permanent regulatory program.

List of Subjects in 30 CFR Part 918

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Raymond L. Lowrie,

Assistant Director, Western Field Operations.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[SW-FRL-3340-2]

National Oil and Hazardous Substances Contingency Plan; The National Priorities Lists; Request for Comments

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete sites from the National Priorities List; request for comments.

SUMMARY: The Environmental Protection Agency (EPA) announces its intent to delete two sites from the National Priorities List (NPL) and requests public comment. The NPL is Appendix B to the National Oil and Hazardous Substances Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).

DATE: Comments concerning the sites may be submitted until April 13, 1988.

ADDRESSES: Comments may be mailed to J, Sam Vance, Site Project Manager, Waste Division, Superfund Branch, South Site Management Section, South Florida Unit, Environmental Protection Agency, 345 Courtland Street, Atlanta, GA 30365. The Comprehensive information on each site is available through the EPA Regional Docket clerks.

Requests for comprehensive copies of documents should be directed formally to the appropriate Regional Docket Office. Address for the Regional Docket Office is:

For background information on both Tri-City Oil Conservationist Corporation site and the Varsol Spill site: J. Sam Vance, Region IV, US. EPA, 345 Courtland St., NE., Atlanta, Georgia 30365, 404/347-2643.

FOR FURTHER INFORMATION CONTACT: J. Sam Vance, Site Project Manager Waste Division, Superfund Branch, Southern Site Management Section, Environmental Protection Agency, 345 Courtland Street, Atlanta, GA 30365. Phone (404) 347-2643.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletions

I. Introduction

The Environmental Protection Agency (EPA) announces its intent to delete two sites from the National Priorities List (NPL), Appendix B, of the National Oil and Hazardous Substances Contingency Plan (NCP), and requests comments on these deletions. The EPA identifies sites that appear to present a significant risk to public health, welfare or the environment and maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Hazardous Substance Response Trust Fund (Trust Fund) financed remedial actions. Any sites deleted from the NPL remain eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such action.

The two sites EPA intends to delete from the NPL are:

1. Tri-City Oil Conservationist Corporation, Temple Terrace, Florida.
2. The Varsol Spill Site, Miami, Florida.

The EPA will accept comments on these two sites for thirty days after publication of this notice in the **Federal Register.**

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action and those that the Agency is considering using for future site deletions. Section IV discusses each site and explains how each site meets the deletion criteria.

II. NPL Deletion Criteria

Recent amendments to the NCP establish the criteria the Agency uses to delete sites from the NPL as published in the **Federal Register** on November 20, 1985 (50 FR 47912). § 300.66(c)(7) on the NCP provides that sites:

> * * * may be deleted from or recategorized on the NPL where no further response is appropriate. In making this determination EPA will consider whether any of the following criteria has been met:
>
> (i) EPA, in consultation with the State, has determined that responsible or other parties have implemented all appropriate response actions required;
>
> (ii) All appropriate Fund-financed responses under CERCLA have been implemented and EPA, in consultation with the State, has determined that no further cleanup by responsible parties is appropriate; or
>
> (iii) Based on a remedial investigation, EPA, in consultation with the State, has determined that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Before deciding to delete a site, EPA will make a determination that the remedy or decision that no remedy is necessary, is protective of public health, welfare, and the environment, considering environmental requirements which are applicable or relevant and appropriate at the time of the deletion.

Deletion of the site from the NPL does not preclude eligibility for subsequent Fund-financed actions if future conditions warrant such actions. Section 300.66(c)(8) of the NCP states that Fund-financed actions may be taken at sites that have been deleted from the NPL.

III. Deletion Procedures

In the NPL rulemaking published in the **Federal Register** on October 15, 1984 (49 FR 40320), the Agency solicited and received comments on the question of whether the notice and comment procedures followed for adding sites to the NPL should also be used before sites are deleted. Comments also were received in response to the amendments to the NCP that were proposed in the **Federal Register** on February 12, 1985, (50 FR 5862). Deletion of sites from the NPL does not itself create, alter, or revoke any individual's rights or obligations. The NPL is designed primarily for informational purposes and to assist agency management. As is mentioned in section II of this notice, § 300.66(c)(8) of the NCP makes clear that deletion of a site from the NPL does not preclude eligibility for future Fund-financed response actions.

For the deletion of this group of two sites, EPA's Regional Office will accept and evaluate public comments before making the final decision to delete. The Agency believes that deletion procedures should focus on notice and comment at the local level. Comments from the local community surrounding the sites considered for deletion are likely to be the most pertinent to deletion decisions. The following procedures were used for the intended deletion of these two sites. The Agency is considering using similar procedures in the future with the exception that the notice and comment period would be conducted concurrently at the local level and through the **Federal Register**.

The procedures used were:

1. EPA Regional Offices recommended deletion and prepared relevant documents.

2. EPA Regional Office provided a 30-day public comment period on the deletion package. The notification was provided to local residents through local and community newspapers. The Region made all relevant documents available in the Regional Offices and local site information repositories.

3. The comments received during the notice and comment period would be evaluated before the tentative decision to delete was made.

A deletion will occur after the Assistant Administrator for Solid Waste and Emergency Response places a notice in the **Federal Register**, and the NPL will reflect any deletions in the next final update. Public notices and copies of the responsiveness summary will be made available to the local residents by the Regional Offices.

IV. Basis for Intended Site Deletions

The following summaries provide the Agency's rationale for intending to delete these sites from the NPL.

Varsol Spill Site, Miami, Florida

The Varsol Spill site is located in the northeast section of the Miami International Airport (MIA). The airport is located less than one-half mile south of the lower Miami Springs municipal well field. The Miami Canal runs adjacent to the northeast corner of the airport, the Tamiami Canal runs immediately south of the airport, and two other canals are located near the western edge of the airport.

Industrial operations associated with the miami International Airport have resulted in hydrocarbon contamination of the surface and groundwater in this vicinity. Since 1966, approximately 15 hydrocarbon spills and leaks have been recorded totalling nearly 2 million gallons. In 1970 Eastern Airlines maintenance base recorded a loss of approximately 1.5 million gallons of varsol in the northeast section of the airport. During 1970 a jet fuel spill of approximately 66,000 gallons was discovered near the west central area of Eastern Airline properties. In 1970, National Airlines accidentally spilled an unknown amount of jet fuels into drainage canals which discharged into the Tamiami Canal. At this time they were ordered to stop discharging cleaning solvents and degreasers into an airport drainage canal. In 1981, Braniff Airlines was discovered using the same practice and was ordered to stop. Several other small spills and discharges of jet oil, aviation fuel, cleaning solvents, and degreasers have also occurred at the airport. Several areas within MIA had heavy accumulations of oil lying on the ground. This was the result of airline maintenance personnel discharging oily wastes onto the ground and into storm sewers. In 1983, another major jet fuel spill was discovered near Concourse E during construction in the area. In 1971 Hydrocarbon Decontamination Separator Trenches were installed by Eastern Airlines to remove the 1.5 million gallons of varsol which had spilled underground. In August 1973 this operation was ceased due to slime build-up in the trenches and extremely slow natural migration of hydrocarbons into the trenches. Actual recovered volumes of hydrocarbons were less than 10% of the estimated spill. Other recovery procedures at the airport were conducted during dewatering operations at construction sites within the airport and were unsuccessful in removing substantial quantities of hydrocarbons. In April 1981, construction at the Eastern Airlines maintenance base revealed a thick hydrocarbon layer floating on the water table in the excavated trench. During the early 1970's Eastern Airlines installed 54 shallow observation wells at their maintenance base near the Varsol spill area. Measurements of water-table depth and hydrocarbon thickness on the upper layer of the water table were taken twice a year during both the wet and dry seasons from 1975 to 1981. According to these data, hydrocarbon layer thickness shows a declining trend with time. In some wells, the hydrocarbon layer could not be detected in the second year. In the Concourse E area, Dade County installed 43 monitoring wells to determine the extent and magnitude of jet fuel spilled. In 1983, Dade County also installed three recovery wells in the Concourse E area and began recovery operations. Through May 1984, over 102,000 gallons of jet fuel had been recovered from this area.

While no varsol was found in and around the airport, the spill did occur. Several factors could contribute to the fact that no varsol is detectable at this time; some of the solvent was recovered. Biodegradation is believe to have destroyed some more, but the hydrology of the aquifer system strongly suggests some of the solvent contributed to and has become a part of the "background" contamination in the aquifer.

EPA, with the concurrence of the Florida Department of Environmental Regulations, has determined all appropriate Fund-financed response under CERCLA at the Varsol Spill site has been completed. The decision is detailed in the Record of Decision for this site.

Tri-City Oil Conservationist Site, Temple Terrace, Florida

The Tri-City Oil Conservationist site is approximately one-fourth acre in a light industrial commercial area of Temple Terrace, Florida. The TriCity property was used for a heating oil service business from the early 1960's to 1975. From 1978 to 1983 Tri-City Oil Conservationist Corporation was a waste oil collection and distribution center. In 1982, a waste oil spill occurred during transfer operations. Failure to clean up this spill, in combination with poor surface drainage, caused accumulation of liquid wastes at the site. In response to the problem, the Hillsborough County Environmental Protection Commission and the Florida Department of Environmental Regulation investigated the site. This November 1982 investigation included the analysis of spoils and sludges for priority pollutant metals and hydrocarbons. In September 1983, the Tri-City site was proposed for inclusion on the National Priorities List (NPL) and appeared as final on the NPL in September 1984. In January 1984 additional sampling by FDER revealed metals contamination in surface soils and in soils 1 to 2 feet beneath the surface. Analysis of these samples indicated the presence of heavy metals, benzene, toulene, xylene, and chlorinated hydrocarbons. Analysis of the groundwater samples collected both on-site and adjacent to it showed no detectable contamination. In February 1984, the EPA issued an Administrative order to the responsible parties ordering them to clean up the site. They did not take any cleanup actions. The EPA conducted an immediate removal at the Tri-City site removing liquids and sludges from below ground tanks and the top six inches of soils from the site. These materials were then disposed of at an EPA approved hazardous waste landfill. DER followed this removal with a contamination assessment which revealed VOC's and heavy metals were present in the top one to three feet of soil on the site. In April 1985 DER began source removal of contaminated soils to protect groundwater supplies on and off site. Organic liquids and sludges were removed. When the work was completed the soils were sampled. Two areas of the site contained low levels of contamination. Further soil removal was conducted by FDER to remove remaining contaminants. The site was then resampled to verify removal was complete. Upon completion, clean fill was used to bring the site back to its original grade in May 1985. In August 1985, the Tri-City monitor wells and nearby drinking water wells were sampled by DER personnel. Analysis indicated metals concentrations for cadmium, chromium, and led to be slightly above drinking water standards in two of the monitor wells. In January 1986 the Tri-City wells were again sampled; analysis revealed all samples to be within drinking water standards. A June 1986 sampling of all monitoring wells indicated these wells were below state and federal drinking water standards. A local public comment period was held from August 30, 1987 through September 10, 1987. No public comments were received.

EPA, with the concurrence of the Florida Department of Environmental Regulations, has determined all appropriate Fund-financed response under CERCLA at the Tri-City site has been completed. This decision is detailed in the Record of Decision for this site.

Date: February 23, 1988.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[General Docket 87-14]

Amendment of Part 2 of the Commission's Rules Regarding the Allocation of the 216-225 MHz Band

AGENCY: Federal Communications Commission.

ACTION: Order accepting late-filed comments.

SUMMARY: This action accepts late-filed comments filed by the United Parcel Service of America, Inc. (UPS) to the *Notice of Proposed Rulemaking* concerning allocation of the 216-225 MHz. Further it provides for reply comments to the UPS comments to be filed until March 31, 1988. This action is in response to a Motion for Acceptance of Late-Filed Comments filed by UPS. UPS requested the comments be accepted as they provide knowledge of network and equipment plans that will assist the Commission in reaching its decision in this proceeding.

DATE: Reply comments due March 31, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Fred Thomas, telephone (202) 632-8112.

SUPPLEMENTARY INFORMATION: The Proposed Rule was published on February 27, 1987, 52 FR 6024.

BILLING CODE 6712–01–M

---

47 CFR Part 73

[MM Docket No. 88–66, RM–6143; RM–6183]

Radio Broadcasting Services; Malone and Owls Head, NY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by North Country Broadcast Co., Inc. proposing the allocation of Channel 243A to Malone, New York, as the community's first local FM service. Channel 243A can be allocated to Malone in compliance with the Commission's minimum distance separation requirements to all domestic allotments without the imposition of a site restriction. The allotment would be approximately 6 kilometers short-spaced to Station CKOI–FM, Channel 245C1, Verdun, Quebec, and approximately 24 kilometers short-spaced to unused and unapplied for Channel 243C1 at Trois Rivieres, Quebec, Canada. However, our review of the proposal shows that the use of Channel 243A at Malone will comply with the interference criteria to the two Canadian allotments as set forth in the U.S.-Canada Working Agreement. We are, therefore, requesting Canadian concurrence in the allotment of Channel 243A to Malone as a specially negotiated short-spaced allocation. The Commission also requests comments on a mutually exclusive petition filed by Timothy D. Martz to allocate Channel 242A to Owls Head, New York, as the community's first local FM service. Petitioner is requested to furnish information demonstrating that Owls Head is a community for allotment purposes since it is not listed in the U.S. Census. Channel 242A can be allocated to Owls Head in compliance with the Commission's minimum distance separation requirements with a site restriction of 1.0 kilometer (0.6 mile) southwest to avoid a short-spacing to Station CJFM–FM, Channel 240C1, Montreal, Quebec, Canada. While this site restriction does not negate the short-spacing to Station CFMK–FM, Channel 242B, Kingston, Ontario, Canada, a staff study shows that there would be no prohibited signal overlap within the 60 dBu service contour of Channel 242A at Owls Head. Therefore, we shall also request Canadian concurrence in this allotment as a specially negotiated short-spaced allotment.

DATES: Comments must be filed on or before April 25, 1988, and reply comments on or before May 10, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Mitchell C. Tackley, President and General Manager, North County Broadcast Co., Inc., Porter Road, Malone, New York 12953 (Petitioner for Malone) and James R. Bayes, Esq., Jerry V. Haines, Esq., Wiley, Rein & Fielding, 1776 K Street NW., Washington, DC 20006 (Counsel to Martz).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 88–66, adopted January 29, 1988, and released March 3, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 88–67, RM–6178]

Radio Broadcasting Services; Ogdensburg, NY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Timothy D. Martz to allocate Channel 254A to Ogdensburg, New York, as the community's second local FM service. Channel 254A can be allocated to Ogdensburg in compliance with the Commission's minimum distance separation requirements with a site restriction of 4.8 kilometers (3.0 miles) northeast. Canadian concurrence in the allotment is required since Ogdensburg is located within 320 kilometers (200 miles) of the U.S.-Canadian border.

DATES: Comments must be filed on or before April 25, 1988, and reply comments on or before May 10, 1988.

ADDRESS: Federal Communications Commission, Washington DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: James R. Bayes, Esq.; Jerry V. Haines, Esq., Wiley, Rein & Fielding, 1776 K Street NW., Washington DC 20006 (Counsel to petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of proposed Rule Making, MM Docket No. 88–67, adopted January 27, 1988, and released March 3, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW. Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

[MM Docket No. 88–70, RM–6163]

Radio Broadcasting Services; Lincoln City, OR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Matrix Media, Inc. requesting the substitution of Channel 244C2 for Channel 244A at Lincoln City, Oregon, and the modification of its license for Station KCRF to specify operation on the higher powered channel. Channel 244C2 can be allocated to Lincoln City in compliance with the Commission's minimum distance separation requirements and can be used at Station KCRF's present transmitter site. In accordance with § 1.420(g) of the Commission's Rules, competing expressions of interest in Channel 244C2 at Lincoln City will not be accepted.

DATES: Comments must be filed on or before April 25, 1988, and reply comments on or before May 10, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Roger J. Metzler, Farrand, Cooper, Metzler & Bruiniers, P.O. Box 7329, San Francisco, California 94120 (Counsel to petitioner).

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 395

[FHWA Docket No. MC–130]

Driver's Record of Duty Status; Automatic On-Board Recording Devices

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The FHWA is requesting comments on proposed changes to the driver's record of duty status requirements contained in Part 395 of the Federal Motor Carrier Safety Regulations (FMCSR). The FHWA has denied the petition for reconsideration filed by the Insurance Institute for Highway Safety (IIHS) on February 25, 1987, to require the installation and use of on-board automatic recordkeeping systems to record vehicle operation. However, the FHWA believes that automatic on-board recording devices may be an effective alternative to the current recordkeeping requirement. Accordingly, this rulemaking proposes to allow, at the motor carrier's option, the use of automatic on-board recording devices in lieu of the handwritten driver's record of duty status. The proposal would replace the current case-by-case review of petitions to permit such devices in lieu of the handwritten record.

DATE: Written comments must be received on or before April 13, 1988.

ADDRESS: All written comments must be signed and should refer to the docket number that appears at the top of this document and should be submitted (preferably in triplicate) to Room 4205, HCC-10, 400 Seventh Street SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., ET, Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas P. Kozlowski, Office of Motor Carrier Standards, (202) 366–2981, or Mr. Thomas P. Holian, Office of the Chief Counsel, (202) 366–1350, Federal Highway Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:40 a.m. to 4:15 p.m., ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION:

Background

Section 395.8, Driver's record of duty status, currently requires drivers to record their duty status and over vital information in duplicate, in their own handwriting, on a graph grid. An exception is provided for drivers operating within a 100 air-mile radius of the normal work reporting location (49 CFR 395.8(k)).

Since 1982, the FHWA has also allowed drivers to use a grid to record duty status (49 CFR 395.8(g)). The grid may be incorporated into any motor carrier form, provided all information required by § 395.8(d) is also contained on that form. Drivers must record their duty status as follows:

1. "Off duty" or "OFF";
2. "Sleeper berth" or "SB" (only if sleeper berth used);
3. "Driving" or "D"; and
4. "On-duty not driving" or "ND".

The IIHS submitted a petition to the FHWA on October 1, 1986, requesting regulations, "* * * to require the installation and use of on-board automatic recordkeeping systems to record vehicle operations." Research conducted by the FHWA in 1978 showed the automatic record, principally the recording tachograph, while very accurate, was unable to provide a driver's record of duty status sufficient to enforce the FMCSR in team-driver operations, and automatically producing duplicate copies of the charts (i.e., logs). Research conducted about the same time by the American Trucking Associations, Inc. (ATA), to evaluate the accident experience of motor carriers using recording tachographs versus motor carriers not using the devices, indicated that the good safety performance of carriers using the devices may have been due to other factors than the use of on-board recording devices. Accordingly, the FHWA denied the petition on December 22, 1986.

The IIHS submitted a petition to reconsider on February 25, 1987. The FHWA, in response to this petition, published an Advance Notice of Proposed Rulemaking (ANPRM) on July 13, 1987 (52 FR 26289). IIHS requested in this petition, as in the earlier one, for FHWA to commence rulemaking to require the use of automatic on-board recording devices for recording the driver's hours of service in lieu of the handwritten record.

The FHWA published a notice in the **Federal Register** on April 17, 1985 (50 FR 15269), that it granted an exemption from the record of duty status recordkeeping requirement to permit Frito-Lay, Inc., to use an on-board computer in lieu of the hand completed record of duty status. On April 2 (52 FR 10664), July 13 (52 FR 26292), July 31 (52 FR 28633), and October 27, 1987 (52 FR 41380), the FHWA published notices in the **Federal Register** either providing notice of and opportunity to comment on similar requests for exemptions, or providing notice that such exemptions had been granted.

The FHWA has granted exemptions to ten motor carriers to permit their drivers to operate their vehicles with on-board computers for recording drivers' record of duty status in lieu of the handwritten record. The FHWA is also considering three additional requests from motor carriers for exemptions.

The FHWA is currently monitoring field tests of two different on-board computer systems being used by ten different fleets. Field testing is necessary to continue to document the reliability and accuracy of the on-board recorder systems, the driver's adaptability ot these devices, and the effectiveness of such systems in assisting in the enforcement of the hours-of-service regulations.

The FHWA's July 1987 compliance/safety reviews of 460 Frito-Lay, Inc., drivers operating with automatic on-board recorders revealed no degradation in the areas of interest to enforcement personnel, i.e., monitoring hours of service and safety. The failure rate for the automatic on-board recorders experienced at that time by Frito-Lay, Inc., was one percent. The field testing process has permitted the discovery of a number of problems with the computer software controlling the recording of sleeper-berth time and the production of records. All of these have been corrected.

Information available to the FHWA at this time indicates that there are at least nine manufacturers currently marketing on-board recorders for fleet operation. The FHWA requests documentation of the operation and features of the devices from the manufacturers.

The FHWA believes that hours of service of drivers is an important element to safety and that monitoring the hours of service of drivers should be a high priority for motor carriers, and that enforcement of the hours of service should be and is a high priority for Federal, State, and local agencies concerned with commercial motor vehicle safety.

Docket Comments

The FHWA received a total of 22 comments to the ANPRM docket, Docket No. MC–130, which closed on October 13, 1987. The commenters included:

8 from motor carrier industry associations;

3 from manufacturers of on-board computers;

2 from tachograph manufacturers;

2 from insurance industry members;

4 from commercial companies, all of which operate private motor carrier fleets;

1 each from a labor union, a State highway patrol, and a State public service commission.

Only three comments contained detailed responses to the questions asked in the ANPRM. Also, commenters, with the exception of two tachograph manufacturers, commented only on the on-board computer systems. However, analysis of the 22 comments submitted to the docket established five major issues of concern to the companies and individuals who responded to the ANPRM. The five issues will be discussed in detail in the following sections.

Issue No. 1: Should regulations be issued that would mandate the use of on-board recorders in commercial motor vehicles used in interstate commerce?

Fourteen of the 22 commenters opposed a mandatory requirement, while five favored such a requirement. Two others recommended that tachographs be given serious consideration for recording drivers' hours-of-service information. One commenter did not take a position on the issue.

Four commenters (including the International Brotherhood of Teamsters, Chauffeurs, Warehousemen & Helpers of America (IBT), the American Trucking Associations, Inc. (ATA), and the Owner-Operators Independent Drivers Association of America, Inc. (Owner-Operators)) contend that there is no meaningful evidence at this time as to the effectiveness of onboard recorders in improving highway safety. CECOS International, Inc. (CECOS), a private motor carrier from Williamsburg, Ohio, submitted accident data for property damage frequency rates that ranged from 0.24 to 0.41 per million miles for recent periods. CECOS stated, "The data show that safe driving records can be maintained with a good transportation/drive management program without the use of on-board recording systems."

The National Private Trucking Association summarized its views on the safety issue, stating, "* * * the on-board computer does not, in and of itself, result in greater safety. Management must make a daily commitment to analyze the data and accept the responsibility to act to correct safety problems." Cadec Systems, Inc. (Cadec), a manufacturer of on-board computers, Frito-Lay, and the IBT made similar comments on the impact of on-board computers on safety.

IIHS, the American Automobile Association (AAA), and Argo Instruments, Inc. (Argo), a tachograph manufacturer, support a mandatory on-board recorder regulation. The AAA stated, "AAA supports the development of a performance standard under which motor carriers would be required to install such devices to monitor driver and equipment performance." The AAA cited a recent 2-year study of large truck accidents in Washington State, "Effects of Driver Hours of Service on Tractor-Trailer Crash Involvement" (IIHS, Sept., 1987, Ian S. Jones and Howard S. Stein), which found a substantial correlation between crashes and fatigue due to long driving hours as a basis for their position. IIHS determined that driving excessive hours was the probable cause in 41 percent of the accidents studied and a contributing factor in 18 percent of the other accidents.

Argo provided accident statistics from the Federal Republic of Germany and claimed that accidents are reduced where automatic on-board recorders are required in commercial motor vehicles. Tachographs have been required on most commercial motor vehicles operated in the Federal Republic of Germany since 1953. Argo stated, "On the basis of the transport volume, the accident involvement of goods vehicles was cut down by almost 75% during the last 20 years."

The AAA stated that fatigue would be reduced by controlling hours of driving and thereby lead to fewer accidents. The IBT, the Petroleum Marketers Association of America (PMAA), and CECOS comments indicated, however, that it would not be realistic to require on-board recorders for certain segments of the motor carrier industry. They indicated that those motor cariers that do not practice good safety programs would likely circumvent any automatic recording system.

After consideration of the information now available to the FHWA, public comments, and the possible purchasing, financing, and servicing disruption resulting from a mandate to use on-board recorders, the FHWA denies the IIHS petition for reconsideration to require motor carriers to install and use automatic on-board recording devices in lieu of the handwritten record. The FHWA believes, however, that the devices have merit, and as discussed in Issue No. 3, should be allowed for use by the motor carrier industry as an alternative to handwritten driver records.

Issue No. 2: The expense of automatic on-board recorders.

Twelve commenters indicated that they were concerned about the expense related to mandating on-board recorders in interstate motor vehicles. The PMAA stated, on behalf of the petroleum distributors, "The expense of on-board computer systems would be prohibitive for most of their marketers." Other commenters stated that the costs were not justified and a mandatory requirement for on-board computers would cost the industry billions of dollars plus millions of dollars annually in maintenance costs. Cadec indicated that the current onboard computer systems are not designed for, and are not cost effective for most small carriers. The FHWA estimates that the cost of the on-board computer, at current unit prices ($1,750), for every truck tractor operating in interstate commerce would amount to over $1.5 billion.

Information provided by Cadec indicates that a complete on-board computer system, for a 10 vehicle fleet, could have a first-year cost to a motor carrier of nearly $35,000 as follows:

Components	Costs
On-board computers (at $1,750 each)	$17,500
Installation	1,000
Computer and printer	4,500
Data link	2,970
Office computer software	3,960
Training/start up costs	3,000
Maintenance for 1 year	2,000
Total	34,930

The FHWA estimates that the vast majority of interstate motor carriers (current estimate is 180,000 of 220,000 fleets) have less than a ten vehicle fleet. Based on the manufacturer's assessment, there is reason to question the cost effectiveness of on-board recorders versus the handwritten record for this group of motor carriers.

Training for drivers, clerks and management, in the operation of the devices and computer system, start up costs encountered in debugging the overall system, plus nonproductive vehicle time needed for installation of the devices would add to the overall cost of an on-board computer system. These costs could realistically be estimated at 10 percent of the total equipment cost or $3,000 for a ten truck fleet.

The FHWA believes that the cost of the on-board computer systems will gradually fall as more companies enter the electronic recorder market and sale volume increases. At this time, however, the cost of an on-board computer system may militate against requiring automatic on-board recorders.

Issue No. 3: Should the FHWA allow motor carriers to voluntarily use the on-board recorder for recording drivers' records of duty status in lieu of the handwritten record?

Nine responses favored allowing the use of the on-board computer. Of these nine, four further stated that they were opposed to any plan in which the FHWA would approve the use of on-board recorders in lieu of the handwritten record on a case-by-case basis. They indicated that this type of approval system has proven to take too much time. Only one respondent, the

---

American Bus Association (ABA), recommended that the case-by-case approval system continue to be used. The IBT stated, "* * * further exemptions should not be granted until the extent is determined to which on-board computers lend themselves to enforcement of hours-of-service regulations at roadside inspections."

The FHWA proposes to allow the use of on-board computers to record drivers' records of duty status in lieu of the handwritten record as long as they meet the performance requirements contained in § 395.15. This decision is based on the information available to the FHWA, public comments, and the need to identify new means of promoting motor carrier safety. The FHWA's exemption programs currently being conducted in ten motor carrier fleets will help to develop additional data regarding the use of automatic on-board recorders. The information gathered to date, however, indicates that such systems can improve driver control, aside from the issue of maintaining hours of service compliance records. Furthermore, the automatic on-board recording devices appear no less effective than handwritten driver logs. Use of such equipment will also promote increased management control of fleet operations. The FHWA believes that greater management control relates, in a positive way, to increased productivity, better maintenance, and improved safety.

Technological advances in the designs of tachograph records have made these devices capable of driver-interactive hours-of-service recordkeeping. They are also highly accurate, easily read by enforcement personnel, and considerably less expensive than the current on-board computer systems. For these reasons, the FHWA has determined that these devices should also be allowed in lieu of the handwritten record, provided they meet the proposed performance requirements for using such devices as contained in § 395.15.

Issue No. 4: To what extent are on-board recorder systems tamperproof?

Eight comments to the docket specifically mentioned a concern about possible tampering to alter data. The IBT indicated considerable concern that the on-board recorder would lead to driver harassment and increased work related stress, both of which might lead to tampering. Cadec stated that up to 5 percent of the devices returned to their factory for the first-time for repairs had failed due to tampering. However, Cadec noted that the level of this type of repair quickly fell to one percent or less once the motor carrier management was notified of the problem.

The FHWA believes that the level of compliance, while unacceptable, is better than the current practices using the handwritten record. Manufacturers may also react to tampering with improved devices which will further curtail tampering attempts.

In considering information available to the FHWA at this time, plus the positive reports received from the FHWA's Office of Motor Carriers' Safety Specialists investigating on-board computer users who have been granted waivers, there does not appear to be a serious problem with tampering of on-board computers.

Issue No. 5: Standardization.

Two on-board computer manufacturers and one motor carrier that uses such a device recommend standardization of the printed data and visual communications format. Standardization was cited as a means of reducing the burden for enforcement officials as the number of different on-board computer systems grows.

Section 395.8 of the FMCSR, Driver's record of duty status, specifies the items of hours-of-service information to be recorded. Currently, § 395.8 also specifies the use of a grid to depict the driver's status. The manufacturers of on-board computers currently being tested under FHWA exemptions have designed their software to provide all of the information required in § 395.8(d). In addition, drivers may activate the instrument's electronic display by striking coded keys to show the duty status information sequentially. In this way, drivers may meet the duty status record requirements for the current day. Reports from the Office of Motor Carriers' Safety Specialists indicate that enforcement personnel find this method of checking drivers' hours-of-service easy and fast, thereby minimizing the time a vehicle and driver are detained for inspection. For these reasons, the FHWA does not propose to require additional or special information formats beyond that currently required in § 395.8.

The current software is able to reconstruct the mandated grid when used with office computer equipment. The grid is needed for compliance/safety reviews of motor carriers and motor carriers would be required to generate such a grid upon demand. The FHWA is interested in the use of computer stored information files, including hours-of-service records, as an alternative method to store and retrieve this data.

Information Requested

The FHWA requests comment on the proposed rule. The FHWA is especially interested in receiving comments and information on the following questions:

1. Are techniques available that permit drivers to certify the authenticity of the hours-of-service records stored in the memory of the motor carrier terminal or home office computer?
2. Would a personal driver-record identifier guarantee the evidentiary value of the driver's computer stored record of duty status?
3. What software and hardware security measures or other protection are available to reduce the possibility of tampering by drivers or motor carriers to an acceptable level and to verify a driver's acknowledgment of the record of duty status with an acceptable level of confidence that the verifying person was the driver?
4. What are the acceptable levels of confidence for tamperproofing and verification of identity?
5. Is technology available that will permit drivers' hours-of-service records to be stored by a computer, following verification by the driver, and thereafter be unalterable?
6. Under what circumstances should hard copies be required?
7. What type and method of training should State enforcement agents receive in order to become familiar with the workings of automatic on-board recorders?
8. Should motor carriers be required to notify FHWA of their intention to use on-board recording devices?
9. Should the design of the on-board recording device by required to warn the driver when it is malfunctioning?
10. Should the final rule require a uniform format (i.e., type of data and order in which it is presented) for the visual displays on the on-board recording devices? Is this or other uniformity needed for enforcement purposes? Would any specific design requirements, such as uniformity of data presentation, unnecessarily restrict device design and associated costs of the devices?
11. Should the final rule contain maximum failure rates for the devices which would make the devices unacceptable for use? If so, what should these rates be?

Discussion and Regulatory Impact

The FHWA has determined that the technology available at this time has reached a level of development that permits the FHWA to accept driver-interactive, automatic on-board recorders for recording drivers' hours of service. The promulgation of rules to allow the use of these devices in lieu of the handwritten record will not diminish safety and will likely have positive benefits for the industry, enforcement agencies, and safety. The FHWA expects the introduction and acceptance of automatic on-board recorders to greatly reduce the paperwork burdens for motor carriers as a result of savings of the time and expense in handling, evaluating, filing, and storing records.

Motor carriers could also gain considerably from increased information of their operations. Increased productivity is reported by certain motor carriers using automatic on-board recorders. This increase is due to the more accurate calculation of mileage driven and the time available for actual driving. Enforcement personnel have also found that time can be saved in roadside inspections where automatic display of driver hours of service records are possible. As a result, vehicles are detained for shorter periods during inspections.

The FHWA believes that the benefits gained from permitting the use of automatic on-board recorders will outweigh any negative societal or operating costs that might exist. The extensive operational experience by carriers already provided an exemption to use the recorders, particularly Frito-Lay, Inc., appears to support this claim. If future compliance/safety reviews reveal, however, that drivers and/or motor carriers are abusing the intent of the automatic systems, the FHWA is prepared to initiate rulemaking to strengthen the regulations associated with the use of automatic on-board recorders.

The FHWA is proposing to amend 49 CFR 395.8 to permit motor carriers to use automatic on-board recording devices an an alternative to the handwritten record of duty status. The FHWA is proposing to issue a new § 395.15 specifying the requirements which an automatic on-board recording device must meet in order to be acceptable as an alternative to the handwritten record of duty status.

The proposed rule would add a definition of automatic on-board recording device to § 395.2. The definition would be broad enough to include a variety of devices, including computers and tachographs, provided the devices meet the requirements specified in the proposed rule. The device must also be able to record the time and synchronized vehicle operations which are related to vehicle motion (i.e., speed, axle revolutions). Section 395.8 of the FMCSR would also be revised to allow automatic on-board devices in lieu of the handwritten records of a driver's duty status.

The proposed § 395.15 would contain a number of paragraphs. Section 395.15(a) would contain the authority for the motor carrier to use the devices, at its discretion, and the requirement that the driver use the device if the motor carrier so decides. Section 395.15(b) would contain the requirements for use of the on-board devices and support systems. These include the requirement for the device to immediately generate information needed by enforcement personnel and for home terminal support systems to generate summaries of the hours of service information. This paragraph also requires that the driver have available, either in the device or hard copy, a record of the full 6 or 7 days of previous driver status required in Part 395.

While this NPRM does not propose to require that "hard copies", i.e., paper copies, be created, if such copies are made, it is proposed that they be signed by the driver. The driver's signature certifies that all entries on these documents, required by this section, are true and correct.

Section 395.15 would require that instruction information on how the device operates be carried on board the vehicle. If the device fails, the rule would require that the driver immediately reconstruct his or her duty status for the previous 7 days, less whatever time for which the driver has a hard copy of the duty status. The rule would require that the driver carry sufficient blank duty status grids to reconstruct, in case of a device failure, past days and future days to complete the trip.

The proposal would also establish minimum performance standards for the devices. These standards are considered important to ensure that the devices have low failure rates and drivers are not faced with major reconstruction of past travel. The standards are also needed to ensure that the devices provide information in a uniform and adequate manner for Federal, State, and local enforcement personnel. The FHWA proposes that the motor carrier obtain a certification from the device manufacturer that the device meets certain standards. The FHWA also proposes that the device permits update of duty status only when the vehicle is at rest. This requirement is necessary in recognition of the importance of the driver maintaining eye contact with the other vehicles in the traffic stream while driving. The FHWA is interested in comment on the appropriateness and adequacy of these requirements.

The proposed alternative method of recording drivers' hours of service is intended to provide relief to motor carriers and drivers from the burdensome requirements of completing these records by hand and of handling, processing, and retaining numerous pieces of paper. The FHWA believes, however, that its hours of service recordkeeping requirements are needed to effectively monitor drivers' hours of service and to enforce the hours of service regulations so as to minimize the problem of driver fatigue. The FHWA is reluctant to take any step which would reduce compliance with the hours of service requirements of Part 395. The FHWA intends to closely monitor the use of on-board recording devices for recording and monitoring drivers' hours of service. In this proposal (§ 395.15(k)), the FHWA would reserve the right to order motor carriers to require drivers to prepare driver's records of duty status by hand if the FHWA assigns a motor carrier a conditional or unsatisfactory safety rating, or if the FHWA determines that drivers are exceeding the hours of service limitations of Part 395, failing to accurately and completely record their hours, or tampering with the devices. The alternative provided by § 395.15 would no longer be available to this motor carrier.

The FHWA believes the proposed rule has the potential to substantially reduce the paperwork burden now imposed on the motor carrier industry. It is conservatively estimated that the driver who begins to use an on-board electronic recording device in lieu of the currently required driver's record of duty status would have the paperwork burden reduced by at least 80 per cent. A motor carrier must now review each driver's record of duty status, which is prepared daily. Again, it is conservatively estimated that a motor carrier who makes use of on-board electronic recording devices and the computers used in conjunction with such devices would realize a burden reduction of at least 80 per cent. The FHWA seeks comments concerning paperwork burdens. It is particularly interested in receiving:

1. Information indicating how many motor carriers could be expected to use the on-board electronic recording devices.

2. Estimates on the amount of time drivers and motor carriers expend on the "driver's records of duty status."

3. Estimates on the percentage of reduction drivers and motor carriers could expect if on-board electronic recording devices were used.

4. Information or suggestions for modifications of this proposal that could result in further reductions.

It is further anticipated that any economic impact upon the motor carrier industry will be outweighed by the economic benefits derived in the utilization of better operational data produced by the automatic on-board recorder. The motor carrier will have a choice whether to use the recorder, so any increase in costs is at the carrier's discretion. Furthermore, there are safety benefits expected as a result of increasing numbers of companies using these devices. State enforcement officials will experience increasing productivity in roadside inspection programs as the total number of vehicles equipped with on-board recorders grows. For these reasons and under the criteria of the Regulatory Flexibility Act, it is hereby certified that this action will not have a significant economic impact on a substantial number of small entities.

Information collection requirements contained in this regulation are being submitted to the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

The FHWA has determined that this document does not contain a major rule under Executive Order 12291. However, because of the public interest in commercial motor vehicle safety, this proposed rule is considered significant under the regulatory policies and procedures of the Department of Transportation. For this reason and pursuant to Executive Order 12498, this rulemaking action has been included on the Regulatory Program for significant rulemaking actions.

The economic impact anticipated as a result of this rulemaking action will be minimal, since this proposal merely affords motor carriers an alternative method of complying with an existing safety requirement.

Due to the number of occasions the public has had an opportunity to comment on this specific issue, the FHWA has determined that a 30-day public comment period is adequate for this proposal. In addition, because this proposal is not mandatory, and no degradation in safety will result, the FHWA believes that good cause exists for expedited action and in this case such action will serve the public interest.

List of Subjects in 49 CFR Part 395

Highway and roads, Highway safety, Motor Carriers, Driver's hours of service, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety)

Issued on March 8, 1988.

Robert E. Farris,

Deputy Administrator, Federal Highway Administration.

In consideration of the foregoing, the FHWA proposes to amend Title 49, Code of Federal Regulations, Subtitle B, Chapter III, Part 395 as follows:

PART 395—HOURS OF SERVICE OF DRIVERS

1. The authority citation for 49 CFR Part 395 continues to read as follows:

Authority: 49 U.S.C. 3102; 49 U.S.C. App. 2505; 49 CFR 1.48 and 301.60.

2. Section 395.2 is amended by adding a definition of "automatic on-board recording device" as new paragraph (k) to read as follows:

§ 395.2 Definitions.

* * * * *

(k) *Automatic on-board recording device.* An electric, electronic, or electro/mechanical device capable of recording driver's duty status information accurately and automatically as required in § 395.15. The device must be connected with the vehicle to record vehicle operations.

3. In § 395.8, paragraph (e) is amended by adding, "of this section or § 395.15" between "activities," and "failure" and by removing, "as prescribed herein".

4. In § 395.8, paragraph (l) is amended by adding paragraph (4) to read as follows:

§ 395.8 Driver's record of duty status.

* * * * *

(l) * * *

(4) The requirements of this section, except paragraph (e) and paragraphs (k) (1) and (2) of this section, shall not apply to a motor carrier and its drivers who use automatic on-board recording devices and who comply with all of the requirements of § 395.15 of this part.

§ 395.13 [Amended]

5. In § 395.13, paragraph (b)(2) is amended by adding, "or 395.15" between "395.8" and "shall".

6. Part 395 is amended by adding a new § 395.15 to read as follows:

§ 395.15 Automatic on-board recording devices.

(a) *Authority to use automatic on-board recording device.* (1) A motor carrier may require a driver used by the motor carrier to use an automatic on-board recording device to record the driver's hours of service in lieu of complying with the requirements of § 395.8 of this part.

(2) Every driver required by a motor carrier to use an automatic on-board recording device shall use such device to record the driver's hours of service.

(b) *Information requirements.* (1) Automatic on-board recording devices shall produce, upon demand, a driver's record of duty status grid, chart, electronic display, or printout showing the time and sequence of duty status changes.

(2) The device shall provide a means whereby authorized Federal, State, or local officials can immediately check the status of a driver's hours of service, when used in conjunction with handwritten or printed records of duty status, for the previous 7 days.

(3) Support systems used on conjunction with on-board recorders at the home terminals or principal places of business must be capable of providing authorized Federal, State, or local officials with summaries of an individual driver's hours of service records, including the information specified in paragraph 395.8(d). Such support systems should meet the information interchange requirements of the American National Standard Code for Information Interchange (ANSCII) (EIARS–232/CCITT V.24 port (National Bureau of Standards "Code for Information Interchange," FIPS PUB 1–1)).

(4) The driver shall have in his/her possession records of duty status for the previous 7 consecutive days available for inspection while on duty. These records shall consist of information stored in and retrievable from the automatic on-board recording device, handwritten or computer generated records, or any combination thereof.

(5) All hard copies of the driver's record of duty status must be signed by the driver. The driver's signature certifies that the information contained therein is true and correct.

(c) The duty status shall be recorded as follows:

(1) "Off duty" or "OFF", or by identifiable code or character;

(2) "Sleeper berth" or "SB", or by identifiable code or character (only if the sleeper berth is used);

(3) "Driving" or "D", or by identifiable code or character; and

(4) "On-duty not driving" or "ON", or by identifiable code or character.

(d) *Additional information.* The following information shall also be included:

(1) Date;

(2) Truck or tractor and trailer number;

BEST COPY AVAILABLE

(3) Name of carrier;
(4) Main office address;
(5) Name of co-driver; and
(6) Shipping document number(s), or name of shipper and commodity

(e) *Location of duty status change.* (1) For each change of duty status (e.g., the place of reporting for work, starting to drive, on-duty not driving and where released from work), the name of the city, town, or village, with State abbreviation, shall be recorded.

(2) Motor carriers are permitted to use location codes in lieu of the requirements of subparagraph (e)(1). A list of such codes showing all possible location identifiers shall be carried in the vehicle cab and motor carrier's principal place of business and made available to an enforcement official on request.

(f) *Entries made by driver only.* If a driver is required to make written entries relating to the driver's duty status, such entries must be legible and in the driver's own handwriting.

(g) *Reconstruction of records of duty status.* Drivers are required to note any failure of automatic on-board recording devices, and to reconstruct immediately the driver's record of duty status for the current day, and the past 7 days, less any days for which the drivers has records, and to continue to prepare a handwritten record of all further duty status until the device is operational.

(h) *On-board information.* Each vehicle must have on-board an information packet containing the following items:

(1) An instruction sheet describing in detail how data may be stored and retrieved from an automatic on-board recording system; and

(2) A supply of blank driver's record of duty status grids sufficient to record the driver's duty status and other related information for the duration of the current trip.

(i) *Filing driver's record of duty status.* The driver shall submit or forward, electronically or by mail to the regular employing motor carrier the record of the driver's duty status for a day within 13 days following the completion of that day.

(j) *Performance of recorders.* Motor carriers that use automatic on-board recording devices for recording their drivers' records of duty status in lieu of the handwritten record shall ensure:

(1) That the automatic device design has been sufficiently tested to meet the requirements of this section and under the conditions it will be used;

(2) That the automatic on-board recording device permits duty status to be updated only when the vehicle is at rest;

(3) That the automatic on-board recording device and associated support systems are, to the maximum extent practicable, tamperproof and do not alter the information collected on the driver's hours of service;

(4) That automatic on-board recording devices with electronic displays shall have the capability of displaying the following:

(i) Driver's total hours of driving today;
(ii) The total hours on duty today;
(iii) Total miles driving today;
(iv) Total hours on duty for the 7 consecutive day period, including today;
(v) Total hours on duty for 8 consecutive day period, including today; and
(vi) The device shall have the capabiilty of displaying the sequential changes in duty status and the times the changes occurred, for the number of days which the driver would be recording his/her duty status;

(5) That the on-board recorder is capable of recording separately each driver's duty status when there is a two-driver operation;

(6) That the on-board recording device is maintained and recalibrated in accordance with the manufacturer's specifications; and

(7) That the motor carrier's drivers are adequately trained regarding the proper operation of the device.

(k) *Rescission of authority.* (1) The FHWA may, after notice and opportunity to reply, order any motor carrier or driver to comply with the requirements § 395.8 of this part, so that an automatic on-board recording device is not the sole method to record a driver's hours of service for purposes of this part.

(2) The FHWA may issue such an order if the FHWA has determined that—

(i) The motor carrier has been issued a conditional or unsatisfactory safety rating by the FHWA;

(ii) The motor carrier has required or permitted a driver to establish, or the driver has established, a pattern of exceeding the hours of service limitations of section 395.3 of this part;

(iii) The motor carrier has required or permitted a driver to fail, or the driver has failed, to accurately and completely record the driver's hours of service as required in this section; or

(iv) The motor carrier or driver has tampered with or otherwise abused the automatic on-board recording device on any vehicle.

[FR Doc. 88–5507 Filed 3–10–88; 8:45 am]

BILLING CODE 4910-22-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

[Docket No. 80334-8034]

Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule with request for a short-term comment period.

SUMMARY: In response to a request by the Pacific Fishery Management Council (Council) NOAA proposes regulations (1) to alter the schedule in the framework 1984 amendment to the Fishery Management Plan for the Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California (FMP) which allocates coho and chinook salmon between non-Indian commercial and recreational ocean fisheries north of Cape Falcon, Oregon, and (2) to increase in-season management flexibility in 1988 to allow the total ocean quotas to be harvested. The regulations are necessary to utilize more fully the allowable ocean salmon harvest and to lessen depressed economic conditions in the salmon fishing industry and in businesses associated with it. The regulations are intended to provide management flexibility to maximize the opportunity for ocean harvest of salmon that are surplus to inside fishery and spawning needs.

DATE: Comments will be received until March 23, 1988.

ADDRESS: Comments on this proposed rule may be submitted to Rolland A. Schmitten, Director, Northwest Region, NMFS, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115. Copies of the environmental assessment and the draft regulatory impact review/initial regulatory flexibility analysis (RIR/RFA) prepared for this rule are available upon request from the Council.

Additional assessments of regulatory impacts of this action will be available from the Council as follows. A document entitled "Preseason Report II: Analysis of Proposed Regulatory Options for 1988 Ocean Salmon Fisheries" will be available March 22. A second publication entitled "Preseason Report III: Analysis of Council Adopted Measures for 1988 Ocean Salmon Fisheries" will analyze the impacts of this rule and final management measures adopted by the Council and will be available on or about April 25, 1988. The Council's office address is as follows: Lawrence D. Six, Executive Director, Metro Center, Suite 420, 2000 SW. First Avenue, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206–526–6150.

SUPPLEMENTARY INFORMATION: Regulations implementing the framework amendment to the FMP were published on October 31, 1984 (49 FR 43679), and are codified at 50 CFR Part 661. The framework regulations include a sliding scale for allocating coho and chinook salmon between non-Indian ocean recreational and commercial fisheries north of Cape Falcon, Oregon, based on predicted abundance of coho salmon (Appendix II.B.2.a). At the request of the Council, and emergency rule was implemented in 1986 to increase the recreational share of the ocean coho salmon harvest (51 FR 18451, May 20, 1986). The emergency rule lapsed prior to the 1987 season.

This proposed rule, during a limited period of time, would:

(1) Alter the framework sliding scale by allocating (a) an increased share of the ocean coho and chinook salmon harvest to the recreational fishery during periods of low stock abundance, (b) an increased share of the ocean coho salmon harvest to the recreational fishery during periods of high coho abundance, and (c) an increased share of the ocean chinook salmon harvest to the commercial fishery during periods of high chinook abundance; and

(2) Increase in-season management flexibility to achieve the total ocean harvest quotas for the 1988 season.

The proposed action would be taken under emergency authority of the Magnuson Fishery Conservation and Management Act, section 305(e), 16 U.S.C. 1855(e). Thus, it will be effective for 90 days, and may be extended for one additional period not exceeding 90 days. An FMP amendment is being prepared to consider a similar allocation issues for 1989 and beyond.

The Allocation Review Process

In April 1987, the Council asked the States of Oregon and Washington to conduct a review of the harvest allocation schedule north of Cape Falcon, Oregon. The review was precipitated by dissatisfaction of both commercial and recreational ocean fishermen over the reduced harvests and short ocean salmon seasons of recent years. In addition, fishermen expressed concern that some coho and/or chinook salmon allocated to ocean fisheries always remained unharvested at the end of the season. Each ocean user group had initiated action in hope of increasing its share of ocean harvests.

Commercial interests pursued legal remedies. Two associations representing commercial trollers filed a suit against the Secretary of Commerce (Secretary), challenging the exclusion from the FMP's ocean allocation plan of an escalating recreational fishery just inside the Columbia River mouth (the so-called "Buoy 10" fishery). The plaintiffs in *Pacific Trollers et al. v. Baldrige et al.* requested that harvests from the fishery be treated as if caught in the ocean. This would result in larger ocean quotas for the troll fishery. The Court ordered the parties to resolve the issues in the case through the Council process by the 1988 fishing season.

Recreational advocates pursued legislative remedies. A bill (HB 223) was introduced in the Washington legislature directing the Department of Fisheries, among other things, to "represent sport fishing interests to regional fish allocation bodies as the highest priority." The legislature tabled action on the bill and funded a study to evaluate the economic value and impact of Washington non-Indian salmon and sturgeon fisheries. The economic study will be completed in early March 1988.

The Council adopted a schedule for review of its non-Indian allocation plan north of Cape Falcon, which involved numerous meetings and extensive discussions among fishery representatives and managers during the summer and fall of 1987. Participants in the process became known as the North of Cape Falcon Allocation Work Group (Work Group).

Allocation Alternatives

Allocation alternatives drafted by the Work Group were presented to the Council during its November 1987 meeting. The alternatives addressed three separate aspects of allocation: (A) Objectives and flexibility of the allocation plan; (B) a sliding scale to allocate coho and chinook salmon between non-Indian commercial and recreational ocean fisheries at various levels of stock abundance; and (C) accounting of salmon harvests in the Buoy 10 fishery. The alternatives are described below.

A. Allocation Objectives and Management Flexibility

Work Group participants unanimously agreed that additional management flexibility was needed in the allocation plan to allow trades of chinook and coho between non-Indian ocean fisheries and transfers of salmon from one fishery to the other which could not otherwise be harvested in the ocean. The Work Group also agreed on an allocation objective for each fishery. These recommendations were adopted by the Council for public comment purposes as an alternative to the status quo.

B. Allocation Schedule

Three alternative allocation schedules were proposed for public review: The status quo, an option developed by troll representatives, and an option developed by recreational representatives. The three options are described in the following table:

COMPARISON OF ALTERNATIVE ALLOCATION SCHEDULES FOR NORTH OF CAPE FALCON NON-INDIAN OCEAN CATCHES (DEVELOPED NOVEMBER 1987)

Coho			Chinook		
Percentage	Harvest (thousands of fish)		Percentage	Harvest (thousands of fish)	
	Troll	Recreational		Troll	Recreational
Alternative 1—Status quo (current framework fmp) [1]					
0–600 600–1,300 >1,300	31–49 49–69 69	69–51 51–31 31	0–600 600–1,300 >1,300	63–54 54 54	37–46 46 46
Alternative 2—(Developed by commercial advisors) [2]					
0–100 200 300	25 30 35	75 70 65	0–80 100 120	50 54 58	50 46 42

COMPARISON OF ALTERNATIVE ALLOCATION SCHEDULES FOR NORTH OF CAPE FALCON NON-INDIAN OCEAN CATCHES (DEVELOPED NOVEMBER 1987)—Continued

Coho			Chinook		
Percentage	Harvest (thousands of fish)		Percentage	Harvest (thousands of fish)	
	Troll	Recreational		Troll	Recreational
400	40	60	140	58.5	41.5
500	45	55	160	59	41
600	50	50	180	59.9	40.5
700	55	45	200	60	40
800	60	40	220	60.5	39.5
900	63	37	240	61	39
1,000	66	34	260	61.5	38.5
>1,100	69	31	280	62	38
			300	62.5	37.5
Alternative 3—(Developed by recreational advisors)[3]					
0-300	25	75	0-100	50	50
>300	60	40	100-150	60	40
			>150	70	30

[1] This is a shortened version of the existing framework table in the FMP. In the existing framework allocation schedule, the chinook percentages are tied to total allowable coho harvest.

[2] For allowable chinook harvests between the numbers shown, the allocation would be interpolated linearly. If the ocean recreational chinook quota determined from this allocation schedule exceeds 25 percent of the ocean recreational coho quota, the recreational chinook allocation would be 25 percent of the recreational coho quota with the balance of the chinook being allocated to the troll fishery.

[3] In this schedule, the percentage allocation is additive depending on stock abundance. For example, for a total coho harvest of 350,000, the recreational allocation would be equal to 75 percent of 300,000 coho plus 40 percent of 50,000 coho or 225,000+20,000=245,000.

C. Buoy 10 Accounting

In the suit filed by commercial trollers questioning the exclusion of the Buoy 10 recreational fishery from the ocean allocation schedule, the Court ordered the parties to schedule resolution of the issues presented in the case through the Council process by the 1988 fishing season. Pursuant to the Court's directive, four alternatives proposed by the Work Group were approved by the Council at its November meeting for public review:

1. Status Quo

The impacts of the Buoy 10 fishery upon stocks of concern are considered pre-season in the determination of the allowable ocean harvest. None of the Buoy 10 harvest, nor impact on stocks of concern, count toward achievement of ocean quotas.

2A. Impact on Stocks of Concern

Impacts of the Buoy 10 recreational fishery on the weakest stocks of ocean management concern would be calculated as if the harvest were in the ocean. Any resulting change in allowable ocean harvest of all stocks would be divided between ocean fisheries according to an allocation schedule.

2B. Impact on Stocks of Concern, Including Any Inside Commercial Impacts

This alternative is similar to Alternative 2A except that any impacts on critical stocks from the non-Indian gillnet fishery inside the Columbia River mouth also would be calculated as if harvested in the ocean. As in Alterntive 2A, the resulting change in allowable ocean harvest of all stocks would be divided between ocean fisheries according to an allocation schedule.

3. Entire Buoy 10 Catch

Ocean salmon quotas would reflect consideration of the entire Buoy 10 catch as if it were taken in the ocean.

Council Solicits Public Review

Public comment periods were held at the July, September, and November meetings in 1987, and the January 1988 meeting. In addition, public comments were invited on the allocation alternatives adopted by the Council from December 17, 1987 until the January 1988 Council meeting. The Work Group continued to meet to discuss compromise positions. Public hearings were held in Seattle, Washington, on January 6, and in Astoria, Oregon, on January 7. A large volume of letters was received and reviewed by Council members and staff. The majority of comments received supported refining allocation goals, increasing management flexibility, allocating more salmon to the ocean recreational fishery during periods of low stock abundance, and excluding Buoy 10 catches from the ocean allocation schedule.

Proposed Allocation Plan for 1988

The allocation alternatives were reviewed by Council advisors prior to the January 13–14, 1988, meeting of the Council. Following extensive comment at that meeting, the Council, by majority vote, recommended implementation of an interim allocation plan in 1988 for non-Indian commercial and recreational salmon fisheries north of Cape Falcon, Oregon. It also recommended increasing the in-season management flexibility in 1988 to facilitate attainment of the total ocean quota.

A. Allocation objectives and Management Flexibility

The following allocation ocean harvest north of Cape Falcon is to achieve, to the greatest degree possible, the objectives for the commercial and recreational fisheries, as follows:

> The goal of allocating ocean harvest north of Cape Falcon is to achieve, to the greatest degree possible, the objectives for the commercial and recreational fisheries, as follows:
>
> 1. Provide recreational opportunity by maximizing the duration of the fishing season while minimizing daily closures, gear, bag, and particularly area restrictions.
> 2. Maximize the value of the commercial harvest, while providing fisheries of reasonable duration.
>
> Allocation will be expressed in terms of quotas based on the following schedule, which is presumed to best achieve the allocation goal. However, these quotas are neither guaranteed catches nor inflexible ceilings. Only the total ocean harvest quota is a maximum allowable catch. Additional flexibility in-season may be utilized to adjust individual quotas if the in-season adjustment will increase the degree to which the allocation goal is achieved, e.g., if it is apparent that the harvest of an individual quota by one fishery will not be achieved and that the other fishery can pursue the harvestable fish.

B. Allocation Schedule

The following allocation schedule would replace the current framework allocation schedule:

PERCENTAGE OF TOTAL OCEAN HARVEST TO BE ALLOCATED TO NORTH OF CAPE FALCON NON-INDIAN OCEAN FISHERIES IN 1988[1]

Coho salmon			Chinook salmon		
Ocean harvest (numbers of fish)	Commercial	Recreational	Ocean harvest (numbers of fish)	Commercial	Recreational
>300,000	25	75	<100,000	50	50
>150,000	60	40	100–150,000	60	40
			>150,000	70	30

[1] In this schedule, the percentage allocation is tiered and must be calculated in additive steps when the harvest level exceeds the initial tier. For example, the recreational allocation for a total allowable ocean harvest of 350,000 coho would be composed of two parts. The first part would be calculated by multiplying 300,000 coho by 75 percent. The result of this calculation would be added to the product of multiplying 50,000 coho by 40 percent, i.e. 225,000 + 20,000 = 245,000 coho or 70 percent of the total allowable ocean harvest.

C. Buoy 10 Accounting

The Council proposes no change from the status quo. The impacts of the Buoy 10 fishery upon the weakest stocks of ocean management concern will be taken into consideration in calculating preseason allowable ocean harvests, but Buoy 10 catches do not count toward achievement of ocean quotas as if those catches occur in the ocean.

Rationale for Proposed 1988 Allocation Plan

The Council's adoption of the proposed 1988 allocation plan and continued exclusion of the Buoy 10 fishery from the ocean allocation schedule is based on consideration of comments, testimony and analyses in the administrative record which is summarized as follows:

1. Representatives of both commercial and recreational ocean fisheries support the Council-adopted allocation objectives and increased management flexibility.
2. Increased management flexibility will help ensure that the total allowable non-Indian ocean salmon harvest is taken in the ocean.
3. The current framework schedule allocates chinook based on coho abundance. At the low coho abundance of recent years, it causes severe instability in both commercial and recreational fisheries.
4. The proposed allocation schedule will bring stability and economic benefits to the recreational fishery and related businesses, which outweigh any loss to the commercial industry.
5. A commercial all-species-except-coho fishery in May is maintained under the Council's proposal, which contributes to meeting the objective of the Council to maximize the value of the catch for the commercial fishery.
6. Management of ocean fisheries under the current framework schedule has required an excessive number of in-season management adjustments, which cause an unacceptable level of instability, particularly in the recreational fishery. During the 1987 season, nine adjustments to recreational management measures north of Cape Falcon were implemented, including modification of area closures and bag limits. The proposed allocation schedule should reduce the need for inseason changes to recreational management measures.
7. There is currently potential for a Memorial Day to Labor Day recreational fishery in all ocean areas south of Cape Falcon. The proposed allocation schedule increases the possibility of a similar recreational season off Washington and northern Oregon.
8. There is no precedent that would justify managing Buoy 10 as an ocean fishery and there is no historic evidence that Buoy 10 was ever managed as an ocean fishery. The historic insignificance of the fishery led managers to aggregate the landing data from Buoy 10 and the ocean for convenience. When Buoy 10 catches became significant, data were segregated to account separately for the ocean and in-river recreational fisheries.
9. Buoy 10 has a different stock composition than the adjacent ocean waters, so there is no biological reason to treat Buoy 10 as an ocean fishery.
10. There is no distinction between Buoy 10 and any other fishery in internal waters for ocean allocation purposes. Modification of ocean allocations to account for one internal water fishery would establish management inconsistency between that fishery and other fisheries in internal waters.
11. The Buoy 10 fishery is an historic fishery whose growth has been caused by the same factors which benefitted inside commercial fisheries. If Buoy 10 recreational catches were to count toward ocean quotas, it would be necessary to count the in-river commercial catch in the ocean quota to preserve equity between the two user groups.
12. It is considered technically impractical to transfer impacts on weak stocks from Buoy 10 to the ocean fisheries e.g., to treat Buoy 10 harvests as if taken in the ocean. One alternative considered by the Council was counting, as if caught in the ocean, only those Buoy 10 fish identified as being from the weakest stocks of ocean management concern. The additional allowable harvest of all stocks would be divided between ocean fisheries according to the allocation schedule, with the Buoy 10 fishery counted against the ocean recreational share. During the January Council meeting, the Chairman of the Council's Salmon Plan Development Team expressed concern over the technical difficulty of determining how many Buoy 10 fish to count as if caught in the ocean, because the number of fish from the weakest stock caught in the ocean varies with the geographical area of the fishery, type of gear, and origin of the fish from the weakest stock.

Timing of Implementation

The Court's order of July 22, 1987, in the *Pacific Trollers et al. v. Baldrige et al.* mandated the resolution of issues in the case by the 1988 season. The schedule submitted to the Court for review of issues raised by the troller plaintiffs culminated in the Council's decision at its January meeting. Because the Council considered the Buoy 10 accounting issue as not separable from

VOL 53
ISS 49
MR 14
1988
UMI

the broader issue of allocating salmon between ocean fisheries, the decision on the allocation schedule also was made at the January Council meeting.

There is insufficient time to amend the FMP between the January 1988 Council meeting and the beginning of the 1988 fishing season. Under the existing FMP framework regulations, the Council must adopt recommendations to the Secretary for 1988 management measures no later than its April 1988 meeting. If the allocation plan is to be useful for the 1988 season, it is necessary for it to be implemented under the Magnuson Act emergency provisions of section 305(e), 16 U.S.C. 1855(e), for two consecutive 90-day periods, beginning in early May 1988. Therefore, comments are solicited on whether the rule should be promulgated under the emergency authority of the Magnuson Act to apply during the 1988 fishing season or whether the full fishery management plan amendment process should be followed, thereby delaying implementation of the measures at least until the 1989 season.

Classification

This rule as proposed would be implemented under the emergency authority of section 305(e) of the Magnuson Act, 16 U.S.C. 1855(e), as amended, because there is insufficient time between now and the beginning of the 1988 season to amend the FMP. However, there is sufficient time between now and the proposed implementation date of April 29, 1988, to meet the requirements of the Administrative Procedure Act (APA). Thus, this rule is being proposed with a short-term comment period and, if approved, will be implemented by an interim final rule with a shortened cooling-off period.

A draft environmental assessment (EA) has been prepared by the Council and is available at the address above. The proposed rule is not expected to alter the total allowable harvest of salmon in the ocean. Thus, the draft EA indicates that this action is not expected to alter the nature nor the intensity of environmental impacts that were addressed in the supplemental environmental impact statement (SEIS) prepared by the Council for the 1984 framework amendment to the FMP. A notice of availability of the SEIS was published on September 23, 1984; 49 FR 38355. A final EA will be prepared by the Council as a basis for consideration of environmental impacts by the Assistant Administrator for Fisheries before implementation of any interim final rule.

The Acting Under Secretary, NOAA, has determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291, because it will not result in (1) an annual effect on the economy of $100 million or more; (2) major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This determination is based on a draft regulatory impact review/initial regulatory flexibility analysis (RIR/RFA) prepared by the Council which indicates total increases in net economic value (NEV) arising from changes in recreational activities in the salmon fishery at between $850,000 and $1,100,000. Similarly, total decreases in NEV arising from changes in the commercial fishery are expected to be between $500,000 and $700,000. The draft RIR/RFA is available at the address listed above. A final assessment by the Council will be prepared and published in a document entitled, "Preseason Report II: Analysis of Proposed Regulatory Options for 1988 Ocean Salmon Fisheries." Copies of this document will be available on or about March 22, 1988. Another Council publication, "Preseason Report III: Analysis of Council Adopted Management Measures for 1988 Ocean Salmon Fisheries," will analyze the impacts of this rule and final management measures adopted by the Council. It will be available on or about April 25, 1988. Both documents can be obtained from the Council office at the address listed above.

The draft RIR/RFA also concludes that this proposed rule, if adopted, would have significant effects on small entities. The results of the analysis indicated adverse impacts for the commercial sector consisting of a maximum average decrease of between 12 and 25 percent for gross receipts for firms fully reliant on salmon catching and processing activities north of Cape Falcon. For firms similarly reliant on the recreational salmon fishery, the gains might be between 8 and 13 percent. A copy of this analysis may be obtained from the Council office at the address listed above.

This rule contains no collection-of-information requirement for purposes of the Paperwork Reduction Act.

The Council has determined that this rule is consistent to the maximum extent practicable with the coastal zone programs of Washington and Oregon. This determination has been submitted for review by the responsible agencies of Washington and Oregon under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Part 661

Fisheries, Indians.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 9, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Part 661 is proposed to be amended as follows:

PART 661—[AMENDED]

1. The authority citation for 50 CFR Part 661 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

Appendix—[Amended]

2. Appendix II.B.2 is amended for 90 days by suspending paragraphs (a) (i), (ii), (iii), and (iv) and adding paragraphs (a) (v), (vi), and (vii) to read as follows:

II. * * *

B. * * *

* * * * *

2. * * *

(a) *Coho and chinook from the U.S.-Canada border to Cape Falcon.*

* * * * *

(v) *Allocation goal.* The goal of allocating ocean harvest north of Cape Falcon is to achieve, to the greatest degree possible, the objectives for the commercial and recreational fisheries, as follows:

(A) Provide recreational opportunity by maximizing the duration of the fishing season while minimizing daily closures, gear, bag, and particularly area restrictions, and

(B) Maximize the value of the commercial harvest while providing fisheries of reasonable duration.

(vi) *Allocation flexibility.* Allocation will be expressed in terms of quotas based on the schedule in paragraph (vii), which is presumed to best achieve the allocation goal. However, these quotas are neither guaranteed catches nor inflexible ceilings. Only the total ocean harvest quota is a maximum allowable catch. Additional flexibility in-season may be utilized to adjust individual quotas if the in-season adjustment will increase the degree to which the allocation goal is achieved, e.g., if it is apparent that the harvest of an individual quota by one fishery will not be achieved and that the other fishery can pursue the harvestable fish.

(vii) *Allocation schedule.*

(A) Allocation of coho and chinook salmon north of Cape Falcon, Oregon will be based on the following schedule:

Coho slamon			Chinook salmon		
Ocean harvest (numbers of fish)	Commercial [1]	Recreational [1]	Ocean harvest (numbers of fish)	Commercial [1]	Recreational [1]
<300,000	25	75	<100,000	50	50
>300,000	60	40	100-150,000	60	40
			>150,000	70	30

[1] Percentage.

(B) In the allocation schedule, the percentage allocation is tiered and must be calculated in additive steps when the harvest level exceeds the initial tier. For example, the recreational allocation for a total allowable ocean harvest of 350,000 coho would be composed of two parts. The first part would be calculated by multiplying 300,000 coho by 75 percent. The result of this calculation would be added to the product of multiplying 50,000 coho by 40 percent, i.e., 225,000+20,000=245,000 coho or 70 percent of the total allowable ocean harvest.

Federal Register
Vol. 53, No. 49
Monday, March 14, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

National Plant Genetic Resources Board Meeting

According to the Federal Advisory Committee Act of October 1972 (Pub. L. 92–463, 86 Stat. 770–776), the USDA, Science and Education, announces the following meeting:

Name: National Plant Genetic Resources Board.

Date: May 12–13–1988.

Time:

8:30 a.m.-5 p.m., May 12
8:30 a.m.-Noon, May 13

Place: Room 104–A, Williamsburg Room, Administration Building, Department of Agriculture, Washington, DC.

Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permits.

Comments: The public may file written comments before or after the meeting with the contact person below.

Purpose: To review matters that pertain to plant germplasm in the United States and possible impacts on related national and international programs; and discuss other initiatives of the Board.

Contact Person: C.F. Murphy, Executive Secretary, National Plant Genetic Resources Board, U.S. Department of Agriculture, BARC-West, Room 239, Building 005, Beltsville, Maryland 20705. Telephone: (301) 344–1560.

Done at Beltsville, Maryland, this 29th day of February 1988.

Charles F. Murphy,

Executive Secretary, National Plant Genetic Resources Board.

[FR Doc. 88–5538 Filed 3–11–88; 8:45 am]

BILLING CODE 3410–03–M

Office of International Cooperation and Development

Cooperative Agreements; University of Arizona

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

ACTIVITY: OICD intends to enter into a Cooperative Agreement with the University of Arizona for the Identification of Results of Farming Systems Research and Extension Activities.

AUTHORITY: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD anticipates the availability of funds in fiscal year 1988 (FY1988) to enter into a cooperative agreement with the University of Arizona. The objective of this agreement is to review, analyze and document the results of a number of farming systems research and extension (FSR/E) projects which have been implemented worldwide.

Assistance will be provided only to the University which will utilize funds to produce an FSR/E inventory report, providing detailed information on 20–25 projects to document the performance of past and on-going projects; identify the key factors influencing performance with emphasis on lessons learned; identify potential for incorporating these lessons learned into future applications; specify desirable indicators for assessing FSR/E performance; and assess the overall contribution of FSR/E to technology generation and transfer, and to economic development.

Based on the above, this is not a formal request for application. An estimated $88,000 will be available in FY1988 as partial support this work. It is anticipated that the agreement will be funded over a budget period of one year. Information on proposed Agreement #58–319R–8–014 may be obtained from: Nancy J. Croft, Contracting Officer, USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Date: March 8, 1988.

Allen Wilder,

Contracting Officer.

BILLING CODE 3410–DP–M

Forest Service

Loon Mountain Ski Area Expansion; White Mountain National Forest; Intent To Prepare Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The forest Service will prepare an environmental impact statement for Loon Mountain's proposed expansion of their winter sports site on the Pemigewasset Ranger District, White Mountain National Forest, Grafton County, Hew Hampshire. The Fish and Wildlife Service, Department of Interior, will participate as a cooperating agency. The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the scope of the analysis must be received by May 30, 1988.

ADDRESS: Submit written comments and suggestions concerning the scope of the analysis to Michael B. Hathaway, Forest Supervisor, White Mountain National Forest, Laconia, New Hampshire 03247.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and environmental impact statement to Geoffrey Chandler, Loon Mountain EIS Coordinator, White Mountain National Forest, Laconia, New Hampshire 03247, phone 603–524–6450.

SUPPLEMENTARY INFORMATION: The White Mountain National Forest Land and Resource Management Plan was completed in April 1986. The management direction in the Plan called for further study of whether to expand an alpine winter sports site on Loon Mountain.

In preparing the environmental impact statement, the Forest Service will identify and consider a range of alternatives for this site. One of these will be no development of the site. Other alternatives will consider development designs with varying capacities.

Michael B. Hathaway, Forest Supervisor, White Mountain National Forest, Laconia, Hew Hampshire, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement (DEIS). The scoping process includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.

The Fish and Wildlife Service, Department of the Interior, and the United States Environmental Protection Agency will be invited to participate as a cooperating agency to evaluate potential impacts on aquatic resources. In addition, the State of New Hampshire, the North Country Council, and the Town of Lincoln will participate with the Forest Service in a joint review process to assess the impacts of the proposed project.

Public scoping meetings were held in 1987. Additional meetings will be held in May or June of 1988. Meeting dates will be advertised in the local media.

The draft environmental impact statement (EIS) is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by October 1988. At that time EPA will publish a notice of availability of the DEIS in the **Federal Register**.

The comment period on the draft environmental impact statement will be 60 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that those interested in the management of the Loon Mountain participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement. The final EIS is scheduled to be completed by March 1989. In the final EIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR 211.18.

Michael B. Hathaway,

Forest Supervisor.

Date: March 7, 1988.

[FR Doc. 88–5464 Filed 3–11–88; 8:45 am]

BILLING CODE 3410–11–M

National Agricultural Statistics Service

Catfish and Trout Survey

Notice is hereby given that the National Agricultural Statistics Service (NASS) will conduct a survey of commercial catfish and trout producers in July 1988. The survey will be similar to those surveys discontinued in 1982. Data will be collected on number of operations, water area, production sales, and inventory. Results will be published by the Agricultural Statistics Board on August 31, 1988. States to be included in the survey are:

Catfish—Alabama, Arkansas, California, Florida, Georgia, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas.

Trout—California, Colorado, Georgia, Idaho, Michigan, Missouri, New York, North Carolina, Oregon, Pennsylvania, Tennessee, Utah, Virginia, Washington, and Wisconsin.

In surveys conducted in 1989, data may be collected on additional aquacultural commodities and additional items for catfish and trout.

Comments from interested persons regarding this action should be addressed to William L. Pratt, Chief, Livestock, Dairy and Poultry Branch, Estimates Division, NASS/USDA, Room 5906–S, Washington, DC 20250–2000.

Dated: March 9, 1988.

Charles E. Caudill,

Administrator.

BILLING CODE 3410–20–M

DEPARTMENT OF COMMERCE

Minority Business Development Agency

[Transmittal No. 06–10–88017–01; Project I.D. No. 06–10–88017–01]

Shreveport Minority Business Development Center (MBDC); Solicitation of Competitive Applications

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate an MBDC for a three (3) year period, subject to available funds. The cost of performance for the first twelve (12) months is estimated at $194,118 for the project's performance period of September 1, 1988 to August 31, 1989. The MBDC will operate in the Shreveport Standard Metropolitan Statistical Area (SMSA).

The first year's cost for the MBDC will consist of:

Name	Federal	Non-federal	Total
Shreveport SMSA	$165,000	[1] $29,118	$194,118

[1] Can be a combination of cash, in-kind contribution and fees for service.

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, non-profit and for-profit organizations, local and state governments, American Indian Tribes and educational institutions.

The MBDC will provide management and technical assistance (M&TA) to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: Coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance (M&TA); and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance (M&TA); the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA, based on such factors as an MBDC's satisfactory performance, the availability of funds, and Agency priorities.

Closing Date: The closing date for receipt of application is April 22, 1988.

ADDRESS: MBDA—Dallas Regional Office, 1100 Commerce Street, Suite 7B23, Dallas Texas 75242–0790.

FOR FURTHER INFORMATION CONTACT: Deselene Crenshaw, Acting Business Development Clerk, Dallas Regional Office, 214/767–8001.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information, copies of application kits and and applicable regulations can be obtained at the above address.

A pre-bid conference will be held in Dallas on March 25, 1988 at 1:00 p.m. Conference site information may be obtained by contacting the individual designed above.

Addtional RFAs will be available at the conference site.

Melda Cabrera,

Regional Director, Minority Business Development Agency, Dallas Regional Office.

Section B. Project Specification

Program Number and Title: *11.800 Minority Business Development.*

Project Name: *Shreveport MBDC* (Geographic Area or SMSA).

Project Identification Number: *06–10–88017–01.*

Project Start and End Dates: *09/01/88 to 08/31/89.*

Project Duration: *12 months.*

Total *Federal Funding* (85%): *$165,000.*

Minimum *Non-Federal Share* (15%): *$29,118.*

Total Project Cost (100%): *$194,118.*

Closing Date for Submission of this Application: *April 22, 1988.*

Geographic Specification: The Minority Business Development Center shall offer assistance in the geographic area of: *Shreveport, Louisiana.*

Eligibility Criteria: There are no eligibility restrictions for this project. Eligible applicants may include individuals, non-profit organizations, for-profit firms, local and state governments, American Indian Tribes, and educational institutions.

Project Period: The competitive award period will be for approximately three years consisting of three separate budget periods. Performance evaluations will be conducted, and funding levels will be established for each of three budget periods. The MBDC will receive continued funding, after the initial competitive year, at the discretion of MBDA based upon the availability of funds, the MBDC's performance, and Agency priorities.

MBDA's minimum level of effort:

Financial packages *$2,747,000.*
Billable M&TA *$84,000.*
Number of Professional Staff *3.*
Procurements *$5,493,000.*
M&TA Hours *1,680.*
Number of Clients *76.*

BILLING CODE 3510-21-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in the Dominican Republic

March 9, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 15, 1988. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the current import restraint limit for cotton textile products in Categories 347/348, produced or manufactured in the Dominican Republic.

Background

On January 29, 1988 a notice was published in the **Federal Register** (53 FR 2619), which announced, among other things, an import restraint limit for cotton textile products in Categories 347/348, produced or manufactured in the Dominican Republic and exported during the period which began on January 1, 1988 and extends through May 31, 1988. The Bilateral Textile Agreement of December 18, 1986, as amended, between the Governments of the United States and the Dominican Republic, under the terms of which this limit was established, also includes provisions for the carryover of shortfalls from the previous agreement period in certain categories (carryover).

Under the foregoing provisions of the bilateral agreement and at the request of the Government of the Dominican Republic, the limit established for Categories 347/348 is being increased for carryover.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

March 9, 1988.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on January 26, 1988 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton textile products, produced or manufactured in the Dominican Republic and exported during the period which began on January 1, 1988 and extends through May 31, 1988.

Effective on March 15, 1988, the directive of January 26, 1988 is hereby amended to adjust the previously established limit for cotton textile products in Categories 347/348 to a level of 277,500 dozen,[1] as provided under the terms of the bilateral agreement of December 18, 1986.[2]

The Committee for the Implementation of Textile Agreements had determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–5496 Filed 3–11–88; 8:45 am]

BILLING CODE 3510-DR-M

Increasing an Import Limit for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Thailand

March 9, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 31, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 15, 1988. For further information contact Ross Arnold, International Trade Specialist, Office of Texiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343–6581. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption and withdrawal from warehouse of cotton and man-made fiber textile products in Categories 226/613/614/615 during the designated period in excess of the new agreed limit.

Background

A CITA directive published in the **Federal Register** on January 4, 1988 (53 FR 60) established import restraint limits for certain cotton, wool and man-made fiber textile products, including Categories 226/613/614/615, produced or manufactured in Thailand and exported during the twelve-month period which began on January 1, 1988 and extends through December 31, 1988.

During consultations held on February 19, 1988 between the Governments of the United States and Thailand, agreement was reached to increase the specific limit for Categories 226/613/614/615.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commission of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

March 9, 1988.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, *Department of Treasury, Washington, D.C. 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 29, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cooton, wool and man-made fiber textile products, produced or manufactured in Thailand and exported during the twelve-month period which began on January 1, 1988 and extends through December 31, 1988.

Effective on March 15, 1988, the directive of December 29, 1987 is amended to include a new limit of 19,169,063 square yards [1] for Categories 226/613/614/615.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 533(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

March 10, 1988.

The USAF Scientific Advisory Board Airlift Panel will meet on 29–30 March 1988, from 8:00 a.m. to 5:00 p.m., at Scott, AFB, IL.

The purpose of this meeting is to review the status of technology programs and full-scale development programs pertinent to the Air Force Military Airlift Command efforts to upgrade their command and control systems. This meeting will involve discussions of classified defense matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697–4948.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

[FR Doc. 88–5580 Filed 3–11–88; 8:45 am]

BILLING CODE 3910-01-M

Department of The Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Date of Meeting: 30 March 1988.

---

[1] The limit has not been adjusted to account for any imports exported after December 31, 1987.

[2] The provisions of the agreement provide, in part, that: (1) Specific limits may be exceeded by designated percentages to account for swing, provided that an equal amount in equivalent square yards is deducted from another specific limit; and (2) specific limits also may be increased for carryover and carryforward.

[1] The limit has not been adjusted to account for any imports exported after December 31, 1987.

VOL 53 ISS 49 MR 14 1988 UMI

Time of Meeting: 1500–1700 hours.

Place: The Pentagon, Washington, DC.

Agenda: The Army Science Board's Ad Hoc Committee on Implementing Competitive Strategies will meet. The objective of this meeting is to work with SARD personnel and help them identify costs of systems and technologies that have been identified in the panel's efforts on Competitive Strategies.

Due to the classification of the report and ensuing discussions, this meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Department of the Navy

Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Weapon Effectiveness Task Force will meet March 16–17, 1988 from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of the meeting is to discuss key issues related to the Navy's ability to maximize weapon effectiveness through both hardware design and tactical employment, and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

The unexpected availability of recently acquired new information critical to the Weapon Effectiveness Task Force's study does not accord an opportunity to provide 15 days prior notice of the meeting. Exceptional circumstances require that this information be discussed prior to the Task Force's targeted final report date in April 1988. The only opportunity during March to discuss this information is during March 16–17, 1988.

For further information concerning this meeting, contact Ann Lynn Cline, Special Assistant to the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 601, Alexandria, Virginia 22302–0268. Phone (703) 756–1205.

Dated: March 10, 1988.

W.R. Babington, Jr.,

Commander, JAGC, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Latin America Task Force will meet March 23–24, 1988 from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to gain a broad overview and insight on Latin America related to U.S. security and naval interests. These matters constitute information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552)c)(1) of Title 5, United States Code.

For further information concerning this meeting, contact Ann Lynn Cline, Special Assistant to the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 601, Alexandria, Virginia 22302–0268. Phone (703) 756–1205.

Dated: May 10, 1988.

W.R. Babington, Jr.,

Commander, JAGC, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

[CFDA No. 84.199A]

Notice Inviting Applications for New Awards under the Cooperative Demonstration Program for Fiscal Year 1988

Purpose: To provide financial assistance through cooperative agreements to project that demonstrate collaborative vocational educational programs between State educational agencies, local educational agencies, postsecondary educational institutions, institutions of higher education, and other public and private agencies, organizations, and institutions.

Deadline for Transmittal of Applications: June 20, 1988.

Deadline for Intergovernmental Review Comments: August 20, 1988.

Applications Available: April 1, 1988.

Available Funds Anticipated: $9,574,000.

Estimated Range of Awards: $125,000–$475,000.

Estimated Average Size of Awards: $250,000.

Estimated Number of Awards: 38.

Project Period: Up to 18 months.

Applicable Regulations: (a) The regulations in 34 CFR Parts 400 and 412 and (b) the Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 78 (Educational Appeal Board), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

Criteria for Evaluating Applications: The Secretary assigns the 15 points, reserved in 34 CFR 412.30(b), as follows:

10 points to the Selection Criterion (b)—Plan of Operation—in 34 CFR 412.31(b) for a total of 30 points for that criterion; and five points to the Selection Criterion (g)—Private Sector Involvement— in 34 CFR 412.31(g) for a total of 10 points for that criterion.

Absolute and Invitational Priorities: (a) In accordance with 34 CFR 75.105(b)(2)(ii) and 75.105(c)(3), the Secretary will give absolute preference in this competition only to applications proposing projects that are examples of successful cooperation between the private sector (including employers, consortia of employers, labor organizations, and building trade councils) and public agencies in vocational education, including State boards and eligible recipients, as described in 34 CFR 412.10(a)(2).

(b) Under 34 CFR 75.105(c)(1), the Secretary also invites applications for projects that are designed to train skilled workers and technicians in high-technology occupations (including programs providing related instruction to apprentices), or to train skilled workers needed to produce, install, operate, and maintain high technology equipment, systems, and processes. Applications that meet this invitational priority will not receive a competitive or absolute preference over other applications that do not meet this priority.

(c) To be eligible for funding in this competition, an application must meet the absolute priority stated in paragraph (a). Applicants, however, should note that the Secretary intends to announce in a subsequent **Federal Register** notice, a separate competition under this program for projects related to dropout prevention. Applications under both competitions will be carefully reviewed to ensure that no grantee receives duplicate Federal funding.

Other Information: (a) Potential applicants are reminded that 34 CFR 412.10(b) requires that all projects must be (1) of direct service to the individuals enrolled and (2) capable of wide replication by service providers.

(b) Potential applicants are reminded that 34 CFR 412.40(a) requires that 25 percent of the cost of a project be provided by the recipient in accordance with 34 CFR Part 74, Subpart G.

(c) Due to the limited funds available, the Secretary strongly urges applicants not to propose purchasing equipment with Federal grant funds. The Secretary suggests that any equipment necessary be provided as part of the recipient's share of the project costs, as described in paragraph (b) above.

(d) Information on the evaluation processes the Department uses in determining whether projects are worthy of replication may be secured by requesting a copy of the Department's "Guidelines for Program Effectiveness" from Dr. James Avea, Recognition Division, 555 New Jersey Avenue, NW., U.S. Department of Education, Washington, DC 20202–5516. Dr. Avea can also identify the appropriate State Facilitator working with this program for a potential applicant. While applications will not be evaluated against this higher standard of worthiness, applicants may find this information useful in planning projects that are capable of replication.

For Applications or Information Contact: Richard F. DiCola, National Projects Branch, Division of Innovation and Development, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, SW (Room 519, Reporters Building), Washington, DC 20202–5516. Telephone (202) 732–2362.

Program Authority: 20 U.S.C. 2411.

Dated: March 2, 1988.

Bonnie Guiton,

Assistant Secretary for Vocational and Adult Education.

BILLING CODE 4000-01-M

Office of Education Research and Improvement

Research and Development Center on the Study of the Education of Disadvantaged Children; Solicitation of Public Comments

ACTION: Notice to Solicit Public Comments on a Planning Paper for a Research and Development Center on the Study of the Education of Disadvantaged Students.

Purpose: The Secretary invites public comments on a planning paper for a research and development center on the study of the education of disadvantaged students. The Office of Educational Research and Improvement intends to establish this center in fiscal year 1989.

Deadline for Transmittal of Comments: All comments should be received on or before April 4, 1988.

Applicable Regulations: (a) The regulations for the Regional Educational Laboratories and Research and Development Centers Programs, 34 CFR Parts 706 and 708. (b) The Notice of Proposed Biennial Research Priorities published in the **Federal Register** on November 20, 1987 (52 FR 44625).

Description of Planning Paper: The Office of Educational Research and Improvement (OERI) has prepared and will make available upon request a planning paper that focuses on developing recommendations for a research and development center which addresses the research priority on the improvement of educational outcomes for students-at-risk. This priority involves the identification of educational strategies successful in lowering dropout rates and raising achievement levels of those students having the greatest difficulty in terms of learning and motivation.

Requests for Planning Paper or Information: To receive a copy of the planning paper or for additional information call or write Dr. John Ralph, U.S. Department of Education, OERI, Office of Research, Room 617, 555 New Jersey Avenue, NW., Washington, DC 20208–1606, 202/357–6223.

Invitation To Comment: All interested parties are invited to review and comment on the planning paper. Written comments received on or before the date specified above will be considered in preparing a final statement which describes the Department's recommendations for the research and related activities and objectives of a center on the study of disadvantaged students.

Program Authority: 20 U.S.C. 1221e.

Dated: March 8, 1988.

Chester E. Finn, Jr.,

Assistant Secretary for Educational Research and Improvement.

[FR Doc. 88–5546 Filed 3–11–88; 8:45 am]

BILLING CODE 4000-01-M

Office of Elementary and Secondary Education

Intent to Repay to the Hawaii State Department of Education Funds Recovered as a Result of Final Audit Determinations

AGENCY: Department of Education.

ACTION: Intent to award grantback funds.

SUMMARY: Under section 456 of the General Education Provisions Act (GEPA), the U.S. Secretary of Education (Secretary) intends to repay to the Hawaii State Department of Education, the State educational agency (SEA), an amount equal to 75 percent of the funds recovered by the U.S. Department of Education (Department) as a result of final audit determinations. This notice describes the SEA's plan for the use of the repaid funds and the terms and conditions under which the Secretary intends to make those funds available. The notice invites comments on the proposed grantback.

DATE: All written comments must be received on or before April 13, 1988.

ADDRESS: All written comments should be submitted to Dr. James Spillane, Director, Division of Program Support, Compensatory Education Programs, U.S. Department of Education, 400 Maryland Avenue SW. (Room 2043, MS–6276), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Dr. James Spillane. Telephone: (202) 732–4692.

SUPPLEMENTARY INFORMATION:

A. Background

In July 1986, the Department recovered $1,829,781.30 from the Hawaii SEA in satisfaction of claims arising from two audits covering fiscal years (FY) 1973 through 1977. The claims involved the SEA's administration of Title I of the Elementary and Secondary Education Act of 1965 (Title I), a program that addressed the special educational needs of educationally deprived children in areas with high concentrations of children from low-income families. Specifically, the SEA used Title I funds during FY 1973 through 1976 to supplant State and local funds in violation of 20 U.S.C. 241e(a)(3)(B)(1976) and 45 CFR 116.17(h). The statute and regulations required that Title I funds supplement, not supplant State or local funds and be expended to meet needs left unmet by funds available from those sources.

In the second audit, the auditors concluded that during FY 1974 through 1977, the SEA did not satisfy the Title I comparability requirements in 20 U.S.C. 241e(a)(3)(C)(1976) and 45 CFR 116.26(a). Those requirements provided that a local education agency (LEA) could receive Title I funds only if it used its State and local funds in each Title I area to provide services that taken as a whole, were at least comparable to services being provided in non-Title I areas.

B. Authority for Awarding a Grantback

Section 456(a) of GEPA, 20 U.S.C. 1234e(a), provides that whenever the Secretary has recovered funds following a final audit determination with respect to an applicable program, the Secretary may consider those funds to be additional funds available for the program and may arrange to repay to the SEA or LEA affected by that determination an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this "grantback" arrangement if the Secretary determines that the—

(1) Practices and procedures of the SEA or LEA that resulted in the audit determination have been corrected, and the SEA or LEA is, in all other respects, in compliance with the requirements of the applicable program;

(2) SEA has submitted to the Secretary a plan for the use of the funds to be awarded under the grantback arrangement, which meets the requirements of the program, and, to the extent possible, benefits the population that was affected by the failure to comply or by the misexpenditures that resulted in the audit exception; and

(3) Use of funds to be awarded under the grantback arrangement in accordance with the SEA's plan would serve to achieve the purposes of the program under which the funds were originally granted.

C. Plan for Use of Funds Awarded Under a Grantback Arrangement

Pursuant to section 456(a)(2) of GEPA, the SEA has applied for a grantback of $1,372,336 and has submitted a plan for use of the grantback funds to meet the special educational needs of educationally deprived children in programs administered under Chapter 1 of the Education Consolidation and Improvement Act of 1981. 20 U.S.C. 3801 *et seq.* The final audit determination against the SEA resulted from improper expenditures of Title I funds. However, since Chapter 1 has superseded Title I, the SEA's proposal reflects the requirements in Chapter 1—a program, similar to Title I, designed to serve educationally deprived children in low-income areas.

The SEA's plan proposes that the grantback funds will be used in the four administrative school districts in which the audit exceptions occurred. These are the Leeward, Windward, Honolulu, and Hawaii Districts.

The Leeward District proposes to use $888,185 in grantback funds to expand the math component provided with Chapter 1 funds to allow nine elementary schools to service children in grades 5 and 6. The district will also develop a pilot reading project for first graders. This project will be an early childhood computer-based reading component to enhance the concept of developmental services along with the remedial concept. Grantback funds will be used for salaries and fringe benefits for 15 teachers, 16 part-time teachers, substitute teachers, and educational supplies.

In the Windward District, $230,435 in grantback funds will be used to expand the services provided by regular Chapter 1 funds to additional eligible children. Children in the ninth and tenth grades in Kailu High School will participate in a diagnostic/prescriptive learning mathematics program that is designed as a supplement to the basal text. Six part-time teachers will be hired and supplies will be purchased for this program. A computer and software will be purchased for this program for use by Chapter 1 students.

Grantback funds in the amount of $234,805 will be used by the Honolulu District to augment the regular Chapter 1 Comprehensive Language Improvement Project. Nineteen part-time teachers will be hired. These funds will make it possible to raise the cutoff percentile scores for eligibility and thus serve more educationally disadvantaged children. Four elementary schools will also implement a pilot project to teach children to read better, write better, and reason better. For program evaluation, the Honolulu District will use grantback funds to make a transition to a new achievement test. This test was developed to provide reliable and verifiable information and to eliminate the penalizing effect other standardized tests have on traditionally low-scoring students. To supplement this test, reading diagnostic tests will be purchased to provide data that will result in more effective teaching.

Computers will be purchased with grantback funds by the Hawaii District. Computer-assisted instruction will be provided at 13 Chapter 1 schools to students most in need of remediating instruction. These computers will also provide technological aid for efficiency in meeting the operational and managerial requirements of Chapter 1. The cost of the computers and software will be $18,911.

Eligible children in private schools will receive services equitable to those provided to eligible children in public schools.

According to the proposed plan, the grantback funds will be used during school years 1987–88 and 1988–89. Any changes to this plan, including activities to be funded or the project period during which the school districts propose to use these funds, will be submitted to the Secretary for advance approval.

D. The Secretary's Determinations

The Secretary has carefully reviewed the plan submitted by the SEA and has determined that the conditions under section 456 of GEPA have been met.

These determinations are based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action.

E. Notice of the Secretary's Intent to Enter Into a Grantback Arrangement

Section 456(d) of GEPA requires that, at least 30 days before entering into an arrangement to award funds under a grantback, the Secretary must publish in the **Federal Register** a notice of intent to do so, and the terms and conditions under which the payment will be made.

In accordance with section 456(d) of GEPA, notice is hereby given that the Secretary intends to make funds available to the Hawaii SEA under a grantback arrangement. The grantback award would be in the amount of $1,372,336, which is 75 percent—the maximum percentage authorized by the statute—of the funds recovered by the Department as a result of the audits.

F. Terms and Conditions Under Which Payments Under A Grantback Arrangement Would Be Made

The SEA agrees to comply with the following terms and conditions under which payment under a grantback arrangement would be made:

(1) The funds awarded under the grantback must be spent in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plan that the SEA submitted and any amendments to that plan that are approved in advance by the Secretary; and

(c) The budget that was submitted with the plan and any amendments to the budget that are approved in advance by the Secretary.

(2) All funds received under the grantback arrangement must be obligated by September 30, 1989, in accordance with section 456(c) of GEPA and the SEA's plan.

(3) The SEA will, not later than January 1, 1989 and January 1, 1990, submit reports to the Secretary which—

(a) Indicate that the funds awarded under the grantback were spent during the previous school year in accordance with the proposed plan and approved budget, and

(b) Describe the results and effectiveness of the projects for which the funds were spent.

(4) Separate accounting records must be maintained documenting the expenditures of funds awarded under the grantback arrangement.

Dated: March 9, 1988.

William J. Bennett,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.010, Educationally Deprived Children—Local Educational Agencies)

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Proposed Remedial Order to Intercontinental Oil Co., Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed remedial order to Intercontinental Oil Company, Inc.

SUMMARY: Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the United States Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Intercontinental Oil Company, Inc. (IOC), 6363 Woodway, Suite 1100, Houston, Texas 77057 This Proposed Remedial Order alleges overcharges in the resale of crude oil in violation of 10 CFR 212.131, 212.183, 212.186, 120.62(c) and 205.202 of the petroleum price regulations during the period November 1975 through September 1978 in the amount of $1,576,305. The effect of the alleged violations is nationwide.

A copy of the Proposed Remedial Order may be obtained from: Office of Freedom of Information Reading Room, United States Department of Energy, Forrestal Building, Room 1E–190, 1000 Independence Avenue SW., Washington, DC 20585.

Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, United States Department of Energy, Forrestal Building, Room 6F–078, 1000 Independence Avenue SW., Washington, DC 20585, in accordance with 10 CFR 205.193. The Notice shall be filed in duplicate, shall briefly describe how the person would be aggrieved by issuance of the Proposed Remedial Order as a final order and shall state the person's intention to file a Statement of Objections. A person who fails to file a Notice of Objection shall be deemed to have admitted the findings of fact and conclusions of law stated in the PRO. If a Notice of Objection is not filed in accordance with § 205.193, the PRO may be issued as a final Remedial Order by the Office of Hearings and Appeals.

Pursuant to 10 CFR 205.193(c), a person who files a Notice of Objection shall on the same day serve a copy of the Notice upon:

Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, U.S. Department of Energy, One Allen Center, 500 Dallas Street, Houston, Texas 77002

and upon:

Diana D. Clark, Administrative Litigation Division, Economic Regulatory Administration, U.S. Department of Energy, Room 3H–055, RG–43, 1000 Independence Avenue SW., Washington, DC 20585

Issued in Washington, DC, on March 3, 1988.

Milton C. Lorenz,

Chief Counsel for Enforcement Litigation, Economic Regulatory Administration.

[FR Doc. 88–5532 Filed 3–11–88; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. EL88-16-000 et al.]

Bridgeport Resco Co., L.P. et al.; Electric Rate and Corporate Regulation Filings

March 8, 1988.

Take notice that the following filings have been made with the Commission:

1. Bridgeport Resco Company, L.P.)

[Docket No. EL88–16–000]

Take notice that on March 2, 1988, Bridgeport Resco Company, L.P. (Bridgeport Resco) tendered for filing pursuant tc 18 CFR 385.207(a) (2) a petition for Declaratory Order as follows:

(1) Authorizing a sale and leaseback financing of Bridgeport Resco's Bridgeport, Connecticut solid waste-fueled qualifying facility;

(2) Disclaiming Commission jurisdiction under the Federal Power Act over the beneficial owner of the facility (Owner Participant) and the trustee for such beneficial owner (Owner Trustee) as a consequence of their participation in the sale and leaseback financing;

(3) Determining that if the Owner Participant, the Owner Trustee or the trustee for the long-term lenders take over the operation of the Facility in the exercise of remedies against Bridgeport Resco following a Bridgeport Resco default, it will not solely as a conseqence thereof become an "electric utility" subject to the Commission's jurisdiction under the FPA if the Facility continues to satisfy all the requirements, including the ownership requirements, required for a "qualifying facility" under PURPA.

(4) Confirming the continued applicability of Bridgeport Resco Company, L.P./Rate Schedule FERC No. 1 to sales by Bridgeport Resco to United Illuminating Company of electricity generated by the facility after the

proposed financing transaction is consummated; and

(5) Determining that change in ownership of the facility effected by the sale/leasback financing will not result in a loss of QF status for the facility.

Comment date: March 22, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. New England Power Company

[Docket No. ER88-188-000]

Take notice that on March 2, 1988, New England Power Company (NEP) tendered for filing an amendment filing to its original filing of January 12, 1988, in the above-referenced docket. That filing concerned an amendment to the Service Agreeement of the Town of Norwood, Massachusetts (Norwood) to facilitate Norwood's receipt of the benefits of its allocation of power from the New York Power Authority (NYPA).

NEP states that the amended filing responds to Staff inquiries regarding cost support and explanation of the proposed five percent monthly administrative charge and billing data for the period July 1, 1985 through May 1, 1987.

Comment date: March 22, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Potomac Electric Power Company

[Docket No. ER88-279-000]

Take notice that on March 2, 1988, Potomac Electric Power Company (Pepco) tendered for filing under § 35.15 of the Commission's Regulations its notice of termination of services provided pursuant to paragraph 2 of Pepco FERC Rate Schedule No. 18, consisting of Pepco's providing, operating and maintaining a 60 Hertz to 25 Hertz frequency changer for Baltimore Gas and Electric Company located at Pepco's Benning Station in Washington, D.C. Termination effective May 1, 1988 is requested.

Comment date: March 22, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5509 Filed 3-11-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. EC88-13-000 et al.]

CP National Corp. et al.; Electric Rate and Corporate Regulation Filings

March 7, 1988.

Take notice that the following filings have been made with the Commission:

1. CP National Corporation

[Docket No. EC88-13-000]

Take notice that on February 29, 1988, CP National Corporation (CP National) tendered for filing an application pursuant to section 203 of the Federal Power Act, 16 U.S.C. 824b (1982), for Commission authorization to sell to the Lassen Municipal Utility District (LMU District) CP National's Lassen Electric System in the State of California.

CP National incorporated in the State of California, provides electric, telephone and natural gas distribution services in Arizona, California, Nevada, New Mexico, Oregon, Texas and Utah.

The LMU District is a municipal utility district duly organized and existing under the Laws of the State of California.

Comment date: March 21, 1988, in accordance with Standard Paragraph E at the end of this document.

2. Arizona Public Service Company

[Docket No. ER88-272-000]

Take notice that on February 29, 1988, Arizona Public Service Company (APS) tendered for filing a Transmission Service Agreement (Transmission Agreement), and a Supplement and Agreement No. 1 to the Wholesale Power Supply Agreement (Supplement) between APS and the Papago Tribal Utility Authority (PTUA).

The tendered Agreements provide for the transmission of PTUA's recently acquired allotments of power from the Parker-Davis and Hoover Dams through the Arizona Power Authority and Western Area Power Administration and attendant changes in PTUA's Wholesale Power Supply Agreement as provided for in the Supplement. No new facilities or modifications to existing facilities are required to provide service hereunder.

The proposed transmission rates are the same as rates for similar service previously accepted for filing with the Federal Energy Regulatory Commission (FERC). No change in the Wholesale Power rate level is proposed herein.

APS, with the concurrence of PTUA, requests a waiver of the Commission's Notice Requirements, 18 CFR 35.11 so that service to PTUA may begin on March 1, 1988, as provided in the supplement and the Transmission Agreement.

Comment date: March 21, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Mississippi Power & Light Company.

[Docket No. ER88-271-000]

Take notice that on February 29, 1988, Mississippi Power & Light Company (MP&L) tendered for filing an extension of a letter agreement for sale of transmission service to Cajun Electric Power Cooperative, Inc.

MP&L requests an effective date of March 1, 1988 for the letter agreement. MP&L requests waiver of the Commission's notice requirements under Section 35.11 of the Commission's Regulations.

Comment date: March 21, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. New England Power Pool

[Docket No. ER88-273-000]

Take notice that on March 1, 1988, New England Power Pool (NEPOOL) Executive Committee tendered for filing an Amendment to NEPOOL Agreement, dated as of March 1, 1988 (*Amendment*), which modifies the provisions of the NEPOOL Agreement (NEPOOL FPC No. 2), dated as of September 1, 1971, as previously amended by twenty-three (23) amendments, the most recent of which was dated as of April 30, 1987.

The NEPOOL Executive Committee states that the *Amendment* has been submitted pursuant to the provisions of a settlement agreement filed with the Commission on June 1, 1987 in Commission Docket No. ER86-694-001 and the *Amendment* changes provisions of the NEPOOL Agreement to assign the effects on the pool's required reserves of certain new generating units to electric utilities with ownership or contractual interests in such new units. The NEPOOL Executive Committee has requested that the *Amendment* be permitted to become effective on the date specified therein, May 1, 1988.

Copies of the filing were served on all electric systems rendering or receiving service under the NEPOOL Agreement and on each of the parties to Docket No.

ER86-694-001, including the public utility regulatory commissions for Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Comment date: March 21, 1988, in accordance with Standard Paragraph E at the end of this notice.

5. Public Service Company of New Mexico

[Docket No. ER88-275-000]

Take notice that on March 1, 1988, Public Service Company of New Mexico (PNM) tendered for filing a 100 MW System Power Agreement (Agreement) between PNM and San Diego Gas & Electric Company (SDG&E). Under the Agreement PNM will provide SDG&E up to 100 MW of system power from PNM's base load resources, deliverable at PNM and SDG&E's point of interconnection at the Arizona Nuclear Power Project (ANPP) High Voltage Switchyard. PNM will also provide interruptible transmission service to SDG&E. The date of initial service for deliveries of all power and energy, as well as provision of interruptible transmission service, is May 1, 1988.

Copies of the filing have been served upon SDG&E and the New Mexico Public Service Commission.

Comment date: March 21, 1988, in accordance with Standard Paragraph E at the end of this notice.

6. Sierra Pacific Power Company

[Docket No. ER88-101-000]

Take notice that on March 1, 1988, Sierra Pacific Power Company (Sierra) tendered for filing an amendment to its November 13, 1987 filing that proposed rate reductions to its wholesale firm power and firm wheeling customers pursuant to Order No. 475 in Docket No. RM87-4-000, Rate Changes Relating to Corporate Income Tax Rates for Public Utilities. The amendment—which is filed pursuant to a deficiency letter issued by the Commission—revises the rate reduction proposed for wholesale firm power service. Sierra requests July 1, 1987 as the effective date for all rate reductions proposed in this docket.

Comment date: March 21, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5510 Filed 3-11-88; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 6602-003 and 8958-000]

D.J. Pitman International Corp., Hydroelectric Development Inc.; Availability of Environmental Assessment and Request for Comments

March 7, 1988.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the competing applications for minor license for the proposed Macallen Dam Hydroelectric Project on the Lamprey River in Rockingham and Strafford Counties, New Hampshire, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has determined the potential adverse impacts of the proposed project. The staff is requesting comments on the EA and any additional information on the expected impacts of the project.

Interested persons and agencies are invited to identify and submit substantive evidence regarding study results, natural resource management policies, and reports from state and local resource agencies. The evidence should be limited to the Macallen Dam Hydroelectric Project and its expected environmental effects.

After evaluating the comments, the staff will determine if preparation of an Environmental Impact Statement is necessary.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street NE., Washington, DC 20426.

Comments should be filed by the close of business, April 15, 1988, and should be addressed to Lois D. Cashell, Acting Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Please affix Project No. 6602-003 or Project No. 8958-000, as appropriate, to all comments.

For further information please contact Dianne Rodman, Environmental Assessment Coordinator, at (202) 376-9045.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5511 Filed 3-11-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP88-164-000 et al.]

Columbia Gas Transmission Corp., et al.; Natural Gas Certificate Filings; Republication

[**Editorial Note:** The following document was originally published at page 3626 in the issue of Monday, February 8, 1988. In that publication, some paragraphs were printed out of order. The corrected document is republished below in its entirety.]

February 1, 1988.

Take notice that the following filings have been made with the Commission:

1. Columbia Gas Transmission Corporation

[Docket No. CP88-164-000]

Take notice that on January 14, 1988, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP88-164-000 an application for authorization to construct certain replacement facilities and to operate such facilities at a higher maximum allowable operating pressure (MAOP), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the construction and operation of approximately 27.6 miles of 20-inch pipeline in two segments, replacing a like amount of 20-inch pipeline, located in Lancaster and Chester Counties, Pennsylvania. The proposed replacement project has an estimated cost of $15,120,000, which would be financed with funds on hand. Applicant also proposes to increase the MAOP from 375 to 1,000 psig for this section of its pipeline system. Applicant asserts that the proposals herein are due to age and the deteriorated condition of the existing facilities. Applicant states that the existing pipeline proposed herein to be replaced will remain in service until the proposed replacement sections are constructed.

It is noted that the proposed increased in the MAOP is necessary in order for the Applicant to perform the firm sales and firm transportation services for Providence Gas Company as proposed in its Docket No. CP88–164–000, also filed on January 14, 1988. It is further noted that Applicant filed this application within the timeframe of the open season announced by the Commission in Docket No. CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: February 22, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Columbia Gas Transmission Corporation

[Docket No. CP88–163–000]

Take notice that on January 14, 1988, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP88–163–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the establishment of a firm sales service to a new wholesale customer and the construction and operation of facilities necessary to implement that service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to initiate a firm sales service to Providence Gas Company (Providence) of up to 10,000 dekatherms (dth) per day under Applicant's Rate Schedule CDS. Applicant further states that Providence has also requested firm natural gas transportation service under Applicant's Rate Schedule FTS of up to 40,000 dth per day. Applicant asserts that the transportation would be self-implemented pursuant to Part 284 of the Commission's Regulations. In order to provide these services, Applicant proposes to construct 19.1 miles of 16-inch lateral and one interconnecting measuring facility for a total estimated cost of $14,870,000. This proposed lateral would be an extension of Applicant's proposed lateral currently pending in Docket No. CP88–129–000 [1] and would extend from Flanders, Morris County, New Jersey to its eastern terminus which would interconnect with Algonquin Gas Transmission Company's (Algonquin) pipeline system, just north of Algonquin's Hanover Compressor Station in Morris County, New Jersey. Applicant explains that Algonquin would redeliver the subject volumes to Providence on its behalf.

Applicant notes that its ability to provide the proposed services is contingent upon an increase in the maximum allowable operating pressure on a certain part of its upstream system which is part of replacement project proposed in Docket No. CP88–164–000.[2]

It is noted that Applicant filed this application within the time-frame of the open season announced by the Commission in Docket CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: February 22, 1988, in accordance with Standard Paragraph F at the end of this notice.

3. Columbia Gas Transmission Corporation

[Docket No. CP88–129–000]

Take notice that on January 14, 1988, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue SE., Charleston, West Virginia 25314, filed in Docket No. CP88–129–001 an amendment to its pending application filed on December 15, 1987, in Docket No. CP88–129–000 pursuant to Section 7(c) of the Natural Gas Act to construct and operate natural gas facilities and to provide firm service to a new resale customer, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

Applicant requests authorization to initiate a firm sales service to New Jersey Natural Gas Company (NJN) of up to 10,000 dekatherms (dth) per day under Applicant's Rate Schedule CDS. Applicant states that Elizabethtown Gas Company (Elizabethtown) has requested firm natural gas transportation service under Applicant's Rate Schedule FTS of up to 20,000 dth per day and an interruptible transportation service under Rate Schedule ITS of up to 2,200 Mdth annually. Applicant further states that in order to provide the requested service, it proposes to extend its main transmission system from a point located near Hellertown, Northampton County, Pennsylvania, to the vicinity of Flanders, Morris County, New Jersey. It is further stated that the proposed extension would consist of the construction of approximately 38.1 miles of 16-inch pipeline and three interconnecting measuring facilities at a total estimated cost of $23,723,000.

Applicant notes that the amended application supersedes the request of Applicant filed in Docket No. CP88–129–000 on December 15, 1987, in that it now proposes the construction and operation of a 16-inch pipeline instead of a 12-inch pipeline to provide additional throughput capacity. In addition a minor change from the initial route has been proposed in order to avoid three wetland areas and two stream crossings and would result in an increase in the total length of the facility from 37.9 miles to 38.1 miles, it is further explained.

It is noted that Applicant filed this application within the time-frame of the open season announced by the Commission in Docket No. CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: February 22, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. Tennessee Gas Pipeline Company

[Docket No. CP88–171–000]

Take notice that on January 15, 1988, Tennessee Gas Pipeline Company (Tennessee), a Division of Tenneco Inc., P.O. Box 2511, Houston, Texas 77252 filed an application pursuant to Section 7(c) of the Natural Gas Act and the Rules and Regulations of the Federal Energy Regulatory Commission for a certificate of public convenience and necessity authorizing the transportation of the dekatherm equivalent of 200,000 Mcf per day of natural gas on a firm basis for National Fuel Gas Supply Corporation (National Fuel) and the construction and operation of new measurement facilities.

Tennessee would receive such quantities of gas at a point of receipt located at the existing interconnection between the facilities of Tennessee and TransCanada PipeLines Limited (TransCanada) on the international border between the United States and Canada near Niagara Falls, New York.

Tennessee would transport and deliver to National Fuel a thermally equivalent quantity of gas at a point to be located at the interconnection of a new pipeline to be constructed by National Fuel and new measurement facilities to be constructed by Tennessee at a mutually agreeable location on Tennessee's existing Niagara Spur Line near Lewistown, New York.

Tennessee seeks authority to construct and operate measurement facilities for approximately 302,100 dth per day of natural gas at the proposed delivery point near Lewistown, New York. It is stated that this represents the need for measurement of the quantities proposed in this application as well as 93,148 dth per day of "Boundary" quantities which Tennessee proposes to deliver to Natural Fuel at Lewistown. It is further stated that of the 93,148 dth per day of "Boundary" quantities, 90,630 dth per day represents quantities to be transported by National Fuel for Tennessee and 2,518 dth per day represents quantities to be delivered to National Fuel by Tennessee. Tennessee states that Tennessee and National Fuel would individually file for the appropriate authorization for transportation of the "Boundary" quantities. The cost of these measurement facilities is estimated to be $1,497,000 of which one-third will be paid by Tennessee and the remainder by National Fuel.

Tennessee states that in consideration of certain transportation services to be performed by National Fuel for Tennessee at no cost to Tennessee, Tennessee would provide the transportation proposed in this application at no cost to National Fuel, with the exception that National Fuel would provide to Tennessee, at no cost to Tennessee, a daily quantity in dekatherms of gas for Tennessee's system fuel and uses and gas lost and unaccounted for equal to one-half of one percent (0.5%) of the quantities received from National Fuel on any day.

It is noted that Tennessee filed this application within the time frame of the open season announced by the Commission in Docket No. CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: Feberary 22, 1988, in accordance with Standard Paragraph F at the end of this notice.

5. Tennessee Gas Pipeline Company

[Docket No. CP88–176–000]

Take notice that on January 15, 1988, Tennessee Gas Pipeline Company (Tennessee) a Division of Tenneco Inc., P.O. Box 2511, Houston, Texas 77252, filed an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Tennessee (1) to provide firm natural gas transportation to six shippers in Massachusetts, Rhode Island and New Hampshire in an aggregate daily maximum quantity of 31,721 Dth; and (2) to construct and operate the facilities necessary to transport and deliver these quantities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The specific shippers, quantities, receipt and delivery points for which Tennessee seeks firm transportation authority are:

	Transportation quantity (Dth/Day)	Receipt point	Delivery point
(1) Colonial Gas Co	7,049	Niagara	Tewksbury and Mendon, MA.
(2) Essex County Gas Co	2,014	Niagara	Haverhill-Essex, MA.
(3) Boston Gas Co	17,119	Niagara	Beverly-Salem and Mendon, MA.
(4) Energy North, Inc	4,026	Niagara	Laconia, NH.
(5) Fitchburg Gas and Electric Light Company	504	Niagara	Fitchburg, MA.
(6) Valley Resources Incorporated	1,007	Niagara	Pawtucket, RI.

To provide the firm transportation service, Tennessee proposes to construct 40.79 miles of mainline loop, 14 miles of lateral line, and 1550 horsepower of compression. It is stated that all pipeline and compression facilities affected are located in Erie, Wyoming, Livingston, Ontario, Herriner, Otsego, Onardoga, and Columbia Counties, New York, Massachusetts; and Merrimack County, New Hampshire. The total project cost of Tennessee facilities is estimated to be $61,247,000.

Tennessee proposes to render the firm transportation service pursuant to proposed new Rate Schedule NET–LD, which provides for incremental rates to recover a portion of the transportation projects (NORTRAN ANE and NEP).

It is noted that Tennessee filed this application within the time-frame of the open season announced by the Commission in Docket No. CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: February 22, 1988, in accordance with Standard Paragraph F at the end of this notice.

6. Texas Eastern Transmission Corporation

[Docket No. CP88–179–000]

Take notice that on January 15, 1988, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP88–179–000 an application pursuant to section 7(c) of the Natural Gas Act requesting a certificate of public convenience and necessity authorizing Texas Eastern to transport natural gas for CNG Transmission Corporation (CNG), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Eastern proposes to transport on a firm basis for CNG a Maximum Daily Transportation Quantity (MDTQ) of 80,000 dekatherms of natural gas per day and such additional quantities on an interruptible basis as Texas Eastern and CNG may mutually agree upon.

Specifically, Texas Eastern would receive from CNG the above stated quantities of natural gas at the existing point of interconnection with CNG located at the Oakford Storage Field in Westmoreland County, Pennsylvania and would transport and redeliver equivalent quantities of gas, less applicable shrinkage, to CNG at the existing interconnection between CNG's pipeline PL–1 and Texas Eastern's compressor station located at Chambersburg, Pennsylvania. The agreement stipulates a primary term beginning upon commencement of service and would continue for twenty years.

The facilities required for the proposed transportation are found in an amended application in Docket No. CP87–92–002 (Capacity Restoration Program) filed by Texas Eastern on January 15, 1988. This amended application seeks authorization for the construction, replacement, and operation of a significant portion of its major pipeline facilities. Texas Eastern alleges that consolidation of the proposed transportation facilities with the major construction proposed in Docket No. CP87–92–002 would result in economies of scale and cost savings for both projects.

Based upon the annual cost of service of the required facilities included in Texas Eastern's amended application in Docket No. CP87–92–002, Texas Eastern estimates an initial monthly demand charge of $3.348 per dekatherm and an excess charge of $0.1101 per dekatherm.

---

[1] In Docket No. CP88–129–001 filed on January 14, 1988, Applicant proposes to construct 38.1 miles of a 16-inch lateral from Hellertown, Northampton County, Pennsylvania, to the vicinity of Flanders, Morris County, New Jersey. Applicant would utilize this facility to initiate a firm sales service to New Jersey Natural Gas Company and a firm transportation service to Elizabethtown Gas Company.

[2] Applicant filed Docket No. CP88–164–000 on January 14, 1988 requesting to replace 27.8 miles of 20-inch mainline pipe which would be located in Lancaster and Chester Counties, Pennsylvania.

It is noted that Texas Eastern filed this application within the time-frame of the open season announced by the Commission in Docket No. CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: February 22, 1988, in accordance with Standard Paragraph F at the end of this notice.

7. Transcontinental Gas Pipe Line Corporation

[Docket No. CP88–177–000]

Take notice that on January 15, 1988, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77252, filed in Docket No. CP88–177–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing construction and operation of natural gas pipeline and related facilities and authorizing the transportation and storage of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco would provide firm transportation of up to the dekatherm equivalent of 125 MMcf of natural gas per day on behalf of potential customers from the United States/Canadian border to a point of delivery for injection into storage or to points of delivery for transportation on Transco's system. Transco states that it has already received nominations for transportation service substantially in excess of the 125 MMcf dekatherms per day which would be offered. Transco further states that it would transport the gas in accordance with the individual transportation agreements in substantially the same form as Transco's *pro forma* Gas Transportation Agreement, a copy of which is included in the complete application. Transco states that it would charge the modified fixed variable rate D–1, D–2 reservation rate and commodity rate.

Transco would also provide storage service for potential customers of up to 11 Bcf storage capacity with a maximum daily delivery capability of 100 MMcf at the facilities of Penn-York Energy Corporation in Wharton County, Pennsylvania. Transco states that it has already received nominations for storage demand that would require storage capacity in excess of the 11 Bcf that is being offered. Transco further states that although the proposed storage and transportation services are being offered as a joint project Transco would offer the storage and/or transportation service in an unbundled fashion. Transco would offer its potential customers the storage service under the proposed Rate Schedule SS–2.

Transco further states that it would construct 25.52 miles of pipeline loop in Monroe and Clinton Counties PA. and in Middlesex and Gloucester Counties NJ. Transco would also add 12,500 horse power of compression at its existing Compressor Station No. 520 in Lycoming County PA.

In addition, Transco would construct, install, and operate additional transportation facilities incremental ranging from 60 to 460 MMcf per day in excess of the above proposed 225 MMcf per day. The incremental service would supply the Northeast markets which are capable of receiving service through Transco's facilities to the extent that the Commission determined that the market need exists and that the public convenience and necessity would be served. Transco states that it has the capability to develop incremental transportation capacity to deliver a significant volume of natural gas from the Leidy Hub area to Northeast U.S. markets in a cost-effective manner. Transco submits therefore that, as an applicant and active participant in the Commission's "open season" proceeding, by its instant application Transco is proposing to expand its Leidy Line and market area facilities to provide additional transportation capacity to serve such markets.

It is noted that Transco filed this application within the time-frame of the open season announced by the Commission in Docket No. CP87–451–000, concerning projects to supply natural gas to the Northeast U.S.

Comment date: February 22, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–2545 Filed 2–5–88; 8:45 am]

BILLING CODE 1505–01–D

[Docket Nos. CP88–242–000 et al.]

Florida Gas Transmission Co. et al.; Natural Gas Certificate Filings

March 8, 1988.

Take notice that the following filings have been made with the Commission:

1. Florida Gas Transmission Company

[Docket No. CP88–242–000]

Take notice that on February 18, 1988, Florida Gas Transmission Company (Florida Gas), P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP88–242–000 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing Florida Gas to transport natural gas for Air Products and Chemicals, Inc. (Air Products), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that gas would be delivered to Florida Gas for the account of Air Products at the following existing points of interconnection between Florida Gas and the indicated entity:

(1) Acadian Gas Pipeline System in West Baton Rouge Parish, Louisiana.

(2) Matagorda Offshore Pipeline System in Refugio County, Texas.

(3) Exxon Company, U.S.A. in Pearl River County, Mississippi.

(4) Prosper Energy Corporation in Pearl River County, Mississippi.

Florida Gas proposes to transport on an interruptible basis up to 35 billion Btu equivalent of gas per day for Air Products to an existing point of interconnection between Florida Gas and Five Flags Pipeline Company (Five Flags) in Santa Rose County, Florida for ultimate delivery by Five Flags to Air Products' plant in Santa Rosa County.

Southern requests that the proposed transportation be authorized for a primary term of five years from the date of initial deliveries, and from year-to-year thereafter until terminated by either Florida Gas or Air Products.

Florida Gas states that its agreement with Air Products provides that Air Products shall pay Florida Gas each month a Facility Charge of 7.3 cents per million Btu equivalent delivered to Air Products, plus a Service Charge of 3.9 cents per million Btu equivalent per 100 miles of forward haul.

Additionally, Florida Gas indicates that it would collect from Air Products the GRI surcharge of 1.47 cents per million Btu equivalent and Florida Gas' ACA surcharge of 0.21 cents per million Btu equivalent.

Florida Gas states that the proposed transportation service would be conditioned upon the availability of capacity sufficient for Florida Gas to perform the proposed services without detriment or disadvantage to Florida Gas' existing customers.

Comment date: March 29, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Tennessee Gas Pipeline Company

[Docket No. CP88–249–000]

Take notice that on February 22, 1988, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP88–249–000, a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205 and 157.212) for authorization to establish new delivery points to an existing firm sales customer, Midwestern Gas Transmission Company (Midwestern), under its blanket certificate issued in Docket No. CP82–413–000 on September 1, 1982, pursuant to section 7 of the NGA, all as more fully set forth in the request on file with the Commission and open to public inspection.

.Tennessee states that it seeks to establish the new delivery points to Midwestern at the following existing points of interconnections on Midwestern's system.

Location	Delivery volume	Interconnecting pipeline
Downstream of Station 2116 in Vermilion County near Potomac, Illinois.	150,000 Mcf/d.	Trunkline Gas Co.
Upstream of Station 2112 in Knox County near Bicknell, Indiana.	50,600 Mcf/d.	Texas Gas Transmission Co.
Downstream of Station 2108 in Spencer County near Chrisney, Indiana.	154,600 Mcf/d.	ANR Pipeline Co.
Upstream of Station 2106 in Daviess County near Whitesville, Kentucky.	113,700 Mcf/d.	Texas Gas Transmission Co.
Upstream of Station 2110 in Pike County near Winslow, Indiana.	20,600 Mcf/d.	Texas Eastern.

It is stated that Tennessee currently provides natural gas service to Midwestern under Tennessee's CD–1 Rate Schedule pursuant to a gas sales contract between Tennessee and Midwestern dated February 24, 1982. According to Tennessee, the new delivery points are necesary to provide increased supply flexibility to Midwestern. Tennessee states that it does not propose to increase or decrease the total daily or annual quantities it is authorized to deliver to Midwestern which is currently 616,400 Dth and 224,986,000 Dth, respectively. Tennessee asserts that the establishment of the proposed new delivery points is not prohibited by its currently effective tariff and that it has sufficient capacity to accoomplish the deliveries at the proposed new delivery point without detriment or disadvantage to any of Tennessee's other customers.

Comment date: April 22, 1988, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion 'o intevene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by selections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission's file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time alowed for filing a portest. If a protest is filed and not withdrawn within 30 days after the time alowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

[FR. Doc. 88–5513 Filed 3–11–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP88–247–000 et al.]

Williams Natural Gas Co. et al.; Natural Gas Certificate Filings

March 7, 1988.

Take notice that the following filings have been made with the Commission:

BEST COPY AVAILABLE

1. Williams Natural Gas Company

[Docket No. CP88-247-000]

Take notice that on February 19, 1988, Williams Natural Gas Company (WNG) (1) applied, in abbreviated form, for temporary and permanent certificate authorization under section 7(c) of the Natural Gas Act (NGA) for WNG to place in effect a Gas Inventory Charge (GIC) mechanism to permit customers under WNG's partial requirements rate schedules to nominate sales gas volumes, and for WNG to charge for the carrying cost of holding gas supply to serve such nominated volumes, and pre-granted authorization under section 7(b) of the NGA for WNG to abandon sales service to partial requirements customers as to service above related contract demand reductions; and (2) submitted a related sections 4 and 5 tariff change to place in effect prospectively the tariff provisions and charges necessary to effectuate the GIC.

WNG requests that the Commission issue a temporary and permanent certificate, to be effective in conjunction with WNG's partial requirements Rate Schedules PR(A), PR(B), and P, to be implemented through a revised stipulation in Docket Nos. RP86-32, *et al.* and Rate Schedules GS and SGS to be implemented prospectively in Docket No. RP87-33, granting certificate authority for WNG to place in effect a mechanism to permit customers under WNG's partial requirements rate schedules to nominate sales gas volumes and for WNG to charge for the carrying costs of holding gas supply to serve such nominated volumes. WNG also requests that the Commission issue an order granting WNG pre-granted authority to abandon sales service to partial requirements customers in accord with their related reductions in contract demand.

WNG requests that the Commission take such other action, or issue any waivers, as may be appropriate and required to promptly grant the requested authorizations.

Comment date: April 1, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Arkla Energy Resources a division of Arkla, Inc.

[Docket No. CP87-458-001]

Take notice that on February 23, 1988, Arkla Energy Resources, a division of Arkla, Inc. (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP87-458-001 an amendment to the application filed in Docket No CP87-458-000 pursuant to section 7 of the Natural Gas Act requesting authorization for certain changes in the facilities and services involved in Docket No. CP87-458-000, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

In Docket No. CP87-458-000 AER requested authority granting authorization necessary for the continued operation and provision of certain facilities and services that are or may be jurisdictional under the Natural Gas Act. AER indicated in the initial application that the potential need for such additional authorization had come to light following new management's separation of Arkla's pipeline and distribution and operation into separate divisions. AER further asserted that this new management group has instituted stringent procedures to assure that in the future such regulatory oversight, do not occur and that appropriate authorizations are obtained in a timely manner.

AER, in Docket No. CP87-458-000, requested jurisdictional authority covering two exchanges involving reserved gas, two other exchanges, various facilities and other services in the northwest Arkansas area of its system, and certain other facilities and services at various locations throughout its system. Upon further review of its system and operations, AER finds it necessary to propose changes to the filing made in Docket No. CP87-458-000. AER proposes to make changes in the existing facilities and services for which authorization was sought initially in order to reflect the sale of certain production-area facilities, the revision of an existing exchange arrangement, the termination of certain services, and the proposed downsizing of a compressor station. AER further states that it has discovered relatively minor error in two previously submitted exhibits and is filing appropriate corrections with the amendment.

Comment date: March 28, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

3. Sabine Pipe Line Company

[Docket No. CP88-253-000]

Take notice that on February 24, 1988, Sabine Pipe Line Company (Sabine), Post Office Box 52332, Houston, Texas 77052, filed in Docket No. CP88-253-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon its gas measurement facilities and platform riser located on the West Cameron Block 547 production platform in offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Sabine states that by Commission order issued on July 26, 1984, in Docket No. CP84-96-000 (28 FERC ¶62,124) it was authorized to construct a 4.9 mile 12-inch pipeline from the platform at West Cameron Block 547 to an interconnect with a Stringray Pipeline Comapny 30-inch pipeline in West Cameron Block 565. Sabine alleges that production and transportation on the subject line began in October, 1984 and ended in November, 1986.

It is asserted that Texaco, as owner of the platform at West Carmeron Block 547, has informed Sabine that it will remove the production platform. As a result of Texaco's removal of the production platform, Sabine is requesting authority to abandon its gas measurement facility and platform riser on the subject platform so that Texaco can remove its platform. Sabine asserts that it does not wish to abandon the remainder of the line. Sabine further asserts that for accounting purposes, the line, in accordance with Part 201 of the Commission's regulations, would be placed in Account 105, gas plant held for future use. It is anticipated that an increase in gas and oil prices would cause an increase in drilling activities in adjacent underline blocks and thus make the line usable at some future time.

Comment date: March 28, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraph

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal

Energy Regualtory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules and Practice and Procedure, as hearing will be held without futher notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

FOOTNOTES

[1] Effective 1-2-86, Sun assigned partial interest and retained a partial interest in Property No. 760242, Wimberly, to Doyle Hartman, James A. Davidson, Michael L. Klein and John H. Hendrix Corporation.

---

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[2] Effective 1-2-86, Sun assigned partial interest an retained partial interest in each well in Property No. 595020, Langley Boren #1, Property No. 595023, Langley Griffin Comm., Property No. 595026 Langley Getty Com. #1, and Property No. 595027, Langley Green, to Doyle Hartman, James A. Davidson, Michael L. Klein, and John H. Hendrix Corporation.

[3] Effective 1-2-86, Sun conveyed a partial interest and retained partial interest in Property No. 780420, Wimberly, to Doyle Hartman, James A. Davidson,. Michael L. Klein, and John H. Hendrix Corporation.

[4] Effective 1-2-86, Sun assigned its interest in Property No. 750532, W. Perryton Unit, to Doyle Hartman, James A. Davison, Michael L. Klein, and John H. Hendrix Corporation.

[5] Not used.

[6] On 8-2-85, Chevron U.S.A. Inc. filed an application to amend certificates held by Gulf Oil Corporation as successor in interest, to substitute Chevron as the certificate holder and to redesignate the related rate schedules in the name of Chevron. Chevron states this filing was inadvertently left off the prior application and Chevron requests that Docket No. G-6841 be redesignated in the namne of Chevron and that Gulf's FERC Gas Rate Schedule No. 145 be redesignated as a Chevron rate schedule and assigned a new rate schedule number.

[7] Effective 6-1-86, Maynard Oil Company assigned to MOEPSI a portion of its interest in the Pointe Au Fer Field, Terroborne Parish, Louisiana.

[8] Effective 1-2-86, Sun assgined its interest in Property No. 456685, Farnsworth 4, to Doylel Hartman, James A. Davidson, Michael L. Klein, and John H. Hendrix Corporation.

[9] Effective 1-2-86, Sun assigned its interest in Property No. 475707, Gingrich Unit, and Property No. 513284, Garvie 2-23 Unit, to Doyle Hartman, James A. Davidson, Michael L. Klein, and John H. Hendrix Corporation.

[10] Conoco Inc. assigned its interest in South La Gloria Unit to Mobil Producing Texas & New Mexico Inc. effective 8-1-87

[11] Applicant requests permanent abandonment of a sale of gas to Panhandle. Applicant states that by agreement dated 12-1-87, the Gas Purchase Contract dated 7-1-66, between Mesa and Panhandle, will terminate by mutual consent. The termination agreement is conditioned ot a permanet abandonment being granted.

[12] Applicant states production ceased and the well was plugged and abandoned.

[13] Applicant states production ceased and the leases expired.

[14] AHC has sold its interest in the property to Huffco Petroleum Corporation effective 8-31-87. AHC's gas purchaser has terminated the related gas purchase contract.

[15] Applicant states that this well has not produced since 1963, due to the wellhead pressure being less than the line pressure maintained by the gas gatherer Applicant states that Williams will not allow compression equipment to be placed on the well to overcome the line pressure.

[16] Applicant requests permanent abandonment of a sale of gas to KN Energy. Applicant states that the production is noncommercial. Applicant states that no sales were ever made to KN Energy. The lease is to be released to the landowner.

[17] By Assignment effective 12-1-86, Tenneco assigned certain acreage to Bell and Kinley Company.

[18] By Assignment effective 1-1-87, ARCO assigned certain acreage to Hondo Oil and Gas Company.

[19] Applicant requests permanent abandonment to National Fuel of 6.25% of production from the Raish No. 1 well. Applicant states that the monthly volume is approximately 350 Mcf, which is too small to justify even the costs of accounting related to the National Fuel sale. Consolidated purchases the remainder of the gas. Applicant states it gave National Fuel a one-year notice of termination of the contract. Upon securing abandonment authorization Applicant states it intends to sell the entire production to Consolidated.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILLING CODE 6717-01-M

[Docket Nos. QF88-262-000, et al.]

Everett Energy Corp. et al.; Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, Etc.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard paragraph E at the end of this notice.

March 8, 1988.

Take notice that the following filings have been made with the Commission.

1. Everett Energy Corp.

[Docket No. QF88-262-000]

On February 18, 1988, Everett Energy Corporation (Applicant) of 236 North Falmouth Highway, North Falmouth, Massachusetts 02556, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in the City of Everett, Middlesex County, Massachusetts. The facility will consist of a circulating fluidized bed combustion boiler, a three-section (HP, IP, LP) extraction/condensing steam turbine generator with reheat cycle, and related auxiliary equipment. The primary energy source of the facility will be bituminous coal. The useful thermal energy output of the facility, which will be in the form of process steam, will be sold to the Boston Edison Company, an electric utility, for various thermal uses at its Mystic Station and for use by its steam customers. The net electric power production capacity of the facility will be 80 megawatts.

2. Hopewell Cogeneration Limited Partnership

[Docket No. QF87-217-002]

On February 17, 1988, Hopewell Congeneration Limited Partnership (Applicant), of 1177 West Loop South, Suite 900, Houston, Texas 77027, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Hopewell, Virginia. The facility as orginally proposed was to consist of two combustion turbine generators, two heat recovery steam generators, and an extraction/condensing turbine generator. Thermal energy recovered from the facility will be used by the Aqualon Company in its manufacturing operations and for space heating. The primary energy source will be natural gas. The net electric power production capacity of the facility as originally proposed was to be 298.6 MW.

By orders issued on May 30, and December 9, 1987, the Commission granted certification and recertification of the facility as a qualifying cogeneration facility (38 FERC ¶62,326 and 41 FERC ¶62,221 respectively).

The current recertification is requested due to change of ownership from Hopewell Cogeneration, Inc., to Hopewell Cogeneration Limited Partnership. In addition the configuration of the facility changed from two combustion turbine generators with two heat recovery steam generators to three combustion turbine generators with three heat recovery steam generator. The net electric power production capacity of the facility will increase to 356.5 MW. Installation of the facility will begin in July 1988. All other facility's characteristics remain unchanged.

3. Kamine Natural Dam Cogen Co. Inc.

[Docket No. QF88-268-000]

On February 23, 1988, Kamine Natural Dam Cogen Co. Inc. of 1620 Route 22 East, Union, New Jersey 07083 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration will be located at the James River Corporation's Natural Dam Division in Governeur, New York 13642. The facility will consist of a combustion turbine

generator, a supplementary fired heat recovery steam generator and an extraction/condensing steam turbine generator. The steam recovered from the facility will be used for hot water and for process applications at the host company's paper production facility. The net electric power production capacity of the facility will be 52,512 kW. The primary energy source will be natural gas. The installation of the facility is expected to commence in June 1989.

4. Oxbow Geothermal Corporation

[Docket No. QF84-256-002]

On February 23, 1988, Oxbow Geothermal Corporation (Applicant), of 333 Elm Street, Dedham, Massachusetts 02026, submitted for filing an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The application for recertification requests that approximately 214 miles of 230 kV transmission line, to be constructed by Applicant, be determined to be part of the qualifying small power production facility. The proposed transmission line will interconnect the facility with the transmission system of Southern California Edison (SCE). The transmission line will only be utilized to transmit the qualifying facility's electric power output to SCE. The facility was previously recertified as a qualifying small power production facility on August 4, 1986, Oxbow Geothermal Corp., Docket No. QF84-256-001, 36 FERC ¶62,152 (1986). All other facility's characteristics remain unchanged.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-70-000]

Blue Dolphin Pipe Line Co.; Tariff Change

March 8, 1988.

Take notice that on March 1, 1988, Blue Dolphin Pipe Line Company (Blue Dolphin), tendered for filing with the Commission, to be effective in thirty days, the following tariff sheets to be included in Blue Dolphin's FERC Gas Tariff:

Original Volume No. 1

Second Revised Sheet No. 11
  Original Sheet No. 11a
First Revised Sheet No. 22
  Original Sheet No. 22a
First Revised Sheet No. 34
  Original Sheet No. 34a
First Revised Sheet No. 40
First Revised Sheet No. 43
Second Revised Sheet No. 58
First Revised Sheet No. 71

Blue Dolphin states that the purpose of the revised tariff sheets is to adjust its jurisdictional natural gas transportation rates to include the Annual Charges Adjustment (ACA) unit charge, authorized by the Commission in Order No. 472, *et seq.* An ACA charge of $0.00198 per MMBtu will be added to each MMBtu of gas transported by Blue Dolphin. This rate is based on a conversion factor of 1060, derived from the average Btus per Mcf of gas transported by Blue Dolphin.

Blue Dolphin asks for whatever waivers are necessary for the Commission to approve the proposed tariff sheets, and for the tariff sheets to go into effect in thirty days on April 1, 1988.

Any persons desiring to be heard or to make any protest with reference to said filing should, on or before March 15, 1988, file with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any conference or hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5516 Filed 3-11-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. SA88-4-000]

Cavallo Pipeline Co.; Petition for Adjustment

March 8, 1988.

On January 11, 1988, Cavallo Pipeline Company (Cavallo) filed with the Commission a petition for adjustment under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA). Cavallo seeks an amendment to the adjustment granted its predecessor, Seagull Energy Corp. (Seagull Energy), from § 284.123(b)(i)(B) of the Commission's regulations so that Cavallo can use an existing intrastate transportation rate as the applicable rate for transportation under section 311 of the NGPA. Cavallo states that the rate is a cost-based intrastate tariff on file with the Railroad Commission of Texas (RRC).

Cavallo, a general partnership comprised of Seagull Industrial Pipeline Company and Amoco Cavallo Investment Company, is an intrastate pipeline system in the Matagorda Island Area, offshore Texas. According to Cavallo, the original portion of the system was completed in October 1979 by Seagull Energy for the purpose of transporting gas intrastate, pursuant to section 311, on behalf of Valley Pipe Lines, Inc. (Valley). On March 23, 1984, Seagull Energy received an adjustment from the Commission allowing it to use an existing intrastate tariff rate as the transportation component for service to Valley under section 311.

On October 23, 1987, Seagull Energy transferred all of the system's assets to Cavallo, which recently expanded the intrastate system. According to Cavallo, the extension will allow it to provide section 311 transportation service to Amoco Gas Company (Amoco Gas) and other parties who desire to transport gas through the system. Cavallo states that it currently has a tariff for intrastate service on behalf of Amoco Gas on file with the RRC and a transportation agreement with Amoco Gas for service under section 311 on the extension. Cavallo requests the Commission to grant an amendment to the March 1984 adjustment so that Cavallo can use the existing cost-based intrastate transportation rate on the new portion of the system for service under section 311 of the NGPA. Cavallo states such an amendment is warranted as the transportation service for Amoco Gas will be substantially the same as that provided for shippers on the original system.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure. (18 CFR 385.1101 *et seq.* (1987)) Any person desiring to participate in this proceeding must file a motion to intervene in accordance with this provision of Subpart K within 15 days after publication of this notice in the **Federal Register**. Cavallo's petition is on file with the Commission and is available for public inspection.

Lois D. Cashell,

Acting Secertary.

BILLING CODE 6717-01-M

[Docket No. CI88–294–000]

Colorado Interstate Gas Co., Application To Abandon Purchases and Sales of Gas

March 9, 1988.

Take notice that on February 1, 1988, as supplemented on February 26, 1988, Colorado Interstate Gas Company (Applicant), P.O. Box 1087, Colorado Springs, Colorado 80944, filed an application pursuant to section 7(b) of the Natural Gas Act for an order permitting and approving the abandonment of purchases of natural gas from Ronald D. Thomas and Odis H. McClellan, Jr. (Thomas/McClellan), and on behalf of Thomas/McClellan, to abandon sales of such gas by Thomas/McClellan to Applicant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to abandon its purchases from Thomas/McClellan made pursuant to a gas purchase agreement dated May 11, 1954, as amended (Agreement), through the reliance upon a provision of the Agreement which allows for the termination of sales and purchases if the parties are unable to agree upon a price for the gas.

Applicant states that the term of the initial Agreement was 20 years from the date of initial delivery of gas and so long thereafter as gas was capable of being produced in commercial quantities from leases and rights dedicated or committeed under the Agreement. Accordingly, Applicant states that although the initial term of the Agreement expired in 1974, Applicant has continued to purchase gas produced under the Agreement.

Applicant states that on September 25, 1985, Applicant and Thomas/McClellan amended the Agreement to include new provisions dealing, *inter alia*, with the price Applicant paid for the gas. Pursuant to that amendment Applicant states that it paid Thomas/McClellan, effective October 1, 1985, a price of $2.50 per MMBtu, such price being effective until October 1, 1987, at which time either party was eligible to seek a redetermination of the price.

Applicant further states it notified Thomas/McClellan of its request for a price redetermination by letter dated August 10, 1987, but after numerous meetings and discussions, agreement on a new price has not occurred. As a result, Applicant states that the last price in effect of $2.50 per MMBtu has continued to be the price under the contract. Applicant states that because the gas is not marketable in Applicant's market area at this price, or at any price offered by Thomas/McClellan, it notified Thomas/McClellan by letter dated November 17, 1987, of its intentions to discontinue purchasing gas under the Agreement. In its latter notification to Thomas/McClellan, Applicant states it has relied upon the provisions contained in section 5.2(b) of the Agreement, as amended September 25, 1985, which states in part that:

> "(b) In the event representatives of Buyer and Seller are unable to agree upon a redetermined Full Price and the latest effective Full Price continues to be the price at which gas is sold pursuant to the Agreement, Buyer and Seller shall each have the right to discontinue sale or purchase of all or a portion of gas hereunder provided Buyer or Seller in its sole discretion and in good faith determines that such price is unacceptable. * * *

Applicant also states that the abandonment as proposed herein will not have any significant impact on its total reserves, as Applicant's present owned and contracted reserves are estimated to be 2.8 trillion cubic feet as of December 31, 1986, resulting in a reserve life index of approximately 19 years. Applicant states that the remaining recoverable reserves attributed to the Agreement are approximately 2.5 Bcf, which constitute less than one-tenth of one percent of Applicant's total reserves, and the loss of such reserves will therefore have no significant impact on Applicant's ability to serve its present and projected annual sales requirement. Applicant states that the deliverability is approximately 170 Mcf/d of NGPA section 108 gas. Applicant states that of the total reserves of 2.5 Bcf, a maximum of 340 MMcf are attributable to the NGA gas for which abandonment is sought.

Applicant states that the instant abandonment authority as requested herein is similiar to the authority to abandon purchases which the Commission has previously granted in *Mississippi River Transmission Corporation, et al.* (MRT), 39 FERC ¶ 61,113 (1987). Further, similar to the conditions prescribed in Paragraph (C) of the Commission's order issued in *MRT*. Applicant states that has expressed to Thomas/McClellan a willingness to provide compression, sweetening and transportation service, subject only to the terms of a mutually acceptable to the terms of a mutually acceptable agreement. Applicant states that an important aspect of acceptability to Applicant of such an agrement would be that it would not subject Applicant to a change of status under proceedings currently pending relative to the Commission's Order Nos. 436 and 500.

Finally, Applicant states that no facilities are to be abandoned as a result of the proposed abandonment of the purchases described hereinbefore, and no rate adjustments or tariff changes are proposed by Applicant in the instant application.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1988, file with the Federal Energy Regulation Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–5518 Filed 3–11–88; 8:45 am]

BILLING CODE 6717-01-M

El Paso Natural Gas Co.; Petition for Issuance of Commission Order

[Docket No. CI88–313–000]

March 9, 1988

Take notice that on February 11, 1988, El Paso Natural Gas Company (El Paso) filed a petition requesting issuance of a Commission order requiring the assignees of certain leasehold properties to seek and obtain certificates of public

convenience and necessity under section 7(c) of the Natural Gas Act (NGA) authorizing their sales of gas produced from the leasehold properties to the extent such sales are subject to the Commission's jurisdiction under section 1(b) of the NGA.

El Paso states that it is a party to certain gas lease-sale agreements pursuant to which natural gas producers transferred to it their interests in various properties and reserved a special overriding royalty or production payment interest. El Paso further states that two court decisions in connection with the lease-sale agreements and the pricing of pipeline production rendered El Paso's continued operation of the properties uneconomic. Accordingly, El Paso reassigned the properties in accordance with certain provisions in the lease-sale agreements and filed a lawsuit in state court seeking a declaration that it had properly exercised its right of reassignment. According to El Paso, the decision by the Texas Court of Appeals confirmed the assignment of the properties effective as of October 1, 1983.

El Paso asks that the Commission require the producers to comply with the Natural Gas Act since the producers are now jurisdictional sellers of gas.

Any person desiring to be heard or to make protest with reference to the petition should on or before 15 days after the date of publication of this notice in the **Federal Register** file petitions to intervene or protests with the Federal Energy Regulatory Commission, Washington, DC 20426, in accordance with the requirements of the Commission's Rule of Practice and Procedure (18 CFR 385.211 or 385.214 (1987)). All protests filed with the Commission will be considered in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–5519 Filed 3–11–88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88–3–33–000]

El Paso Natural Gas Co.; Proposed Change in Rates Pursuant to Purchased Gas Cost Adjustment

March 7, 1988.

Take notice that on March 1, 1988, El Paso Natural Gas Company ("El Paso") filed a notice of change in rates for jurisdictional gas service rendered under rate schedules affected by and subject to Section 19, Purchased Gas Cost Adjustment Provision ("PGA"), of the General Terms and Conditions in El Paso's FERC Gas Tariff, First Revised Volume No. 1.

El Paso states that by Order No. 483 issued November 10, 1987 at Docket No. RM86–14–000, the Federal Energy Regulatory Commission (Commission) amended its PGA Regulations to require companies to file comprehensive annual filings providing for 12-month surcharge deferral and amortization periods, with quarterly adjustments in projected gas costs, instead of semiannual filings. Included in Order No. 483 are interim procedures intended to provide an orderly transition from the existing 6-month deferral and amortization periods to the 12-month cycle under the amended Regulations. El Paso states that under the interim procedures, it would not be fully phased-in to the amended Regulations until July, 1990, and that during the transition period its customers will experience five surcharge rate adjustments. To provide for an earlier implementation of the 12-month cycle, El Paso requested waiver of the applicable provisions of its Tariff and the Commission's Regulations as necessary to permit effectuation of a surcharge rate for the period April, 1988 through June, 1989, to recover deferred gas costs accumulated during the period July, 1987 through February, 1988. El Paso submits that use of such a procedure will not only facilitate a more rapid transition to the amended Regulations (El Paso would be fully phased-in by July, 1989, one year earlier than under the transition rules), but would also provide more rate stability during the transition period by requiring only two, scheduled surcharge adjustments. Utilizing such procedure, the filing reflects an increase of $0.5918 per dth in the base purchased gas cost rate and an increase of $0.2160 per dth in the surcharge rate for a net increase in El Paso's currently effective rates of $0.8078 per dth attributable to the PGA.

El Paso states that to implement the notice of change in rates, El Paso tendered for filing and acceptance the following revised sheets to its FERC Gas Tariff:

Tariff volume	Tariff sheet
First Revised Volume No. 1.	Substitute Sixteenth Revised Sheet No. 100 Substitute Fourth Revised Sheet No. 100–A.
Original Volume No. 1–A...	Substitute Eighth Revised Sheet No. 24.
Third Revised Volume No. 2.	Substitute Fortieth Revised Sheet No. 1–D.
Original Volume No. 2A.....	Substitute Forty-second Revised Sheet No. 1–C.

El Paso states that in the event the Commission does not grant the requested waivers, El Paso tendered alternate sheets, reflecting calculation of the surcharge adjustment in accordance with the applicable provisions of its FERC Gas Tariff, proposed to be made effective in lieu of their above-designated counterparts, as appropriate. The alternate sheets provide for a net increase in El Paso's currently effective rates of $1.0833 per dth.

El Paso states that in compliance with the commission's Order No. 478 issued July 27, 1987 at Docket No. RM87–28–000, *et al.*, requiring pipelines, in their first PGA filing in calendar year 1988, to remove from their tariff all incremental pricing provisions and references, El Paso also tendered the following sheets to its FERC Gas Tariff, First Revised Volume No. 1:

First Revised Sheet Nos. 352 through 354
Third Revised Sheet Nos. 355 and 356
First Revised Sheet Nos. 357 through 359
First Revised Sheet No. 500
Tenth Revised Sheet No. 540

In addition to the specific waivers requested above, El Paso requested that the Commission grant such other waivers of its applicable rules and regulations as may be necessary to permit the tendered tariff sheets to become effective on April 1, 1988.

El Paso states that copies of the filing have been served upon all of its interstate pipeline system sales customers and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 14, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ID-2327]

M. Dorothy Lyons; Filing

March 7, 1988.

Take notice that on February 8, 1988, M. Dorothy Lyons filed an application pursuant to § 45.9, Part 45 of the Commission's Regulations authorization to hold concurrently the following positions:

Position	Name of corporation
Assistant Secretary	Philadelphia Electric Co.
Assistant Secretary	Philadelphia Electric Power Co.
Assistant Secretary	Susquehanna Power Co.
Assistant Secretary	Susquehanna Electric Co.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 21, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5521 Filed 3-11-88; 8:45am]

BILLING CODE 6717-01-M

[Docket No. TA 88-6-5-000]

Midwestern Gas Transmission Co.; Tariff Filing and Rate Filing Pursuant To Tariff Rate Adjustment Provisions

March 8, 1988.

Take notice that on March 1, 1988, Midwestern Gas Transmission Company (Midwestern), tendered for filing ten copies of the following tariff sheets to its FERC Gas Tariff to be effective as proposed:

Original Volume No. 1:

Twenty-Ninth Revised Sheet No. 6
Fifth Revised Sheet No. 21
Third Revised Sheet No. 23
Second Revised Sheet No. 27
Third Revised Sheet No. 86A
Third Revised Sheet No. 88
Third Revised Sheet No. 90
Third Revised Sheet No. 92
Third Revised Sheet No. 94

Midwestern states that the purpose of this filing is to implement a Purchased Gas Adjustment (PGA) rate adjustment applicable to Midwestern's Northern System Rate Schedules CR-2, CRL-2, SR-2 and I-2 to be effective April 1, 1988. The remaining tariff sheets are being filed to correct inconsistent pagination on previously accepted tariff sheets.

Midwestern states that the Current Adjustments reflected on Twenty-Ninth Revised Sheet No. 6 consist of a positive adjustment of $.54 to the Demand Rate (D-1) for Rate Schedules CR-2 and CRL-2, a positive adjustment of $.0444 to the Commodity Rate for Rate Schedule SR-2, a positive adjustment of $.0178 to the Commodity Rate for Rate Schedule I-2, and a negative adjustment of $.07220 to the Gas Rate. Twenty-Ninth Revised Sheet No. 6 also reflects a Surcharge for Amortizing the Unrecovered Gas Cost Account for the Northern System, consisting of a demand surcharge of $.06 per Dkt and a gas surcharge of negative $.4628 per Dkt.

Midwestern states that copies of this filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5522 Filed 3-11-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI88-220-000]

John A. Newman and Foy Tomlinson; Application for Permanent Abandonment

March 9, 1988.

Take notice that on December 31, 1987, as supplemented on February 17 and 22, 1988, John A. Newman and Foy Tomlinson (Applicants), P.O. Box 405, Raywood, Texas, filed an application in Docket No. CI88-220-000 pursuant to Section 7(b) of the Natural Gas Act and § 2.77 [1] of the Commission's Regulations for permanent abandonment of a residue gas sale to El Paso Natural Gas Company (El Paso), from the John A. Newman Morris "30" No. 3-A Well in Zeno Field, Coleman County, Texas. John A. Newman is a small producer certificate holder in Docket No. CS74-270, and Foy Tomlinson is a small producer certificate holder in Docket No. CS74-175.

Applicants state in support of their application that marketing conditions have restricted the sale of this gas; that an alternative intrastate market is available, thus making this gas available to the public, as well as preserving the life of the well; that the subject well is presently shut in; and the that the new market is connected, and awaits only FERC approval of abandonment.

By letter agreement dated August 3, 1987, effective August 1, 1987, El Paso agreed to release the subject residue gas conditioned upon correction of any errors or discrepancies in charts or statements and conditioned upon correction of any liability on the part of Seller (Applicants) to make refunds for any overcollections of applicable governmental price ceilings.

Applicants state that the subject well was spudded on September 15, 1955. Applicants state that subsequently, a residue gas sales contract dated December 1, 1973, was entered into with El Paso for interstate sales, and a concurrent gas processing agreement was entered into with Union Texas Petroleum Corporation which processed the gas at its Perkins Plant for delivery to El Paso at the tailgate of the plant. Applicants state that on June 15, 1981, the subject well received an NGPA section 108 determination but was disqualified on September 30, 1984, due to lowering of the line pressure. Applicants state that the well requalified as a stripper well on January 1, 1985, and finally was disqualified on February 28, 1985. Applicants state the deliverability of the subject well is 200 Mcf/day at 40 psig line pressure.

Since Applicants have requested that their application be considered on an expedited basis, all as more fully described in the application which is on file with the Commission and open to public inspection, any person desiring to be heard or to make any protest with reference to said application should on or before 15 days after the date of publication of this notice in the Federal Register file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirments of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Dockect No. RP88-65-000]

Panhandle Eastern Pipe Line Co.; Petition For Declaratory Order Regarding Minimum Bill Liability and Motion For Summary Disposition

March 8, 1988.

Take notice that on February 29, 1988, Michigan Gas Storage Company (MGS) filed a petition for declaratory order regarding minimum bill liability and motion for summary disposition. MGS requests the Commission to resolve a controversy between it and Panhandle Eastern Pipe Line Company (Panhandle) over MGS's liability to Panhandle under Panhandle's Rate Schedule CS-1 annual minimum bill provision for commodity-related fixed costs during the 1987 calendar year. MGS also seeks summary disposition of this matter stating that the instant dispute involves only legal and policy considerations regarding the interpretation of the tariff provision and applicable Commission precedent.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP88-66-000]

Stingray Pipeline Co.; Change in Tariff

March 8, 1988.

Take notice that on March 1, 1988 Stingray Pipeline Company (Stingray) tendered for filing Fifteenth Revised Sheet No. 4, Second Revised Sheet No. 8, Third Revised Sheet No. 10, Second Revised Sheet No. 16, Second Revised Sheet No. 18, Second Revised Sheet No. 19, Second Revised Sheet No. 21, Second Revised Sheet No. 22, Second Revised Sheet No. 23, Second Revised Sheet No. 24, Second Revised Sheet No. 39, Second Revised Sheet No. 39.1, First Revised Sheet No. 49, First Revised Sheet No. 51, First Revised Sheet No. 52, First Revised Sheet No. 55, First Revised Sheet No. 56 and First Revised Sheet No. 57 to its FERC Gas Tariff Original Volume No. 1. An effective date of April 1, 1988 was proposed.

Stingray submits that these revised tariff sheets are being filed pursuant to Article VII of the Stipulation and Agreement dated April 16, 1985 in Docket No. RP85-16-000, and also reflect minor changes to its billing and measurement procedures. Stingray also states that it has proposed procedures in this filing to flowback to its customers excess deferred Federal income tax resulting from the Tax Reform Act of 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. SA88-6-000]

The Tekas Corp.; Petition for Adjustment

March 8, 1988.

On February 24, 1988, The Tekas Corporation (Tekas) filed with the Commission a petition for adjustment under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA). Tekas seeks an adjustment from § 284.123(b)(1)(i)(B) of the Commission's regulations [1] so that the company can use an existing intrastate transportation rate as the applicable rate for transportation under section 311 of the NGPA. Tekas states that the rate was established using a cost-of-service methodology and is part of a tariff filed with the Kansas Corporation Commission (KCC).

Tekas is curently leasing and operating a fifty-four mile intrastate pipeline and compression facility owned by Sunflower Electric Cooperative, Inc. (Sunflower). Prior to leasing the pipeline to Tekas, Sunflower used the line to transport gas within Kansas for its own use and for transportation under NGPA section 311(a). Tekas has no cost-based sales rate that satisfies the requirements of § 284.123(b)(i)(B) of the Commission's regulations, and thus seeks an adjustment in order to use its existing intrastate transportation rate currently on file with the KCC. According to Tekas, the rate currently on file is calculated using a cost-of-service methodology. Tekas has requested the KCC to issue a determination that the rates are in fact cost based. Tekas states that the adjustment from the Commission's regulations is necessary to prevent special hardships and inequities resulting from duplicat unnecessary filings.

---

[1] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applictions for certificate and abandonment authority where the producers assert they are subject to substantially reduced takes without payment or where the parties have entered into a take-or-pay buy-out pursuant to § 2.76. On August 7, 1987, the Commission issued Order No. 500 which promulgated interim regulations in response to the court's remand (40 FERC ¶ 61, 172 (1987)). These interim regulations became effective on September 15, 1987

[1] 18 CFR 284.123(b)(1)(i)(B) (1987).

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure. (18 CFR 385.1101 *et seq.* (1987)) Any person desiring to participate in this proceeding must file a motion to intervene in accordance with the provisions of Subpart K within 15 days after publication of this notice in the **Federal Register**. Tekas' petition is on file with the Commission and is available for public inspection.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-67-000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 7, 1988.

Take notice that Texas Eastern Transmission Corporation ("Texas Eastern") on March 1, 1988, tendered for filing as part of its FERC Gas Tariff revised tariff sheets reflecting a rate change from currently effective rates and other changes in its tariff. This rate filing will increase the level of Texas Eastern's jurisdictional rates to provide an overall annual increase in revenues of approximately $127 million or approximately 14.30 cents per dekatherm based on 100% load factor of the Zone D DCQ rate. The rates reflected in the revised tariff sheets are designed to bring Texas Eastern's revenues to a level of its jurisdictional cost of service and reflect changes in the areas of rate of return, labor costs, operating and maintenance expenses, and plant facilities cost.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest the filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure set forth in Part 385 of 18 Code of Federal Regulations. All such motions or protests should be filed on or before March 14, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP88-68-000 and RP88-68-001]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

March 8, 1988

Take notice that on March 1, 1988, Transcontinental Gas Pipe Line Corporation (Transco) filed certain revised tariff sheets to be effective April 1, 1988.[1] Transco states that the purpose of the filing is to resolve buyout and buydown cost apportionment and recovery on its system as expeditiously as possible. Transco's filing, pursuant to Order No. 500, proposes a billing mechanism to recover 75 percent of (a) the amounts actually paid or contracted to be paid by Transco under producer settlements entered into through February 29, 1988 to buy out Transco's take-or-pay exposure under its contracts with those producers and/or to buy down contractual price or take levels; (b) the buyout and buydown costs which Transco expects to pay or obligate itself to pay under settlement agreements which it anticipates it will execute during the period March 1, 1988 through November 30, 1988; and (c) the carrying costs on such amounts (the sum of which are referred to as "the Producer Settlement Costs"). Pursuant to Order No. 500, Transco proposes to absorb 25 percent of such Producer Settlement Costs. Transco further states that no producer settlement payments to affiliates are included in the filing. In addition, Transco avers that the filing is without prejudice to a similar filing or filings which Transco may make under the current provisions of the Commission's regulations on or before December 31, 1988 for the purposes of recovering any additional producer settlement costs.

Transco states that the proposed tariff sheets establish a fixed charge (Fixed Monthly PSP Charge) designed to recover 25 percent of Transco's "Producer Settlement Costs" through a fixed monthly charge to be collected over a 5-year period and to be billed in addition to Transco's currently effective rates. In addition, the proposed tariff sheets establish charges designed to recover 50 percent of Transco's "Producer Settlement Costs" through a commodity surcharge (Commodity PSP Charge) to rates Transco will charge for all sales and transportation services during the 5-year collection period. Transco also proposes annual adjustments to the fixed and commodity charges to reflect actual interest rates and actual balances for the amounts to be recovered, as more fully explained in the filing.

Transco states that the amounts to be billed to customers and to be absorbed by Transco (inclusive of interest carrying charges to April 1, 1988) are: $232.9 million in the Fixed Monthly PSP Charge, $465.8 million in the Commodity PSP Charge, and $232.9 million to be absorbed by Transco.

Transco states that copies of the filing have been mailed, *inter alia*, to each of its customers and State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 15, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717-01-M

---

[1] On March 4, 1988, Transco filed Eighth Revised Sheet No. 404-A, Original Volume No. 2, which was not included in the March 1, 1988 filing.

[Docket No. TA88-4-42-000]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

March 8, 1988.

Take notice that Transwestern Pipeline Company (Transwestern) on March 1, 1988 tendered for filing 43rd Revised Sheet No. 5 as part of its FERC Gas Tariff, Second Revised Volume No 1, to be effective April 1, 1988.

43rd Revised Sheet No. 5

Transwestern states that the tariff

sheet listed above is being filed pursuant to its Purchased Gas Adjustment provision set forth in Article 19 of the General Terms and Conditions of Transwestern's FERC Gas Tariff, Second Revised Volume No. 1. The Purchased Gas Cost Adjustment reflected herein represents an increase of $0.2915/dth as measured against Transwestern's Out-of-Cycle PGA filing in Docket No. TA88-3-42-000 (PGA88-3), which became effective on February 1, 1988.

Transwestern states that the rate change herein consists of:

1. An increase in the Cost of Gas Adjustment of $0.0042/dth as measured against Transwestern's Out-of-Cycle PGA filing, Docket No. TA88-3-42-000, which became effective on February 1, 1988;

2. An increase in the currently effective Surcharge Adjustment of $0.2873/dth due to an increase in the balance in the Gas Cost Adjustment Account as of December 31, 1987;

The proposed effective date for the tariff sheet listed above is April 1, 1988.

Transwestern has requested the Federal Energy Regulatory Commission to waive the Regulations set forth in Order No. 483, §§ 154.308 and 154.310, requiring the submission of a Quarterly PGA filing, to be effective June 1, 1988 and to allow Transwestern's semi-annual PGA filing of April 1, 1988 to remain in effect through June 30, 1988.

Copies of the filing were served on Transwestern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. In accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 15, 1988. Protests will be considered by the Commission in determining the approriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717-01-M

Docket No. CI85-673-004, et al.

UER Marketing Co., et al; Applications for Extension of Blanket Limited-Term Certificates With Pregranted Abandonment[1]

March 9, 1988.

Take notice that each Applicant listed herein has filed an application prsuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for amendment of its blanket limited-term certificate with pregranted abandonment previously issued by the Commission for a term expiring March 31, 1988, to extend such authorization for the term listed herein, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 24, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,
Acting Secretary.

[Docket No. TA88-1-2-001]

Western Gas Interstate Co.; Compliance Filing

March 7, 1988.

Take notice that on March 1, 1988, Western Gas Interstate Company (Western), in compliance with the Commission's Letter Order issued January 28, 1988, tendered for filing Substitute Eleventh Revised Sheet No. 10 and Substitute Third Revised Sheet No. 212 as part of its FERC Gas Tariff, First Revised Volume No. 1, to be effective February 1, 1988.

Western states that Substitutes Eleventh Revised Sheet No. 10 reflects a change to the Purchase Gas Surcharge under its Rate Schedule G-N and reflects a change in the Base Tariff Rate under its Rate Schedule G-S and Average Cost of Purchased Gas. Western states that Substitute Third Revised Sheet No. 212 is being tendered because of typographical deletions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1987)). All such motions or protests should be filed on or before March 14, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

Western Area Power Administration

Withdrawal of Proposed Allocation Criteria, Allocations, and Rates for Interim Power From the Navajo Generating Station

AGENCY: Western Area Power Administration, Department of Energy.

ACTION: Notice of withdrawal of proposed allocation criteria, allocations, and rates for interim power from the Navajo Generating Station.

SUMMARY: The Boulder City Area Office of the Western Area Power Administration (Western) initiated a public process on the interim allocations and rates for power from the Navajo Generating Station (Navajo) in the **Federal Register** (51 FR 30116, 30120) on August 22, 1986, and followed-up with additional notices in the **Federal Register** (52 FR 23764, 23770) on June 24, 1987. The power to be offered from Navajo was specified in the Interim Navajo Power Marketing Plan (Interim Plan) developed by the Bureau of Reclamation (Reclamation) pursuant to the Hoover Power Plant Act of 1984 (98 Stat. 1333). The Hoover Power Plant Act provides that Navajo power surplus to the needs of the Central Arizona Project and certain salinity control facilities (Navajo Surplus) would be offered for sale under a plan adopted by the Secretary of the Interior.

Interested parties were requested to submit applications for the interim Navajo Surplus identified in the Interim Plan and to submit comments on proposed interim allocation criteria and rates. Based on Western's analysis of the comments received on the proposed interim allocation criteria and the rates, Western has determined to withdraw the allocation criteria and the rates for the interim Navajo Surplus proposed in the June 24, 1987, **Federal Register** notice. Furthermore, based on Western's analysis of the applications received, Western has determined that no allocations will be made under the terms and conditions specified in the June 24, 1987, **Federal Register** notice. After consultation with Reclamation and the Central Arizona Water Conservation District (CAWCD), it has been decided that interim Navajo Surplus will be sold under the provisions provided for in section III.B.3 of the Interim Plan. Section III.B.3 provides that any Navajo Surplus not sold or exchanged under sections III.B.1 or 2 will be marketed by Western under short-term arrangements. Each applicant for interim Navajo Surplus will be contacted regarding the resource being offered under section III.B.3. Interim Navajo Surplus sold under section III.B.3 will be at rates, terms, and conditions agreed to by Western, Reclamation, CAWCD, and each contractor. The "Supplementary Information" section of this notice contains the discussion of Western's course of action, comments received on the proposed interim Navajo Surplus allocation criteria and rates, and Western's rationale for its determinations.

FOR FURTHER INFORMATION CONTACT: Mr. Earl W. Hodge, Assistant Area Manager for Power Marketing, Boulder City Area Office, Western Area Power Administration, P.O. Box 200, Boulder City, NV 89005, (702) 477–3255.

SUPPLEMENTARY INFORMATION:

Contents

A. Background
B. Course of Action
C. Discussion of Comments on Proposed Ratemaking Methodology and Rates
D. Discussion of Comments on Proposed Rescurce and Allocation Criteria
E. Allocations
F. Regulatory Procedural Requirements
G. Additional Information

A. Background

The power to be marketed from Navajo was specified in the Interim Plan developed pursuant to the Hoover Power Plant Act. Section 107 of the Hoover Power Plant Act provides that capacity and energy associated with the United States interest in Navajo, which is in excess of the pumping requirements of the Central Arizona Project (CAP), and any such needs for desalting and protective pumping facilities as may be required under section 101(b)(2)(B) of the Colorado River Basin Salinity Control Act of 1974, shall be marketed and exchanged by the Secretary of Energy, pursuant to a plan adopted by the Secretary of the Interior.

While work was ongoing on a long-term Navajo Power Marketing Plan, the Interim Plan was developed and adopted by the Commissioner of Reclamation on March 17, 1986, after consultation with Western, CAWCD, and the Arizona Governor's Office. The Interim Plan provides for marketing of the Navajo Surplus by Western during the initial delivery and pump testing period of the CAP and may continue through the pre-New Waddell period. New Waddell is a regulatory storage feature of CAP that will provide operational flexibility to increase winter season pumping and reduce summer season pumping, thereby providing an enhanced power resource during peakload periods. The Interim Plan will terminate upon termination of all contracts entered into under the Interim Plan. Interim Navajo Surplus contracts will terminate upon a 1-year notice given subsequent to September 30, 1989.

Section III of the Interim Plan provides the quantities and classes of service that are available under the Interim Plan. Applications were requested for the quantities and classes of service provided in section III.B of the Interim Plan.

Following the adoption of the Interim Plan, Western initiated the public process of a proposed ratemaking methodology and rates and requested applications in the August 22, 1986, **Federal Register** notice. The proposed ratemaking methodology for energy was based on a 3-year average of fuel replacement sale prices. The proposed energy rates using this methodology were 26.59 mills per kilowatthour in the summer season and 24.51 mills per kilowatthour in the winter season. A capacity rate of $10 per kilowatt-month was proposed for the summer season only.

Western analyzed the applications and comments on the proposed rates received pursuant to the August 22, 1986, notice, and elected to publish the revised proposed rates and reopen the period to submit comments and applications. A "Notice of Revised Proposed Rates and Reopening of Comment Period" and a "Notice of Proposed Allocation Criteria and Extension of Time for Submitting Applications for Power from the Navajo Generating Station" were published in the June 24, 1987, **Federal Register**. The June 24, 1987, notices provided that the proposed ratemaking methodology for energy would continue to be based on a 3-year average of fuel replacement sale prices; however, such sales were proposed to be limited to Arizona. Because Western had a third year of fuel replacement sales data available and had refined certain fuel replacement data and the rate calculation, the revised proposed energy rates were 24.09 mills per kilowatthour in the summer season and 23.69 mills per kilowatthour in the winter season. Based on the comments that the capacity charge was too high, the proposed capacity charge was changed to $5 per kilowatt-month for the summer season only.

In the June 24, 1987, notice, new and existing applicants were requested to provide a statement on the amount of desired interim Navajo Surplus by season, expressed as a percentage of the maximum capacity estimated to be available at the revised proposed rates.

The exhibit 1 Summary provided only an estimate of the monthly capacity and energy amounts expected to be available for marketing by Western under the Interim Plan. Western indicated that the actual power available may be more or less than estimated. If the power available from Navajo was more than estimated in the exhibit 1 Summary, each contractor would be obligated to take up to a 10-percent increase in the power that was estimated to the available to such contractor. Energy deliveries were subject to CAP pumping requirements.

The June 24th notices also stated that a public information forum on the proposed allocation criteria was to be held on July 7, 1987, and that public comment forums on the proposed allocation criteria and revised proposed rates would be held on July 14, 1987. At the public information forum, Western provided information and answered questions on the interim Navajo resource and the proposed allocation criteria. Oral comments on the proposed allocation criteria, ratemaking methodology, and rates were received at the public comment forums. Written comments were received through the end of the comment period on July 24, 1987.

Western received 25 applications for the interim Navajo Surplus and several oral and written comments regarding the proposed allocation criteria and rates in response to the June 24, 1987, notices. After review and analysis of the applications and the comments, Western, in accordance with the Hoover Power Plant Act, consulted with representatives from Reclamation, CAWCD, and the Arizona Governor's Office. The conclusion derived from this process is that no allocations will be made under the terms and conditions described in the June 24, 1987, **Federal Register** notice. A discussion of the applications and the rationale for making no allocations is presented in section E of this notice. A decision was also made, based on the comments received, that no further action would be taken on the proposed rates and allocation criteria. Discussions of the comments received are presented in sections C and D of this notice. Consistent with the terms of the Interim Plan, interim Navajo Surplus will be made available under the provisions of section III.B.3 of the Interim Plan. A discussion of this course of action follows in section B.

B. Course of Action

A review of the interim Navajo Surplus applications and comments on the proposed allocation criteria and rates indicated that the interim Navajo resource, as it was presented in the June 24, 1987, **Federal Register** notice, could not be sold to eligible entities under terms that would satisfactorily meet all the provisions of the Hoover Power Plant Act. Western's analysis of the interim Navajo Surplus applications, as amended, indicated that none of the applications fully meet the requirements set out in the June 24th notice. The comments received implied that the nature of the Navajo resource was not clearly defined, particularly the amount of power that would be available, and the revised proposed rates were too high. A group of Arizona entities indicated that Western's proposed ratemaking methodology did not satisfy the "appropriate saving" requirement of the Hoover Power Plant Act. This group proposed an interim Navajo Surplus ratemaking methodology based on 85 percent of a contractor's avoided cost. Applications received from the Arizona entities were subject to satisfactory settlement of the rate issue.

The alternative interim Navajo Surplus ratemaking methodology proposed by the Arizona entities was reviewed, and Western concluded that the methodology was not appropriate for the interim Navajo Surplus rates. A discussion of the reasons for not adopting this methodology is presented in section C of this notice. Subsequently, after review of the comments received relative to the interim Navajo Surplus, Western has concluded that no satisfactory sales could be made pursuant to the terms specified in the June 24th notices. Therefore, Western will sell interim Navajo Surplus under section III.B.3 of the Interim Plan. Interim Navajo Surplus not sold under the terms and conditions specified for the resource under section III.B.1 or 2 will be sold on a short-term basis pursuant to negotiated terms, conditions, and rates. Western has been asked to work with the interim Navajo applicants to determine if a sale could be negotiated pursuant to the provisions of section III.B.3.

It is Western's intent to market the interim Navajo Surplus in a manner that will optimize revenues to provide financial assistance in the timely construction of authorized features of CAP and to make repayment or establish reserves for the repayment of such construction costs. Consequently, Western will enter into interim Navajo Surplus contracts with eligible entities as necessary to optimize the revenues from interim Navajo Surplus sales. Each of these contracts may be under different terms, conditions, and rates. Preference Arizona entities will be given the first opportunity to purchase interim Navajo Surplus under the same terms, conditions, and rates as offered to non-Arizona or nonpreference entities.

C. Discussion of Comments on Proposed Ratemaking Methodology and Rates

The comments received on the ratemaking methodology and rates were primarily that the rates were too high and the ratemaking methodology did not satisfy the provisions of the Hoover Power Plant Act requiring an "appropriate saving for the contractor." The Arizona commentors supported an alternative ratemaking methodology submitted by the Salt River Project, the Arizona Power Authority, the Arizona Power Pooling Association, and the Arizona Irrigation and Electrical Districts Association, which will be referred to as the Arizona rate proposal.

Commentors indicated that fuel replacement sales during the period of October 1983 to September 1986 are not representative of the current energy market. One commentor indicated that Navajo short-term energy sales by Western and Western Systems Power Pool sales made during the 1987 summer season are representative of the market. Using average fuel replacement settlement prices during this period mitigates the effect of the sharp change in natural gas prices which occurred in 1986. The market shows that scheduled energy sales are presently in the 22 to 23 mills per kilowatthour range during onpeak hours. According to the commentor, this illustrates that Western is not only pricing above a level of appropriate saving, but above the prevailing market. Furthermore, the commentor stated that the alternative resources available at the lower price range offer scheduling flexibility. Navajo has no flexibility and has other characteristics which reduce the value of the resource.

The comments on the characteristics of the resource are addressed in section D of this notice. Western respond to the Arizona rate proposal in the June 24, 1987, **Federal Register** notice on page 23771, under the "Discussion" section. Western does not believe that a ratemaking method based on each contractor paying 85 percent of its projected avoided costs for the upcoming season is appropriate for the interim Navajo Surplus presented in the June 24, 1987, **Federal Register**. Western agrees that this method would provide a contractor with an "appropriate saving;" however, the method submitted would not assure that the rates from interim Navajo Surplus would yield sufficient revenues to provide the financial assistance necessary for the timely construction and repayment of construction costs of authorized features of CAP. The Hoover Power Plant Act entrusts the United States with the responsibility to optimize revenues to provide financial assistance in the timely construction of authorized features of CAP and to make repayment or establish reserves for the repayment of such construction costs; provided, however, that rates shall not exceed levels that allow for an appropriate saving for the contractor. Western does not believe that a ratemaking methodology that does not fulfill all the requirements of section 107 of the Hoover Power Plan Act is appropriate; therefore Western is not adopting the Arizona rate proposal.

Western's explanation for its decision to use fuel replacement sales to provide an appropriate saving to the contractor is addressed on page 23772 of the June 24th **Federal Register.** The commentor indicated that a 3-year average of fuel replacement sale prices does not reflect sharp declines in market prices. Western agrees that using a 3-year average would temper any sharp declines or increases; that is the purpose of using a 3-year average. As explained in the June 24th notice, the 3-year average was selected to provide revenue stability to CAP, thereby providing the necessary financial assistance to CAP. Furthermore, Western proposed to limit any changes in the Navajo energy rates not to exceed a 3-mill increase or decrease from the prior year. The limitation was proposed to provide financial stability as well as rate stability. Using a 3-year average with a limitation on the amount of change mitigates any sharp increases or decreases in fuel prices.

One commentor pointed out that the Navajo rates should be in the range of 22 to 23 mills. Western's revised proposed energy rates were only slightly over this range; however, when the proposed capacity rate is added to the energy rate, the composite rate is somewhat higher in the summer. Western's rationale for including a capacity charge was explained in the June 24th notice on page 23772. Western believes that the large amount of assured capacity available with the energy in the summer season makes the Navajo resource more available than fuel replacement sales and other nonfirm energy sales.

After review of the above-noted comments received on Western's revised proposed ratemaking methodology and rates, and the decision not to make an allocation, Western has determined to withdraw its rate proposal. The Navajo interim rates under section III.B.3 will be established by the Administrator of Western and will be appropriate for the type of resource, terms, and conditions of the sale. The method, terms, and conditions for marketing of any power under the Interim Plan shall not set a precedent for any other sales and exchanges of Navajo Surplus, including the sales and exchanges to be made pursuant to the Navajo Power Marketing Plan, adopted by the Commissioner of Reclamation, on behalf of the Secretary of the Interior, on December 1, 1987.

D. Discussion of Comments on Proposed Resource and Allocation Criteria

The major comments on the resource offer were primarily concerning the offered price. One commentor indicated that the offered price was too high, and several applicants indicated that their applications were conditioned on the settlement of the rate issue.

An additional comment regarding the rate was that the capacity charge for a summer month should be based on the highest hourly, integrated rate of delivery during an onpeak period and that no capacity charge should be assessed if interim Navajo Surplus is not made available during onpeak hours, at least during the lesser of 25 percent of the hours during the month or the total number of hours in that month multiplied by the monthly capacity factor as calculated from the then current exhibit 1. As discussed in section C of this notice, Western has elected to market and develop rates under section III.B.3 of the Interim Plan. No rate will be set for the resources marketed under section III.B.1. of the Interim Plan.

Comments on the nature of the Navajo resource were also received. One commentor indicated that a definition of the product was needed since the **Federal Register** notice identified the product in different locations, in table 1 and in exhibit 1. The same commentor noted that Western indicated that exhibit 1 was subject to modification and the commentor recommended that the exhibit 1 in the **Federal Register** notice be the measure of the resource if the June 24th criteria were adopted. Western agrees with the commentor that exhibit 1 in the **Federal Register** notice should be the measure of the resource. For the short-term interim contracts, Western, Reclamation, and CAWCD are working together to revise exhibit 1.

Another commentor suggested that the obligation to take up to 10 percent additional available capacity and energy be deleted. The commentor indicated that applying this requirement on a monthly basis may force a contractor to take the additional energy in the last 2 or 3 days of the month if the additional energy is not made available until late in the month. Western does not agree with the commentor. Under the terms provided in the June 24th notice, the contractors were being allocated a percentage of the available output from Navajo. In order to alleviate the possibility of requiring a contractor to take an unusually large delivery, Western proposed a 10-percent limitation. We believe this was a reasonable approach considering the nature of the allocation. Under any short-term sales, the 10-percent limitation provision will be subject to negotiation and will be dependent on how a contractor's power is scheduled.

Commentors also questioned the exhibit 1 capacity and energy estimates. One commentor noted that in some instances the estimated energy reflected a load factor in excess of 100 percent. The commentor recommended that any excess energy be made available to the Navajo contractor in the same percentage as its percentage allocation. Western agrees with the recommendation. Another commentor stated that in the years 1989 and 1990, the exhibit 1 summer season monthly quantities reflected little diversity, which is contrary to Western's statements that efforts would be made to maximize the value of the resource by load shaping. The exhibit 1 quantities were developed from estimated CAP pumping requirements. As stated earlier, Western is working with Reclamation and CAWCD to develop a resource that will maximize the value of the resource by load shaping and still meet CAP pumping requirements.

The comments regarding the proposed allocation criteria were concerned with the requirement for utility status and the requirement to have the ability to receive the power by dynamic signal at a Navajo designated point of delivery. Several commentors questioned what factors would be considered in the determination of utility status. One commentor recommended that cities without utility status should be considered as a lower priority preference entity since section 9(c) of the Reclamation Project Act of 1939 does not require that a city be a utility in order to be a preference entity. The commentor requested that the allocation criteria be clarified to indicate that cities buying power for municipal purposes are preference entities. Another commentor stated that the interests of the United States and the Arizona preference entities are better protected by adherence to the preference provisions stated in the Hoover Power Plant Act. This commentor stated that the creation of a separate, superior class of nonpreference cities for Navajo involved legal ramifications and potential impacts on Plan 6 and the successful completion of the Central Arizona Project. This same commentor also stated that any entity in Arizona that currently has a contract with Western for the purchase of any Federal preference resource should be classified as an entity having "utility status."

In the June 24th notice, on page 23765, the reader is referred to 48 FR 20878 for a discussion of "utility status." The primary consideration of "utility status" is that an entity must control and operate its own distribution system. Since Western has not taken action on the proposed allocation criteria, and the interim Navajo Surplus will be sold under the provisions of section III.B.3 of the Interim Plan, this factor will only be considered if a conflict arises over contracting with a utility or a nonutility. Western will first contract with the entity considered to have "utility status."

Several comments regarding the requirement to receive the Navajo power by dynamic signal at a Navajo point of delivery were also made. One commentor stated that the nature of the resource being marketed by Western does not lend itself to use of a dynamic signal. The commentor recommends that Western take the signal and parcel the resource out to CAWCD and the other purchasers on a prescheduled basis. Other commentors questioned the nature of the dynamic signal and what was required of a contractor to meet this requirement. A commentor also requested that the Navajo Switchyard be added as a designated point of delivery. Western believes that the issue of the use of a dynamic signal and the delivery point will depend on the terms and conditions of delivery worked out with a contractor for sales under section III.B.3 of the Interim Plan.

Additional comments were received regarding the contract period and short-term sales and exchanges. One commentor stated that inconsistencies exist between the Interim Plan and the application notice regarding the termination of the power sales contract subsequent to September 30, 1990. Western agrees with this statement. Subsequent to the publication of the application notice, Western published the proposed long-term Navajo Power Marketing Plan. The long-term plan provides that the Interim Plan contracts shall expire upon a 1-year notice given by Western subsequent to September 30, 1989, but in any event after such notice as Western deems appropriate upon the date of initial operation of New Waddell. The Interim Plan shall terminate upon expiration of all contracts entered into pursuant to the Interim Plan. Western believes that the provision in the long-term plan eliminates the inconsistency regarding the contract terms and will adhere to the provision of the long-term plan.

Comments were received recommending that Western consider the use of exchanges as provided in the Interim Plan and short-term sales in the event that all the available Navajo power is not sold pursuant to the application notice. Western agrees with this comment. Interim Navajo Surplus will be made available under section III.B.3 of the Interim Plan. Western also will explore the options of using exchanges under section III.B.2 of the Interim Plan.

E. Allocations

Twenty-five applications for interim Navajo Surplus were received and reviewed. After consultation with representatives from Reclamation, CAWCD, and the Arizona Governor's Office, Western concluded that only one of the applications submitted fully met the requirements in the June 24, 1987, **Federal Register** notice. As a result of Western's analysis of the applications received, no allocations will be made pursuant to the June 24, 1987, **Federal Register** notice. A discussion of the reasons for not selecting any entity follows.

The Colorado River Commission (CRC) applied for the interim Navajo Surplus at the revised proposed rates and fully met the requirements stated in the June 24, 1987, **Federal Register** notice. Subsequently, CRC withdrew their original application.

The following entities were not selected because they did not apply for the interim Navajo Surplus at the offered rates specified in the June 24, 1987, notice:

Aguila Irrigation District, Arizona
Arizona Power Authority, Arizona
Arizona Public Service Company, Arizona
Electrical District No. 1, Arizona
Electrical District No. 3, Arizona
Electrical District No. 4, Arizona
Electrical District No. 5, (Pinal County), Arizona
Electrical District No. 6, Arizona
Electrical District No. 7, Arizona
Electrical District No. 8, Arizona
Harquahala Valley Power District, Arizona
Maricopa County Municipal Water Conservation District No. 1, Arizona
McMullen Valley Water Conservation and Drainage District, Arizona
Papago Tribal Utility Authority, Arizona
Roosevelt Irrigation District, Arizona
Roosevelt Water Conservation District, Arizona
San Diego Gas and Electric, California
Tonopah Irrigation District, Arizona
Salt River Project, Arizona

The following applicants were not selected because they did not provide information to support eligibility under the allocation criteria set forth in the June 24, 1987, **Federal Register** notice. The entities did not provide information that they had utility status as of the date of the June 24, 1987, **Federal Register** notice and have the ability to receive the power by dynamic signal at a Navajo designated point of delivery.

Kern County Water Agency, California
Town of Paradise Valley, Arizona
City of Phoenix, Arizona

The following applicants were not selected because they did not apply for the interim Navajo Surplus as offered in the June 24, 1987, **Federal Register** notice, but desired the resource only under different terms and conditions:

Nevada Power Company, Nevada.
United States Army, Yuma Proving Ground, Arizona

F. Regulatory Procedural Requirements

Executive Order 12291: The Department of Energy has determined that an allocation is not a major rule because an allocation does not meet the criteria of section 1(b) of Executive Order 12291 (46 FR 13193) dated February 17, 1981. Western has an exemption from sections 3, 4, and 7 of Executive Order 12291. Moreover, Western has decided not to allocate power on a long-term basis.

Regulatory Flexibility Act: Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601, *et seq.*), each agency, when required to publish a notice of public rule, shall prepare for public comment an initial regulatory flexibility analysis to describe the impact of the proposed rule on small entities. In this instance, the proposed allocation criteria and proposed rates relate to electric services provided by Western. Under section 601(b) of the Regulatory Flexibility Act of 1980, services are not considered "rules" within the meaning of the Act; therefore, Western believes that no flexibility analysis is required.

National Environmental Policy Act: Pursuant to the National Policy Act of 1969 and the Department of Energy regulations published in the **Federal Register** on February 23, 1982 (47 FR 7976), as amended, Western prepared an environmental assessment of the

VOL.

ISS
49
MR
14
988
UMI

potential impacts of the marketing of interim Navajo Surplus and has determined that Western's actions pursuant to this **Federal Register** notice will not lead to any significant environmental impacts.

Paperwork Reduction Act of 1980: The Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520) requires that certain information collection requirements be approved by the Office of Management and Budget before information is demanded of the public. OMB has issued a final rule on the Paperwork Burdens on the Public (48 FR 13666), dated March 31, 1983. Ample opportunity was provided for the interested public to participate in the development of the allocation criteria and rates for power from Navajo. Nevertheless, this was at their sole election. There is no requirement that members of the public participating in the development of the allocation criteria and rates for power from Navajo supply information about themselves to the Government. It follows that the proposed allocation criteria and rates for power from Navajo are exempt from the Paperwork Reduction Act.

G. Additional Information

The following materials relative to the proposed allocation of Interim Navajo Surplus are available for inspection at the Boulder City Area Office:

1. Applications received requesting Navajo Power pursuant to the June 24, 1987, **Federal Register** notice (52 FR 23764).
2. **Federal Register** notice (52 FR 23764) dated June 24, 1987, publishing the "Proposed Allocation Criteria and Extension of Time for Submitting Applications for Power from the Navajo Generating Station."
3. **Federal Register** notice (52 FR 23770) dated June 24, 1987, publishing the "Proposed Interim Navajo Power Rate; Navajo Generating Station, Arizona."
4. **Federal Register** notice (51 FR 30120) dated August 22, 1986, publishing "Proposed Interim Navajo Power Rate; Navajo Generating Station, Arizona."
5. **Federal Register** notice (51 FR 30116) dated August 22, 1986, publishing the "Request for Applications for Power from the Navajo Generating Station."
6. **Federal Register** notice (51 FR 35557) dated October 6, 1986, publishing "Notice of Public Comment Forum on Proposed Navajo Interim Power Rate."
7. **Federal Register** notice (49 FR 50582) dated December 28, 1984, publishing the "Conformed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects."
8. **Federal Register** notice (49 FR 11673) dated March 28, 1984, publishing the "Request for Appliations for Short-Term Power from the Navajo Generating Station."
9. Environmental Assessment of General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects, Western Area Power Administration, April 1983.
10. Environmental Assessment.

Issued at Golden, Colorado, February 29, 1988.

William H. Clagett,
Administrator.

[FR Doc. 88–5534 Filed 3–11–88; 8:45am]

BILLING CODE 6450-01-M

Central Valley Project, CA; Power and Transmission Rates

AGENCY: Western Area Power Administration, Department of Energy.

ACTION: Notice of a rate order; Central Valley Project power and transmission rates.

SUMMARY: Notice is hereby given of the confirmation and approval, by the Under Secretary of the Department of Energy, of Rate Order No. WAPA–38 for placing power and transmission rates in effect, on an interim basis, for the marketing of firm power from the Central Valley Project (CVP) and the transmission of power over the transmission system of the CVP.

The schedule of rates for firm power service to CVP commercial power customers (Rate Schedule CV–F6) will consist of three step adjustments:

	Capacity charge ($/kW = month)	Energy charge (mills/kWh)
May 1, 1988, through Sept. 30, 1989	6.86	14.43
Oct. 1, 1989, through Sept. 30, 1991	7.49	15.76
Oct. 1, 1991, through Apr. 30, 1993	7.74	16.30

The initial power rate step effectively represents approximately a 17.5 percent composite rate decrease for CVP customers at average system load factor from the current CVP power rate.

In addition to the CVP power rates, a firm transmission rate of $0.481/kW-month (Rate Schedule CV–FT1) and a nonfirm transmission rate of 1.022 mills/kWh (Rate Schedule CV–NFT1) for the transmission of non-CVP resources over the CVP transmission systems have been developed. In addition, a transmission rate schedule (Rate Schedule CV–TPT2) that directly passes through all third-party transmission costs incurred by the Western Area Power Administration (Western) in delivery of CVP power to the CVP commercial power customers has been developed.

The rate order contains further explanation of the development of various rates, discussion of the principal factors supporting the decisions concerning the rates, and responses to the major comments and criticisms offered during the consultation and comment period.

EFFECTIVE DATE: The power and transmission rates will become effective on an interim basis on May 1, 1988, the first day of the May 1988 billing period. This effective date is approximately 1 month in advance of the expiration of the existing rates. Implementing the proposed rates in advance is considered appropriate because the rate proposal represents a rate reduction on an average system basis, and would meet the financial requirements of the CVP.

FOR FURTHER INFORMATION CONTACT:

Mr. David G. Coleman, Area Manager, Western Area Power Administration, Sacramento Area Office, 1825 Bell Street, Suite 105, Sacramento, CA 95825, (916) 978–4418.

or

Mr. Conrad Miller, Chief, Rates and Statistics Branch, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401, (303) 231–1535

or

Mr. Ronald K. Greenhalgh, Assistant Administrator for Washington Liaison, Western Area Power Administration, Room 8G061, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–5581.

SUPPLEMENTARY INFORMATION: By Amendment No. 1 to Delegation Order No. 0204–108, effective May 30, 1986 (51 FR 19744, May 30, 1986), the Secretary of Energy delegated:

1. To the Administrator of Western on a non-exclusive basis the authority to develop power and transmission rates;
2. To the Under Secretary of the Department of Energy on a non-exclusive basis the authority to confirm, approve, and place such rates in effect on an interim basis; and
3. To the Federal Energy Regulatory Commission on an exclusive basis the authority to confirm, approve, and place in effect on a final basis, remand, or disapprove such rates.

Two informal customer briefings were held, on March 24, 1987, and May 26, 1987, to solicit CVP customer input to the Sacramento Area Office staff's early development of the 1988 CVP rates. A formal 113-day public comment and consultation period was initiated on August 4, 1987, with a notice in the **Federal Register** at 52 FR 28864, and terminated November 25, 1987. The August 4, 1987, notice announced a public information forum on August 25, 1987, and a public comment forum on September 22, 1987. On August 25, 1987, a brochure with technical appendices was distributed to all CVP customers and interested parties. The brochure describes CVP operations, the rate development process, the proposed 1988 rates, and data supporting all the major assumptions behind the rate proposal. In addition to the public information and comment forums, Western held an evidentiary hearing on the merits of an automatic revenue adjustment clause proposed as part of the 1988 CVP power rates. The notice of the evidentiary hearing was published on October 7, 1987, in the **Federal Register** at 52 FR 37509. The hearing convened on November 10, 1987. This hearing was conducted in accordance with the requirements of the Public Utility Regulatory Policies Act, 16 U.S.C. 2612, *et seq.* Written comments on all aspects of the proposed power and transmission rate adjustments were accepted through November 25, 1987. Public comments received have been considered in the preparation of the rate order.

Rate Order No. WAPA–38 confirming and approving the power and transmission rates on an interim basis is hereby issued, and the rates will be promptly submitted to the Federal Energy Regulatory Commission for confirmation and approval on a final basis.

Issued at Washington, DC, March 2, 1988.

Joseph F. Salgado,
Under Secretary.

[Rate Order No. WAPA–38]

Order Confirming, Approving, and Placing Power and Transmission Rates in Effect on an Interim Basis

Pursuant to section 302(a) of the Department of Energy (DOE) Organization Act, 42 U.S.C. 7101 *et seq.*, the power marketing functions of the Secretary of the Interior and the Bureau of Reclamation (Reclamation) under the Reclamation Act of 1902, 43 U.S.C. 371 *et seq.*, as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Act of 1939, 43 U.S.C. 485h(c), and acts specifically applicable to the Central Valley Project (CVP), were transferred to and vested in the Secretary of Energy. By Amendment No. 1 to Delegation Order No. 0204–108, effective May 30, 1986 (51 FR 19744, May 30, 1986), the Secretary of Energy delegated: (1) the authority on a non-exclusive basis to develop power and transmission rates to the Administrator of the Western Area Power Administration (Administrator); (2) the authority on a non-exclusive basis to confirm, approve, and place such rates in effect on an interim basis to the Under Secretary of the Department of Energy (Under Secretary); and (3) the authority on an exclusive basis to confirm, approve, and place in effect on a final basis, remand, or disapprove such rates to the Federal Energy Regulatory Commission (FERC). This rate order is issued pursuant to such delegations to the Administrator and the Under Secretary, and the Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions for the Alaska Power Administration, Southeastern Power Administration, Southwestern Power Administration, and Western Area Power Administration (Western) at 10 CFR Part 903, published at 50 FR 37835 on September 18, 1985, with corrections published at 50 FR 48075, November 21, 1985.

Background

Project History

Located in northern and central California, the CVP consists of eight powerplants, two pump-generation plants, and approximately 1,300 miles of transmission lines integrated with the Pacific Gas and Electric Company's (PGandE) electric power system.

The initial features of the CVP, authorized in 1935 for construction by Reclamation, included:

1. Shasta Dam on the Sacramento River and Friant Dam on the San Joaquin River;
2. Tracy Pumping Plant and the Delta-Mendota Canal;
3. Powerplants at Shasta Dam and at Keswick Dam below Shasta Dam with powerlines to bring the power generated to the Tracy pumps and to integrate that power into other electric systems;
4. The Contra Costa Canal, the Friant-Kern Canal, and the Madera Canal;
5. The Delta Cross Channel.

Shasta Dam began storing water in January 1944; by 1951 the project had become fully operational. To help meet the expanding needs in the Central Valley, in 1944 Congress authorized the American River Division to be constructed by the Corps of Engineers and in 1949 reauthorized it to be integrated with the Central Valley Project. This division included Folsom Dam and Powerplant, Nimbus Dam and Powerplant, and the Sly Park Unit. The Sacramento Canals Unit was authorized in 1950. The Grasslands Waterfowl Management Area in the San Joaquin Valley was authorized in 1954. The Trinity River Division, including Trinity Dam and Powerplant, Lewiston Dam and Powerplant, Lewiston Fish Facilities, Whiskeytown Dam, Judge Francis Carr Powerhouse, and Spring Creek Powerplant, was authorized in 1955. The San Luis Unit, including San Luis Dam and Reservoir, San Luis Canal, Pleasant Valley Canal, and the O'Neill and San Luis pump-generators, was authorized in 1960. The Auburn-Folsom South Unit was authorized in 1965. The only portions of this unit which have been constructed are the Foresthill Dam and Reservoir and the first reaches of the Folsom South Canal. The San Felipe Division was authorized in 1967.

Another significant addition was the authorization, in 1964, of the 500-kV Pacific Northwest-Pacific Southwest Intertie (Intertie) of which the CVP has the right to use 400 MW of transmission capacity to import power from the Pacific Northwest.

The Corps of Engineers constructed the New Melones Dam, Reservoir, and Powerplant, completing the construction in 1980. In compliance with the 1962 authorization act, New Melones is now operationally and financially integrated into the CVP. Three additional projects, Hidden, Buchanan, and Black Butte, have been constructed by the Corps, then integrated in the CVP. These three projects serve mainly the water supply and flood control functions and have no Federally owned power facilities.

Power generated from the CVP system is dedicated first to meeting the power requirements of the project pumping facilities. The remaining capability of the project's power facilities is used to provide commercial power to various preference customers in northern California. These customers consist of military and Federal installations, irrigation and reclamation districts, cooperatives, utility districts, municipalities, and educational and penal institutions of the State of California.

The existing powerplants and two pump-generation plants, with a total maximum operating capability of about 2,025 MW, are integrated operationally with PGandE's power system.

The amount of commercial firm load which can be supplied at present by CVP generation alone is significantly less than the current customer load level. In 1951, Reclamation entered into a support contract with PGandE which greatly increased the commercial load serving ability of the project. In 1967, that contract was amended and consolidated with a transmission contract into the present Contract No. 14-06-200-2948A (Contract 2948A). This contract provides that energy and capacity generated by the CVP, along with power imported from the Pacific Northwest over the Intertie, in excess of CVP obligations to preference customers, may be sold to PGandE. The contract also provides Western the right to purchase an equivalent amount of capacity and energy from PGandE at times and in amounts required when the CVP's power supply is insufficient to meet the CVP obligations to the preference customers. The energy and capacity available under this "banking arrangement" permit the CVP to supply a much greater amount of customer load than would be possible without benefits of such coordination.

The contract provides that PGandE, with the Intertie arrangements, will provide support to enable the CVP to supply a simultaneous customer peak demand up to a maximum level of 1,152 MW through CY 2004.

Public Notice, Forums, and Hearings

The procedures for public participation for rate adjustments as set forth in 10 CFR Part 902 have been followed in the development of these rates. The following discussion summarizes the steps Western has taken to assure the involvement of interested parties in the rate process:

1. On January 30, 1987, Western issued an "Announcement of Central Valley Project Rate Adjustment" to all CVP customers. This announcement notified CVP customers of Western's desire to initiate informal customer meetings to discuss a proposed rate adjustment.

2. Western issued an "Announcement of the First Informal Customer Meeting Regarding the Central Valley Project Rate Adjustment" on February 26, 1987. This first informal customer meeting was held on March 24, 1987. The status of CVP repayment, general rate design, options, and CVP load and expense forecasts were discussed.

3. On May 6, 1987, Western issued a notice of its second informal customer meeting. At this meeting, held on May 26, 1987, the focus was onforecasted CVP revenue requirements, proposed alternative power rate designs, and proposed revenue and power factor adjustment clauses.

4. On June 30, 1987, a schedule of major events for the rate proceedings and Western's preliminary proposal for the transmission rate adjustments were issued.

5. A **Federal Register** notice (52 FR 28864, August 4, 1987) initinted the formal public proceedings, officially anounced the proposed power and transmission rate adjustments, and began the 113-day consultation and comment period.

6. On August 7, 1987, all parties were issued a notice containing the August 4, 1987, **Federal Register** notice and the schedule for the public comment and information forums.

7. A public information forum was held on August 25, 1987. Western representatives presented an overview of the proposed rates and the supporting assumptions, methods, forecasts, and potential impacts associated with the rate proposal. In addition, Western distributed a "Central Valley Project 1988 Proposed Power and Transmission Rate Adjustments" brochure that contained nine technical appendices including supporting demand forecasts, the revised power repayment study, and explanations of various rate design methodologies and calculations.

8. On September 8, 1987, a notice was issued informing all CVP and interested parties of the time, procedures, and agenda for the public comment forum.

9. The public comment forum was held on September 22, 1987. Only two participants commented at this forum. Responses to these comments, as well as those received in writing during the consultation and comment period, are presented in the "Discussion" section of this document.

10. On October 7, 1987, a **Federal Register** was issued (52 FR 37509) noticing the schedule and procedures for a pre-hearing conference and evidentiary hearing regarding the Revenue Adjustment Clause (RAC) proposed as part of the 1988 CVP power rates. This evidentiary hearing was scheduled in accordance with the Public Utility Regulatory Policies Act.

11. A copy of the October 7, 1987, **Federal Register** notice and the procedures for intervention or other participation in the RAC hearing were distributed (without cover letter) on October 9, 1987.

12. As an attachment to a notice issued by Western on October 14, 1987, Western distributed direct testimony regarding the design, application, and merits of the proposed RAC.

13. On November 4, 1987, a pre-hearing conference was held as noticed by the October 7, 1987 **Federal Register** notice.

14. On November 10, 1987, the RAC evidentiary hearing was held. Western staff issued supplemental testimony regarding the RAC at this hearing based on questions raised at the pre-hearing conference.

15. On November 25, 1987, Western issued a proposed schedule for completion of the 1988 CVP Rate Adjustment process as well as copies of the supplemental RAC testimony.

Certification of Rates

Western markets capacity and energy from the CVP and provides transmission services over the CVP transmission system at the lowest possible rates consistent with sound business principles. The Administrator has certified that the proposed CVP power and transmission rates are the lowest possible consistent with sound business principles and applicable law.

Discussion

This section addresses the issues presented by commentors and Western's responses to those comments. The issues are arranged by topic as follows:

A. Revenue Adjustment Clause Design and Application.

B. Power Factor Adjustment Clause (PFAC) Design and Application.

C. Power Rate Design.

D. Transmission Rate Design.

E. Treatment of Losses in Power Rate "Unbundling."

F. Timing of Rate Implementation and Step Increases.

G. Purchased Power Expense Assumptions.

A. Revenue Adjustment Clause Design and Application

Issue: Several comments were received on the RAC's design and application throughout the public consultation and comment period. However, at the evidentiary hearing regarding the merit of the proposed RAC that was held on November 10, 1987, only one comment was received. Western's direct testimony addressed previous comments and is contained as part of the Record of Decision. The one comment received requested that the RAC consider revenue from surplus power sales as part of its basic RAC formula.

Response: Western's response to the one comment raised in the RAC hearing is contained in the supplemental testimony question and response number 31, issued to all interested parties on November 25, 1987, which is

also part of the Record of Decision. As a result of Western's response to this issue in the supplemental testimony, the commentors (the Northern California Power Agency and the Sacramento Municipal Utility District) issued a letter to David G. Coleman dated December 16, 1987, stating:

> We are willing to accommodate the suggested rates using the RAC formula proposed by Western. However, it is our intention to monitor the working results of the RAC closely during the upcoming rate period.

B. Power Factor Adjustment Clause (PFAC) Design and Application

1. *Issue:* Western's PFAC originally proposed that a combination of two types of power factor measurements be used to measure a customer's monthly power factor performance. One of these measurements was the power factor at the time of the customer's system peak demand and the other was the customer's average monthly power factor. The measurement that has been used typically for power factor adjustment clauses has been the measurement at the time of the system peak. Certain customers commented that it would be burdensome to maintain a high average system power factor.

Response: Western has modified its original proposal to eliminate the requirement to consider the average monthly power factor measurement. However, Western recognizes that low power factors at times other then peak periods can contribute to system inefficiency and losses, and therefore may reconsider this decision based on future experience.

2. *Issue:* Some parties expressed concern that their points of delivery for CVP power are contractually defined and are not actual physically metered points, and therefore, it is not possible to measure power factor at those points.

Response: Western's power factor proposal, as defined to customers at the August 25, 1987, customer information forum, stated that the PFAC will not apply to points of measurement without continuous volt-amperes reactive metering.

3. *Issue:* Several commentors stated that either the 95-percent power factor standard was too high; or that revenue credits ought to be provided to CVP customers for power factors maintained above 95 percent.

Response: Western is required by Article 26 of its "Sale, Interchange, and Transmission Agreement" (Contract 2948A) with PGandE to maintain, and to require its customers to maintain, a 95-percent factor. Western based its power factor penalty on a study it performed on the average expense for power factor correction for CVP commercial power customers. The intent of the proposed PFAC is for Western to meet its contractual obligation to PGandE to improve the system efficiency and performance, and to reduce losses by encouraging its customers' compliance, using a penalty that represents a slightly higher cost to customers than if they were to install the actual corrective equipment. Western's intent is not to provide any economic advantage to customers that may make the decision to improve power factor above 95 percent. Western expects that such decision would be made based on each customer's internal cost-benefit analysis. In addition, because of the 1-year grace period proposed by Western prior to the implementation of the PFAC Penalty, Western has assumed no revenue from this program for ratemaking purposes. If revenue is realized (and all other assumptions remain the same), then such revenue would repay CVP investment beyond required levels in that year. Therefore, CVP customers that are in compliance could realize a future rate benefit (although it is likely to be small) if a customer is burdening the system with a poor power factor.

C. Power Rate Design

1. *Issue:* Western proposed two power rate designs for review and comment by CVP customers. Both of the proposed options differed from the current rate design. One rate design was developed to have all fixed annual costs recovered by the capacity rate component and variable annual costs recovered by the energy rate component. This rate design was referred to as the "fixed/variable" rate design option. The second rate design was established to recover 50 percent of the annual CVP costs by both the capacity and the energy rate components (referred to as the "50/50" design option). Ten comments were received on the power design option, five supported the fixed/variable design, four supported the 50/50 design, and one supported the current rate design. The comment in support of the current rate design was that Western had not met its "burden of proof" of demonstrating that the current rate design was inappropriate, and therefore should not change its present power rate design.

Response: The two rate design options were developed to consider conventional utility rate design (i.e., the fixed/variable option) and the typical design of Western power rates (i.e., the 50/50 option). In support of these rate design options, Western's staff produced an analysis that examined the fixed and variable expenses that are required to be recovered by the CVP commercial power rate. This study (see appendix F of the August 25, 1987, customer brochure) did not support the current rate design in that it indicated that the current capacity rate was not sufficient to cover projected CVP fixed annual costs. As a result, Western considered it inappropriate to consider the current rate design as an option.

Western has selected the 50/50 design option as its final rate design for confirmation and approval. This decision was made based upon the fact that the customer comments received on the rate design options did not offer a clear direction as to the preferred option. Only 10 customers commented on the rate design options. There were five customers that preferred the fixed/variable option, four preferred the 50/50 option, and one preferred the current rate design. The fixed/variable option requires the classification of costs as either fixed or variable. The decision on such classifications may be arbitrary and subject to debate. How these costs are classified can lead to very different allocations between energy and capacity rates. The 50/50 option is consistent with Western's historical practice and promotes equity.

2. *Issue:* An additional comment on power rate design was that it is discriminatory to require low-load factor customers to subsidize the purchase of higher cost purchased power for high-load factor customers.

Response: Western does not offer rates on a time-of-use basis. All resources necessary to supply the total commercial power obligation are considered in each kilowatthour and kilowatt of power sale. This results in a homogenous and nondiscriminatory rate structure. Secondly, the generalization that high-load factor customers cause the purchase of energy in excess of CVP generation, while low-load factor customers do not, is inaccurate. CVP generation follows a pattern of high generation in the spring and summer, and low generation in the fall and winter. If a low-load factor customer were to peak significantly and have high loads in a fall or winter month, then a substantial portion of the energy serving such load would likely be from purchased energy.

3. *Issue:* In Western's assessment of the fixed and variable expenses used as the basis for the fixed/variable power rate design proposal, Western considered operation and maintenance expense as a 100 percent variable expense. One commentor objected to this allocation.

Response: Since Western has determined to finalize the CVP power rates based on the 50/50 design option, the issue of the appropriate allocation of operation and maintenance (O&M) expenses between fixed and variable components does not exist. However, this issue was one factor that contributed to the adoption of the 50/50 design option in that Western did not have a clear basis for allocating O&M costs to either the fixed or variable rate components.

D. Transmission Rate Design

Issue: As part of the 1988 rate adjustment announced in the August 4, 1987, **Federal Register** notice, Western proposed two transmission rates for parties desiring to move non-CVP power over the CVP transmission system. These rates were: The CVP firm transmission rate of $0.597/kW-month per kilowatt of transmission capacity specified in the contract at the point of receipt, and the CVP nonfirm transmission rate of 1.27 mills/kWh for each kilowatthour delivered from the CVP transmission system.

One party made the following comments regarding the proposed CVP transmission rate methodology:

a. The amortized annual expense used to calculate the rate was based on a 50-year amortization of the total capital investment in the facilities considered, at a 3-percent interest rate. However, the repayment of the basic (3 percent) CVP investment is ahead of schedule and therefore, the amortized expense under this methodology ought to be reduced accordingly.

b. Some portion of the operation, maintenance, replacement, and capital investment is annually allocated to the project use power customers power and/or water rates and, as such, ought to be removed from the transmission rate culculation.

c. The energy and capacity amounts used to divide into the annual expenses in order to establish the proposed transmission rates should be the CVP commercial power load forecast, the same as are used to set the power rate.

Response: Western performed additional analyses assessing these comments. The point regarding the advance status of the repayment of the CVP basic investment is accurate, and Western has modified its proposed transmission rate design to proportionally reduce the amortized expenses for repayment of investment by considering only the remaining unpaid Federal investment at 3-percent interest through the mandatory repayment date of 2014. The adoption of this comment reduces the proposed CVP nonfirm and firm transmission rates to 1.022 mills/kWh and $0.481/kW-month, respectively.

No other modifications were made to the proposed transmission rate because: (1) The allocation of operation, maintenance, replacement, and investment to project use power customers and/or water rates would not have an impact on the proposed rates if the project use loads were also removed from the energy values used as the divisor to calculate the rates, and (2) the concept of using the CVP preference customer loads as the billing determinants to calculate the rates does not make sense from Western's perspective, since most of the power delivered to customers is not delivered over the CVP transmission system.

E. Treatment of Losses in Power Rate "Unbundling"

Issue: One party commented that although they strongly supported the unbundling of wheeling expenses from the CVP power rates, they felt that Western had failed to properly consider the unbundling of high voltage transmission losses from the capacity and energy rates. This comment is contrasted with another party's comment that all wheeling expenses should be melded with the CVP power rate, and no differentiation should be made for low or high voltage wheeling expenses.

Response: All forecasts of CVP power sales, which are the basis for determining the rates, were made at the points of delivery. Therefore, losses applicable to each customer are taken into consideration in establishing the projected amounts of generation and purchases which are required to serve the customer load. The 1.035 multiplier billing adjustment for low-voltage wheeled customers is consistent with the present practice of surcharging such customers, for the additional power required to meet their demand, due to the fact that low voltage wheeling contractually incurs 8.0-percent losses versus the 4.5-percent losses incurred by high voltage wheeling.
